Dear Bidder:

Welcome to the PNG Dallas Invitational U.S. Coins Signature sale! This is "home turf" for Heritage Auctions, and after a coast-to-coast swing that headlined the record-setting Orlando FUN sale, followed by our annual trip to the West Coast and a busy Long Beach Expo, we are more than ready for a refreshing dose of Dallas hospitality and an enjoyable PNG Invitational event.

We are especially grateful for the participation of more than 140 consignors to the auction, who have provided a wide assortment of intriguing numismatic specialties for your bidding pleasure. Selections range from colonial issues to modern proof rarities, including more than 300 high-value lots in our Premier Session.

We would be remiss to not say a few words about the consignments from our named and pedigreed collections to be offered as part of PNG Dallas. The specialized nature of these two consignments speaks to the strength of the "collector side" of the business, sometimes taken for granted in this time of stunning seven-digit investor coins and one-of-a-kind ultra-rarities.

THE SKIDAWAY ISLAND COLLECTION

We are pleased to present one of the most extensive groups of Lettered Edge Capped Bust half dollars by Overton variety we have ever handled. The collection is 96% complete by die marriage, with 437 of the Overton numbers representing the years 1807 through 1836, plus a number of additional coins that are included by die state.

Most of the collection is presented in the Premier and Signature floor sessions of the Dallas PNG sale. Other coins appear in the fast-paced Online Signature session, and still more coins (more than 100 lots) are found in our Sunday Internet Coin Auction Sale scheduled for February 22, 2015. This is truly a wonderful offering for Bust half collectors – averaging 50.75 in grade – with many rare varieties and Choice original examples in preferred collector grades.

The Skidaway Island Collection is reminiscent of a previous set we handle in 2006 – the incomparable Jules Reiver Collection, which was also focused on circulated, original coins with appealing surfaces and sharp diagnostics for most Overton die pairs.

Our consignor's eye for quality abounds in the sale. For example, the scarce 1812/1 Large 8 half in VF20 NGC displays excellent old-silver surfaces ... an R.5 1818 half, O-112a, grades AU58 NGC and is beautifully toned, a die state that was missing from the Reiver Collection ... and a sought-after 1822/1, O-102 overdate variety (in AU55 NGC) displays lustrous, light patina. These are just three examples of hundreds that will change hands from this remarkable collection. Assembled over a period approaching two decades, such a set is not easy to acquire, and it may be many years before we once again offer a nearly complete a group of Capped Bust halves by Overton number.

The Collection of Philip M. Peterson

Equally impressive is a carefully formed collection of more than 100 federal gold issues and Territorial gold coins and nuggets, as well as select silver and copper type coins from the estate of Philip M. Peterson. A keen understanding of quality and innate appeal is obvious in the numismatic leanings of our consignor, who was a longtime Heritage Auctions client and valued friend. In particular, the Territorial gold pieces are outstanding, ranging from the early Bechtler issues to private minters in the West and U.S. Assay Office gold. Lot 3313 is a rare Miners Bank ten dollar gold piece, infrequently found and missing in most Gold Rush type collections. The federal issues encompass several rare dates and varieties in all denominations, with high-end examples of special interest to dealers and collectors alike. The collection is replete with high-quality Premier Session coins.

Whether you attend the Premier or Floor Sessions, or prefer to participate remotely, bidding is simple both before the auction and during the sale. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform).

While in Dallas, please feel free to stop by our headquarters at 3500 Maple Avenue, where we can assist you with buying, selling, consigning, or just answer questions that you may have.

Good luck and have a great time at the PNG Dallas sale!

SESSION ONE

COLONIALS

1652 Oak Tree Shilling, Choice VF
Noe-5, IN at Bottom

- 3001** 1652 Oak Tree Shilling, IN at Bottom, VF35 PCGS. Noe-5, W-470, Salmon 3-D, R.2. 72.1 gn. A lovely and problem-free silver-gray example, ideal for the Early American type collector. Like most examples of Noe-5, the obverse is moderately off center toward 6 o'clock, though only the tops of IN MA are affected. Noe's sizeable "die break" at 12 o'clock is instead the border of the obverse die. The reverse centering is exemplary. The coin exhibits the S-shaped wave characteristic of rocker press issue, which leads to greater wear on the upper branches than the remaining three-quarters of the tree. Listed on page 39 of the 2015 *Guide Book*. PCGS# 45362 Base PCGS# 20

1652 Pine Tree Shilling, Choice VF
Large Planchet, Noe-10

- 3002** 1652 Pine Tree Shilling, Large Planchet VF35 PCGS. Noe-10, W-750, Salmon 8-Diii, R.3. 70.37 gn. A cream-gray shilling with sharp definition on the date and denomination. Mint clips on the sides give the coin a somewhat oval appearance, but the weight is fairly close to the Large Planchet average of 72 grains. Marks are absent except for a diagonal line near the top of the tree. The S-shape to the flan is customary for the type, as issued by a rocker press. The middle of the tree shows slightly greater wear due to the natural flan wave. The usual die state with flowlines above HV, a "bird's nest" break at the right center of the tree, and a double set of clash marks at 3 o'clock on the reverse. Listed on page 39 of the 2015 *Guide Book*. PCGS# 23

1652 Pine Tree Shilling, Choice XF
No Pellets, Noe-5

- 3003** 1652 Pine Tree Shilling, Large Planchet XF45 PCGS. Noe-5, W-720, Salmon 4-Di, R.4. 71.1 gn. No pellets at trunk. Noe-4 through 6 are from the same die pair, but close examination reveals small legend differences between the varieties, where Boston Mint workers made subtle repairs to the dies. This gently shimmering lavender-gray and apple-green example has pleasing surfaces, a clear tree, and virtually complete legends. Somewhat wavy, as made from a rocker press. Listed on page 39 of the 2015 *Guide Book*. Ex: Orlando FUN Signature (Heritage, 1/2008), lot 8. From The Collection of Philip M. Peterson. PCGS# 23

1652 Pine Tree Shilling, XF40
Small Planchet, Noe-25

- 3004** 1652 Pine Tree Shilling, Small Planchet, XF40 PCGS. Noe-25, W-890, Salmon 8-E, R.5. The legends are fully intact on this attractive silver-gray shilling. The reverse is misaligned slightly toward 3 o'clock, but the obverse centering is nearly perfect. The mildly granular surfaces are nearly unabraded. Listed on page 39 of the 2015 *Guide Book*. Ex: St. Louis Central States (Heritage, 5/2007), lot 14. From The Collection of Philip M. Peterson. PCGS# 24

HALF CENTS

1793 Liberty Cap Half Cent, VF35 Elusive C-1, B-1 Variety

3005 1793 VF35 PCGS. C-1, B-1, High R.3. Manley Die State II. The 1793 Liberty Cap half cent claims a mintage of 35,344 pieces, with four die varieties known for the date. This coin represents the C-1 variety, with a long 7 in the date and a period after the legend on the reverse. The C-1 is the most elusive variety of the date and is usually seen in lower circulated grades, with HALF CENT illegible on the reverse.

This Choice VF specimen retains some interior design detail in the leaves and shows some wear on the hair near the ear and forehead. The smooth planchet is problem-free and the pleasing brown surfaces show a few scattered grade-consistent abrasions. Our EAC grade VF20. Population: 1 in 35, 6 finer (1/15). PCGS# 35003 Base PCGS# 1000

1805 Half Cent, MS64 Brown No Stems, C-1, B-1

3006 1805 No Stems, C-1, B-1, R.1, MS64 Brown NGC. Deep gunmetal-blue and golden-brown toning blankets this lustrous Choice Draped Bust type coin. The strike is good on the portrait and wreath, although Liberty's shoulder shows minor incompleteness. The dentils are softly brought up. Contact is minimal but unimportant mint-made strike-throughs accompany the C in CENT. Our EAC grade AU50. PCGS# 35179 Base PCGS# 1081

LARGE CENTS

1793 Chain Cent, VG Details S-1, AMERI.

3007 1793 Chain, AMERI., S-1, B-1, R.4 — Environmental Damage — NGC Details. VG. The first official product of the United States Mint, the Sheldon-1 cent is the only variety that abbreviates the country name as AMERI, presumably for aesthetic reasons (UNITED and STATES each have five letters). The present unabraded deep olive-brown example is evenly porous. The obverse appears lightly burnished. Our EAC grade AG3.

1793 Chain Cent, VF Details AMERICA, Periods, S-4

3008 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — NGC Details. VF. S-4 is the sole variety with periods after LIBERTY and the date, and thus secures a premium relative to S-3. The present dark brown Sheldon-4 cent has an evenly granular reverse. The obverse is mostly lightly granular but shows moderate pitting near the date and Liberty's neck. Abrasions are essentially absent aside from a small reverse rim nick at 1:30. Our EAC grade VG8.

1793 S-8 Wreath Cent, Fine 15
Vine and Bars Edge, Bold Legends

- 3009** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, Fine 15 NGC. Liberty's profile is sharp and the legends are bold on this ebony-brown Wreath cent. A few hair-thin marks are noted near the U in UNITED and the back of Liberty's cheek, but granularity is minimal and the overall appearance is pleasing. The slender diagonal die crack often seen on S-8 is apparent on the present coin as field buckling near the E in CENT. Our EAC grade VG8. PCGS# 35456 Base PCGS# 1347

1799/8 S-188 Cent, VG Details
Better Variety of Key Date

- 3010** 1799/8 S-188, B-2, R.4 — Damaged — NGC Details. VG. All legends are distinct on this deep olive-gray key date cent. A diagonal mark beneath the ear affirms the NGC notation. The surfaces are evenly microgranular and a minor edge ding is noted at 9 o'clock. A few delicate hair-thin marks are noted on the lower portion of the portrait. Our EAC grade Good 5.

1799 S-189 Cent, Fine Details
Draped Bust Key

- 3011** 1799 S-189, B-3, R.2 — Environmental Damage — NGC Details. Fine. A granular deep brown representative with light obverse pinscratches. The upper two-thirds of the date is sharp. LIBERTY is bold except for the tops of the letters. The reverse legends are clear. The 1799 has long been recognized as the rarest Draped Bust date, especially in better circulated grades. Our EAC grade Good 5.

1803 S-264 Cent, Fine Details
Rare Large Date, Small Fraction

- 3012** 1803 Large Date, Small Fraction, S-264, B-24, High R.4 — Environmental Damage — NGC Details. Fine. S-264 is only 1803 variety that pairs a Large Date obverse and a Small Fraction reverse. Since S-264 is a very scarce *Guide Book* entry, it commands a lofty premium relative to the plentiful Small Date variety. The usual die state with breaks on the upper reverse and Liberty's chest. The medium to deep brown surfaces are nicely defined but granular. The obverse has a moderate rim ding at 5:30 and a pair of minor thin marks near the bust tip. Our EAC grade Good 4.

1807/6 S-272 Cent, Fine 12
Rare Blunt 1 Overdate

- 3013** 1807/6 Blunt 1, S-272, B-2, High R.4, Fine 12 NGC. The *Guide Book* lists five varieties of 1807-dated cents. Four are common, but the Blunt 1 overdate is rare, limited to the elusive Sheldon-272 marriage. This deep gunmetal-gray example has clear legends and substantial hair detail. The surfaces are moderately granular, particularly near STATES, but abrasions are few and generally inconsequential. Our EAC grade VG7. PCGS# 36439 Base PCGS# 1525

FLYING EAGLE CENT

1858 Flying Eagle Cent, MS66+
Only One Finer Coin at PCGS

3014 1858 Large Letters, High Leaves MS66+ PCGS. CAC. High Leaves Reverse, Closed E in ONE. The High Leaves Reverse was used early in the year and follows the style used in 1856 and 1857. The elements were in fairly high relief, which probably caused striking problems and reduced die life, prompting the change to the lower relief Low Leaves design later in the year. The Closed E coins used the denomination punches from 1857.

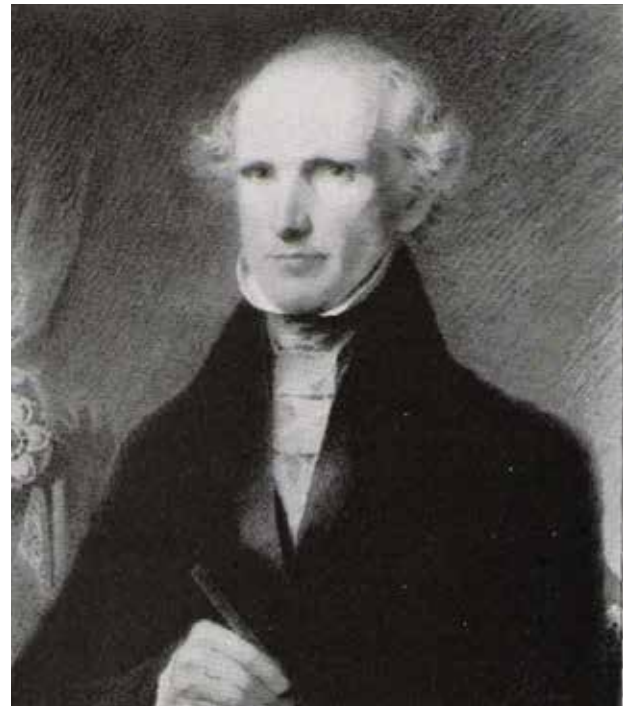

This high-end Premium Gem exhibits pinpoint detail on all design elements and the original red surfaces radiate vibrant mint luster on both sides. A die crack shows on the obverse from the rim at 5 o'clock to the eagle's tail. Population: 28 in 66 (1 in 66+), 1 finer (1/15). NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENTS

1857 Flying Eagle Cent, PR61
Snow PR-1

3015 1857 PR61 PCGS. Snow PR-1. Three proof varieties are known for the 1857 Flying Eagle cents, perhaps a little surprising given Rick Snow's mintage estimate of just 50 pieces. This pleasing example has exceptional eye appeal for the grade, despite a few faint hairlines and contact marks. The strike is bold and the mirrors are deep, with lovely golden-tan surfaces and pale blue toning. NGC ID# 227B, PCGS# 2040

James B. Longacre, Chief Engraver

**1858 Flying Eagle Cent, PR66
Sole-Finest at PCGS**

3016 1858 Large Letters, High Leaves, PR66 PCGS. Snow PR1. Based on the number of silver proof sets issued (80), and a small number of pattern sets that contained an example of the cent in 1858 (approximately 20), experts believe about 100 proof Large Letters Flying Eagle cents were struck in 1858. The obverse employed the Large Letters design, easily recognized by the position of AM in AMERICA joined at the base, and a High Leaves reverse of the type used in 1856 and 1857. PCGS CoinFacts estimates about 50 examples survive today in all grades. Some proofs of the Small Letters design were struck later in the year.

The present coin is a magnificent Premium Gem proof, with razor-sharp definition on all design elements and deeply mirrored fields that create a modest degree of contrast. The impeccably preserved surfaces show an attractive mix of copper-red and lilac patina with outstanding eye appeal. As the finest example graded at PCGS, this coin should find a home in the finest collection or Registry Set. Population: 1 in 66, 0 finer (1/15). NGC ID# 227C, PCGS# 2042

INDIAN CENTS

**1872 Cent, MS64 Red
Low-Mintage Semikey**

3017 1872 MS64 Red PCGS. CAC. Bold N. A splendid orange-gold Choice semikey cent. The strike is good and cartwheel luster abounds. A couple of pinpoint flecks emerge beneath a loupe, and minor contact is noted on the shoulder curl and chin. The lower loop of the 8 in the date is repunched, a variety unlisted in Rick Snow's recently published third edition. NGC ID# 227W, PCGS# 2105

**1908 Indian Cent, MS66+ Red
Incredibly Eye-Appealing**

3018 1908 MS66+ Red PCGS. CAC. Frosty mint bloom in rich shades of rose and coppery-red encompass nearly flawless surfaces on each side of this boldly struck, Plus-graded Premium Gem. A lack of perceptible carbon spotting only increases the already immense visual appeal. Population: 53 in 66 (2 in 66+) Red, 1 finer (1/15). NGC ID# 2295, PCGS# 2231

LINCOLN CENTS

1909-S VDB Lincoln Cent, MS66 Red and Brown Among the Finest Coins at PCGS

- 3019 1909-S VDB MS66 Red and Brown PCGS.** A thoroughly lustrous and pinpoint-sharp representative of this eternally popular series key. Fire-red and orange shades dominate, and only a hint of violet near the borders denies full red status. The unmarked and nearly carbon-free example will please even the jaded specialist. Population: 37 in 66 Red and Brown, 0 finer (1/15).
Ex: Dallas Signature (Heritage, 11/2006), lot 170.
From The Collection of Philip M. Peterson. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65+ Red Widely Sought Key Issue

- 3020 1909-S VDB MS65+ Red PCGS. CAC.** A wonderful Red Gem example of this famous cent variety, the "Holy Grail" for the millions of young collectors in the 1950s and 1960s filling Whitman folders from pocket change or paper route payments. The lustrous peach-gold and olive surfaces lack marks or spots. The strike is full, even on the VDB initials. Certified in a green label holder.
Ex: FUN Signature (Heritage, 1/2010), lot 298; Central States Signature (Heritage, 4-5/2010), lot 219. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS66 Red Capstone Issue in the Series

- 3021 1909-S VDB MS66 Red PCGS.** Arguably one of the most well-recognized issues in American numismatics, the 1909-S VDB sustains ever-strong demand from collectors of all sorts. This amazing Premium Gem features glowing luster and warm amber-red coloration. A small area of lighter toning occurs in the left obverse field. The designer's famous initials are clearly visible on the lower reverse, and all other motifs are equally sharp. The surfaces lack any mentionable abrasions. PCGS reports only 11 Red coins in higher numeric grades (1/15). NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS66 Red Luminous Surfaces

- 3022 1909-S VDB MS66 Red PCGS.** Dies for the new Lincoln cent were sent to the San Francisco Mint on June 22, 1909. Between late July and the suspension of production on August 5, the West Coast branch mint struck 484,000 1909-S VDB cents. Soon after the coins were released on August 2, the press began printing articles quoting so-called experts, typical of the yellow journalism of the era, stating that designer Victor David Brenner's prominent initials on the lower reverse were akin to advertisement and were therefore illegal. From a judicial standpoint, such was not the case, but the uproar led to the removal of the initials soon thereafter.

This well-preserved Premium Gem exhibits softly frosted mint luster over amber-red surfaces. Lincoln's portrait details are boldly rendered, as are the wheat sheaves and designer's initials. Carbon is minimal, and a few small ticks scattered over each side likely preclude an even higher grade. PCGS has certified only 11 submissions in higher numeric grades (1/15). NGC ID# 22B2, PCGS# 2428

1915-S Cent, MS65 Red
Conditionally Rare S-Mint Coin

- 3023 1915-S MS65 Red PCGS. CAC.** A better date in the series, the 1915-S enjoys a relatively small production of 4.8 million coins. Comparing it with Philadelphia's 29 million-coin mintage or Denver's 22 million-coin total puts the scarcity of the S-mint issue into perspective. Additionally, most examples quickly acquired a darker patina, meaning full Red pieces like this are rare. The copper-orange surfaces feature sharply struck motifs, save for the O in ONE, with an area of lighter toning at the upper left obverse. Population: 28 in 65 (1 in 65+) Red, 5 finer (1/15). NGC ID# 22BM, PCGS# 2485

1922 No D Lincoln Cent, MS63 Brown
Weak Reverse Example

- 3024 1922 No D Weak Reverse MS63 Brown NGC. Die Pair 3.** No Lincoln cents were struck at the Philadelphia Mint in 1922, but some of the 7.1 million coins struck at the Denver facility that year appear to lack the D mintmark, creating much confusion for early collectors of this popular series. Three varieties of the No D Lincoln cent are recognized today and all are scarce -to-rare in all grades. This coin represents the No D, Weak Reverse type from Die Pair 3, characterized by severely worn obverse and reverse dies. Die Pair 1 coins were also struck from worn dies, but the reverse of that pair shows a die crack from the L in PLURIBUS through the O in ONE. The mintmark was apparently filled by grease, or some other foreign matter, when these coins were struck, and no trace of the mintmark is evident on this example. Later in the striking process, some of the material that was obstructing the mintmark fell out, creating coins with a Weak D mintmark to further confuse the issue.

The present coin is an impressive Select example with the incomplete detail always seen on this issue, due to the worn dies. The glossy brown surfaces retain traces of original red and a few highlights of lilac, with bright luster under the patina. Occasional specks of carbon are visible on close inspection, but only minor signs of contact are evident. This coin was not certified as a Weak Reverse variety by NGC, perhaps being submitted before the grading services distinguished between the Weak and Strong Reverse varieties. Currently, NGC has not graded any MS63 Brown examples of the Weak D variety, and only one coin finer (1/15). PCGS# 2540

1941 Cent, MS66 Red
FS-102, Doubled Die Obverse

- 3025** 1941 Doubled Die Obverse, FS-102, MS66 Red PCGS. This variety displays broad doubling on IN GOD WE TRUST and on the 4 in the date. Each side of this example exhibits fiery-red coloration with emanating luster throughout. The strike shows strong detail and magnification reveals only a handful of well-hidden marks that do not detract. Population: 19 in 66 (1 in 66+) Red, 0 finer (1/15). PCGS# 37783 Base PCGS# 92695

THREE CENT SILVER

1851-O Three Cent Silver, MS66
Among the Finest at PCGS

- 3026** 1851-O MS66 PCGS Secure. The 1851-O three cent silver is somewhat of a numismatic orphan — the only branch mint issue in the entire series and the only moderately elusive Type One issue. The New Orleans Mint struck just 720,000 pieces (compared to nearly 5.5 million at Philadelphia), and the issue is appropriately challenging in Gem and finer grades. This Premium Gem example displays hints of lavender and gold toning over thickly frosted, carefully preserved surfaces. As is expected for the issue, some lightness of strike is noted on the central design elements, but the overall quality is outstanding for the date. Population: 26 in 66 (1 in 66+), 0 finer (1/15). NGC ID# 22YY, PCGS# 3665

1851-O Three Cent Silver, MS66
First-Year Branch Mint Issue

- 3027** 1851-O MS66 PCGS. CAC. Dappled shades of green, gray, and amber toning blanket the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed and the mint luster is somewhat subdued by the patina. From a mintage of 720,000 pieces. Population: 26 in 66 (1 in 66+), 0 finer (1/15). NGC ID# 22YY, PCGS# 3665

1855 Three Cent Silver, MS66
Vibrant Luster, Vivid Toning

- 3028** 1855 MS66 PCGS. CAC. This better date is seen here in exceptionally attractive, high-grade condition. The fields are bright and shimmer with intense, semiprooflike intensity. This is noteworthy on this coin, not only because of the brightness of the lustrous flash, but also because of the deep blue, rose, and charcoal-gray patina splashed across each side. Such deep coloration would greatly subdue less-lustrous coins, but here it has no dampening effect. The surfaces are die clashed, as always, yet free from any troubling abrasions. A bit of softness appears around the peripheries, the closest we can find to a defect. Population: 8 in 66, 1 finer (1/15). *Ex: Andre Dawson Collection / Long Beach Signature (Heritage, 9/1998), lot 5738.* NGC ID# 22Z4, PCGS# 3671

1872 Three Cent Silver, MS67
None Numerically Finer at PCGS

3029 1872 MS67 PCGS. CAC. The three cent silver denomination was clearly obsolete by 1872, being largely replaced in the channels of commerce by its nickel counterpart. A minuscule mintage of 1,000 business-strike examples was accomplished at the Philadelphia Mint in 1872, the last time the coins were produced in regular-issue format, making the date scarce-to-rare in all grades. After a small proof mintage the following year, the silver three cent piece was cancelled.

The present coin is a spectacular Superb Gem, one of the finest-certified survivors. The design elements are well-detailed and the surfaces are impeccably preserved. The fields show prooflike reflectivity throughout and the terrific eye appeal is enhanced by attractive shades of golden-brown, cerulean-blue, and lavender toning. Population: 2 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 22ZN, PCGS# 3693

PROOF THREE CENT SILVER

1869/8 Three Cent Silver, PR67+
Superb Eye Appeal and Technical Quality

3030 1869/8 PR67+ PCGS. CAC. RPD-001. Ex: Legend Collection. Walter Breen originally listed this variety as an overdate in his *Proof Encyclopedia*, and it is recognized as such by PCGS. However, Kevin Flynn, in his *Authoritative Reference on Three Cent Silver Coins*, refutes its status as an overdate, revealing that the curvature of the underlying digit beneath the 9 and the recutting on the adjacent 6 more accurately represent a repunched date, and not an 1869/8 overdate, as previously thought. Still, this is an interesting variety, unlisted in the *Cherrypickers'* reference and not counted among those listed under NGC's VarietyPlus service.

PCGS lists this example as the sole finest non-Cameo representative by more than three grade points of the so-called 1869/8 variety, and among normal date pieces it still ranks as the only Plus-designated non-Cameo PR67 coin at that service, with none numerically finer (1/15). The design elements are fully defined, and the fields showcase deep reflectivity. Beautiful violet and ocean-blue peripheral toning yields to warm golden hues on the reverse, while the obverse is more evenly colored in vivid aquamarine patina. A remarkable coin in terms of both the variety and the issue in general. NGC ID# 22ZR, PCGS# 3720

SHIELD NICKEL

1870 Shield Nickel, MS66
Among the Finest Certified at PCGS

3031 1870 MS66 PCGS. CAC. From a business-strike mintage of 4.8 million pieces, the 1870 Shield nickel is a challenging date in high grade. This delightful Premium Gem displays sharply detailed design elements and a network of interesting die cracks on both sides. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. Population: 12 in 66, 0 finer (1/15). NGC ID# 22P4, PCGS# 3797

3032 No Lot

PROOF SHIELD NICKEL

1874 Shield Nickel, PR67 Cameo
Tied for Finest at PCGS

3033 1874 PR67 Cameo PCGS. The 2015 *Guide Book* lists the mintage of 1874 proof Shield nickels as 700+ pieces and this spectacular Superb Gem is one of the finest survivors. The design elements are sharply detailed in most areas, but one star and the letters in the legend at 4 o'clock are a little soft. This localized softness is seen on many examples of this issue and was caused by grease, or some other foreign matter, partially filling the recesses in the die. Both letters and stars show signs of recutting. The frosty devices contrast boldly with the reflective fields and the surfaces are impeccably preserved. Population: 3 in 67 Cameo, 0 finer (1/15). PCGS# 83828

LIBERTY NICKEL

1885 Liberty Nickel, MS66
Sought-After Key Date

3034 1885 MS66 PCGS. From a low mintage of 1.4 million pieces, the 1885 Liberty nickel was ignored by contemporary collectors, who usually just updated their collections by purchasing proofs from the Philadelphia Mint each year. As a result, few high-quality examples were saved and the 1885 is the business-strike key to the Liberty nickel series.

The present coin is a remarkable Premium Gem, with well-detailed design elements and vibrant mint luster on both sides. Some interesting spidery die cracks show in the legends and stars and the well-preserved surfaces display shades of pale gold toning. Population: 25 in 66 (2 in 66+), 3 finer (1/15). NGC ID# 2773, PCGS# 3846

PROOF LIBERTY NICKELS

1893 Liberty Nickel, PR67 Deep Cameo
None Numerically Finer at PCGS

3035 1893 PR67 Deep Cameo PCGS. A fairly low mintage of 2,195 proof Liberty nickels was accomplished in 1893, and examples in Superb Gem condition, with the Deep Cameo designation, are extremely rare today. This magnificent Superb Gem exhibits razor-sharp definition on all design elements, with complete star radials and distinct kernels in the ears of corn. The fields are deeply mirrored and contrast profoundly with the richly frosted devices to create a stunning cameo effect when the coin is tilted in the light. The well-preserved surfaces show a few highlights of pale gold toning and eye appeal is tremendous. Population: 3 in 67 (1 in 67+) Deep Cameo, 0 finer (1/15). PCGS# 93891

1912 Liberty Nickel, PR67 Cameo
Deeply Mirrored Fields

3036 1912 PR67 Cameo PCGS. CAC. Essentially brilliant with dazzling mirrored reflectivity and a surprising degree of contrast for this final-year issue. One would have to look long and hard to locate a comparable 1912 proof nickel. Population: 7 in 67 Cameo, 0 finer (1/15).

Ex: Long Beach Signature (Heritage, 6/2005), lot 5610; Long Beach Signature (Heritage, 2/2006), lot 569. PCGS# 83910

BUFFALO NICKELS

1916 Buffalo Nickel, MS67
Sharply Struck and Lustrous

3037 1916 MS67 PCGS. A spectacular Superb Gem example of this popular early series date, with sharply detailed design elements and vibrant mint luster on both sides. The impeccably preserved surfaces show delicate hints of ice-blue toning with outstanding eye appeal. Population: 21 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 22RA, PCGS# 3930

1918/7-D Nickel, AU58
Pleasing, Problem-Free Surfaces

3038 1918/7-D FS-101 AU58 PCGS. CAC. The diagonal of the 7 is straight, and two "ears" show on each side of the upper portion of the 8. This is the major overdate among Buffalo nickel issues and arguably the key to the entire series. As a result, demand is perennially strong for examples across all grade levels. The variety results from two different hubs used to prepare the die, which was first struck with a 1917-dated hub, annealed, and subsequently impressed with a hub dated 1918. The employment of insufficiently skilled laborers at the Mint during the war years is usually given as the reason this and other contemporary overdate issues were produced. This is an exceptionally attractive coin with significant satiny mint luster evident beneath the even golden patina that covers each side. Problem-free surfaces. PCGS# 38446 Base PCGS# 3939

1918-S Nickel, MS65
Elusive and In-Demand

- 3039 1918-S MS65 NGC.** Specialists have long recognized the 1918-S as the rarer of the two mintmarked issues from this year. It is rarely seen with complete definition on each side. This piece shows well above-average sharpness on the reverse, while the obverse is typically a bit soft on the Indian's hair above the knot. Bright mint frost covers each side with an overlay of attractive pale champagne-gold and ice-blue patina. Just a couple of minor bagmarks are seen, none worthy of singular mention. The "beard" clash mark below the Indian's chin is from the motto on the reverse, an interesting foible seen on several early S-mint Buffalo issues. An elusive and in-demand Gem. Census: 17 in 65, 2 finer (1/15). Ex: *FUN Signature* (Heritage, 1/2009), lot 3644. NGC ID# 22RK, PCGS# 3940

1920 Buffalo Nickel, MS67
None Finer at PCGS

- 3040 1920 MS67 PCGS.** Produced in large numbers, the 1920 Buffalo nickel is still a condition rarity at the MS67 level. This remarkable Superb Gem offers pinpoint definition on all design elements and vibrant mint luster throughout. No mentionable surfaces flaws are evident and attractive shades of champagne-gold toning enhance the terrific eye appeal. Population: 11 in 67, 0 finer (1/15). NGC ID# 22RP, PCGS# 3944

1934-D Nickel, MS66
Among the Finest at Both Services

- 3041 1934-D MS66 PCGS. CAC.** The 1934-D marks the resumption of Buffalo nickel production at the Denver Mint for the first time since 1929. Nearly 7.5 million coins were struck, yet Premium Gems such as this are very scarce, and neither PCGS nor NGC report a single submission numerically finer (1/15). Satin luster radiates over surfaces that show pale lavender, aqua-blue, and peach colors. This coin is a pleasing exception to the issue's propensity for weak strikes, with above-average definition on the bison's head and shoulder. NGC ID# 22SM, PCGS# 3973

1937-D Three Legged Nickel, MS63

- 3042 1937-D Three-Legged, FS-901, MS63 PCGS.** Tan-brown toning embraces this satiny and well preserved Three-Legged nickel. Nicely struck and desirable. All diagnostics of the popular variety are readily apparent. Without supporting evidence, Walter Breen (1988) assigns the excessive die lapping error to obscure Mint employee Mr. Young. PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel
Attractive Near-Gem Example

- 3043 1937-D Three-Legged, FS-901, MS64 PCGS.** One of the transcendent coins in all of numismatics, a set-defining coin as opposed to a mere curiosity, and a coin that attracts attention from collectors and non-collectors alike with equal fervor. This near-Gem example is remarkably sharp for the variety, with a bold strike and the Three-Legged feature pronounced. Soft, satiny luster glows from the unmarked, appealing lilac-gray surfaces. Both the Indian and the bison are far above-average for the issue. PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS64+
Lustrous and Well-Struck**

- 3044** 1937-D Three-Legged, FS-901, MS64+ PCGS. CAC. Perhaps the best known lapped die variety in numismatics, along with the 1922 No D cent. Overenthusiastic die polishing at the Mint removed much of the bison's right front leg. The granular back leg, and the trail of minute die lumps beneath the bison's leg, provide further diagnostics for FS-901. The typical example grades XF, but the present coin is a near-Gem with dynamic luster and wisps of straw-gold and pale blue toning. The strike definition is much stronger than usually seen with good details on the Indian's hair and over the bison's horn. PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKEL

**1914 Buffalo Nickel, PR67
Fully Struck With Matte Surfaces**

- 3045** 1914 PR67 PCGS. CAC. This remarkable Superb Gem exhibits razor-sharp definition on all design elements, and impeccably preserved surfaces with strong matte luster and delicate shades of ice-blue toning. From a small proof mintage of 1,275 pieces. Population: 82 in 67 (5 in 67+), 11 finer (1/15). NGC ID# 278T, PCGS# 3991

JEFFERSON NICKELS

**1945-S Jefferson Nickel, MS67 Full Steps
Tied for Finest Certified, Blazing Silver Luster**

- 3046** 1945-S MS67 Full Steps PCGS. A well-known condition rarity among Jefferson nickel collectors, this Wartime nickel is one of the challenging San Francisco issues of the series, especially with Five Full Steps. While the brilliant silver luster and vibrant, frosted surfaces of this Superb Gem command first attention, the overall technical quality is undeniable. The strike is far bolder than most, and the Full Steps designation is well-deserved. A light abrasion on the forehead is the only deterrent from an even higher grade. Population: 6 in 67 Full Steps, 0 finer (1/15). NGC ID# 22TZ, PCGS# 84027

**1948-S Nickel, Rare MS67 Full Steps
Tied With Two Others for Finest at PCGS**

- 3047** 1948-S MS67 Full Steps PCGS. Essentially brilliant centers yield to warm golden peripheral toning on this boldly struck, well-preserved Superb Gem. PCGS and NGC combined have certified only four Full Steps pieces in this lofty grade (three at PCGS and one at NGC), with none finer (1/15). As one of the finest known of the date, this coin ranks a full grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 22UA, PCGS# 84036

**1949-D Nickel, MS67 Full Steps
Very Rare at This Grade Level**

- 3048 1949-D MS67 Full Steps PCGS.** A single glance at the population reports shows why this issue is so challenging in the highest grades. PCGS and NGC combined have certified just six examples in MS67 Full Steps and none in a higher numeric grade (1/15). Prospective bidders will be competing with Registry Set enthusiasts for this immaculate Full Steps representative. A whisper of golden translucence covers lustrous, satin-silver surfaces. There are no surface distractions. Population: 4 in 67 Full Steps, 0 finer (1/15). NGC ID# 22UC, PCGS# 84038

**1952-D Nickel, MS67 Full Steps
Nearly Six Complete Steps**

- 3049 1952-D MS67 Full Steps PCGS.** As the numismatic hobby approaches 30 years of third-party certification, the online population data provides a clear indication of the relative rarity for every series, with the understanding that the data is biased toward higher grade and rarer coins. PCGS has certified 850 1952-D Jefferson nickels, with just 100 of those assigned the Full Steps designation. Understanding that a Full Steps example is more likely to be submitted in the first place is important when considering the relative rarity of these coins. This brilliant Superb Gem, with delicate champagne toning over frosty mint luster, just misses six complete steps on the reverse. PCGS has only certified two examples as MS67 Full Steps, with none finer (1/15). NGC ID# 22UL, PCGS# 84047

PROOF JEFFERSON NICKELS

**1939 Jefferson Nickel, PR68
Scarce Reverse of 1940**

- 3050 1939 Reverse of 1940, FS-901, PR68 PCGS. CAC.** Only a slender percentage of proof 1939 nickels exhibit the "Straight Steps" reverse. The present essentially immaculate representative is beautifully patinated lime-green, ruby-red, and lemon-gold. The single finest certified at PCGS (1/15), and thus a key addition for the competitive Registry holding. PCGS# 38534 Base PCGS# 94176

**1942 Type One Jefferson Nickel, PR68
No Example Certified Numerically Finer**

- 3051 1942 Type One PR68 PCGS. CAC.** A vignette of orange-gold toning frames each side of this deeply mirrored, silk-smooth proof nickel. Vibrant surfaces are remarkably attractive and colorful, with central lilac-tinged iridescence and lightly frosted, fully struck central motifs. Eye appeal is off the charts. Tied for finest certified by either service. Population: 13 in 68, 0 finer (1/15). NGC ID# 27A3, PCGS# 4179

EARLY HALF DIME

**1795 Flowing Hair Half Dime, AU53
Popular V-5, LM-8 Variety**

- 3052 1795 V-5, LM-8, R.3, AU53 PCGS.** The 1795 Flowing Hair half dime claims a mintage of 78,660 pieces, with 10 die varieties known for the date. The LM-8 variety is identified by the low L in LIBERTY and no berries under the left wing on the reverse. This attractive AU53 example shows light wear on the high waves of hair and tips of the eagle's wings, but most interior design detail is intact. The lightly abraded surfaces retain traces of original mint luster. Population: 2 in 53, 0 finer (1/15). PCGS# 38592 Base PCGS# 4251

SEATED HALF DIMES

1840-O With Drapery Half Dime, MS64 The Sole-Finest Certified

3053 1840-O Drapery MS64 PCGS. Design modifications to the half dime in 1840 included an entire reworking of the obverse portrait, with the primary difference being the addition of drapery to the field below Liberty's right (facing) elbow. This new With Drapery type was introduced at the New Orleans Mint after much of production needs for this denomination had been met, with the result that only 240,000 With Drapery coins were struck. By contrast, that facility produced 695,000 No Drapery half dimes before the transition.

The With Drapery variant is by far the scarcer of the two, and is a major series rarity in Mint State, regardless of grade. This Choice example is one of only two Uncirculated pieces reported at PCGS, and also stands as the sole finest With Drapery 1840-O half dime encapsulated by either major grading service (1/15). Liberty's head and the stars exhibit better than average detail, and satiny surfaces seem to glow beneath a patina of blended olive-gold and lavender-gray hues. A heavy die crack bisects the obverse from 7 to 1 o'clock, and a radial break extends from the reverse rim at 7 o'clock. NGC ID# 232X, PCGS# 4327

1855 Arrows Half Dime, MS67 Just a Single Coin Finer

3054 1855 Arrows MS67 NGC. The 1855 Arrows issue was struck to the extent of 1.7 million coins — a sizeable quantity, though significantly smaller than was accomplished at the Philadelphia Mint in the two preceding years. A thin layer lavender-rose patina graces the mostly brilliant surfaces of this remarkably preserved Superb Gem. The design motifs are somewhat lightly struck up, typical for the issue, and roller marks appear over both sides. Census: 4 in 67, 1 finer (1/15). NGC ID# 2344, PCGS# 4360

**1856 Half Dime, Stunning MS68
Finest Certified at PCGS**

- 3055 1856 MS68 PCGS. CAC. V-8.** Fantastic eye appeal on essentially mark-free surfaces is the hallmark of this stunning Superb Gem 1856 half dime. Cream-white interiors cede to peripheral cinnamon, medium blue, and amber-gold patina near the rims. Several different Valentine varieties constitute this mintage exceeding 4.8 million pieces, minor variations of date placement, shape of the flag on the 5, and open/closed 6. While of interest to specialists, in such a high grade level as this piece, those differences count for little. This piece is the sole finest certified at PCGS, with one coin graded at this level also by NGC (1/15). NGC ID# 233P, PCGS# 4363

EARLY DIME

**1797 Draped Bust Dime, AU58
JR-2, 13 Stars, Knobbed 9**

- 3056 1797 13 Stars, JR-2, R.4, AU58 PCGS.** A glimpse of golden-rose highlights in the fields adds life to this silver-gray early dime, with subtle mint luster still visible at the margins. Only three Uncirculated examples are known to exist with the 13 Stars obverse, assuring this near-Mint coin ranks in the top six examples known of the JR-2 variety.

Some granularity on Liberty's portrait is not unusual for the date. Otherwise, the obverse strike is bold and the surfaces are smooth with no significant marks. The reverse strike on the eagle's breast is typically soft, with even the best specimens showing weak feathers and flatness of strike on the eagle. This is an attractive, high-grade example of the Knobbed 9 type and a challenging, high grade for an advanced collection. Population: 1 in 58, 2 finer (1/15). PCGS# 38749 Base PCGS# 4463

SEATED DIMES

1852 Seated Liberty Dime, MS67 Tied for Finest at PCGS

- 3057 1852 MS67 PCGS. CAC. Fortin-101.** Despite the relatively generous mintage exceeding 1.5 million coins, the 1852 dime is scarce through Gem and is conditionally rare any finer. Many coins were apparently melted due to the high price of silver during this time. This Superb Gem displays pleasing luster along with grayish-brown freckles that are slightly deeper and more extensive on the obverse. The design elements exhibit strong detail, including Liberty's facial features and most of the hair, the star centers, and the majority of the ribbing on the leaves of the reverse wreath. Neither side reveals significant contact marks. Population: 3 in 67, 0 finer (1/15).
Ex: Northern Bay Collection (Stack's, 3/2006), lot 4244. NGC ID# 238N, PCGS# 4597

1853 Arrows Dime, Toned MS67 Ideal Type Coin, Condition Rarity

- 3058 1853 Arrows MS67 NGC.** The surfaces feature crisp design elements, including Liberty's head and the bow knot, and intermingled shades aqua-blue, russet, and golden-orange patina. Marks are essentially non-existent, in accordance with the high technical grade. The 1853 With Arrows is a rather available issue for the most part. Examples are plentiful through MS64, and the issue only becomes scarce in MS65. Superb Gems such as this, however, are notable condition rarities. Census: 12 in 67 (1 in 67 ★), 5 finer (1/15). NGC ID# 2398, PCGS# 4603

1854 Seated Liberty Dime, MS67 Popular Arrows Design

- 3059 1854 Arrows MS67 NGC.** The arrows at the date indicate a minor weight change instituted in 1853. The 1854 Arrows dime enjoyed a mintage of nearly 4.5 million pieces, but not as many examples were saved of this second-year emission. This spectacular Superb Gem is well-detailed, with vibrant satiny luster and attractive gold and ice-blue patina. Census: 8 in 67, 1 finer (1/15). NGC ID# 239A, PCGS# 4605

1874-CC Seated Liberty Dime, AG Details Low-Mintage Key

- 3060 1874-CC Arrows — Bent — PCGS Genuine. AG Details.** Only one die pair was used to strike the 1874-CC Seated Liberty dimes, with a low-mintage of 10,817 pieces and a low survival rate. The major design elements are intact in outline on this well-worn example, but the rims are worn smooth and some of the legend is not legible. The date, mintmark, and arrows remain distinct, but the coin is slightly bent. Collectors prize examples of the 1874-CC in all grades and conditions. NGC ID# 23BL, PCGS# 4669

Carson City Mint

1874-CC Dime, XF45
Key Carson City Issue

- 3061 1874-CC Arrows XF45 PCGS. CAC.** The 1874-CC Arrows dime (which is redundant, really; there were no 1874-CC No Arrows dimes made, but the distinction is a useful one for type collectors) was minted in the tiny amount of 10,817 pieces, and today it completes what Rusty Goe calls the “Fearsome Foursome” of low-mintage Carson City issues from the beginning of the series. (Actually, it could be called a “Fearsome Fivesome” if one includes the unique 1873-CC No Arrows dime.) The 1874-CC had the lowest mintage of all Carson City dimes and is the key to the entire set, including all mintmarks. Rusty Goe writes in *The Mint on Carson Street* that Uncirculated examples are typically well-struck, but lower-grade coins usually have “rougher surfaces, with various levels of porosity.” Many examples are damaged in one way or another, showing graffiti, rim dings, or polishing. Not this piece, however. Even friction is seen over the high points of the design, an light golden color is seen on each side with no detracting marks. NGC ID# 23BL, PCGS# 4669

PROOF SEATED DIME

1879 Dime, PR66 Deep Cameo
Outstanding White-on-Black Contrast

- 3062 1879 PR66 Deep Cameo PCGS. CAC.** A deeply contrasted representative with bold white-on-black contrast and a high level of visual appeal, this is one of just 1,100 proofs struck in 1879. Each side remains entirely brilliant with deep mirroring in the fields and a thick layer of mint frost over the devices. Exceptionally preserved and virtually unmarked. This is the single finest Deep Cameo coin at PCGS (1/15). PCGS# 94776

MERCURY DIMES

1916-D Mercury Dime, XF45
Low-Mintage Key

- 3063 1916-D XF45 PCGS.** The 1916-D Mercury dime is always in demand because it was the first year of the design and claims a famously low mintage of 264,000 pieces. This pleasing Choice XF example retains much interior design detail in Liberty's hair and shows slight wear on the bands. The lightly abraded surfaces display highlights of lavender toning. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, MS65 Full Bands
Exceptional, Sharply Struck Key Issue

3064 1916-D MS65 Full Bands PCGS. The 1916-D Mercury dime issue bears similarities as the sole key to its series with another such issue, the 1911-D Indian Head quarter eagle. It too is the sole key to that series, the lowest-mintage and most-desired issue. Although both contain other issues that are considered conditional rarities — the 1921-P and -D dimes and the 1914-P and 1914-D quarter eagles — the 1916-D dime and 1911-D quarter eagle are absolute rarities in any grade. The mintage of the 1916-D dime, 264,000 pieces, was about five times that of the 1911-D quarter eagle at 55,680 coins, but there are far more collectors of the complete Mercury dime series than of the complete Indian Head quarter eagles set.

This Gem is housed in a first generation holder, indicating it is no newcomer to this grade level and has been considered a Gem for decades. The surfaces display an interesting mixture of brilliance and light golden patina with an occasional dab of haziness interspersed. The fields show die flow lines, an indication of die fatigue, yet these flow lines give the coin an interesting, textured appearance. The mint luster is radiant with a bright, satiny appearance. Examination of the central bands leaves no doubt about the status of the strike on this piece, the bands are fully separated from side to side. Likewise, the diagonal bands are well-detailed, only the lower diagonal shows just the faintest suggestion of softness. PCGS has only certified 33 Gem Full Bands dimes with 29 finer (minus resubmissions), and NGC has graded even fewer with 25 in MS65 and a mere six coins in higher grades (1/15). NGC ID# 23GY, PCGS# 4907

1916-D Mercury Dime, MS66 Full Bands
Remarkably Lustrous and Attractive Example

3065 1916-D MS66 Full Bands PCGS. CAC. Only a handful of 20th century issues have the power to immediately capture the imagination of collectors. Among them are the 1909-S VDB cent, the 1932-D quarter, and certainly the 1916-D Mercury dime. With a mintage of just 264,000 coins, the 1916-D is far and away the lowest-mintage date in the entire series, and in fact it claims the lowest mintage among all dime issues dating back to 1886 when the San Francisco Mint struck a mere 206,524 examples.

As Mint officials prepared for the release of three new designs for the dime, quarter, and half dollar in 1916, the Great War caused a shortage of subsidiary coinage, especially quarter dollars. Earlier in the year, the Philadelphia and San Francisco Mints had struck more than 22 million and 10 million examples of the new Mercury dime design respectively. These quantities were sufficient to satisfy commercial demand, and on November 24 Mint Director von Engelken ordered the Colorado branch mint to cease production of all denominations save the quarter dollar, explaining the low mintage of D-mint dimes. So the mintage and availability of the 1916-D dime was limited to the small number of coins struck prior to the Director's orders.

Although other Mercury dime issues may be scarcer, collector interest in the 1916-D exceeds that of all other dates in the series. Examples are available across virtually all grade levels. Circulated examples are usually available for a price through Extremely Fine condition, About Uncirculated pieces are elusive, and Mint State representatives such as this are scarce. At the MS66 level, fewer than two dozen coins are known. This piece displays remarkable mint luster; frosted in nature rather than the expected satin finish seen on most Denver products. The centers are mostly untoned with rich golden-russet patina surrounding the margins on each side. Housed in a first generation holder. Population: 22 in 66 (2 in 66+) Full Bands, 7 finer (1/15). NGC ID# 23GY, PCGS# 4907

PROOF TWENTY CENT PIECES

1876 Twenty Cent Piece, PR64
Rich Multicolor Toning

- 3066 1876 PR64 PCGS. CAC.** A handsomely toned Choice proof that exhibits sea-green centers and mahogany-brown borders. A brilliant area is noted between stars 9 and 10. Well struck and flashy. The usual reverse die with minor doubling on STATES, but the obverse die is unlisted in the recently issued Brunner-Frost reference. The date is low, similar to BF-1, but minutely differs in placement. A scarce four-year proof type. NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent Piece, PR64
Modest Field-Device Contrast

- 3067 1876 PR64 PCGS. CAC.** Unlike the circulation strikes, which include the prohibitively rare 1876-CC, the proof twenty cent series is a completable endeavor, requiring just four individual coins. This is an appealing Choice example of the 1876, showing bold detail and deeply mirrored fields. Pale lavender-gray and olive-gold hues attest to the original of the surfaces and deliver a uniquely attractive patina overall. Housed in a first generation holder. NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

1796 Quarter Dollar, Well-Defined XF40
Scarcer B-1 Die Pair

- 3068 1796 B-1, R.4, XF40 NGC.** B-1 is the scarceter variety with the 6 in the date approximately centered between the drapery and border (the "low 6"). 1796 quarters in any grade are the subject of avid collector demand. Although both the silver quarter and gold quarter eagles are first-year types that were introduced in 1796, the quarter is also a one-year type. No more were made until 1804, by which time the design had changed to the Draped Bust with Heraldic Eagle reverse.

Cobalt-blue, forest-green, and crimson patination gravitates to the margins of this XF specimen, being slightly more extensive and deeper on the obverse, and framing the semibright silver-gray centers. The devices display the appropriate design detail, including strong definition on Liberty's hair and facial features, the stars (except the centers), and the eagle's wing, and tail plumage. Moreover, the design elements are well-centered on the planchet and both sides exhibit strong dentilation, attributes seen on virtually all 1796 quarter dollars irrespective of grade or condition. The few light marks visible over each side are consistent with the grade and with a coin that has experienced light to moderate circulation. This piece, a representative that is missing from most collections, will make an excellent addition to a type set of early U.S. coins. Census: 5 in 40, 72 finer (1/15). PCGS# 38919 Base PCGS# 5310

1796 B-2 Quarter, Fair 2
Rare Introductory Silver Type

- 3069** 1796 B-2, R.3, Fair 2 PCGS. CAC. Tompkins Die State 2/1. Among the rarest silver type coins, the Draped Bust, Small Eagle quarter was struck only in 1796, and had a mintage of just 6,146 pieces. Bullion depositors preferred the crown-sized silver dollar, while the half dime and dime were more convenient for commerce. Those in search of an affordable but unblemished example need look no further. The present piece has broad golden-brown borders and a powder-blue center. The obverse also exhibits lilac tints. The date is bold and the types are evident. The reverse legend is worn smooth save for AMERICA. Both sides are lightly hairlined. PCGS# 38920 Base PCGS# 5310

BUST QUARTERS

1825/4/(2) B-2 Quarter, MS62

- 3070** 1825/4/(2) B-2, R.2, MS62 PCGS. Medium golden-brown, dove-gray, and forest-green shades embrace this satiny and nicely struck Capped Bust type coin. Rotation beneath a light reveals thin marks on the fields and Liberty's neck, made unobtrusive by the original toning. 25 C is distant from the rim on B-2, the most available 1825-dated Browning variety. PCGS# 38975 Base PCGS# 5336

1831 Capped Bust Quarter, MS64
B-1, Small Letters *Guide Book Variety*

- 3071** 1831 Small Letters, B-1, R.3, MS64 PCGS. From a nominal mintage of 398,000 pieces, the 1831 Capped Bust quarter is seldom encountered in MS64 condition. This attractive Choice example is sharply detailed in most areas, with a touch of softness on the stars on the left. The well-preserved surfaces are lightly toned in shades of champagne-gold and lavender. Population: 60 in 64 (3 in 64+), 18 finer (1/15). PCGS# 38980 Base PCGS# 5348

SEATED QUARTERS

1853 Seated Liberty Quarter, MS65
Popular Arrows and Rays Design

- 3072** 1853 Arrows and Rays MS65 PCGS. The weights of all U.S. silver coinage except the three cent silver piece and silver dollar were adjusted in 1853 to bring the intrinsic value of the coins in line with their face value. This weight change was indicated on the quarter by adding arrows at the date and a glory of rays on the reverse. The rays were dropped the following year due to striking problems, creating an immensely popular one-year subtype.

This impressive Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show attractive highlights of greenish-gold and lavender toning. Population: 15 in 65, 10 finer (1/15). NGC ID# 23U4, PCGS# 5426

**1875-CC Seated Liberty Quarter, MS66
Finest-Certified Example**

**1889 Seated Quarter, MS67
Impressive Visual and Technical Quality**

3073 1875-CC MS66 PCGS. CAC. Briggs 1-A. In 1875, the Carson City Mint struck 133,290 twenty cent pieces in its first year producing the denomination. The public saved the new coins as novelties and dismissed the 140,000 quarters struck as uninteresting. As a result, CoinFacts estimates only 250 pieces are extant with 30 coins in mint condition. Probably no more than five survivors are left in Gem condition and this piece is the only Premium Gem certified at either of the leading grading services (1/15).

Each side of this delightful Premium Gem exhibits shades of violet, blue, green, orange, and yellow toning that progress outward from the centers in spectacular fashion. This Carson City product offers well-struck design elements, despite typical softness on Liberty's head and the stars. This coin is a "must-have" for the finest Registry Set. Population: 1 in 66, 0 finer (1/15).

Ex: *Kennywood Collection (American Numismatic Rarities, 1/2005)*, lot 451. NGC ID# 23UY, PCGS# 5499

3074 1889 MS67 PCGS. CAC. In addition to the remarkably low mintage of just 12,000 pieces, the 1889 Seated quarter is a great choice for collectors desiring to obtain a Superb Gem or finer for type or date sets. This example displays warm crimson-gray and cobalt-blue patina that blankets the fully struck elements. Recently part of the Eugene H. Gardner Collection, this spectacular coin offers rich, lustrous appeal and an originality few other examples possess. Suitably CAC endorsed. Population: 31 in 67 (3 in 67+), 2 finer (1/15).

Ex: *FUN Signature (Heritage, 1/2001)*, lot 6916. NGC ID# 23VM, PCGS# 5522

PROOF SEATED QUARTERS

1846 Seated Liberty Quarter, PR65 Tied for Finest-Certified Example

3075 1846 PR65 NGC. The 1846 proof Seated Liberty quarter is a very rare issue with a surviving population of about a dozen pieces. One of the survivors resides in the National Numismatic Collection at the Smithsonian Institution, out of the reach of eager collectors. The coin offered here is one of the finest-certified examples and traces its history back to the famous Phil Kaufman Collection.

Unlike some of the other 1846 proof quarters that reveal localized softness, especially in the star centers, the strike on the present offering imparts crispness to all of the design elements. Not only are the star centrils complete, but the straps on Liberty's foot stand out, as does the foot-sandal separation. The borders are squared off, and reflective fields yield pleasing contrast with the motifs. Beautiful toning enriches both sides, and consists of a mélange of dappled forest-green, beige-gold, lavender, and orange. Close inspection of the immaculately preserved surfaces reveals little in the way of pedigree markers—no contact marks, planchet defects, or spots. All in all, a simply gorgeous Gem proof that is sure to elicit spirited bidding. Census: 4 in 65, 0 finer (1/15).

Ex: *Grand Central Convention Auction* (Paramount, 11/1978); *Auction '79* (Paramount, 7/1979), lot 44; *Mann-Smedley Collections* (Bowers and Merena, 9/1988), lot 201; *FUN Convention Auction* (Mid-American, 1/1989), lot 2650; *Phil Kaufman Collection, Part III* (Heritage, 4/2008), lot 2385, realized \$23,000. NGC ID# 23W9, PCGS# 5540

1858 Seated Liberty Quarter, PR65 Landmark First Commercial Proof Offering

3076 1858 PR65 PCGS. Briggs 5-E. The year 1858 saw the beginning of the Mint's commercial proof set offerings, with an estimated total of 300 Seated Liberty quarters produced. This delightful Gem is one of the finest survivors, with sharply detailed design elements and reflective fields under shades of golden-brown and electric-blue toning. Population: 4 in 65, 1 finer (1/15). NGC ID# 23WK, PCGS# 5554

1860 Quarter, PR66 Tied for Finest at PCGS

3077 1860 PR66 PCGS. CAC. Type Two Reverse. Attractive multicolor toning covers both sides of this Premium Gem proof. Colors include ice-blue, purple, and orange. As expected, the strike is full aside from the usually seen incompleteness on stars 1 through 5. The Mint reportedly struck 1,000 Seated quarter proofs in 1860, though meltings result in a net mintage of just 542 coins. PCGS reports seven MS66 and none finer. This is one of only four examples with a CAC approval sticker (1/15). NGC ID# 23WM, PCGS# 5556

1880 Seated Quarter, PR67 Deep Cameo
Outstanding Registry Set Candidate

3078 1880 PR67 Deep Cameo PCGS. CAC. Briggs 2-B. Type One Reverse. A generous mintage of 1,355 proof Seated Liberty quarters was accomplished in 1880, using one obverse and two reverse dies. This coin exhibits the Type One Reverse, with a cut in the shield lines on the left border a little more than half way up. This reverse was first used on proofs in 1872 and it was also used to strike some business-strikes in 1880. It was finally retired after this year.

Few survivors can match the high technical quality and incredible eye appeal of the coin offered here. It offers well-detailed frosty design elements that contrast profoundly with the deeply mirrored fields to create a dramatic cameo effect. The impeccably preserved surfaces are mostly brilliant, with a few highlights of pale gold toning. This coin will be a welcome addition to the finest collection or Registry Set. Population: 3 in 67 Deep Cameo, 0 finer (1/15). PCGS# 95581

1882 Seated Quarter, PR67 Deep Cameo
Sole-Finest at PCGS

3079 1882 PR67 Deep Cameo PCGS. From a mintage of 1,100 proofs, this is a brilliant and fully struck Superb Gem that boasts exceptional eye appeal. Every individual design element, including the date, stars, and lettering, features intensive mint frost that provides a remarkable black and white appearance. The business strike mintage for this date was quite low (15,200 coins), and today proof examples provide the vast majority of high-quality pieces for date collectors. This is the sole finest example certified in Deep Cameo at PCGS(1/15).

Ex: Central States Signature (Heritage, 5/2007), lot 2093; FUN Signature (Heritage, 1/2009), lot 2420. PCGS# 95583

BARBER QUARTERS

1899-O Barber Quarter, MS67
Single-Finest Certified at NGC

- 3080 1899-O MS67 NGC. CAC.** The 1899-O is only marginally elusive in the lower Mint State grades, but cross over the Gem threshold and finding an example will prove exceedingly difficult; at the MS67 grade level, this date is nearly unobtainable. Splashes of orange-gold, navy-blue, and lavender-gray toning encompass each side, while the surface preservation is excellent. As is typical of this New Orleans issue, some of the more finely detailed design elements are not fully brought up; the most noticeable are the lower obverse stars, though the overall eye appeal is nonetheless excellent. Census: 1 in 67, 0 finer (1/15). NGC ID# 23YH, PCGS# 5623

1901-S Quarter, Good 6
A Collectible Example of This Key Date

- 3081 1901-S Good 6 PCGS.** The 1901-S Barber quarter is the most sought-after issue in the series, even more so than the lower-mintage 1913-S. This example is well-circulated, ideal for the budget-conscious collector. Original olive and battleship-gray hues encompass both sides. The obverse rim is complete, though the reverse border grows a trifle weak from 1 to 5 o'clock. NGC ID# 23YR, PCGS# 5630

PROOF BARBER QUARTERS

1896 Quarter, Stunning PR68 Cameo

- 3082 1896 PR68 Cameo NGC.** Frosty, boldly struck motifs appear to float over the mirrored, watery fields, yielding stunning cameo contrast. Immaculate preservation further contributes to the coin's outstanding eye appeal. While 1896 proof quarters are fairly common (NGC and PCGS combined report 617 examples in all three finishes, from a mintage of 762 pieces) relatively few can match the technical quality and aesthetic appeal of the present PR68 Cameo offering. Census: 8 in 68 Cameo (2 in 68 ★ Cameo), 2 finer (1/15). PCGS# 85682

1911 Barber Quarter, PR68 Cameo
Impressive, Virtually Flawless Example

- 3083 1911 PR68 Cameo NGC.** A pinpoint strike accentuates virtually flawless, untuned silver surfaces of this deeply mirrored and highly contrasted proof quarter. Every detail of the shield, wing plumage, tail, and talons is bold on the reverse, and there are no distracting blemishes on Liberty's portrait or field lines — even under magnification. The eye appeal is as impressive as the technical quality. Collectors of high-quality proof type and series specialists alike will vie for ownership of this exquisite Barber proof. Census: 12 in 68 Cameo (2 in 68 ★ Cameo), 2 finer (1/15). Ex: Long Beach Signature (Heritage, 2/2010), lot 1107. PCGS# 85697

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU58
First-Year Key Date

- 3084 1916 AU58 PCGS.** Only 52,000 Standing Liberty quarters were struck at the Philadelphia Mint in 1916, an extremely low production total for any 20th century coin. This attractive near-Mint example retains most of its original mint luster and the well-detailed design elements show just a trace of high-point wear. The pleasing surfaces are free of large or distracting abrasions. NGC ID# 242Y, PCGS# 5704

1917-S Type Two Quarter, MS66 Full Head
Delightfully Patinated, Lustrous Surfaces

- 3085** 1917-S Type Two MS66 Full Head NGC. Generous luster emanates from each side of this Premium Gem Type Two representative. The strike is complete on the head but slightly deficient on a trio of shield rivets and the leading edge of the eagle's left (facing) wing, as nearly always on this San Francisco issue. The delightful color ranges from gold and lilac on the obverse to pastel blue, pink, champagne, and violet on the reverse. Census: 13 in 66 (1 in 66+) Full Head, 4 finer (1/15).
Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3455. NGC ID# 2436, PCGS# 5719

1918/7-S Quarter, Choice VF
Key World War Overdate

- 3086** 1918/7-S FS-101 VF35 PCGS. The crossbar and downstroke of the underdigit 7 are obvious on this appealing midgrade example. Glimmers of luster remain in design crevices, and the mildly luminous surfaces show only infrequent unimportant contact. The present variety and the 1918/7-D nickel imply that inexperienced hands were left at the Mint following World War I recruitment. PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, AU53
Well-Preserved Example of This Key

- 3087** 1918/7-S FS-101 AU53 PCGS. CAC. A hubbing error accounts for this dramatic *Guide Book* overdate (similar to the 1918/7-D Buffalo nickel), while the issue's scarcity and popularity make it one of the preeminent dates in the Standing Liberty quarter series. The prominence of the underlying 7 facilitates the identification of even heavily circulated pieces and highlights the incongruous circumstances surrounding the variety's discovery; it was only noticed in 1937, nearly 20 years after it was first produced. A small diagnostic die chip occurs above the pedestal and to the left of the lowest star on the right, characteristic of genuine representatives. The downstroke of the underdigit remains strong on this moderately circulated overdate quarter. Light silver-gray surfaces show just the faintest accent of darker color around the devices. Problem-free surfaces. PCGS# 395949 Base PCGS# 5726
-

**1919-D Quarter, Sharp MS65
High-End for the Grade**

- 3088 1919-D MS65 PCGS.** Gem examples of this semikey Denver issue are elusive without Full Head detail and distinctly rare with the designation. The present piece is ever so close to qualifying, but is a trifle weak at the temple. The shield lines and rivets, the stars, and the date numerals are unusually well-defined, and the both sides are awash in satiny, gold-tinted luster. No distracting abrasions are present. Population: 49 in 65 (1 in 65+), 28 finer (1/15). NGC ID# 243C, PCGS# 5730

1919-D Quarter, Radiant MS65

- 3089 1919-D MS65 PCGS. CAC.** Radiant luster emanates from the silvery surfaces of this D-mint Gem that displays hints of light brown color at the borders. Liberty's head exhibits considerable flatness, a typical characteristic of the issue. Indeed, Cline (2007) writes that only one percent of this date is struck with a full head. The chain mail and vertical stripes in the inner shield are quite strong, however. A die crack runs through the top of the date. Population: 49 in 65 (1 in 65+), 28 finer (1/15). NGC ID# 243C, PCGS# 5730

**1920-D Quarter, MS64
Seldom Seen Full Head Example**

- 3090 1920-D MS64 Full Head PCGS.** Light pinkish-gold patina graces each side of this satiny near-Gem coin. Liberty's head is sharp, although the central regions of both sides are deficiently struck, as is characteristic of this Denver issue. The lightness on the top half of the date numerals is an often seen anomaly on virtually all issues of this period, and would persist until the introduction of the recessed date in 1925. There are no abrasions of note. Population: 38 in 64 (2 in 64+) Full Head, 47 finer (1/15). Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3625. NGC ID# 243F, PCGS# 5737

**1920-S Quarter, MS66
Highly Lustrous, Lightly Toned**

- 3091 1920-S MS66 PCGS. CAC.** The scarcity of the 1920-S with Full Head puts such coins out of reach for many collectors. This non-Full Head piece, however, is conditionally rare at the Premium Gem grade level, and thereby poses a distinctly different kind of allure for the specialist. The mint luster glows beneath a blanket of warm golden toning on each side, while the shield, date, and eagle's feathers exhibit above-average detail. Housed in an old green label holder. Population: 14 in 66 (1 in 66+), 4 finer (1/15). Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3627. NGC ID# 243G, PCGS# 5738

**1921 Quarter, Frosty MS66
Boldly Struck Central Details**

- 3092 1921 MS66 PCGS. CAC.** The low-mintage 1921 (1.9 million pieces) is one of the key dates of the Standing Liberty quarter series. This Premium Gem exhibits sharp definition, especially the horizontal and vertical shield stripes, rivets, and the eagle's feathers. Lustrous surfaces display soft golden-gray patina and are devoid of significant marks. Population: 24 in 66, 1 finer (1/15). Ex: Los Angeles Signature (Heritage, 8/2009), lot 709; Long Beach Signature (Heritage, 2/2011), lot 3631. NGC ID# 243H, PCGS# 5740

**1923 Standing Liberty Quarter, MS66 Full Head
Only Three Finer Coins at NGC**

- 3093 1923 MS66 Full Head NGC.** The 1923 Standing Liberty quarter claims a substantial mintage of 9.7 million pieces, but the issue is scarcer than was previously thought with the Full Head designation. This impressive Premium Gem meets the standard for Full Head definition, but some of the shield rivets are incomplete. The impeccably preserved surfaces are lustrous and appealing. Census: 12 in 66 Full Head, 3 finer (1/15). NGC ID# 243J, PCGS# 5743

**1929-S Standing Liberty Quarter, MS67 Full Head
Among the Finest at PCGS**

- 3094** 1929-S MS67 Full Head PCGS. Vibrant mint luster and delicate shades of golden-brown toning are the calling cards of this spectacular Superb Gem. Sharply detailed in most areas, with Full Head definition, a touch of softness is evident on the eagle's belly and some shield rivets are incomplete. Eye appeal is outstanding for this strong Registry Set candidate. Population: 14 in 67 Full Head, 0 finer (1/15). NGC ID# 2444, PCGS# 5777

WASHINGTON QUARTERS

**1936-D Washington Quarter, MS67
High-Quality, Better Date**

- 3095** 1936-D MS67 PCGS. From a mintage of 5.4 million pieces, the 1936-D Washington quarter is a better date in the series. This spectacular Superb Gem displays sharply detailed design elements and brightly lustrous impeccably preserved surfaces. Population: 15 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 244H, PCGS# 5801

**1943-S Quarter, MS66
Doubled Die Obverse**

- 3096** 1943-S Doubled Die Obverse, FS-101, MS66 PCGS. CAC. Bold die doubling is evident on all obverse lettering, as well as on portions of the portrait. This is a long-recognized and highly popular variety, and it is genuinely rare in MS66. This piece displays brilliant, satiny luster and well-defined design elements. No mentionable abrasions are present. Population: 8 in 66 (1 in 66+), 0 finer (1/15). PCGS# 145154 Base PCGS# 5823

EARLY HALF DOLLARS

**1795 O-110 Half Dollar, XF40
Deep Original Toning**

- 3097** 1795 2 Leaves, O-110, R.3, XF40 PCGS. A splendid gunmetal-gray and lavender example of the introductory two-year Flowing Hair type. No marks merit mention. The eagle's wings and Liberty's hair show impressive definition. Die lines near stars 2 and 3 confirm the Overton variety. Both sides exhibit bold clash marks but lack the die cracks characteristic of O-110a. From The Collection of Philip M. Peterson. PCGS# 39228 Base PCGS# 6052

**1795 Half Dollar, VF25
Y Over Star, O-121**

- 3098** 1795 2 Leaves, Y Over Star, O-121, High R.4, VF25 PCGS. The very scarce Y Over Star variety is mentioned in the *Guide Book* but does not receive a separate listing. A cream-gray and aquamarine example that boasts ample plumage definition for the given third party grade. Adjustment marks on the lower right obverse border, and clash marks beneath the Liberty's chin, are all of Mint origin. PCGS# 39256 Base PCGS# 6052

**1805 Half Dollar, Choice AU
O-111, Boldly Clashed Dies**

- 3099** 1805 O-111, R.2, AU55 NGC. Autumn-gold and forest-green endow the borders of this briefly circulated and lightly abraded Bust half. The die state is earlier than generally encountered, without the two radial cracks between the AM and IC in AMERICA. Nonetheless, four different "collar" clash marks are present above Liberty's chest, and lines from the shield extend between Liberty's ribbon and ear. PCGS# 39285 Base PCGS# 6069

1807 Draped Bust Half, MS63
O-102, Rare in Mint State

3100 1807 Draped Bust, O-102, R.2, MS63 NGC. Silver-pink luster resides under soft-gray toning and creates a copperlike patina across the smooth surfaces of this Select Uncirculated early half dollar. Struck from a late state of the dies, as identified by a noticeable die chip within the top loop of the 8 in the date. The 7 is small and repunched, visible at the bottom of its upright. Marks are limited to a few delicate lines, visible under a glass.

The high points of the central elements are weakly struck, a function of worn dies and the early minting process, when planchets varied in thickness and proper die spacing was more a function of happenstance than skill. The reverse shows a stronger strike than the obverse. There are no adjustment marks on either side of the coin. Nor are there signs of wear, justifying the assigned grade and making this a Condition Census coin in both the current Steve Herrman listing (Number 45) and Don Parsley's 2013 reference. Census (all varieties): 13 in 63, 27 finer (1/15). PCGS# 39339 Base PCGS# 6079

BUST HALF DOLLARS

1807 Capped Bust Half, XF45
O-111a, The Famous 'Bearded Goddess'

3101 1807 Bearded Goddess, XF45 NGC. O-111a, R.5. An early die state of the famous 'Bearded Goddess' variety. Pleasing original toning covers both sides of this evenly worn, still-lustrous example. The remnant of a 2 near the 5 in the denomination is easily visible with a glass. An absent-minded engraver thought that he was working on a quarter dollar die, then realized his mistake. *Ex: Central States Signature (Heritage, 4/2006), lot 1932. From The Skidaway Island Collection. PCGS# 39357 Base PCGS# 6086*

**1807 Capped Bust Half, AU53
O-114, Two-Year Type**

- 3102** 1807 Capped Bust, Large Stars, O-114, R.3, AU53 NGC. The devices exhibit blushes of honey color, but this bright example is otherwise brilliant. Remaining mint luster dominates the stars, legends, hair, plumage, and shield. Mint-made die clash marks appear on both sides, but abrasions are minor and bold details remain on the major devices. The scroll is weak beneath ATE of STATES. A group of diagnostic die lumps beneath the 7 of the date confirms the Overton number of this scarce, two-year type.
Ex: *New York Signature* (Heritage, 6/2005), lot 380.
From *The Skidaway Island Collection*. PCGS# 39361 Base PCGS# 6088

**1810 O-109 Bust Half, MS64
Condition Census Quality**

- 3103** 1810 O-109, R.3, MS64 NGC. A Condition Census near-Gem that boasts remarkably smooth surfaces. The portrait and eagle appear fully struck. Minor flatness is noted the right reverse margin and on stars 8 to 10. Battleship-gray toning lies thick on the unmarked surfaces, with satin cartwheel luster rolling across the prevalent gray tones. PCGS# 39418 Base PCGS# 6095

**1812/1 Large 8 Bust Half, VF20
Rare Guide Book Variety, O-101**

- 3104** 1812/1 Large 8, O-101, R.5, VF20 NGC. An elusive series overdate, notable for its Large 8 numeral and far scarcer than the 1812/1 with a Small 8. This oft-mistaken variety is most easily identified by the position of the date, which is starts further to the left than the date on the more common O-102 variant. The diagnostic recut N in UNITED is bold on O-101, which shares the same reverse as O-102, although the recutting is often weak or absent on the later Small 8 die pairing. All R.5 Bust halves command significant premiums over less-scarce varieties, a fact that is especially true for this rare, early overdate. Deep, gunmetal-gray fields surround lighter devices for a pleasing, old-silver appeal.
From *The Skidaway Island Collection*. PCGS# 39441 Base PCGS# 6102

**1815/2 Bust Half, AU53
O-101, Key Overdated Issue**

- 3105** 1815/2 O-101, R.2, AU53 NGC. A higher-grade survivor of this key issue, of which only 47,150 pieces were struck. The remnants of the underdigit 2 remains visible between the flag and the curvature of the 5 in the date. This scarce piece shows moderate steel-gray patina with ice-blue shadings and considerable golden luster still present. The only surface blemish worthy of mention is a shallow, crescent-shaped scrape to the left of the eagle's head on the reverse, where its effect is largely subdued by the overlay of toning.
Ex: *Frontenac Sale* (Bowers and Merena, 11/91), lot 3469; *Atlanta Signature* (Heritage, 8/2001), lot 6123.
From *The Skidaway Island Collection*. PCGS# 39491 Base PCGS# 6108

**1822/1 Capped Bust Half, AU55
Popular O-102 Overdate**

- 3106** 1822/1 O-102, High R.4, AU55 NGC. A substantial mintage of more than 1.5 million Capped Bust half dollars was produced in 1822, with 15 die varieties known for the date. This coin represents the sought-after O-102 overdate variety, with some roughness near the upper points of star 12. Only light wear is evident on the well-detailed design elements and the lustrous surfaces are blanketed in attractive shades of champagne-gold and lavender-gray toning. Census: 2 in 55, 0 finer (1/15).
From *The Skidaway Island Collection*. PCGS# 39605 Base PCGS# 6130

1823 Half Dollar, Fine Details
Very Rare Overton-113

- 3107** 1823 O-113, Low R.7 — Graffiti, Damaged — NGC Details. **Fine.** The very rare O-113 is distinctive for the proximity of stars 7 and 8 with Liberty's cap. Both stars virtually touch the cap, and 50 C is much more widely spaced than usual. This slate and steel-gray example has a small letter H pinscratched near stars 4 and 5. The surfaces are somewhat wavy and show smoothing near the eagle's beak. Protected areas are minutely granular. As of (1/15), the NGC Census lists only a single AU50 example, while PCGS Population has two coins, one as Good 6 and the other as XF40. *From The Skidaway Island Collection.*

1827 Square Base 2 Half, Fine 12
Rare Overton-137

- 3108** 1827 Square Base 2, O-137, R.6, Fine 12 NGC. "Extra feathers" from the right wing, near the RI in AMERICA, identify the rare Overton-137. A deep lavender-gray representative with clear legends and partial definition on the neck curls and tail feathers. The left reverse border displays moderate verdigris, the obverse margin near 12 o'clock has a couple of thin marks, and the left obverse field exhibits faint vertical hairlines. *From The Skidaway Island Collection.* PCGS# 39736 Base PCGS# 6144

1827 Half Dollar, AU Details
Very Rare O-148

- 3109** 1827 Square Base 2, O-148, High R.6 — Improperly Cleaned — NGC Details. AU. Many Bust half collectors have attempted to obtain each of the 49 1827-dated die marriages. Among the stoppers is O-148, which pairs the “line above LI” obverse of O-131 through O-133 with the “dot above beak” O-143 reverse. The present piece ranks among the sharpest survivors. The reverse is steel-gray and the obverse displays golden-brown and apple-green. Both sides are hairlined, and the field near the eagle’s head displays wispy abrasions.
From The Skidaway Island Collection.

1834 O-102 Half Dollar, MS66
Large Date, Large Letters, Recut 3
Tied for Finest of the Variety

- 3110** 1834 Large Date, Large Letters, O-102, R.1, MS66 NGC. The O-102 variety is one of three Large Letters, Large Date die pairs for the issue, and the only one with such a prominently recut 3 in the date. Actually, all the date numerals are recut to one extent or another for the O-102 die pair.
The current Premium Gem coin is tied for the top spot in the Condition Census for the variety according to Stephen Herrman’s auction reference an Donald Parsley’s fifth edition of the *United States Early Half Dollar Die Varieties* book. Rings of steel-blue and golden-rose toning are strongest at the margins, with lovely golden-rose shades covering the obverse center and brilliant silver luster covering the central reverse. Boldly struck everywhere except for three stars and the furthest right corner of the shield and adjacent wingtop. There are no significant marks or distractions. PCGS# 39906 Base PCGS# 6164

SEATED HALF DOLLARS

1851 Seated Liberty Half Dollar, MS67 Finest-Known Example, Ex: Pittman-Gardner Rare WB-104 Dies, R.8 in Wiley-Bugert

3111 1851 MS67 PCGS. WB-104, R.8. Ex: Pittman. The Philadelphia Mint struck only 200,750 business-strike Seated Liberty half dollars in 1851, a small production total in the context of the series, making the 1851 a scarce issue in today's market. Few examples were saved by contemporary collectors, making high-quality specimens particularly difficult to locate. Despite the elusive nature of the 1851, the date is often underrated, outside of series specialists. Heritage Auctions is pleased to present the finest-certified example of this elusive issue in this impressive offering.

The present coin traces its history to the famous collection of John Jay Pittman. Pittman was a true connoisseur who would accept nothing less than the finest available specimens for his collection. After his death, the collection was offered by David Akers in a series of landmark auctions in the late 1990s. Describing this coin in lot 1541 of his May 1998 catalog, Akers stated:

"This is a superb coin, one of the prettiest coins from the standpoint of toning in the entire Pittman Collection. It is very sharply struck except on a few of the obverse stars. It has full frosty mint luster and gorgeous multicolored toning, medium reddish-gold and russet in the centers turning to violet, blue and greenish-gold at the borders. Under the toning, there are just a few trivial marks, and the overall eye appeal of the coin is absolutely first-rate. This is almost certainly the finest known 1851 Half Dollar and is distinctly finer than the Eliasberg specimen which was described as, 'Probably the finest known'."

Another great collector, Eugene Gardner, purchased the coin at the Pittman auction and retained it in his collection until it was sold by Heritage last June, realizing a record \$49,937.50. At that time, the coin was certified in an MS66 PCGS holder. In his commentary in the lot description, Gardner noted, "It may sound presumptuous, but I was actually hoping for a higher grade from PCGS. There are no apparent flaws, and the coin, while on the dark side, is gorgeous." Gardner's comments were prophetic, as the coin now resides in an MS67 PCGS holder, making it even more desirable.

Randy Wiley and Bill Bugert list four die varieties for the 1851 Seated Liberty half dollar in their series reference. This coin represents the extremely rare WB-104 variety, with an errant 8 in the dentils below the space between the 8 and 5 in the date. When *The Complete Guide to Liberty Seated Half Dollars* was written, the only example of this variety known to the authors was the coin in the National Numismatic Collection at the Smithsonian Institution. The present coin is just the second example we are aware of, although some others may exist that have not been attributed.

The coin offered here is the finest-known example of an elusive date and an extremely rare die pair. For the Registry Set enthusiast, there can be no substitute for this MS67 PCGS example, as the finest NGC has certified is a single coin in MS66, and the second-finest specimen at PCGS grades "only" MS65 (1/15). We expect intense competition from series specialists and advanced students of die varieties when this lot is called.

Ex: 91st Sale (Barney Bluestone, 2/1946), lot 809; John Jay Pittman; Pittman Collection, Part II (David Akers, 5/1998), lot 1541; Eugene Gardner; Gardner Collection, Part I (Heritage, 6/2014), lot 30496, realized \$49,937.50 (as MS66 PCGS). NGC ID# 24HJ, PCGS# 6266 Base PCGS# 6266

**1865 Seated Liberty Half Dollar, MS64
Attractive Natural Toning**

- 3112 1865 MS64 PCGS. CAC. WB-101.** Attractive overall steel-gray color and shimmering luster provide this near-Gem with a high degree of visual appeal. Closer examination reveals large areas of aqua and golden-orange toning, with aqua predominant on the obverse and golden-orange on the reverse. A number of tiny gray-brown spots are present on the obverse. The coin displays a pleasing degree of detail aside from minor incompleteness at the upper portion of the eagle's right wing. Population: 10 in 64, 16 finer (1/15). NGC ID# 24JF, PCGS# 6313 Base PCGS# 6313

**1877 Seated Half, MS66
Radiant, Frosty Mint Bloom**

- 3113 1877 MS66 NGC. WB-102.** The 1877 Seated half dollar had a mintage in excess of 8.3 million pieces, but its availability declines somewhat in Gem and finer grades, and it is rare above the MS66 level. This Premium Gem displays frosty mint luster with a touch of amber-gold luster along portions of the peripheries. The stars are sharp, as are the olive leaves and arrow fletchings. The fields are devoid of any mentionable flaws, although some minor contact on the figure of Liberty precludes a higher numeric designation. Census: 14 in 66 (2 in 66 ★), 7 finer (1/15). NGC ID# 24KK, PCGS# 6355 Base PCGS# 6355

PROOF SEATED HALF DOLLARS

**1858 Seated Liberty Half, PR65
Only Two Pieces Finer at PCGS**

- 3114 1858 PR65 PCGS.** In 1858, the first year of the Mint's commercial proof set offerings, an estimated 300 proof Seated Liberty half dollars were struck. This delightful Gem exhibits Walter Breen's diagnostic area of unfinished polish between Liberty's chin and shoulder. The devices are well-defined and the fields are deeply mirrored, with brilliant silver centers highlighted by spectacular shades of cobalt-blue and sea-green toning at the rims. Population: 6 in 65, 2 finer (1/15). NGC ID# 27TH, PCGS# 6412

**1860 Seated Liberty Half, PR65 Cameo
525 Examples Distributed**

- 3115 1860 PR65 Cameo PCGS. CAC.** An even 1,000 proof half dollars were struck in 1860, many on speculation that collectors would snap them up if they were available. In part this ploy worked as many more proofs were sold in this year than in the lower-mintage, pre-1858 period. Still, the net mintage after melting at year's end was only 525 proofs. This is a lovely Gem Cameo proof with a fully brilliant and untuned obverse, and a subtly toned reverse with just a hint of pale reddish color. Both sides show excellent contrast. The fields show a few minuscule marks that prevent a higher grade. The reverse is rotated about 20 degrees. Population: 4 in 65 Cameo, 7 finer (1/15).
Ex: Long Beach Signature (Heritage, 9/2010), lot 5047. PCGS# 86414

**1862 Seated Half, PR65
Only 550 Proofs Struck**

- 3116 1862 PR65 PCGS.** Seldom do we offer an 1862 Seated half that combines such high technical quality with blatant originality. Smooth, virtually blemish-free features are bathed in rich lavender-charcoal and cobalt-blue shades that lighten somewhat over the central and left reverse. Orange-apricot undertones are also seen on that side at direct angles. The coin is fully brought up throughout, an even more important trait due to the scarcity of similarly graded business strikes of this date. Population: 15 in 65, 2 finer (1/15).
Ex: ANA Sale of the Millennium (Bowers and Merena, 8/2000), lot 4145, where it realized \$5,290; Trane Collection FUN Signature (Heritage, 1/2003), lot 7207, which realized \$4,255; Central States Signature (Heritage, 4/2008), lot 1155. NGC ID# 27TN, PCGS# 6416

1862 Seated Half, PR65 Cameo
Gorgeous Peripheral Toning

- 3117 1862 PR65 Cameo NGC. CAC.** Ocean-blue and lavender hues illuminate the margins of this intricately struck and beautiful Gem. Despite the toning, the major devices are frosty, particularly on the obverse. This Civil War specimen is from a proof mintage of only 550 pieces. Census: 11 in 65 Cameo (1 in 65+ Cameo), 6 finer (1/15). Ex: *The Slotkin Family Trust Collection (Heritage, 4/2011)*, lot 3697. PCGS# 86416

1863 Half Dollar, PR65
Lovely Border Toning

- 3118 1863 PR65 NGC.** Cobalt-blue and lavender toning clings to the margins of this Gem proof, leaving the centers silvery with soft champagne hues. The design elements are sharply impressed and display a degree of contrast with the mirrored fields. Carefully preserved with excellent eye appeal. Census: 13 in 65, 8 finer (1/15). Ex: *Long Beach Signature (Heritage, 2/2012)*, lot 3665. NGC ID# 27TP, PCGS# 6417

1868 Seated Half, PR66
Patinated and Sharply Detailed

- 3119 1868 PR66 NGC.** Only 600 proof Seated Liberty half dollars were struck in 1868, and few survivors can match the quality and eye appeal of the present coin. The design elements are sharply detailed throughout, and the deeply mirrored fields are patinated in attractive shades of blue, green, and gray. Census: 8 in 66 (2 in 66 ★), 2 finer (1/15). NGC ID# 27U3, PCGS# 6426

1869 Half Dollar, PR66 Cameo
Deeply Contrasted

- 3120 1869 PR66 Cameo PCGS.** Plenty of perceptible field-device contrast emanates from each side of this Premium Gem Cameo proof 1869 half dollar, from a recorded production of 600 coins. The central areas are silver with a light wash of amber and copper-gold color that deepens noticeably at the rims, a beautiful effect. Minute doubling or repunching shows on a few of the left-side stars, and the strike is far superior to most examples, some of which show GOD weak on the reverse. The few visible signs of contact, on Liberty's left (facing) thigh and calf and in the right lower obverse field, are quite trivial and undistracting. Population: 4 in 66 Cameo, 1 finer (1/15). PCGS# 86427

1872 Seated Half, PR65 Cameo
Lightly Toned, Starkly Contrasted

- 3121 1872 PR65 Cameo NGC. CAC.** A fairly generous proof mintage of 950 Seated Liberty half dollars was struck in 1872, but few survivors can match the quality of this spectacular Gem. This coin exhibits razor-sharp details on all design elements, and the frosty devices contrast boldly with the deeply reflective fields. The surfaces are mostly brilliant, but the fields are visited by hints of gold and lavender toning. Census: 7 in 65 Cameo (1 in 65 ★ Cameo), 7 finer (1/15). Ex: *Long Beach Signature (Heritage, 2/2011)*, lot 3721. PCGS# 86430

1874 Arrows Half, PR64 Cameo
Attractive Example of This Two-Year Type

- 3122 1874 Arrows PR64 Cameo NGC.** After the weight change in the previous year from 12.44 grams to 12.50 grams, arrows were added to each side of the date to indicate this change. This design change persisted into 1874, and thus a two-year type coin was created, one that is especially sought-after as a proof. This high-grade proof exhibits sharp cameo contrast on each side. The interiors are brilliant and surrounded by a hint of golden-rose toning at the margins. Census: 9 in 64 Cameo (1 in 64+ Cameo), 10 finer (1/15). PCGS# 86435

**1875 Half Dollar, PR66
Boldly Struck and Lightly Toned**

- 3123 1875 PR66 PCGS.** Both sides of this Premium Gem exhibit delicate cameo contrast with deeply mirrored fields and satin devices. The design motifs are bold. The surfaces exhibit wispy champagne toning with light gold and vibrant blue toning at the borders. Population: 9 in 66, 2 finer (1/15). NGC ID# 27U9, PCGS# 6436

**1877 All-White Half Dollar, PR66 Cameo
Tied for Finest Certified**

- 3124 1877 PR66 Cameo PCGS.** The 1877 half dollar is one of the most frequently encountered issues as a circulation strike. However, that cannot be said of the proofs, where only 510 pieces were struck. This is a dazzling, all-white example with deeply mirrored fields that establish the "black" background for the frosted devices, the combination of which yield cameo contrast. The strike details are full throughout, and there are no mentionable contact marks on either side. High-grade proofs are of the greatest rarity. PCGS has only certified five others as PR66 Cameo, and NGC has graded four at this level (1/15). PCGS# 86438

**1877 Seated Liberty Half Dollar, PR66 Cameo
None Certified Finer**

- 3125 1877 PR66 Cameo PCGS. CAC. WB-103.** Only 510 proof Seated Liberty half dollars were struck in 1877, and the date is very rare in Premium Gem condition with the Cameo designation. Most proofs, including the present coin, were struck from the new Tail Hub Variety Two, which has a closed lower berry on the olive branch. The obverse of this gorgeous Premium Gem Cameo proof exhibits brilliant silver devices with deeply mirrored fields and hints of peripheral gold toning. The reverse is similar with heavier gold toning splashes. Intense field-device contrast adds to the terrific eye appeal, and no mentionable distractions are evident. This coin will be a welcome addition to the finest collection or Registry Set. Population: 6 in 66 Cameo, 0 finer (1/15). PCGS# 86438

**1879 Seated Half, PR67 ★ Cameo
Only One Numerically Finer Coin at NGC**

- 3126 1879 PR67 ★ Cameo NGC.** A boldly contrasted Superb Gem with spectacular eye appeal. The centers are essentially untoned with amazing contrast, while hints of amber, orange, and violet grace the margins. Out of 10 PR67 Cameo coins graded by NGC, this is one of just three to have received the ★ designation, with only one numerically finer (1/15).
Ex: ANA Signature (Heritage, 7/2008), lot 577; Long Beach Signature (Heritage, 2/2009), lot 1364. PCGS# 86440

**1880 Seated Half Dollar, PR66 Cameo
None Numerically Finer at PCGS**

- 3127 1880 PR66 Cameo PCGS. CAC.** The contrast between the fields and devices is readily apparent on both sides of this Premium Gem example. Toning appears at the peripheries on both sides, with shades of turquoise, gold, copper, yellow, plum, and violet. The obverse exhibits a sharp strike, while a few areas of incompleteness are present on the reverse. An as-made lint mark appears near Liberty's mouth. Population: 18 in 66 (2 in 66+) Cameo, 0 finer (1/15). PCGS# 86441

**1884 Half Dollar, PR66 Cameo
Conditionally Rare**

- 3128 1884 PR66 Cameo NGC.** The availability of the 1884 proof half dollar benefits from the issue's 875-coin mintage — a fair total for the period — but Cameo representatives make up only a fraction of the surviving population. This Premium Gem example is sharply struck, with stark white-on-black contrast. A light golden halo around the peripheries is the only trace of toning. Census: 5 in 66 Cameo, 6 finer (1/15). PCGS# 86445

**1886 Half Dollar, Richly Toned PR66
Only 886 Proofs Struck**

- 3129 1886 PR66 PCGS. CAC.** As with other dates from the 1880s, the 1886 had a low total production because the various mints were primarily focused on churning out silver dollars under the provisions of the Bland-Allison Act. The 1886 follows that tradition with 5,000 circulation strikes and 886 proofs produced. Deep blue and rose-colored patina covers each side of this example, toning of sufficient depth that it partially subdues the mirrors in the fields. Held under a light, though, the mirrors jump to life. Pinpoint strike definition. Population: 12 in 66, 4 finer (1/15). NGC ID# 27UM, PCGS# 6447

**1887 Seated Half, PR66 Cameo
Exceptional Contrast**

- 3130 1887 PR66 Cameo NGC.** One of just 710 proofs produced, this untuned Premium Gem must be one of the most visually appealing survivors. The liquid fields offer deep reflectiveness; and the thickly frosted devices stand in sharp contrast to the surrounding mirrors. The strike is full except for a few rounded stars. Untoned and attractive. Census: 11 in 66 Cameo (2 in 66 ★ Cameo), 4 finer (1/15). PCGS# 86448

**1888 PR66 Half Dollar
Popular, Low-Mintage Date**

- 3131 1888 PR66 PCGS. CAC.** Dusky rose, golden-brown, aqua, and cream-gray hues envelop this sharply struck Premium Gem proof. Subtle remnants of a fingerprint in the right obverse field is barely worthy of passing mention. This was a low-mintage date for circulation strikes, since the Mint was legislatively obligated to strike inordinate numbers of silver dollars during the era. By extension, proofs are in high demand among date collectors. Ex: *Central States Signature* (Heritage, 4/2008), lot 1179. NGC ID# 27UP, PCGS# 6449

**1891 Half Dollar, PR66+
Only 600 Proofs Produced**

- 3132 1891 PR66+ PCGS. CAC.** Just 200,000 circulation strikes and 600 proofs were produced for the 1891 date — the final year of the Seated Liberty half dollar series. This colorful example is deeply mirrored and lustrous. Blue, purple, and red-orange toning dominates the obverse, while the reverse displays a halo of red-orange and blue-green. The devices are well-struck with light mint frost. This is a thoroughly attractive proof, earning the PCGS Plus designation and CAC-approved for eye appeal and quality. Population: 12 in 66 (1 in 66+), 1 finer (1/15). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

1893-O Half Dollar, MS66
Tied for the Finest Certified

3133 1893-O MS66 PCGS. Slight strike doubling appears at the lower reverse of this brilliant Premium Gem half dollar. Aside from the claw and arrow feathers on the reverse, all design elements are completely defined. The satin surfaces are almost entirely untuned with reflective fields. The upright mintmark is centered below the eagle's tail. The obverse has faint clash marks at the back of the neck. The reverse has light clash marks above and below PLURIBUS.

This piece is tied with one other NGC example in MS66, the finest they have graded. PCGS has seen five examples in MS66 with none finer (1/15). This issue is obtainable in lower Mint State grades, but like many other Barber half dollars, it is an important condition rarity in MS65 or finer grades. NGC has certified only eight coins in MS65 or MS66.
Purchased from U.S. Coins (11/2007). NGC ID# 24LL, PCGS# 6466

1893-S Barber Half Dollar, MS65
Low-Mintage Branch Mint Issue

3134 1893-S MS65 PCGS. Augustus Heaton published his seminal treatise on mintmarks in 1893, creating widespread collector interest in branch mint issues for the first time. The San Francisco Mint produced a modest mintage of 740,000 Barber half dollars that year, and it is possible that a contemporary collector obtained this delightful Gem directly from that facility. The 1893-S is a prime condition rarity in MS65 condition, and finer coins are virtually unobtainable.

The present coin exhibits sharply detailed design elements and lustrous, well-preserved surfaces with no mentionable distractions. Attractive shades of pink and golden-brown toning add to the outstanding eye appeal. Population: 7 in 65, 1 finer (1/15). NGC ID# 24LM, PCGS# 6467

**1914-S Barber Half, MS66+
Important Registry Set Coin**

- 3135 1914-S MS66+ PCGS. CAC.** The PCGS plate coin. The San Francisco Mint struck 992,000 half dollars in 1914, and the issue is about on par with the 1913-S in terms of rarity. The 1914-S is very rare in Premium Gem condition. PCGS reports just eight coins in MS66, and this is the sole representative to receive a Plus designation for quality within the assigned numeric grade (1/15). Shimmering luster percolates through a thin layer of lavender and golden-orange toning that blankets the mostly brilliant surfaces. The devices exhibit a nearly full strike with just a touch of softness over the eagle's right (facing) talon and arrow fletchings. Close examination fails to reveal any impairments worthy of mention. A remarkable example in all respects and an excellent opportunity for Registry Set specialists. NGC ID# 24NP, PCGS# 6531
-

PROOF BARBER HALF DOLLARS

**1892 Half Dollar, PR66 Cameo
Die Doubled Reverse**

- 3136 1892 PR66 Cameo PCGS. CAC.** The reverse is nicely die doubled, most evident on the peripheral legends. The doubling is very similar to FS-801, but that designation is for business strikes. The present well struck Premium Gem has a window of brilliance near the center of each side, while the borders offer iridescent sea-green, lavender-red, and straw-gold toning. PCGS# 86539
-

**1893 Barber Half Dollar, PR67
Only 792 Pieces Struck**

- 3137 1893 PR67 NGC.** The Barber half dollar saw 792 proofs struck in 1893. The population data indicate that surviving specimens are mostly in the PR62 to PR65 range. An attractive melange of cobalt-blue, orange-gold, violet, lavender, and yellow-gold toning adorns this Superb Gem. With the exception of the typically seen softness in the upper-right shield corner the design features are sharply struck. The surfaces of this coin have been very well cared for. Census: 18 in 67, 3 finer (1/15). NGC ID# 24NV, PCGS# 6540
-

**1902 Barber Half Dollar, PR66 Cameo
A Rare Contrasted Proof**

- 3138 1902 PR66 Cameo PCGS.** Cameo contrast was suppressed at the Philadelphia Mint beginning in 1902 as operations were underway at the new third mint building. The rarity of these pieces is clearly illustrated through PCGS population data. From 1892 to 1901, 25% of PCGS certified proof Barber half dollars are Cameo or Deep Cameo examples, and from 1902 to 1915, only 10% have contrast.

This brilliant Premium Gem Cameo proof has pristine silver surfaces with satin luster and deep mirrors. A hint of pale violet toning appears on the reverse. An exceptional example. Population: 8 in 66 (1 in 66+) Cameo, 5 finer (1/15). PCGS# 86549

WALKING LIBERTY HALF DOLLAR

1947 Walking Liberty Half, MS67+
Strong Registry Set Contender

3139 1947 MS67+ PCGS. CAC. The 1947 Walking Liberty half dollar is an underrated issue from a mintage of just over 4 million pieces. This was the final year of the Walking Liberty design and examples are prized by series specialists and type collectors alike. The 1947 can be located in lower Mint State grades without much difficulty, but it is very scarce at the MS67 grade level, and none have been certified in higher numeric grades (1/15).

The present coin is a high-end Superb Gem with well-detailed design elements that show just a touch of softness on the eagle's leg. The virtually pristine surfaces radiate vibrant mint luster and show hints of greenish-gold toning at the borders. Population: 55 in 67 (4 in 67+), 0 finer (1/15). NGC ID# 24SM, PCGS# 6630

FRANKLIN HALF DOLLARS

1952-S Franklin Half Dollar, MS67
Rare Example With Full Bell Lines
Tied for Finest Certified

3140 1952-S MS67 Full Bell Lines PCGS. CAC. The 1952-S Franklin half dollar claims a mintage of 5.5 million pieces, a small production total in the context of the series. Unfortunately, the issue was not especially well-produced, and coins with a decent strike and Full Bell Lines are elusive in today's market. The present coin is a dramatic exception to the rule, with well-detailed design elements and Full Bell Lines definition. This spectacular Superb Gem offers impeccably preserved, lustrous surfaces under attractive shades of greenish-gold and lavender toning. Eye appeal is terrific. Tied with one other coin for finest certified at either of the leading grading services, this coin should find a home in the finest collection or Registry Set. Population: 2 in 67 Full Bell Lines, 0 finer (1/15). NGC ID# 24T5, PCGS# 86663

1957-D Half, MS67 Full Bell Lines
Amplly Toned Condition Rarity

- 3141 1957-D MS67 Full Bell Lines PCGS. An important piece for the Registry enthusiast, toned silver-to-sage over part of each side with rainbow patina elsewhere that is centered on reddish-orange. Though Franklin's portrait shows a degree of softness as always, the Liberty Bell has full lines. Population: 14 in 67 Full Bell Lines, 0 finer (1/15). NGC ID# 24TF, PCGS# 86673 Base PCGS# 86673

1958 Franklin Half, MS67 Full Bell Lines
Registry Set Quality

- 3142 1958 MS67 Full Bell Lines PCGS. Vibrant mint luster illuminates consistently mottled olive-gold and lavender-blue toning on each side of this Superb Gem Full Bell Lines Franklin half. A lack of abrasions and well-defined motifs further contribute to the overall appeal. An important offering for the Registry Set collector, as this piece is among the finest certified at PCGS. Population: 14 in 67 (1 in 67+) Full Bell Lines, 0 finer (1/15). NGC ID# 24TG, PCGS# 86674

PROOF FRANKLIN HALF DOLLAR

1952 Half, PR66+ Deep Cameo
Only One Graded Finer at PCGS

- 3143 1952 PR66+ Deep Cameo PCGS. CAC. An exceptional coin without a doubt, this beautifully preserved, high-end Premium Gem well-deserves the Deep Cameo designation, as the contrast between the frosted devices and the mirrored fields is boldly pronounced. A tiny, faint toning spot appears in Franklin's hair below the B in LIBERTY. The 1952 proof mintage consisted of 81,980 coins, but Deep Cameo examples from this key proof date are rarely encountered. PCGS has assigned the PR66 grade to only eight such examples, this being the sole PR66 piece to receive the Plus designation, with only one finer (12/14). NGC ID# 27VC, PCGS# 96693

EARLY DOLLARS

1795 Dollar, B-7, BB-18, AU55
Condition Census Example

1795 B-5, BB-27 Flowing Hair Dollar, VF25
Head of 1795, Three Leaves Reverse

3144 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, AU55 PCGS. Die State I. On this Three Leaves variety with the Head of 1794, there is a pair of berries below the first S in STATES, and star 15 points well below the bust tip. This variety is generally found in the lower grades. Bowers' *Silver Dollar Encyclopedia* estimates that 500 to 800 examples exist in all grades.

This is a marvelous example, with original, problem-free grayish-gold surfaces on both sides. Only a light whisper of wear touches the surfaces, and the only relevant mark is a nick well-hidden in Liberty's rear hair curls. Some planchet adjustment marks appear in the central reverse. Since PCGS began attributing varieties, this piece is second finest B-7, BB-18 they have certified, behind a single MS66.

Ex: FUN Signature (Heritage, 1/2010), lot 2571; Central States Signature (Heritage, 4-5/2010), lot 2143. PCGS# 39973 Base PCGS# 6852

3145 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 NGC. The hands-down, most common variety of the Flowing Hair dollars, but still a perennial favorite for both type and early dollar specialists. The margins display a band of deep, gunmetal-blue toning on the obverse and smooth, medium-gray central elements. The reverse shows deep gray accents around light-gray devices, while the fields match the medium-gray patina of the obverse. Overall, the surfaces are a bit subdued yet virtually unmarked. A small planchet void on the rim between IB of LIBERTY is Mint-made and non-problematic. PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, XF45
B-5, BB-27 Three Leaves Variety**

- 3146** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. Die State III. The characteristic bar-shaped die line in back of Liberty's highest curl is prominent on this appealing Choice XF piece. Considerable luster still radiates from beneath the smoke-gray toning, with glints of copper. This piece is well-centered and well-struck, with good dentilation intact around the borders on both sides. The characteristic softness in the center reverse is noted on the eagle's breast. There are a couple of light adjustment marks, visible only under a loupe, at the juncture of the hair and neck, just below the ear. An appealing and highly collectible Choice XF Flowing Hair dollar. Housed in a green label holder.

Ex: *Denver Signature* (Heritage, 8/2006), lot 5275. PCGS# 39977 Base PCGS# 6852

**1797 10x6 Stars Dollar, VF20
Large Letters, B-3, BB-71**

- 3147** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF20 NGC. Bowers Die State III. The sole die marriage with a 10x6 star arrangement, which causes LIBERTY to be placed too far clockwise relative to the portrait. This glossy olive-green, chestnut-gold, and powder-blue example is lightly abraded overall, though we note a few thin horizontal lines near the eagle's right wing and slight reverse rim dings at 2:30 and 3:30. PCGS# 40004 Base PCGS# 6865

**1798 Heraldic Eagle Dollar, AU53
B-15, BB-112, Early Die State**

- 3148** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU53 PCGS. Bowers Die State I. Dusky walnut-brown and steel-gray toning encompasses well defined and exceptionally unabraded surfaces. Several parallel adjustment marks on the central obverse are of mint origin. The scarce early die state, described as "may not exist" in the Bowers reference. A majority of B-15 dollars have an attenuated obverse star 13, and an open shoulder curl near the date, but the present coin was struck before the obverse die was lapped. PCGS# 40029 Base PCGS# 6877

**1799 Dollar, 7x6 Stars, B-9, BB-166, XF40
Attractive Collector-Grade Coin**

- 3149** 1799 7x6 Stars, B-9, BB-166, R.1, XF40 PCGS. Bowers-Borckardt Die State II. This is an attractive rose-gray example of this popular and available variety, showing the diagnostic die lump on the reverse rim, just past the second S in STATES. The surfaces are well-struck and virtually unmarked, a great-looking collector-grade coin. A small die crack runs from the dentils upward but not reaching the 1 in the date. PCGS# 40057 Base PCGS# 6878

1802/1 Silver Dollar, XF40
Wide Date, B-3, BB-234

- 3150** 1802/1 Wide Date, B-3, BB-234, R.3, XF40 PCGS. Bowers Die State III. Medium golden-brown and powder-blue toning graces the fields. The high points are slate-gray. A charming Heraldic Eagle type coin with moderate wear and only a single visible mark, west of obverse star 9. An easily attributed Bolender variety, courtesy of the large die lump on the field near Liberty's forehead. PCGS# 40094 Base PCGS# 6899

SEATED DOLLARS

1850 Dollar, Well-Struck AU58
A Low-Mintage Issue

- 3151** 1850 AU58 PCGS. The silver-gray surfaces of this near-Mint dollar display considerable mint luster. The design elements are well-struck, with an especially bold LIBERTY. Only a couple of stars are soft in the center. The 1850 saw a low mintage of only 7,500 pieces. PCGS and NGC report fewer than 70 coins in mint condition. Population: 20 in 58, 34 finer (1/15). NGC ID# 24YM, PCGS# 6937

1871 Seated Dollar, MS64
Eye-Catching No Motto Type Coin

- 3152** 1871 MS64 PCGS. As one of only two issues in the entire series with a mintage topping 1 million coins, the 1871 Seated Liberty dollar is of seemingly unparalleled popularity as a No Motto type coin. Still, there is a dramatic plunge in the available population at the Gem grade level, and high-end Choice examples are the finest that are typically offered. The present piece is an absolutely outstanding coin for the grade and type, showing fresh mint frost over the devices and distinct semiprooflike mirroring in the fields. A few minute ticks on the figure of Liberty preclude a full Gem grade, but hardly inhibit the eye appeal, which is immense. Well-struck, with just a trace of light champagne toning over each side. Population: 40 in 64 (1 in 64+), 6 finer (1/15). NGC ID# 24ZG, PCGS# 6966

1872-CC Seated Liberty Dollar, AU53
Low-Mintage Branch Mint Issue

- 3153** 1872-CC AU53 PCGS. The 1872-CC Seated Liberty dollar is an elusive issue from a minuscule mintage of 3,150 pieces. Most of the coins were released into circulation, making Mint State specimens very rare. The low mintage became known to coin collectors in the 1890s, when Augustus Heaton wrote his seminal treatise on branch mint coins. Heaton mentioned the low mintage of the 1872-CC, and commented on its rarity. When discussing the different mintmark configurations of the Carson City issues, Heaton noted "1872 we have not seen." The awareness of the low mintage caused collectors to cull any specimens they found out of circulation at an early date, or the 1872-CC would be even more elusive than it is today.

This attractive AU53 example shows just a touch of wear on the well-detailed design elements and the pleasing surfaces are lightly abraded. Mingled shades of blue, gray, and pale gold toning blanket the surfaces on both sides. Population: 7 in 53, 36 finer (1/15). NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLAR

1869 Seated Dollar, PR64
Deeply Toned and Well-Struck

- 3154 1869 PR64 NGC.** Only 600 proofs were reportedly struck of the 1869 Seated Liberty dollar, and most certified examples today are in the Select or near-Gem grade levels, the latter the grade of the present piece. Deep pinkish-purple areas alternate with scattered silver on surfaces that show a few minor marks that determine the grade. The proof strike brings up all details to good advantage. Census: 51 in 64, 33 finer (1/15). NGC ID# 252R, PCGS# 7017

TRADE DOLLARS

1873-CC Trade Dollar, AU58
Nicely Toned, Inaugural Issue

- 3155 1873-CC AU58 PCGS.** The 1873-CC boasts the second-lowest mintage in the series. Only 124,000 dollars were produced, and CoinFacts estimates just 500 coins survive. Limited collector interest in mintmarks prior to 1893 and widespread circulation in the Orient account for the issue's high attrition rate. This near-Mint coin is delicately toned in shades of violet and golden-orange. Typical strike softness is confined to the upper obverse and the eagle's right (facing) talon, and there are no singularly distracting marks. NGC ID# 252X, PCGS# 7032

1876-CC Trade Dollar, MS62
Scarce Micro CC Variety
Type One Reverse

- 3156 1876-CC Type One Reverse MS62 NGC. Breen-5804.** A lustrous and essentially brilliant representative of this conditionally rare Carson City issue. Microgranularity is limited to the obverse margin near 5 o'clock, and the scattered small obverse field marks correspond to the grade. Breen-5804 is the widely spaced Micro CC with the distance between the Cs about equal to their combined height. Breen (1988) described the Micro CC as extremely rare, while Bowers (1993) called it "quite scarce." All 1876-CC Trade dollars have a Type One obverse, about half have a Type One reverse, and only about 15% have a Micro CC. The Tall CC variety is usual for the '76-CC.

Ex: Andy Geosits Collection of Trade Dollars (Heritage, 9/2002), lot 7252. PCGS# 40112 Base PCGS# 7042

**1877 Trade Dollar, Conditionally Rare MS65
Above-Average Strike**

- 3157 1877 MS65 PCGS. CAC.** The 1877 Trade dollar claims a mintage exceeding 3 million business strikes, many of which went into domestic circulation or were exported, helping explain why relatively few are known in mint condition. Gem and finer pieces are quite rare. The present MS65 offering displays a silver-white obverse that cedes to whispers of light tan and lavender on the reverse. The design elements are much better struck than usually seen on this typically weak issue, though Liberty's head and the adjacent stars are soft. We mention two minute round marks in the field just right of Liberty's right (facing) elbow and a few linear marks on the lower part of the left (facing) wing solely for identification purposes. Nevertheless, this is a nicely preserved example well deserving of the CAC label. Population: 11 in 65, 2 finer (1/15). NGC ID# 253C, PCGS# 7044

**1877-CC Dollar, MS63
Strongly Defined Throughout**

- 3158 1877-CC MS63 NGC.** The Nevada mint produced 531,000 Trade dollars between June and August 1877. An additional run of 3,000 coins was completed in December. Of the supposed 400 survivors, less than one-third remain in Uncirculated condition. Select representatives such as this are very scarce. The largely brilliant surfaces feature vibrant mint luster and excellent strike definition on Liberty's olive branch, the stars, and the eagle's talons. A few minute ticks are scattered over each side. Census: 21 in 63, 10 finer (1/15). NGC ID# 253D, PCGS# 7045

**1878-CC Trade Dollar, MS61
In-Demand Key Date**

- 3159 1878-CC MS61 NGC.** Ex: Richmond Collection. The 1878-CC Trade dollar is the lowest-mintage and final circulation strike issue in the series. It is, therefore, highly coveted in all grades. Only 97,000 coins were struck by the Carson City Mint before Treasury Secretary Sherman mandated that production of regular-issue Trade dollars cease. Bowers adds in his *Silver Dollars and Trade Dollars of the United States* (1993): "On July 19, 1878, 44,148 undistributed trade dollars went to the melting pot. All must have been dated 1878-CC, many from the 41,000 delivered in February." Approximately 350 pieces are extant in all grades. This pleasingly toned survivor is well-struck with a hint of softness on Liberty's head and olive branch. Luster emanates from beneath the violet-gray patina, which effectively conceals the evenly scattered abrasions. Census: 10 in 61, 17 finer (1/15).
Ex: Richmond Collection II (David Lawrence, 11/2004), lot 1555. NGC ID# 253F, PCGS# 7047

PROOF TRADE DOLLAR

**1881 Trade Dollar, PR65
Iridescently Toned and Reflective**

- 3160 1881 PR65 PCGS.** This sharply detailed Gem, from a proof-only mintage of 960 pieces, displays spectacular iridescent toning. The attractive shades of emerald-green and cobalt-blue mingle in a breathtaking play of colors over deeply mirrored fields. Only a few minor hairlines are present to prevent an even finer grade. Population: 37 in 65, 11 finer (1/15). NGC ID# 27YT, PCGS# 7061

MORGAN DOLLARS

**1878 Morgan Dollar, MS66
7 Tailfeathers, Reverse of 1879**

- 3161 1878 7TF Reverse of 1879 MS66 PCGS.** The slanting top arrow feather identifies the popular Reverse of 1879. The creamy, well-preserved surfaces of this remarkable Premium Gem show no mentionable distractions and radiate vibrant cartwheel mint luster. The design elements are sharply detailed, adding to the outstanding eye appeal. Population: 20 in 66, 0 finer (1/15). NGC ID# 253L, PCGS# 7076

**1878-CC Dollar, MS66
Popular First CC-Mint Morgan**

- 3162 1878-CC MS66 PCGS.** As the first Morgan dollar from the Carson City Mint, the 1878-CC is always in demand. The mostly brilliant, well-preserved surfaces of this delightful Premium Gem show a few hints of pink toning and display vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded only six numerically finer examples (1/15). NGC ID# 253M, PCGS# 7080

1878-S Morgan Dollar, MS67
Exceptional First-Year Type Coin

3163 1878-S MS67 PCGS. A magnificent Superb Gem, from the first year of the Morgan dollar design, this coin exhibits razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. Eye appeal is tremendous. Population: 31 in 67 (1 in 67+), 1 finer (1/15). NGC ID# 253R, PCGS# 7082

1879-CC Morgan Dollar, MS64+
Seldom Available Finer

3164 1879-CC MS64+ PCGS. CAC. Although not heralded to the extent of the 1889-CC, the 1879-CC is a significant key issue among Carson City Morgan dollars. Many were likely melted under the terms of the Pittman Act of 1918, and only a little more than 4,000 pieces were offered in the GSA sales of the early 1970s, compared to tens of thousands of several other dates from this Mint. This piece displays subtle light golden toning over sharp, frosty devices. Substantial semiprooflike mirroring is seen in the fields, and only a few light marks on the cheek limit the grade. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS64 Prooflike
Normal Mintmark, Brilliant-White Coin

3165 1879-CC MS64 Prooflike PCGS. A lack of silver bullion at the Carson City Mint contributed to the low mintage of this early CC issue, which trails only the 1889-CC mintage in scarcity. Prooflike examples are scarcer still, and highly prized. This brilliant-white example offers a clean cheek on Liberty and nice contrast with the reflective fields. The expected abrasions from coin-to-coin contact are less prevalent than on other coins of similar grade. Nice mint luster rolls across both sides. Rare any finer (and much more expensive). Population: 82 in 64 (4 in 64+) Prooflike, 9 finer (1/15). NGC ID# 253T, PCGS# 7087

**1880-CC Morgan Dollar, MS67
None Numerically Finer at PCGS**

3166 1880-CC MS67 PCGS. Two reverse designs were used to strike silver dollars in 1880. This coin exhibits the more available Reverse of 1879, with a slanting top arrow feather. Experts estimate the mintage of this type as approximately 466,000 pieces (out of 591,000 examples for the year). The 1880-CC is not difficult to locate in lower Mint State grades, but it is conditionally rare at the MS67 level, and no coins have been certified in higher numeric grades (1/15).

This delightful Superb Gem exhibits sharply detailed design elements and vibrant frosty mint luster. The virtually pristine surfaces show a few highlights of golden-brown toning and eye appeal is terrific. Population: 31 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 2542, PCGS# 7100

**1884 Morgan Dollar, MS67
Vivid Multicolor Toning**

3167 1884 MS67 PCGS. This spectacular Superb Gem displays vivid shades of electric-blue and golden-brown toning on the obverse, while the reverse remains essentially brilliant. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. Population: 47 in 67 (7 in 67+), 3 finer (1/15). NGC ID# 254L, PCGS# 7150

**1888-O 'Scarface' Dollar, MS61
Dramatic Top 100 Variety**

3168 1888-O Scarface, VAM-1B3, MS61 PCGS. CAC. A Top 100 Variety. The Top 100 Guide refers to VAM-1B as "the most dramatic die break in the Morgan dollar series" and adds "Rare in all grades." Lustrous with faint green-gold toning and a soft central strike. Moderate marks on the portrait determine the grade. Ex: *Houston Signature (Heritage, 11/2012)*, lot 4244, which realized \$4,993.75. PCGS# 133918 Base PCGS# 87184

**1888-S Morgan Dollar, MS66
Sharply Detailed and Brightly Lustrous**

3169 1888-S MS66 PCGS. From a smallish mintage of 657,000 pieces, the 1888-S Morgan dollar seldom exhibits the sharply detailed design elements found on this delightful Premium Gem. The well-preserved surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 27 in 66 (2 in 66+), 3 finer (1/15). NGC ID# 2557, PCGS# 7186

**1889 Morgan Dollar, MS66+
Few Certified Finer**

3170 1889 MS66+ PCGS. CAC. An especially sharp strike joins vibrant mint luster and brilliant, untuned surfaces for stunning eye appeal, as confirmed by the PCGS Plus designation and the accompanying CAC endorsement. Frosty silver luster converges at the apex of the central motifs for strong cartwheel flash. The cheek is clean, and the fields show virtually no marks. PCGS reports just four coins in a finer numeric grade, and NGC has seen but a single finer example (1/15). NGC ID# 2558, PCGS# 7188

1889-CC Morgan Dollar, AU53
Key Carson City Issue

- 3171 1889-CC AU53 PCGS.** From a mintage of 350,000 pieces, the 1889-CC is the rarest Morgan dollar from the Carson City Mint. This attractive AU53 specimen shows just a touch of wear on the hair above the ear and the eagle's breast, and the lightly abraded surfaces retain some of their original mint luster. Subtle highlights of greenish-gold and lavender visit the surfaces on both sides. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar
Uncirculated Details

- 3172 1889-CC — Questionable Color — PCGS Genuine. Unc. Details.** Blended chestnut-brown and gunmetal toning embrace this key date Carson City silver dollar. The toning is much less inoffensive than implied by the PCGS designation. Marks are minimal aside from a solitary obverse hair-thin line from 7:30 to the ear. Luster illuminates the borders, legends, curls, and wings. NGC ID# 2559, PCGS# 7190

1889-S Morgan Dollar, Brilliant MS66+
Sharp Design Definition

- 3173 1889-S MS66+ PCGS.** This is a flashy, all-brilliant Premium Gem example from a relatively small mintage of just 700,000 coins. Strong striking characteristics and radiant luster tend to be the rule for this S-mint issue, as is the case with this coin. A small struck-in grease mark on Liberty's neck and a minute planchet flake to the left of star 13 (both as-made) are mentioned for accuracy, but they do not detract. PCGS shows just a single coin finer (1/15). NGC ID# 255B, PCGS# 7194

1891-CC Dollar, MS64 Deep Mirror Prooflike
Popular 'Spitting Eagle' VAM-3 Variety

- 3174 1891-CC MS64 Deep Mirror Prooflike PCGS. CAC. VAM-3.** A Top 100 Variety. This impressive Choice example shows the die gouge below the eagle's beak that gives this variety its "Spitting Eagle" nickname. The design elements are well-detailed and richly frosted, contrasting boldly with the deeply reflective fields. Population: 54 in 64 Deep Mirror Prooflike, 1 finer (1/15). NGC ID# 255H, PCGS# 97207

1891-O Dollar, MS65
Exceptional Silver Luster

- 3175 1891-O MS65 PCGS. CAC.** Far sharper than most representatives of this strike-challenged New Orleans issue, with minor merging of the hair strands above the ear. Wholly untoned and brilliantly lustrous, only the most forgivable marks exist, and they are few and far between. The fact that PCGS has graded no coins numerically finer makes this example a candidate for the finest Morgan dollar collection. Population: 107 in 65 (3 in 65+), 0 finer (1/15). NGC ID# 255J, PCGS# 7208

1893-CC Silver Dollar, MS63
Upper-End for the Grade

- 3176 1893-CC MS63 PCGS.** Radiant, brilliant cartwheel luster captivates the eye on this Select 1893-CC Morgan. The central design elements are remarkably crisp for this issue which is frequently seen with noticeable softness over Liberty's ear, and grade-limiting abrasions are surprisingly minor. The result is a high-quality and distinctly appealing representative of this final Carson City silver dollar. NGC ID# 255S, PCGS# 7222

**1893-S Dollar, AU50
Problem-Free Surfaces**

- 3177 1893-S AU50 PCGS.** This famous keystone date claims the single-lowest mintage among all Morgan dollar issues. The West Coast facility produced a paltry 100,000 examples in 1893 in the wake of the repeal of the Sherman Silver Purchase Act. Accordingly, the 1893-S is exceedingly elusive across all grade levels. CoinFacts estimates that only 9,948 representatives are extant, most of which survive in well-worn condition. The issue ranks among Garrett and Guth's *100 Greatest U.S. Coins*, and it arguably represents the pinnacle of achievement for a Morgan dollar collector. This is a pleasing AU representative with just the slightest high-point wear evident. Each side is silvery with light accents of golden around the devices. No mentionable abrasions are seen on either side. Sure to bring a significant premium in this grade and problem-free. NGC ID# 255U, PCGS# 7226

**1894 Dollar, Select Mint State
Famous Low-Mintage Issue**

- 3178 1894 MS63 PCGS.** The lowest-mintage Morgan dollar issue of the year, at 110,000 pieces, and a famous rarity of the series. This is a bright silver example with a dusting of pink-peach at the margins. Though the portrait has light abrasions and a small rim nick near the E in E PLURIBUS UNUM, the overall eye appeal is good for a Select coin. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS63
Key Philadelphia Mint Issue**

- 3179 1894 MS63 PCGS.** An attractive Select specimen of this challenging, low-mintage Philadelphia issue, with sharply detailed design elements and lustrous surfaces that show just a few grade-consistent contact marks on both sides. A few hints of pale gold and turquoise toning visit the moistly brilliant surfaces. NGC ID# 255V, PCGS# 7228

**1895-S Morgan Dollar, MS61
Just 400,000 Pieces Struck**

- 3180 1895-S MS61 PCGS. CAC.** A slight showing of gold and stone-gray toning visits the lustrous, silver surfaces of this scarce San Francisco issue. The fields — nearly prooflike when struck — are now less-so from bagmarks and the intermittent toning. Still, the coin displays a Mint-fresh quality and an above-average strike. CAC endorsed. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS61
Challenging Issue in High Grade**

- 3181 1895-S MS61 NGC. CAC.** From a low mintage of just 400,000 pieces, the 1895-S Morgan dollar is a challenging issue, especially in high grade. This attractive Mint State specimen displays sharply detailed design elements, with lustrous surfaces that show a scattering of grade-consistent contact marks on both sides. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS63+
Low-Mintage Issue**

- 3182 1895-S MS63+ PCGS.** A high-end Select specimen of this low-mintage Morgan dollar, with well-detailed design elements that show just a touch of the usual softness on the hair above Liberty's ear. The lustrous surfaces show a few scattered minor contact marks under delicate shades of lavender-gray and pale gold toning. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS62 Prooflike
Seldom Seen Finer**

- 3183 1895-S MS62 Prooflike PCGS.** From a low mintage of 400,000 pieces, the 1895-S Morgan dollar is known for excessive surface marks and the issue is seldom encountered in high grade. This impressive MS62 example offers sharply detailed design elements and reflective prooflike fields with a moderate number of contact marks for the grade. An obverse planchet flaw near the rim at 5 o'clock makes a good pedigree marker. Population: 23 in 62 Prooflike, 36 finer (1/15). NGC ID# 255Z, PCGS# 7239

**1896-S Morgan Dollar
Elusive Near-Gem Example**

- 3184 1896-S MS64 PCGS.** The 1896-S Morgan dollar claims a mintage of 5 million pieces, but high-quality specimens are much more difficult to locate than that generous production total would suggest. This well-detailed Choice example offers lustrous well-preserved surfaces under attractive shades of pink and greenish-gold toning. NGC ID# 2564, PCGS# 7244

**1900 Morgan Dollar
Superb Gem, Near-Perfect Surfaces**

- 3185 1900 MS67 PCGS. CAC.** It would take dogged determination and a great amount of luck to find an equal to this Superb Gem Philadelphia example. The silver-white surfaces display thick mint frost and essentially unmarked surfaces. The strike is a trifle short of full, but far above the norm for this issue. Flashy luster completes the appeal. No numerically higher-graded examples exist at PCGS or NGC. Population: 38 in 67 (3 in 67+), 0 finer (1/15). NGC ID# 256E, PCGS# 7264

1901-S Morgan Dollar, Brilliant MS67
Finest Example Offered to Date
Tied for Finest Certified

3186 1901-S MS67 PCGS. Morgan dollar output at the San Francisco facility declined to 2.3 million coins in 1901. The issue is among the most elusive S-mint dates since 1896. Examples were slowly paid out by the San Francisco Mint throughout the first half of the 20th century, but few coins surfaced during the Treasury release of the early 1960s. The issue is scarcely seen in Gem condition, and the certified population declines exponentially in MS66. The issue is extremely rare in MS67. Only three grading events are reported at PCGS and NGC combined, all of them by the former service (1/15).

This magnificent representative is the finest example we have offered to date. Frosty luster cartwheels over the fully brilliant and expectedly pristine surfaces. While coins usually come lightly struck, this piece displays a bold impression. Only minor softness is noted over Liberty's ear and the eagle's breast feathers. Expect strong bidding from advanced Morgan dollar collectors and Registry Set enthusiasts when this lot is called. NGC ID# 256L, PCGS# 7276

1902-O Dollar, MS67
Exceptional Quality and Eye Appeal

3187 1902-O MS67 PCGS. CAC. The 1902-O was once considered a better date in the series prior to the Treasury release of the early 1960s. Hundreds of thousands of examples surfaced at that time, significantly altering the availability of Uncirculated representatives. Today, the issue is plentiful through Gem condition and only becomes scarce in MS66. Coins as fine as this, however, are highly sought-after condition rarities. Unlike the typical 1902-O representative, this example exhibits impressive detail above Liberty's ear and on the eagle's breast feathers and talons. The brilliant and lustrous surfaces are essentially void of marks save for a few unimportant ticks. An exceptional coin with unrivalled technical quality and eye appeal. Population: 17 in 67, 0 finer (1/15). NGC ID# 256N, PCGS# 7280

PROOF MORGAN DOLLARS

1878 8TF Dollar, PR64 Cameo
Low Mintage Proof Subtype

3188 1878 8TF PR64 Cameo PCGS. CAC. VAM-14.3. Icy motifs rise in full detail above glassy fields. The golden-brown, jade-green, and lilac peripheral toning is particularly attractive on the reverse. ONE DOLLAR and Liberty's eyelid are die doubled. A very scarce proof subtype. From the reported mintage of 500 pieces, it appears that less than half that number have survived, if third party data and resubmissions over 30 years are considered. PCGS# 87311

**1882 Morgan Dollar, PR67 Cameo
Attractive Multicolor Toning**

3189 1882 PR67 Cameo PCGS. CAC. A total of 1,100 Morgan dollar proofs were struck 1882 and included in silver proof sets along with the Trade dollar. The coins were struck from heavily polished dies at slow speeds and received multiple blows from the coining press. Consequently, examples from this issue are typically of excellent technical quality. This remarkable Superb Gem proof displays bold Cameo contrast, uninhibited by multicolor toning in shades of orange, blue, green, and purple. A layer of frost blankets the relief elements, while the fields show a strong degree of reflectivity. Inspection with a loupe yields no mentionable signs of contact. Population: 8 in 67 Cameo, 2 finer (1/15). PCGS# 87317

**1896 Morgan Dollar, PR68 Deep Cameo
Tied for Finest at PCGS**

3191 1896 PR68 Deep Cameo PCGS. The silver proofs of the late 1890s rank among the best produced and most attractive coins of the 19th century. The Mint was capable of exceptional products. Many numismatists share that observation. Even lower-grade pieces are attractive, and higher grade proofs are stunning. Mint workmen must have made a special effort to create wonderful coins for the collecting clients.

Just 762 proof Morgan dollars were struck in 1896, originating from two different die pairs. That fact helps to explain the high quality of survivors. The minting process serves to polish the devices of each die. The deepest cameo contrast occurs on new dies, with diminished contrast as more pieces are minted. The use of a second die pair effectively doubles the number of Deep Cameo and Cameo proofs.

This 1896 is a lovely Superb Gem Deep Cameo proof with brilliant silver surfaces and outstanding contrast. Both sides are fully detailed, including the individual hair strands over Liberty's ear. The surfaces are virtually flawless, with deeply mirrored fields around the lustrous, frosted silver devices. Toning is non-existent with a uniformly brilliant appearance over each side. This is a marvelous piece for a world-class type set or a specialized collection of proof Morgan dollars. While NGC has certified three finer pieces, this example is tied for the finest that PCGS has graded. Population: 3 in 68 Deep Cameo, 0 finer (1/15). PCGS# 97331

**1894 Silver Dollar, PR64
Undesignated Cameo Contrast**

3190 1894 PR64 PCGS. CAC. Delicate orange-gold toning adorns the rims of this well struck and flashy Choice proof. The portrait, eagle, and wreath are frosty, but a Cameo designation is absent due to the age of the green label holder. The eye appeal is exceptional despite a tiny spot on the field beneath Liberty's cap. A better date due to the rarity of the associated business issue. NGC ID# 2577, PCGS# 7329

1897 Morgan Dollar, PR65
Vivid Reverse Toning

- 3192 1897 PR65 PCGS.** This lovely Gem proof Morgan dollar exhibits razor-sharp strike details and gorgeous red-brown and electric-blue peripheral toning on the obverse, surrounding untuned fields and centers. Dense cobalt-blue and purple-red patina covers the reverse. A conditionally scarce, low-mintage issue of 731 proofs. Population: 22 in 65, 29 finer (1/15).
Ex: Dallas Signature (Heritage, 10/2008), lot 1543; Boston Signature (Heritage, 8/2010), lot 5413. NGC ID# 27ZV, PCGS# 7332

1902 Morgan Dollar, PR65
Only 777 Pieces Struck

- 3193 1902 PR65 PCGS.** The Mint in 1902 and thereafter changed the way it produced proof dies, polishing the recesses so that there was little contrast, as a rule, between the fields and devices. The present Gem proof shows the resulting "chrome" or no-contrast appearance, but is quite appealing nonetheless, with good radiance and few distractions aside from a couple of thin slide marks on the cheek. Population: 25 in 65 (1 in 65+), 27 finer (1/15).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2789; Los Angeles Signature (Heritage, 8/2009), lot 2067. NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

1934-S Peace Dollar, Vibrant MS64
Superior Quality for the Grade

- 3194 1934-S MS64 PCGS.** Seldom does one find a Peace dollar with vibrant luster, and rarely does one find a 1934-S with such. This Choice example is a remarkable exception, showcasing radiant, frosty mint bloom that is devoid of toning. Moreover, the surface quality is superb for the MS64 grade level, with absolutely no detracting abrasions; we instead note only some faint luster grazes on Liberty's cheek and the eagle's feathers that limit the grade. Well-struck and exceptionally eye-appealing. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS65
In-Demand Series Key

- 3195 1934-S MS65 PCGS.** Despite the smallish mintage of just over 1 million pieces, contemporary collectors overlooked the 1934-S Peace dollar, and relatively few high-quality examples were saved at the time of issue. This well-detailed Gem is remarkably free of surface flaws, but the luster is slightly subdued by the light golden-tan patina. PCGS has graded 27 numerically finer examples (1/15). NGC ID# 257Z, PCGS# 7377

PROOF SET

1867 10-Piece Proof Set, All NGC-Certified
Cent Through Seated Dollar, PR64+ to PR67 ★

3196 1867 10-Piece Proof Set, PR64+ Cameo to PR67 ★ Cameo NGC. This uniformly high-grade proof set has all coins certified by NGC and each coin is designated as either a Cameo or Ultra Cameo. Included are:

Cent PR67 ★ Red Cameo. This early date Indian cent is challenging to locate with full red color. This is a spectacular, bright-red example with profound depth of mirrors and strong field-device contrast.

Two Cent Piece PR65+ Red Cameo. Uniformly bright surfaces tend toward the yellow end of the red spectrum. The fields are glassy-smooth and brightly reflective with stark contrast against the frosted devices.

Three Cent Nickel PR66 Cameo. Among the lower-mintage, early proofs in this series, only 625 proofs are estimated to have been struck. This is a brilliant example with deeply mirrored fields and softly frosted devices. Mint-made die striations in the reverse field run slightly diagonal to the ribbing on the Roman numeral.

Three Cent Silver PR66+ Cameo. An exceptionally well-produced example of this odd type coin, the strike details are full on each side. Additionally, the fields flash strongly through the considerable blue and rose-colored toning.

No Rays Shield Nickel PR66 Cameo. Each side is brilliant with noticeable mint frost over the devices. This frost, when set against the mirrored fields gives the coin its cameo effect. A sharp example of this second-year type coin.

Half Dime PR67 Ultra Cameo. Another all-brilliant proof, this example displays remarkably strong contrast between the fields and devices, explaining the Ultra Cameo designation. The devices are fully struck and the surfaces are remarkably clean, as one would expect from a PR67.

Dime PR66 Ultra Cameo. A completely untoned proof, the fields display the depth of mirroring expected with the added touch of thick mint frost over the devices, the result being an Ultra Cameo. Close inspection reveals a few randomly placed lint marks that were struck into the planchet after wiping the dies (the lint from the cloth then adhered to the die and was subsequently struck into the coin). The strike is pinpoint sharp in all areas except the upper-left leaf of the wreath.

Quarter PR67+ Cameo. Remarkably deep mirrors are seen in the fields on each side. With such mirroring it takes only the slightest bit of mint frost on the devices to give a cameo effect to the coin. This coin, however, goes significantly beyond "slight" mint frost. Each side is mostly brilliant with just a hint of light peripheral color. A curious strike anomaly is seen on this piece. The coin was struck from slightly misaligned dies, the effect is full strike definition on the left part of each side and some weakness of detail seen on the right portion. This is rarely seen on proofs.

Half Dollar PR65 Cameo. Another nearly brilliant proof, this one shows just the slightest accent of golden patina around the margins. The strike is complete on each side and there are no post-striking defects visible to the unaided eye.

Seated Dollar PR64+ Cameo. A remarkable proof type coin for any date Seated dollar. Each side is brilliant and the contrast between the fields and devices is profound. The strike details are complete throughout. Only close examination with a loupe shows the light hairlines that keep this flashy coin from an even higher grade. (Total: 10 coins)

GOLD DOLLARS

1850-C Gold Dollar, MS63 Condition Census Example

- 3197 1850-C MS63 PCGS. Variety 1.** Among the finest known examples of this low mintage (6,966 pieces) Charlotte issue, with a surviving population of 150-250 examples in all grades. Both sides are fully struck, uncommon for the remote branch mint facility, although the '50-C gold dollar was one of its better-made issues. The apricot-gold and lime-green surfaces are mildly prooflike and are devoid of mentionable marks. For those who wish to track appearances of high grade pieces, we note a pinpoint carbon spot at the 1 o'clock point of the 11 o'clock star. Population: 2 in 63, 0 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2012), lot 4721. NGC ID# 25BG, PCGS# 7510

1851-D Gold Dollar, MS62 Conditionally Rare Dahlonga Type Coin

- 3198 1851-D MS62 PCGS. Variety 3-E.** The leaf is positioned centrally under the second 1 in the date. From a mintage of just 9,882 coins, the 1851-D is the secondmost available date in the series among Dahlonga issues after the 1849-D. Winter (2013) estimates that only 15 to 20 Mint State representatives are extant, primarily in MS60 and MS61. This example features light yellow-gold surfaces. The strike is generally sharp with typical softness on the stars below Liberty's portrait, on LLA in DOLLAR, and on 85 in the date. Good for type. Population: 15 in 62, 7 finer (1/15). NGC ID# 25BM, PCGS# 7515

1852 Gold Dollar, MS66 Popular Type One Issue

- 3199 1852 MS66 NGC.** This spectacular Premium Gem exhibits just a touch of softness on the date, but the portrait is sharply detailed. The well-preserved yellow and rose-gold surfaces are free of mentionable defects and radiate vibrant mint luster on both sides. Census: 18 in 66 (1 in 66 ★), 5 finer (1/15). NGC ID# 25BP, PCGS# 7517

1852-D Gold Dollar, AU58 Seldom Encountered Finer

- 3200 1852-D AU58 PCGS. Variety 4-E.** The 1852-D gold dollar claims a low mintage of 6,360 pieces, with a single die variety known for the date and a surviving population of 125-175 examples in all grades. This well-detailed near-Mint example displays just a trace of wear and a few minor abrasions, along with a number of interesting clash marks on both sides. Population: 15 in 58, 13 finer (1/15). NGC ID# 25BS, PCGS# 7519

1855 Gold Dollar, MS65
Excellent Type Two Example

3201 1855 MS65 PCGS. The 1855 gold dollar is always in demand as a representative of the short-lived Type Two design. From a mintage of 758,269 pieces, the 1855 is slightly scarcer in today's market than its 1854 counterpart. Despite the substantial production total, the 1855 is quite elusive at the MS65 grade level, as relatively few examples were saved by contemporary numismatists.

This impressive Gem features well-detailed design elements that show just a touch of the always seen softness on the date and denomination. The 1 in the denomination shows signs of recutting. The orange-gold surfaces are well-preserved, with vibrant, satiny mint luster. Population: 42 in 65 (1 in 65+), 17 finer (1/15). NGC ID# 25C4, PCGS# 7532

1858-D Gold Dollar, AU58
Low-Mintage Dahlonga Date

3202 1858-D AU58 PCGS. Variety 10-M. A lovely peach-gold Borderline Uncirculated Dahlonga dollar. The strike is above average, particularly on the second S in STATES, although the R in AMERICA shows softness. Marks are trivial except for a small bright area on the field beneath the bust truncation. A scant mintage of 3,477 pieces ensures the rarity. Population: 30 in 58, 30 finer (1/15). NGC ID# 25CJ, PCGS# 7549

PROOF GOLD DOLLAR

1886 Gold Dollar, PR67 Deep Cameo
Finest-Certified Example at PCGS

3203 1886 PR67 Deep Cameo PCGS. CAC. A fairly generous mintage of 1,016 proof gold dollars was accomplished in 1886, but the issue is much more difficult to locate than that large production total suggests. Perhaps 100-140 examples survive in all grades, with many coins showing alloy spots and minor impairments. This magnificent Superb Gem is the single-finest-certified example at PCGS. The design elements exhibit razor-sharp definition throughout, with a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. The light yellow-gold surfaces are impeccably preserved and eye appeal is tremendous. Population: 1 in 67 Deep Cameo, 0 finer (1/15). NGC ID# 25EW, PCGS# 97636

CLASSIC QUARTER EAGLE

1839-O Quarter Eagle, AU55
Popular Obverse Mintmark

- 3204 1839-O AU55 PCGS. Variety 27.** High Date, Wide Fraction. The more available of two 1839-O quarter eagle die pairs, though still scarce in an absolute sense and in high demand for its obverse New Orleans mintmark. This Choice AU example retains considerable luster in its radiant yellow-gold fields. Interior detail is solid, though the stars around the portrait are flat and the reverse shows late-state die weakness. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1843-D Liberty Quarter Eagle, MS62
Condition Census Example

- 3205 1843-D Small D MS62 PCGS. Variety 4-H.** The 1843-D Liberty quarter eagle claims a mintage of 36,209 pieces, making it the most available quarter eagle from the Dahlonega Mint. Four die varieties are listed in Doug Winter's series reference, all using the same obverse. This coin represents Variety 4-H, with a small, low mintmark. The 1843-D is the number one choice of mintmark type collectors seeking a quarter eagle from this famous Southern mint.

The present coin is an attractive MS62 example, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster throughout. A spidery die crack is seen from the tip of the bust to the inner point of star 1. Eye appeal is outstanding. This coin should rank in the lower half of the Condition Census for the date. Housed in a green label holder. Population: 5 in 62, 2 finer (1/15). NGC ID# 25GP, PCGS# 7730

**1851 Liberty Quarter Eagle, MS66
Second-Finest Coin at PCGS, Ex: Bass**

- 3206 1851 MS66 PCGS.** Ex: Bass Collection. From a large mintage of 1.3 million pieces, the 1851 Liberty quarter eagle is reasonably available in most grades, but it is a prime condition rarity in MS66 and finer coins are virtually unobtainable. This delightful Premium Gem is one of the finest survivors and traces its history to the famous collection of Harry W. Bass, Jr., a connoisseur with an eye for quality that has seldom been equaled.

The design elements of this delightful specimen are well-detailed and the honey-gold surfaces radiate vibrant mint luster on both sides. No mentionable distractions are evident and eye appeal is terrific. Population: 1 in 66, 1 finer (1/15).

Ex: *Fairfield Collection* (Bowers and Ruddy, 10/1977), lot 1524; *Harry W. Bass, Jr. Collection, Part IV* (Bowers and Merena, 11/2000), lot 177. NGC ID# 25HL, PCGS# 7759

**1851-O Quarter Eagle, MS61
Repunched Date**

- 3207 1851-O MS61 NGC. Variety 1.** Later die state. This variety is of special interest to collectors of New Orleans gold as the date was noticeably double punched into the die. The earliest state shows all four digits. This later state still retains all of the base of the too-low 1 below the dominant (final) 1, but just the faintest lunule of the bottom of the 8 can be seen below the dominant 8. The 1851-O is one of the more frequently encountered O-mint quarter eagles, but most examples are seen in VF or XF condition. Few Uncirculated examples are known, especially considering the relatively high mintage of 148,000 pieces. This piece shows a bright mixture of yellow- and orange-gold color, and a few small field marks are expected for the grade. As usual, the reverse shows significantly less high-point detail than the obverse devices. NGC ID# 25HP, PCGS# 7762

**1905 Quarter Eagle, High-End Superb Gem
Powerful Mint Luster**

- 3208 1905 MS67+ PCGS.** Robust visual appeal supports the high technical quality visible on both sides of this impressive Superb Gem quarter eagle. The frosted surfaces glitter with captured mint luster, and the strike is amazingly full. Importantly, this example is one of just two coins to earn the valuable PCGS Plus designation at the grade level, and only two pieces are graded numerically finer at the service. Population: 72 in 67 (2 in 67+), 2 finer (1/15). NGC ID# 25LW, PCGS# 7857

PROOF LIBERTY QUARTER EAGLE

1905 Liberty Quarter Eagle, PR64
144 Examples Struck

- 3209 1905 PR64 PCGS. This attractive Choice proof exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The well-preserved lemon-yellow surfaces show a few highlights of orange and a couple of minor contact marks that define the grade. Population: 23 in 64 (1 in 64+), 32 finer (1/15). NGC ID# 288V, PCGS# 7931

INDIAN QUARTER EAGLES

1911-D Two and a Half, AU55
Bold D Mintmark

- 3210 1911-D AU55 PCGS. The 1911 *Mint Director's Report* explained: "The gold quarter eagle is a coin for which there is no demand for business uses. There is a call for them each year, about the holiday season, for gift purposes, and during the remainder of the year they drift back to the Treasury." Hence the Denver Mint's low issuance of just 55,680 pieces in 1911. This example features a bold D mintmark and pleasing sun-gold coloration. The headdress and breast feathers are well-detailed. Only a few small marks in the left obverse field are worthy of mention. NGC ID# 2894, PCGS# 7943

1914-D Quarter Eagle, MS64+
Overlooked, Underrated Issue

- 3211 1914-D MS64+ PCGS. CAC. From a mintage of 448,000 pieces, the 1914-D Indian quarter eagle was overlooked by contemporary collectors and few high-quality examples were saved for posterity. This high-end Choice example is sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. PCGS has graded 47 numerically finer examples (1/15). NGC ID# 2899, PCGS# 7947

PROOF INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, PR58
First Year of Design

- 3212 1908 PR58 PCGS. The 1908 proof quarter eagle was struck using the heavy matte texture, and is popular as the first year of issue. Both sides of this PR58 specimen display yellow-gold color, and the design elements are quite well-defined, save for the eagle's shoulder feathers. The only noticeable mark occurs below the U of TRUST, and it is not particularly obtrusive. Each side exhibits a partial wire rim. NGC ID# 289G, PCGS# 7957

**1911 Indian Quarter Eagle, PR66
Only 191 Pieces Struck**

3213 1911 PR66 PCGS. CAC. From a mintage of 191 pieces, the 1911 Indian quarter eagle is actually even more elusive than that small production total suggests. The various matte and Roman finishes employed by the mint in the early 20th century were decidedly unpopular with collectors and sales of proof coins dwindled accordingly. It is likely that many gold proofs went unsold in 1911, to be melted after the end of the year.

This impressive Premium Gem exhibits razor-sharp definition on all design elements and the virtually pristine olive-gold surfaces show a finer-grained matte finish than the proofs of earlier years. Eye appeal is tremendous. Population: 14 in 66 (1 in 66+), 16 finer (1/15). NGC ID# 289K, PCGS# 7960

THREE DOLLAR GOLD PIECES

**1855 Three Dollar Gold, MS63
Underrated Early Series Issue**

3214 1855 MS63 PCGS. The 1855 three dollar gold piece is an underrated issue because its mintage of 50,555 pieces is relatively high for the series, but it is much more elusive than its 1854 counterpart. This well-detailed Select specimen offers lustrous, well-preserved orange-gold surfaces with outstanding eye appeal. Population: 61 in 63 (2 in 63+), 27 finer (1/15). NGC ID# 25M6, PCGS# 7972

**1857 Three Dollar Gold, MS62
Shimmering Original Luster**

3215 1857 MS62 NGC. Although not as scarce as the branch mint issues from this period, the 1857 three dollar gold piece is decidedly scarcer than the 1854 and 1855, as it should be with a notably small mintage of 20,891 pieces. This MS62 example is unusually appealing for the grade, exhibiting only light contact, with satiny, orange-gold luster being the primary attribute. The reverse bow knot is slightly soft, as usual, but the obverse is sharp. Census: 41 in 62 (2 in 62+), 26 finer (1/15). NGC ID# 25MA, PCGS# 7976

**1872 Three Dollar Gold, MS62
Colorful Prooflike Surfaces**

3216 1872 MS62 PCGS. Only 2,000 three dollar gold pieces were struck in 1872 and the date is rare in all Mint State grades. This attractive MS62 specimen exhibits well-detailed design elements and prooflike orange-gold surfaces with a scattering of minor contact marks that explain the grade. Population: 21 in 62 (1 in 62+), 14 finer (1/15). NGC ID# 25MV, PCGS# 7994

**1879 Three Dollar, MS66
Only One Coin Certified Finer**

3217 1879 MS66 PCGS. The year 1879 was a watershed for the three dollar gold denomination. The powers-that-be recognized that the three dollar coins were unnecessary and unwanted in the national economy, so only limited business-strike mintages were produced each year from 1879 onward. A meager total of 3,000 examples was struck in 1879, and many of these coins were never distributed and melted in later years. Fortunately, the survival rate of the remaining coins was high, because they seldom circulated. After the denomination was cancelled in 1889, numismatic demand for three dollar coins caused dealers to scour the holdings that had accumulated in bank vaults over the years, ensuring a supply of Mint State examples for collectors. Accordingly, the 1879 three dollar gold piece can be located easily in lower Mint State grades, but it is a prime condition rarity at the MS66 level.

This delightful Premium Gem exhibits sharply detailed design elements throughout and the impeccably preserved yellow-gold surfaces radiate vibrant mint luster. A few subtle hints of orange and rose patina add to the outstanding eye appeal. Population: 6 in 66, 1 finer (1/15). NGC ID# 25N2, PCGS# 8001

**1881 Three Dollar Gold, MS62
Only 500 Pieces Struck**

3218 1881 MS62 NGC. Only 500 business-strike three dollar gold pieces were struck in 1881, making the date scarce-to-rare in all grades today. Despite the efforts of prominent coin dealer Thomas Elder, who rescued many circulated specimens from bank deposits in the early 20th century, the issue is particularly elusive in Mint State grades. Nice Mint State coins are seen less frequently than proofs of this date, and are appreciated accordingly.

This impressive MS62 example displays well-detailed design elements and pleasing yellow and greenish-gold surfaces that show semiprooflike reflectivity in sheltered areas. A scattering of minor contact marks on both sides explains the grade, but eye appeal is quite strong. Census: 10 in 62, 11 finer (1/15). NGC ID# 25N4, PCGS# 8003

**1883 Three Dollar Gold, MS61
Only 900 Business Strikes Minted**

- 3219 1883 MS61 NGC.** A minuscule business-strike mintage of 900 three dollar gold pieces was produced in 1883, making the date both scarce and popular in today's market. This attractive Mint State specimen offers sharply detailed design elements and bright orange-gold surfaces that show a minimum number of minor contact marks for the grade. Census: 16 in 61, 61 finer (1/15). NGC ID# 25N6, PCGS# 8005

**1889 Three Dollar, MS65
Exceptional Final-Year Type Coin**

- 3220 1889 MS65 PCGS. CAC.** Only 2,300 business-strike three dollar gold pieces were struck in 1889, the final year the denomination was produced. Fortunately, contemporary numismatists realized the issue would be in strong demand in later years, so a number of high-quality examples were saved. The 1889 is still very scarce in MS65 condition, however.

The present coin is a delightful Gem, with sharply detailed design elements and well-preserved yellow-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 30 in 65 (1 in 65+), 13 finer (1/15). NGC ID# 25NC, PCGS# 8011

EARLY HALF EAGLES

**1800 Five Dollar, Choice XF
BD-4, Blundered M Variety**

- 3221 1800 BD-4, R.4, XF45 NGC. CAC.** Bass-Dannreuther Die State c/a. Breen's "Blundered M" variety with wide repunching on the right stand of that letter. A pleasing peach-red example. Minor adjustment marks (as coined) are relegated to the lower reverse. Smooth aside from a few hair-thin vertical marks noted near the left border of the cap. *From The Collection of Philip M. Peterson.* PCGS# 45594 Base PCGS# 8082

**1802/1 Capped Bust Right Half Eagle, MS64+
Popular BD-8 High Overdate Variety
Only One Finer Coin at PCGS**

3222 1802/1 MS64+ PCGS. BD-8, R.4. Bass-Dannreuther Die State c/b. A substantial mintage of 53,176 Capped Bust Right half eagles was accomplished in 1802, with eight die varieties known for the date. All the 1802-dated coins were struck using overdated obverse dies from 1801, as no half eagles were minted that year. This coin represents the popular BD-8 variety, with the 2 in the date touching the bust, perfect T's in the legends, and the final S in STATES positioned over the far right side of a cloud. The BD-8 is one of the more available varieties of this date, with a surviving population of 150-200 examples in all grades. The BD-8 probably accounted for 10,000-15,000 pieces of the reported mintage for the year. The obverse die was used earlier to strike the BD-6 and BD-7 varieties, but this was the only use of the reverse die, which developed a large cud over T in UNITED in the terminal state.

The 1802/1 half eagle was a popular issue with early collectors and the overdate was recognized at an early date. An early auction appearance was lot 2755 in the Sixth Semi-Annual Sale (W. Elliot Woodward, 3/1865):

"1802 over 1801; uncirculated, as fine as proof; scarce."

Of course, the term "proof" had a different meaning to numismatists of the mid-19th century than it has today. In the early days of the hobby, European numismatists called coins struck as prototypes for a new design "proofs" (they are called patterns today). At some time around 1860, Mint Director James Ross Snowden began calling coins specially produced as presentation pieces for VIP's and collectors "proofs" (they were earlier called "specimen" or "master" coins). The term "proof" was loosely understood to mean a coin in the finest possible grade to collectors of the 19th century. Today the term is rigorously defined as a coin produced by a specific method of manufacture, using specially polished planchets and dies, and being struck more than once to fully bring up the design detail. The earliest true proofs in this country were produced in 1816, so the coin in Woodward's Sixth Semi-Annual Sale was probably a high-quality Uncirculated specimen, like the coin offered here. The lot realized \$9, a strong price at the time, to Thomas Cleneay. Recent auction appearances include the MS65 PCGS example in lot 4847 of the FUN Signature (Heritage, 1/2012), which realized \$138,000.

The present coin is a high-end Choice example, vibrant satiny mint luster and well-preserved antique-gold surfaces that show a few barely perceptible traces of planchet adjustment marks in the obverse fields. The design elements are sharply struck in most areas, with just a touch of the usual softness on the eagle's left (facing) claw. Light clash marks are evident on both sides and a thin die crack is visible through UNIT in UNITED. Eye appeal is terrific. With only one finer coin at PCGS, this piece is a strong Registry Set candidate. Population: 21 in 64 (2 in 64+), 1 finer (1/15). PCGS# 519889 Base PCGS# 8083

1803/2 BD-4 Five Dollar, AU58
Original, Orange-Gold Surfaces

3223 1803/2 BD-4, R.4 AU58 NGC. CAC. Bass-Dannreuther Die State b/c. “Available” is a relative term when it comes to early gold. Although the 1803 date is more readily available than other early issues, it is challenging enough, with perhaps fewer than 700 survivors in all grades. All 1803 fives are overdated (1803/2), with four die pairs known. BD-4 is the sole variety with a Perfect T in LIBERTY — all other varieties show a missing right foot on the T.

This example is an exceptional near-Mint coin, with sharply struck devices and amazing, original orange-gold coloration. Only a few minor marks are visible across the smooth surfaces. Plentiful mint luster remains. Bass-Dannreuther estimate no more than 175 pieces are known in all grades. Interested bidders will be wise to note the CAC endorsement and the visual appeal of this high-end example. PCGS# 504951 Base PCGS# 8084

1812 Half Eagle, MS63
BD-1, Wide 5D

3224 1812 BD-1, R.3, MS63 PCGS. Bass-Dannreuther Die State a/a. BD-1 is the Wide 5D variety, which is less rare than its Narrow 5D BD-2 alternative. Only two die marriages are known from the reported mintage of 58,087 pieces. This representative has pleasing olive-green and butter-gold toning. The strike is generally sharp, although the central reverse displays faint roller marks (as made). Free from any distracting abrasions, and a desirable example of John Reich's Capped Bust Left design. Introduced in 1807, his reverse design continued on the denomination (in modified form) through 1908. PCGS# 507601 Base PCGS# 8112

LIBERTY HALF EAGLES

1839-C Five Dollar, AU53

- 3225 1839-C AU53 PCGS. Variety 1.** The 1839-C is interesting for several reasons. It is the only Charlotte Liberty issue with an obverse mintmark. It is also the only date of the series with the initial sleepy-eyed portrait of Liberty. Finally, it has a low mintage of 17,205 pieces. This representative is well defined aside from softness on the left-side stars. The sun-gold surfaces are inoffensively abraded and only mildly bright. Population: 4 in 53, 18 finer (1/15). NGC ID# 25S8, PCGS# 8192

1839-D Half Eagle, XF45 Early, Better Dahlonega Issue

- 3226 1839-D XF45 NGC. Variety 2-A.** Luster glints from the legends and other protected areas of this wheat-gold representative. The fields are minimally abraded aside from minor marks behind the hair bun. One of two Dahlonega five dollar issues with an obverse mintmark. A scant 18,939 pieces were struck. NGC ID# 25S9, PCGS# 8193

1840-C Half Eagle, AU55 First Date With Reverse Mintmark

- 3227 1840-C AU55 PCGS. Variety 2.** From a mintage of 18,992 pieces, the 1840-C half eagle is one of the most challenging issues in the Charlotte Mint series. This Choice AU specimen shows just a touch of actual wear on the design elements, which display the usual soft strike for this issue. The lightly abraded orange-gold surfaces retain most of their original mint luster. Population: 11 in 55, 15 finer (1/15). NGC ID# 25SD, PCGS# 8196

1843-O Large Letters Half Eagle, MS64 Conditionally Rare Branch Mint Gold Issue

- 3228 1843-O Large Letters MS64 NGC. Variety 1.** Two varieties exist for half eagles coined at the New Orleans Mint in 1843. The Small Letters variant was struck to the extent of 19,075 coins, while 82,000 Large Letters coins, represented by this piece, were manufactured. Although this is the more available of the two varieties, Winter (2006) estimates that only six to eight coins survive in Mint State. This is a lovely example with reddish-gold and sunburst-orange coloration throughout. The obverse is strongly detailed, including full star centers without signs of die lapping, while the reverse exhibits moderate softness on the eagle's neck, wing, and leg feathers. An attractive and nicely preserved representative, sure to be a highlight in any branch mint gold collection. NGC shows eight coins in MS64 (one in 64+, one in 64+★) and one example finer, almost certainly including a number of resubmissions (1/15). NGC ID# 25T6, PCGS# 8216

1848-D Half Eagle, AU58
No Noticeable Marks

- 3229** 1848-D AU58 NGC. Variety 22-O. The same die marriage as the well known 1848-D/D variety, but the present piece is a later striking without any traces of the initial errant mintmark placement. A well struck Borderline Uncirculated Dahlonega type coin with luminous and unblemished honey-gold surfaces. Clashed above the eagle's shoulders, as made. Census: 16 in 58, 7 finer (1/15). From The Collection of Philip M. Peterson. NGC ID# 25TU, PCGS# 8238

1867-S Half Eagle, Elusive AU53
Seldom Seen So Fine

- 3230** 1867-S AU53 NGC. Small S mintmark. The low-mintage 1867-S half eagle, struck to the extent of only 29,000 pieces, is unknown in Mint State, according to data from both NGC and PCGS, and most survivors tend to be XF at best, and usually below that. This golden-orange AU53 example shows a scattering of mostly light marks. The strike is decent overall, save for softness on the fletchings and the eagle's claws. Census: 12 in 53, 12 finer (1/15). NGC ID# 25W4, PCGS# 8314

1869 Liberty Half Eagle, AU53
Elusive Low-Mintage Issue

- 3231** 1869 AU53 NGC. Only 1,760 Liberty half eagles were struck in 1869, making the date elusive in all grades today. This attractive AU53 example shows just a trace of friction on the well-detailed design elements and the brightly lustrous yellow-gold surfaces are lightly abraded. Census: 8 in 53, 15 finer (1/15). NGC ID# 25W7, PCGS# 8317

1882-CC Five Dollar, MS62+
Condition Census Quality

- 3232** 1882-CC MS62+ NGC. CAC. Variety 1-A. Among the finest examples of this conditionally rare Carson City issue. In AU grades, the '82-CC is always available for a price, but Uncirculated pieces are undeniably rare. Most survivors were shipped to foreign banks and indifferently stored for many years. Minimally marked examples with bountiful luster, such as the present coin, are seldom encountered. In addition, the strike is precise and the butter-gold surfaces exude eye appeal. The only MS62+ coin at either service, with just a single example finer. Census: 5 in 62 (1 in 62+), 1 finer (1/15). NGC ID# 25XH, PCGS# 8359

**1895 Five Dollar, MS66
Splendid Original Surfaces**

- 3233 1895 MS66 PCGS. CAC.** Ex: Col. Green/Newman. A mintage in excess of 1.3 million coins ensures the date's availability through Gem grade levels, though Premium Gems are very rare. Reddish-gold, orange, and lavender coloration paint the surfaces and attest to their originality. A full strike, glowing luster, and minimal marks round out the elegant eye appeal. Population: 6 in 66, 1 finer (1/15). NGC ID# 25YH, PCGS# 8390

**1907 Liberty Five, MS66
Excellent Final-Year Type Coin**

- 3234 1907 MS66 PCGS.** The final year of production for the Liberty design saw a large mintage of 626,192 half eagles at the Philadelphia Mint. This delightful Premium Gem offers well-detailed design elements and well-preserved peach-gold surfaces that radiate vibrant mint luster on both sides. Population: 23 in 66 (1 in 66+), 0 finer (1/15). NGC ID# 25ZC, PCGS# 8416

PROOF LIBERTY HALF EAGLE

**1904 Half Eagle, PR65
Tied for Finest Non-Cameo at PCGS**

- 3235 1904 PR65 PCGS.** Proof Liberty half eagle production began a gradual decline in 1904, with only 136 pieces struck. Fewer than 75 pieces are believed to survive, and "most of the coins known grade PR64 at best," per Jeff Garrett and Ron Guth, an assessment with which the certified population reports agree, even taking into account a likely number of resubmissions. The present Gem example is one of just three non-Cameo coins for the grade at PCGS, with none numerically finer. Fully struck design elements deliver modest field-motif contrast on each side, amid deep mirrors and warm honey-gold and rose hues. There are no mentionable contact marks, and any grade-limiting hairlines are undetectable without magnification. NGC ID# 28DA, PCGS# 8499
-

INDIAN HALF EAGLE

1909 Half Eagle, MS65
Sharp, Original Indian Head Gold

3236 1909 MS65 PCGS. While Gem examples of the issue are somewhat available, finer coins are conditionally rare and command large premiums. Specialists in Indian gold are challenged to find an outstanding, original MS65 example as a viable alternative to the next higher grade. This is such a coin, with a bold strike, rich orange-gold color, and bright, frosty luster. The surfaces are nearly mark-free. PCGS has certified just seven numerically finer coins (1/15). NGC ID# 28DH, PCGS# 8513

PROOF INDIAN HALF EAGLE

1910 Half Eagle, PR64
Radiant Roman Finish Proof

3237 1910 PR64 PCGS. Although the brilliant “Roman Gold” finish was used for the entire 250-piece proof mintage in 1910, the existence of a solitary matte proof coin confirms the Mint was experimenting with different proof formats in 1910, as it was in 1909 as well. The public response to the brilliant finish — which was neither satiny nor mirrorlike, but somewhere in between — was lukewarm at best. In 1911, a darker, matte finish returned to the Indian Head proofs.

The incuse design of this example is extremely sharp, displaying the the smooth fields and the sunken devices to their best advantage. The surfaces show a lemon-yellow coloration that is both pleasing and strikingly untuned. A few minor, hair-thin lines are visible with a glass but do not distract from the visual appeal. Population: 12 in 64, 11 finer (1/15). PCGS# 8541

EARLY EAGLES

1795 13 Leaves Ten Dollar, VF35
BD-1, First Die Variety of Denomination

- 3238** 1795 13 Leaves, BD-1, High R.3, VF35 PCGS. Bass-Dannreuther Die State a/a. BD-1 is the first ten dollar die variety coined by the U.S. Mint. It is readily attributed by the defective left serif of the Y in LIBERTY. The pick-up point on the reverse is the U in UNITED, which is touched by a frond from the palm branch. The Small Eagle type is significantly scarcer than its Heraldic Eagle successor, and is absent from most advanced gold collections. The present coin shows substantial wing plumage along with traces of peach-gold luster. The high points and open fields are apricot-gold. Despite its service in early American commerce, marks are unimportant except for a reverse rim nick at 3 o'clock and a narrow impression on the eagle's neck and near the top of the right (facing) wing.
Ex: Orlando FUN Signature (Heritage, 1/2003), lot 8724. PCGS# 45710 Base PCGS# 8551

1801 BD-2 Ten Dollar
Uncirculated Sharpness

- 3239** 1801 BD-2, R.2 — Improperly Cleaned — NGC Details. Unc. An unworn example that displays full detail on the Liberty's curls and the eagle's breast feathers. Only obverse stars 2 and 11 lack a bold impression. The green-gold surfaces are subdued but lack any consequential marks. A small portion of the reverse field, directly above the eagle's head, is lightly smoothed. The usual die state with nine parallel and vertical die lines embedded in Liberty's cap. BD-2 pieces exist without those lines, whose origin remains mysterious. A coveted large denomination early gold type. PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1843-O Eagle, AU58
Conditionally Rare

- 3240 1843-O AU58 PCGS. CAC. Variety 4.** There are four die marriages documented among survivors from the 175,162 coin mintage of 1843-O eagles. This lovely near-Mint example has splendid light yellow surfaces with nearly full design definition. A small copper toning spot appears at the top of the first T in STATES. Population: 7 in 58, 5 finer (1/15). NGC ID# 262R, PCGS# 8589

1855 Eagle, MS61
Rare in Mint State

- 3241 1855 MS61 NGC.** The 1855 eagle is decidedly rare in Mint State, but it is still one of the more often seen No Motto issues in this condition and is in high demand among type and date collectors alike. The present piece exhibits bright, yellow-gold luster, with just light chatter in the fields limiting the grade. The peripheral stars are weakly struck, but the central devices are sharp. Census: 24 in 61, 7 finer (1/15). NGC ID# 263L, PCGS# 8616

1868 Ten Dollar, AU58
Upper-End for the Issue

- 3242 1868 AU58 PCGS.** Substantial amounts of luster remain in the recesses of this sharp, orange-gold example. A trace of friction over the high points of the design precludes a Mint State designation, while the obverse also exhibits a few small ticks scattered about. With a low mintage of 10,630 pieces, the 1868 eagle is understandably scarce in AU; Mint State coins are prohibitively rare, with the sole finest grading just MS62 at PCGS. Population: 16 in 58, 1 finer (1/15). NGC ID# 264N, PCGS# 8653

1872 Ten Dollar, Well-Defined AU55
A Classic Numismatic Rarity
Low-Mintage Issue

- 3243 1872 AU55 PCGS.** The 1872, from a minuscule mintage of 1,620 pieces, is a premier rarity in the Liberty Head With Motto ten dollar series. It is perhaps noteworthy that the Smithsonian lacks a circulation-strike example of this date. The PCGS website suggests that only 40 to 60 pieces are known, and the two services report just 58 submissions, a number of which are likely resubmitted or crossover coins.

This Choice AU example displays yellow-gold surfaces that retain luster in the recessed areas. All design elements are well-defined. Light marks are scattered over each side but do not negatively impact the design detail. This is an excellent opportunity for the gold specialist to acquire a classic numismatic rarity. Population: 3 in 55, 5 finer (1/15). NGC ID# 264Z, PCGS# 8663

1882-CC Eagle, AU55
Only 6,764 Coins Struck

- 3244 1882-CC AU55 NGC. Variety 2-A.** Production of ten dollar gold coins dropped precipitously at the Carson City Mint from over 24,000 coins in 1881 to just 6,764 examples in 1882. The coins circulated widely, and only 275 pieces are thought to have survived. Most of them are found in VF to lower About Uncirculated grades. Comparably graded examples are decidedly scarce. This Choice AU example exhibits khaki-gold coloration overall with occasional reddish hues and partial luster. Abundant design detail remains with an expected amount of light friction over the high points. NGC ID# 2663, PCGS# 8696

1906-S Eagle, MS64
Conditionally Elusive, Exceptional Appeal

- 3245 1906-S MS64 PCGS. CAC.** Lustrous apricot-gold surfaces provide this sharply struck near-Gem with strong visual appeal. Very few signs of contact appear, leaving this firmly near the upper-end of the assigned grade. An as-made strike-through is present in the right obverse field. Otherwise, just one or two microscopic alloy specks are seen when studied with a loupe. If ever there was a true "sleepers" in a sale, this exceptional ten dollar gold piece might be it. Housed in an old green label holder. Population: 4 in 64, 5 finer (1/15). NGC ID# 2687, PCGS# 8762

PROOF LIBERTY EAGLES

1867 Liberty Eagle, PR64+ Cameo
50 Pieces Struck
Finest-Certified PCGS Example

3246 1867 PR64+ Cameo PCGS Secure. CAC. Despite having one of the higher proof mintages of the period (still only a paltry 50 pieces), the proof 1867 gold ten dollar is no more available today than are those issues with 25 and 30-coin mintages, and is arguably rarer in high grades. Most survival estimates suggest no more than a dozen examples are extant in all grades, though the two leading certification services report having seen only eight individual coins, counting an unknown number of resubmissions. Of these, two are slightly impaired, grading PR53 and PR55 at PCGS. A Gem Cameo example (grade, per Garrett and Guth) resides in the National Numismatic Collection in the Smithsonian Institution, out of reach of collectors, while the finest-known representative is a sole PR66 Cameo coin at NGC (1/15).

This piece is an exceptional Choice example, with sharp, heavily frosty devices and remarkably deep mirroring in the fields. Warm honey-gold color engulfs each side, though the fields display areas of milky patina, attesting to the originality of the surfaces. Contact marks are seemingly nonexistent, and only a few wispy hairlines in the fields preclude a finer numeric grade.

Produced chiefly for inclusion in proof sets with the other gold denominations of the period, the proof ten dollar pieces are every bit as rare as their sought-after double eagle counterparts, and in many cases are rarer. Early proof gold issues are among the most highly prized relics in 19th century numismatics, and this Choice representative of the 1867 ten dollar issue is a must-have for the advanced proof gold or Liberty eagle specialist. Its sheer rarity alone makes it worthy of special attention. Population: 1 in 64 (1 in 64+) Cameo, 0 finer (1/15). NGC ID# 28F5, PCGS# 88807

1899 Eagle, PR55
Just 86 Proofs Struck

- 3247 **1899 PR55 NGC.** Of this proof issue (86 pieces struck), Jeff Garrett and Ron Guth note: "Most were well preserved and hardly any were spent (unlike in previous years)." Clearly, this coin represents an exception to the rule. Its proof status is confirmed by a centered date with slight repunching on the 1. Additionally, the left base of the 1 is positioned nearly over the right edge of the dentil. The reddish-gold surfaces show good detail with slight blending over the relief elements. Marks are evenly scattered throughout. This one of two PR55 coins at NGC, and only three examples are reported finer (1/15). NGC ID# 28G6, PCGS# 8839

INDIAN EAGLES

1908 Indian Eagle, MS65
First Year With Motto

- 3248 **1908 Motto MS65 PCGS.** After a smaller mintage of No Motto eagles, the Philadelphia Mint completed the year with a sizeable production of With Motto coins. The mintage of 341,300 pieces was uncommonly well-produced, and the 1908 Motto issue is extremely popular with type collectors.

This spectacular Gem displays a bold strike on the central motifs and attractive, satiny luster on both sides. The coin has many claims to an even higher grade, with no visible distractions when viewed under magnification and exceptional eye appeal. Population: 74 in 65 (3 in 65+), 42 finer (1/15). NGC ID# 28GJ, PCGS# 8859

1913 Indian Eagle, MS65
Sharply Detailed and Lustrous

3249 1913 MS65 PCGS. From a mintage of 442,000 pieces, the 1913 Indian eagle is very scarce at the MS65 grade level. This delightful Gem displays pleasing autumn-gold surfaces with vibrant mint luster and no mentionable distractions. The design elements are sharply detailed and eye appeal is outstanding. Population: 64 in 65 (4 in 65+), 14 finer (1/15). NGC ID# 28GY, PCGS# 8873

1914-S Indian Eagle, MS62

3250 1914-S MS62 PCGS. The 1914-S Indian eagle claims a mintage of 208,000 pieces and most examples seen are in lower Mint State grades. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 28H4, PCGS# 8877

1914-S Indian Ten, MS64
Bright, Lustrous Example

3251 1914-S MS64 PCGS. An impressive green-gold eagle, this moderately low-mintage San Francisco issue had the 14th lowest mintage of the Indian eagle series. This ranking has significance when discussing circulated coins. However, when strictly Uncirculated examples are considered, the 1914-S is among the scarcest of all ten dollar Indians, and it is very seldom available with both problem-free surfaces and in high grade. Both sides of this piece show tinges of coppery-orange toning, especially along the portrait, with a small splash of dark toning in the left reverse field. Population: 66 in 64 (2 in 64+), 11 finer (1/15). NGC ID# 28H4, PCGS# 8877

1915-S Ten Dollar, MS62
Low Survivorship Issue

3252 1915-S MS62 PCGS. Just 59,000 pieces were struck of this San Francisco issue, and few coins escaped the rigors of circulation in the West. Others fell prey to the waiting melting pots during the 1930s gold recall. The issue was not exported to a large extent, so no significant foreign hoards have been found.

The current example offers considerable appeal for the assigned grade. There are no serious marks on the lightly textured satiny surfaces, nor any overt weakness of strike. A sole tiny rim nick above the E of STATES is minor, but mentioned for accuracy. Nice mint luster adds depth to the attractive, medium-gold coloration, with a few reddish-gold highlights on the reverse. Population: 58 in 62 (1 in 62+), 59 finer (1/15). NGC ID# 28H6, PCGS# 8879

LIBERTY DOUBLE EAGLES

1851-O Double Eagle, AU58
Scarce, Early New Orleans Twenty

3253 1851-O AU58 PCGS. CAC. Variety 2. Ex: "Col." E.H.R. Green-Eric P. Newman Collection. While the banking sector was experiencing increasing demand for coins, this period also saw some of the largest gold exports from the California gold fields during the Gold Rush. Despite its high mintage (315,000 pieces), the 1851-O double eagle experienced a high attrition rate. High-end AU examples are scarce, and the date is a notable rarity across the Mint State threshold. This near-Mint example boasts rich lemon-gold patina and retains substantial original, semiprooflike mirroring in the fields. A highly attractive early New Orleans twenty, close to full Mint State — appealing in every way. Population: 10 in 58, 10 finer (1/15). NGC ID# 268J, PCGS# 8905

1853 Twenty, MS61
Scarce in Mint State

3254 1853 MS61 PCGS. The surfaces show a moderate amount of coin-to-coin friction and abrasions, and the obverse was struck marginally off-center southeast, but nice luster remains intact. Few examples of the date are certified in Uncirculated condition, including a few pieces that were salvaged from the S.S. *Central America* and the S.S. *Republic*. This coin may or may not be one of those, since there is no indication on the holder. Population: 15 in 61, 25 finer (1/15). NGC ID# 268M, PCGS# 8908

1854-S Twenty Dollar, AU53
Ex: S.S. *Central America*

3255 1854-S AU53 PCGS. CAC. Variety 11A. Ex: S.S. *Central America*. SSCA 6563. A canary-gold double eagle that has a sharp strike and no mentionable abrasions. The obverse margin near 1 o'clock displays orange patina. The "Broken A" die variety, as named by Robert Evans. The nickname refers to the incomplete crossbar of the A in STATES, a hub imperfection usually (although not in the present case) repaired at the Mint on the working die. The right half of the horizontal shield lines are attenuated. Relative to the 1857-S, the first year San Francisco issue is very scarce with a pedigree to the S.S. *Central America*, although recovery efforts from the shipwreck continue to the present day. Housed in a gold label holder. NGC ID# 268U, PCGS# 8913

1857-S Double Eagle, MS61
Lustrous Type One Example

- 3256 1857-S MS61 NGC. Variety 20F. No Serif, Right S.** The discovery of the S.S. *Central America* yielded over 5,000 1857-S double eagles, and the issue's compelling history earned it a prominent place among Garrett and Guth's *100 Greatest U.S. Coins*. This mint condition Type One example offers strong striking detail. Shimmering mint frost rolls over lightly abraded, peach and sun-gold surfaces, contributing to the strong eye appeal. Only two marks, one below Liberty's eye and another on the eagle's shield, merit mention. NGC ID# 2696, PCGS# 8922

1861 Double Eagle, MS61
Thick, Original Mint Frost

- 3257 1861 MS61 NGC.** Prior to the salvage of the S.S. *Central America* shipwreck which yielded large quantities of 1856-S and 1857-S double eagles, the 1861 was the most available Type One Liberty twenty in the series, and it remains an ideal choice for type representation. This example is surprisingly attractive for the grade, with thickly frosted, original green-gold luster and well-defined motifs. Scattered abrasions limit the technical grade, but have remarkably little affect on the overall appeal. NGC ID# 269G, PCGS# 8932

1862 Double Eagle, AU53
Scarce, Low-Mintage Issue

- 3258 1862 AU53 NGC.** Although double eagle production reached nearly 3 million coins in 1861, the Mint struck just 92,133 twenties in 1862 after the uncertainties of the Civil War began to drive hard money out of circulation. The issue is highly sought-after in all grades, but an estimated 215 survivors strictly limits the issue's availability — especially in AU and above. Examples are usually sharply struck, and this representative is no different. Green-gold coloration dominates the surfaces, while lighter peach accents appear sporadically throughout. Partial luster remains within the recesses, and numerous small marks do not detract from the overall appeal. Census: 13 in 53, 37 finer (1/15). NGC ID# 269M, PCGS# 8937

**1866-S Twenty Dollar, AU55
First-Year Motto Issue**

- 3259 1866-S Motto AU55 NGC. CAC.** Tall S. A sun-gold double eagle from the introductory year of the Type Two design. Bright luster illuminates raised elements, especially on the reverse. The fields and devices display abrasions consistent with the grade, but only those on the left half of the shield merit individual mention. NGC ID# 269Y, PCGS# 8950

1867-S Twenty Dollar, AU58

- 3260 1867-S AU58 NGC.** Small S, the rarest of three mintmark size varieties known for the issue. An apricot-gold Borderline Uncirculated double eagle that has nearly unbroken luster on the reverse. Obverse luster is plentiful at the borders though subdued across the cheek and open field. Distributed small marks correspond to the grade and type. NGC ID# 26A2, PCGS# 8952

**1868-S Double Eagle, AU58
Seldom Encountered Finer**

- 3261 1868-S AU58 NGC.** Like most Type Two Liberty double eagles, the 1868-S is plentiful in lower circulated grades, but Mint State examples are rare. This attractive near-Mint example shows light wear on the well-detailed design elements and the lustrous surfaces show a moderate number of minor abrasions for the grade. NGC has graded 38 numerically finer examples (1/15). NGC ID# 26A4, PCGS# 8954

**1869-S Liberty Twenty, MS61
Scarce Type Two Issue in High Grade**

- 3262 1869-S MS61 PCGS.** From a mintage of 686,750 pieces, the 1869-S Liberty double eagle is a very scarce issue in mint condition with an infrequent appearance on the auction circuit. This attractive MS61 piece is well-detailed, with the usual flatness on the stars. The luster on the obverse is a bit thin but the reverse is much more vibrant. The pleasing surfaces display medium orange-gold coloration with the usual number of small abrasions one would expect for a double eagle in this grade. Population: 30 in 61, 11 finer (1/15). Ex: *Central States Signature* (Heritage, 5/2005), lot 8950. NGC ID# 26A6, PCGS# 8956

**1870-S Double Eagle, AU58
Appealing Type Two Twenty**

3263 1870-S AU58 NGC. The 1870-S double eagle issue is among the higher-mintage Type Two S-mints, struck to an extent just shy of 1 million coins, although the 1865-S is slightly higher at 1.04 million pieces. The 1865-S twenties, however, have been found in ample numbers from shipwreck recoveries, where the 1870-S has not, as a rule. Mint State examples are mostly in the lower reaches, seldom found above MS62. This near-Mint example boasts plenty of eye appeal, lilac and orange-gold patina prevailing over sharply struck surfaces. A few digs are noted on the profile of Liberty and in the obverse left field. NGC ID# 26A9, PCGS# 8959

**1871-S Double Eagle, MS61
Conditionally Rare Issue**

3264 1871-S MS61 NGC. CAC. Micro S. Type Two twenties are known for their scarcity in Uncirculated grades, and many such pieces are the Open 3 1873. The 1871-S is a decidedly better date at the MS61 level. The present well-struck green-gold coin displays satin cartwheel sheen and is refreshingly void of obtrusive abrasions. Census: 66 in 61, 24 finer (1/15).
Ex: Long Beach Signature (Heritage, 6/2005), lot 8064. NGC ID# 26AC, PCGS# 8962

**1872-S Liberty Twenty, MS63
Sole Finest at PCGS**

3265 1872-S MS63 PCGS. Short S. The 1872-S double eagle is a fairly plentiful issue in the VF to AU grade range, benefiting from a generous mintage of 780,000 coins, but its availability dramatically drops across the Mint State threshold. Most of the Uncirculated coins known are heavily abraded, grading only in the MS60 to MS61 range, with many tracing their origin to overseas hoards where they waited out the gold confiscation of the mid-1930s. At the MS62 grade level, the 1872-S becomes a notable condition rarity, and finer pieces are extremely rare. This Select example is the sole finest certified at PCGS; NGC has also seen just one piece in this grade, as well as one MS64 coin numerically finer (1/15). By contrast, the Smithsonian example grades just XF45, per Jeff Garrett and Ron Guth.

This piece showcases distinct eye appeal with frosty straw-gold luster and sharply defined relief elements. Inspection with a lens reveals minor, scattered ticks, but none are out of line for the grade, and the overall preservation is far and away superior to almost all other examples of this issue. NGC ID# 26AF, PCGS# 8965

**1877-CC Twenty Dollar, AU55
First-Year Type Three Coin**

- 3266 1877-CC AU55 NGC. Variety 1-A.** The 1877-CC represents the first Type Three issue from the Nevada facility. Of the 42,565 double eagles produced, most survivors are found in VF to AU condition. Many of the coins have returned from overseas holdings in recent decades, accounting for the prevalence of bagmarked examples. This Choice AU coin features lovely green and rose-gold color and abundant mint luster. The well-struck devices show slight friction, and abrasions are lightly scattered over each side. NGC ID# 26AZ, PCGS# 8983

**1877-S Liberty Twenty, MS62
Heavily Exported Issue**

- 3267 1877-S MS62 PCGS.** Large numbers of Liberty double eagles were struck at the San Francisco Mint in 1877 and many coins have recently been repatriated from overseas holdings, but most examples seen show the effects of rough storage and transport. This well-detailed MS62 example displays lustrous orange-gold surfaces with relatively few minor contact marks for the grade. PCGS has graded 32 numerically finer examples (1/15). NGC ID# 26B2, PCGS# 8984

**1877-S Twenty Dollar, MS62
Well-Struck Example**

- 3268 1877-S MS62 PCGS. CAC.** As would be expected from the mintage of more than 1.7 million pieces, the 1877-S Liberty Head double eagle is an available issue in circulated grades. Mint State examples are much more elusive, and well-struck MS62 specimens such as the present piece are seldom encountered. Bright, satiny mint luster beams over light orange-gold surfaces.
Ex: National Money Show Signature (Heritage, 3/2011), lot 4963.
NGC ID# 26B2, PCGS# 8984

**1884-CC Double Eagle, AU55
Original and Unblemished**

- 3269 1884-CC AU55 PCGS. CAC. Variety 1-A.** A Choice AU peach-gold Carson City type coin that has the original "dirty gold" appearance desired by experienced collectors. Marks are fewer than expected for the grade and type, and luster emerges from many design elements. A late die state with a spindly descending crack beneath the date. NGC ID# 26BK, PCGS# 9001

**1887-S Liberty Double Eagle, MS62
Nice Color and Luster**

- 3270 1887-S MS62 PCGS. CAC.** The San Francisco Mint reduced double eagle mintage to a relatively low 283,000 pieces in 1887, but enough examples survive in lower Mint State grades to satisfy collector demand. The 1887-S becomes very scarce beyond the MS62 level, however. This attractive specimen is well-detailed and brightly lustrous, with vivid orange-gold surfaces that show a scattering of minor contact marks. NGC ID# 26BS, PCGS# 9007

1889-S Twenty Dollar, MS64
Rarely Encountered in Finer Condition

- 3271 1889-S MS64 PCGS.** As its mintage of 774,700 coins suggests, the 1889-S is readily obtainable in most grades. Large quantities were shipped off and held in European vaults before being repatriated in the mid-20th century. Examples are generally found in Very Fine through MS62 condition. Near-Gems such as this were the finest coins available to collectors prior to the discovery of the Saddle Ridge Hoard in February 2013, which yielded 422 1889-S double eagles. PCGS shows only five numerically finer submissions, all in MS65 (two in MS65+) and originating from that grouping (1/15). Swirling luster illuminates the light yellow-gold surfaces. Minor incompleteness toward the centers is evident on the eagle's shield, but the remaining motifs are quite strong. Marks are lightly peppered over each side without being overly distracting, and the overall appeal is undeniable. A lovely S-mint twenty. NGC ID# 26BW, PCGS# 9012

1890-CC Double Eagle, AU50
With Gold CAC Label

- 3272 1890-CC AU50 PCGS. Gold CAC. Variety 1-A,** having the CC mintmark largely left of the D(OLLAR) below. Mint State examples of this issue are seldom seen, unsurprising given the meager mintage of a tad more than 91,000 coins. This AU example shows deep, ruddy reddish-orange patina with scattered marks that are mostly on the small side. The few larger marks are on Liberty's lip and lower cheek area. Note the gold CAC label on this piece. In addition, the coin is housed in a green label holder. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU53
With Gold CAC Label

- 3273 1890-CC AU53 PCGS. Gold CAC. Variety 1-A.** The mintmark is largely left of the D in DOLLARS. Beautiful orange-gold patina and a paucity of mentionable marks make this 1890-CC with the CAC gold label apparently underrated in its current grade level. Liberty's cheek in particular but the obverse as a whole is free of singular contact, and considerable luster and eye appeal remain. The lower reverse shows extensive die lapping on the lower eagle feathers. Housed in a green label holder. NGC ID# 26BY, PCGS# 9014

**1890-S Liberty Twenty, MS64+
Ex: Saddle Ridge Hoard**

3274 1890-S Saddle Ridge Hoard MS64+ PCGS. CAC. Ex: Saddle Ridge Hoard. Prior to the discovery of the Saddle Ridge Hoard, the 1890-S double eagle was moderately available in grades through MS63, due to numerous examples surviving in overseas bank vaults, but was rare in Choice or finer condition. The Hoard yielded a small number of additional high-grade pieces, though the date remains scarce at the MS64 level, and Gem-quality examples are still firmly within the rare category.

In terms of eye appeal, the coins pedigreed to the Saddle Ridge Hoard are seemingly unrivaled, with many exhibiting vibrant mint bloom and razor-sharp strikes. This high-end near-Gem example is an outstanding coin in that regard, and is limited numerically only by a few light luster grazes on the cheek and the adjacent field. Population: 19 in 64 (10 in 64+), 14 finer (1/15). PCGS# 109015 Base PCGS# 9015

**1892-CC Liberty Double Eagle, MS60
Colorful Semiprooflike Surfaces**

3275 1892-CC MS60 NGC. Variety 1-A. The 1892-CC Liberty double eagle is one of the more available issues from the Carson City Mint, and a popular choice of mintmark type collectors. The mintage was not overly large at 27,265 pieces, but it dwarfs the 5,000 piece production total of the previous year. In addition, a number of examples surfaced in hoards that came on the market in the late 1990s. Mint State coins are still very scarce in an absolute sense.

This attractive Mint State example exhibits well-detailed design elements and pleasing greenish-gold surfaces that are minimally marked for the grade. Prooflike reflectivity is evident in sheltered areas around the devices. This coin will be a welcome addition to a fine date set or type collection. NGC ID# 26C6, PCGS# 9020

**1892-CC Liberty Twenty, MS62
Very Rare in Finer Grades**

3276 1892-CC MS62 PCGS. Variety 1-A. The Carson City Mint increased production of double eagles in 1892, when 27,265 examples were struck. These coins were once elusive, but a number of specimens have surfaced in hoards since 1994, increasing the surviving population to approximately 800-900 examples in all grades. Mint State pieces are still seldom encountered.

This attractive MS62 specimen offers well-detailed design elements and lustrous greenish-gold surfaces with a minimum number of minor contact marks for the grade. Eye appeal is quite strong. Population: 48 in 62 (1 in 62+), 5 finer (1/15). NGC ID# 26C6, PCGS# 9020

**1894 Double Eagle, MS64
Pleasing and High-End for the Grade**

3277 1894 MS64 PCGS. CAC. This high-mintage issue is easily available in lower grades, up to MS63, but near-Gems are very scarce, and Gems are downright rare with fewer than 10 known. This example is remarkably attractive and highly lustrous, with lovely light coloration and relatively slight abrasions for the grade. The CAC sticker confirms this coin's high-end status. NGC ID# 26CB, PCGS# 9025

**1900 Twenty Dollar, MS65
Only Three Coins Numerically Finer at NGC**

3278 1900 MS65 NGC. The 1900 double eagle benefits from a mintage of nearly 1.9 million pieces, and is common in grades through MS64. However, Gems are seen significantly less often and finer pieces are extremely rare and proportionately expensive. This piece displays razor-sharp detail, with frosty wheat-gold luster that delivers an eye-catching cartwheel effect. Light contact on the cheek is all that limits the grade. NGC has seen just three numerically finer submissions (1/15). NGC ID# 26CP, PCGS# 9037

**1900 Liberty Twenty, MS65
Very Rare in Finer Grades**

3279 1900 MS65 PCGS. CAC. The 1900 Liberty double eagle claims a large mintage of nearly 1.9 million pieces and examples in MS65 condition can be found with just a little patience. However, the 1900 is a prime condition rarity in finer grades. This impressive Gem is sharply detailed throughout, with well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded only two numerically finer examples (1/15). NGC ID# 26CP, PCGS# 9037

**1904 Liberty Double Eagle, MS66+
Only One Finer Coin at NGC**

- 3280 1904 MS66+ NGC.** The 1904 Liberty double eagle was produced in large numbers and the issue can only be called scarce at the MS66 level, but finer coins are almost unobtainable. This impressive Premium Gem offers sharply detailed design elements and vivid orange-gold surfaces with vibrant mint luster and no mentionable distractions. NGC has graded only one finer example (1/15). NGC ID# 26CY, PCGS# 9045

**1906-D Double Eagle, MS64
Popular First-Year Mintmark Type Coin**

- 3281 1906-D MS64 PCGS. CAC.** Liberty double eagle coinage was limited to only two years at the Denver Mint, before giving way to the Saint-Gaudens design. The 1906-D is always in demand as the first year of the design from the popular Western mint. This attractive Choice example is sharply detailed and lustrous, with well-preserved orange-gold surfaces. PCGS has graded 13 numerically finer examples (1/15). NGC ID# 26D5, PCGS# 9050

SAINT-GAUDENS DOUBLE EAGLES

**1908-D No Motto Double Eagle, MS65
Sole Mintmarked No Motto Twenty**

- 3282 1908-D No Motto MS65 PCGS. CAC.** Of the two branch mints to strike double eagles in 1908, only Denver produced twenties with the No Motto reverse design, as San Francisco's limited mintage of 22,000 pieces came entirely after the legally mandated switch. While Denver put out a fair number of No Motto pieces, almost two-thirds of a million of the coins, the date is a great condition rarity above the Gem level. MS65 pieces like this one are more accessible, albeit at a price. The coin has satiny, slightly granular luster and a full strike. The obverse shows even orange-gold color, while that hue shows lilac variations on the reverse. The surfaces are clean for the grade. PCGS has graded just 10 numerically finer examples (1/15).
Ex: *Chicago Signature* (Heritage, 8/2011), lot 7686. NGC ID# 26F7, PCGS# 9143

**1909 Twenty Dollar, MS64+
Conditionally Rare Any Finer**

- 3283 1909 MS64+ NGC.** The 1909 Saint-Gaudens twenty is usually obtainable in the lower Mint State grades, but its availability plummets at the Gem level, where it becomes a distinct condition rarity. This Plus-graded Choice example is just a breath away from that level, and displays vibrant straw-gold luster and sharply struck design elements. Some minor contact on Liberty's figure is all that keeps this piece from a full Gem grade assessment. Only nine coins are numerically finer at NGC (1/15). NGC ID# 26FB, PCGS# 9150

**1909-D Saint-Gaudens Twenty, MS63
Low-Mintage Branch Mint Issue**

- 3284 1909-D MS63 PCGS.** Only 52,500 Saint-Gaudens double eagles were struck at the Denver Mint in 1909, making it a scarce issue from this popular facility. This attractive Select example is sharply detailed, with vibrant mint luster and lightly marked orange-gold surfaces. Eye appeal is quite strong. NGC ID# 26FD, PCGS# 9152

1913-D Double Eagle, MS66
Among the Finest Examples Certified

3285 1913-D MS66 NGC. Like many other double eagle issues of the era, a significant portion of the 393,500 coins struck at the Denver Mint in 1913 ended up in overseas bank holdings, primarily in Europe, most notably in Switzerland and France, and in South America. The twenty dollar gold coins were subsequently shipped back and sold on the American market. Hence, the 1913-D is frequently encountered in Uncirculated grades through Gem condition. The certified population drops abruptly at the Premium Gem grade level, and examples are seldom available for collectors.

Each side displays luminous, reddish-gold surfaces and satiny luster. The devices are crisply impressed with much detail on the Capitol building and lower leaves. Noteworthy marks are absent, though some tiny ticks occur throughout. The NGC *Census* shows just 12 grading events in MS66 (one in MS66+), while PCGS reports only five coins in the same grade. Neither service has seen any numerically finer examples (1/15). NGC ID# 26FP, PCGS# 9162

1923-D Saint-Gaudens Twenty, MS67
None Finer at PCGS

3286 1923-D MS67 PCGS. The 1923-D Saint-Gaudens double eagle claims a large mintage of 1.7 million pieces and the issue was remarkably well-produced. As a result, the 1923-D is reasonably available in Mint State grades today and the issue is a favorite choice with mintmark type collectors. Even at the MS67 grade level, the 1923-D can only be called very scarce, but finer examples are virtually unobtainable.

This spectacular Superb Gem exhibits razor-sharp definition on all design elements and the vivid orange-gold surfaces are impeccably preserved. Vibrant mint luster adds to the terrific eye appeal. This coin should find a home in the finest collection or Registry Set. Population: 68 in 67, 0 finer (1/15). NGC ID# 26G6, PCGS# 9176

**1926-S Saint-Gaudens Twenty, MS63
Heavily Melted Issue**

- 3287 1926-S MS63 PCGS.** Produced in large numbers, the 1926-S Saint-Gaudens double eagle was all but annihilated by the Gold Recall of 1933. This impressive Select example is sharply detailed, with vivid orange-gold surfaces that show a scattering of minor contact marks on both sides. Vibrant frosty mint luster adds to the considerable eye appeal. NGC ID# 26GF, PCGS# 9185

**1926-S Double Eagle, MS64
Vibrant Luster, Vivid Color**

- 3288 1926-S MS64 PCGS.** The 1926-S Saint-Gaudens double eagle claims a large mintage of more than 2 million pieces, but the issue was almost completely destroyed in the government melts of the 1930s. This attractive MS64 survivor exhibits well-detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster. PCGS has graded 36 numerically finer examples (1/15). NGC ID# 26GF, PCGS# 9185

COMMEMORATIVE SILVER

**1893 Isabella Quarter, Sharp MS67+
Radiant Mint Luster**

- 3289 1893 Isabella Quarter MS67+ PCGS.** A popular issue for commemorative collectors, the Isabella quarter was struck in concert with the World's Columbian Exposition in Chicago in 1893, and is the only U.S. quarter dollar issue in the classic commemorative series.

This stunning MS67+ PCGS example is superbly toned across each side in a multicolored display of blended iridescence. The fully struck surfaces show exceptionally crisp delineation of every design element, including each of the beads along the borders, as well as the central figures of Queen Isabella on the obverse and the kneeling female on the reverse, symbolizing women's industry. Flashy cartwheel luster illuminates clean, impeccably preserved surfaces. Population: 40 in 67 (5 in 67+), 6 finer (1/15). NGC ID# 28HR, PCGS# 9220

1900 Lafayette Dollar
Lightly Toned Gem

- 3290** 1900 Lafayette Dollar MS65 NGC. DuVall 1-B. A thin layer of stone-gray toning does little to obscure the bright silver luster of this lightly toned Gem dollar. Scarce this nice and rare any finer, the coin is boldly struck for the issue with only ticklike marks on Washington's jawline and on the high points of Bartlett's statue. Just 36,026 pieces were distributed from an authorized mintage of 50,000, including the 26 assay coins. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS66
Attractive, Conditionally Scarce Example

- 3291** 1900 Lafayette Dollar MS66 PCGS. CAC. DuVall 1-B. The leaf points between the 1 and 9 in the date. Although the coins are apparently dated 1900, this is misleading. The entire production of 50,000 coins plus 26 assay pieces was accomplished on December 14, 1899. In fact, the inscribed date refers to the Universal Exposition held in Paris in that year. The coins were struck to raise funds for a statue honoring Lafayette, similar to the one depicted on the reverse, that was to be given to France for the Exposition as a gift from the United States. The commemorative dollars were sold for \$2, but interest in them was less than expected. Only 36,000 examples were distributed, and the remainder was converted into silver bullion in 1945.

This example is impeccably preserved. Light-olive toning occurs mainly at the borders, while the centers remain mostly brilliant. Cartwheel luster swirls over each side, imbuing the coin with substantial visual appeal. The strike is bold overall with minor softness on Lafayette's raised arm and sword, and a few trivial marks prevent an even higher grade. PCGS reports just five numerically finer coins (1/15). NGC ID# 28N8, PCGS# 9222

**1939-D Arkansas Centennial Half, MS67
Only One Coin Numerically Finer**

- 3292 1939-D Arkansas MS67 PCGS.** The 1939-D Arkansas Centennial half dollar had a limited distribution of just 2,100 coins (plus four pieces for assay purposes), sold in three-coin sets along with an example each of the Philadelphia and San Francisco issues of that year. This Superb Gem survivor is notable for being conditionally rare, and also for its outstanding technical quality. Satiny champagne luster deepens as it nears the borders where it is met by tinges of russet. Sharply struck design elements further contribute to the overall appeal. Population: 9 in 67 (1 in 67+), 1 finer (1/15). NGC ID# 28JB, PCGS# 9250

**1936 Cincinnati Half Dollar, MS67
Among the Finest Certified**

- 3293 1936 Cincinnati MS67 PCGS.** The Cincinnati Music Center half dollars were struck at all three mints, but were only sold in three-coin sets, of which just 5,000 were distributed. This brilliant, satiny Superb Gem is one of just nine so-graded examples of the Philadelphia issue at PCGS (1 in 67+), and none are finer (1/15). The devices are well-struck and, as is expected at this grade level, the preservation is exceptional. NGC ID# 28JZ, PCGS# 9283

**1922 Grant Memorial Half, MS65
Scarcer With Star Variant**

- 3294 1922 Grant With Star MS65 PCGS.** The With Star Grant Memorial half dollar is significantly scarcer in high grades than its No Star counterpart. This Gem representative is a trifle soft on the high point of the portrait's hair, but is otherwise well-struck and is free of major abrasions. A faint golden hue accents each side, while numerous die striations in the fields deliver thick, satiny luster. PCGS has certified only 45 numerically finer examples (1/15). NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar, MS66
Lustrous and Well-Preserved**

- 3295 1922 Grant With Star MS66 PCGS.** Ex: Young Collection. According to Dave Bowers, in *Commemorative Coins of the United States* (1991): "The 1922 Grant 'star' half dollar in Mint State is one of the very rarest pieces of the series simply because the mintage was low and most pieces did not sell to collectors."

Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high-grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender, this Premium Gem specimen is pleasingly lustrous and minimally abraded. Population: 40 in 66 (5 in 66+), 5 finer (1/15). NGC ID# 28KC, PCGS# 9307

**1928 Hawaiian Sesquicentennial Half
Champagne-Toned Premium Gem**

- 3296 1928 Hawaiian MS66 PCGS.** The Hawaiian half dollars represent one of the few success stories among the classic commemorative series. A prudent 10,008-piece mintage was accomplished (including 50 sandblast proofs and eight assay coins) and, more importantly, all were promptly sold. The low mintage and sizeable distribution to the Hawaiian populace mean relatively few survivors today, making the issue elusive in all grades and highly prized. This appealing champagne-toned Premium Gem shows a sharp strike and strong satin luster. The surfaces are devoid of all but the most minor marks, none of which are individually significant. Just two coins are certified numerically finer at PCGS (1/15). NGC ID# 28KE, PCGS# 9309

**1946 Iowa Centennial Half Dollar, MS68+
Tied for Finest Known at PCGS**

- 3297 1946 Iowa MS68+ PCGS.** A mintage of 100,057 pieces was promptly sold out to a numismatically inclined public, in part because the postwar coin market was booming. Most were distributed in-state by the Iowa Centennial Committee. The Iowa half was an exceptionally well-produced issue by the Mint, and today most survivors are in higher grades. This Superb Gem is at the top of known examples, with radiant, satin mint luster and an exceptional full strike. Vivid rainbow toning visits the margins on both sides of the coin. One of seven MS68 coins to earn the PCGS Plus designation, with none certified finer. NGC ID# 28KJ, PCGS# 9316

COMMEMORATIVE GOLD

**1915-S Panama-Pacific Quarter Eagle
Near-Gem Quality, Fantastic Color**

- 3298 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** Orange and olive-gold highlights visit intense, honey-gold surfaces of this visually compelling collector favorite. Numerous swirling, raised die lines and slight weakness of the central strike reduce the technical grade, yet the eye appeal and rolling luster suggest a higher designation. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66
Popular Odd-Denomination Commemorative**

- 3299 1915-S Panama-Pacific Quarter Eagle MS66 NGC.** A primarily wheat-gold example of the first new-design commemorative quarter eagle issue, smooth overall with only a few stray marks in the fields. The usual striking softness affects the central devices, but the all-around eye appeal secures this coin's Premium Gem status. NGC ID# 26HK, PCGS# 7450

MODERN BULLION COIN

**1995-W Silver Eagle, PR70 Deep Cameo
Low-Mintage Series Key**

- 3300 1995-W Silver Eagle PR70 Deep Cameo PCGS.** For the 10th anniversary of the American Eagle Bullion program in 1995, the U.S. Mint issued a five-piece set of coins including the four gold denominations and the silver eagle in proof format. The coins were struck at the West Point Mint and all have the W mintmark. Because the coins were sold only in sets, with a high price of \$999 per set, the mintage of the West Point issues was limited and Only 30,125 sets were sold. Accordingly, the 1995-W is the low-mintage king of the silver eagle series.

This magnificent specimen is technically perfect, with fully struck frosty design elements that create stunning cameo contrast with the deeply mirrored fields. The impeccably preserved surfaces are completely brilliant and eye appeal is tremendous. The 1995-W is the number 4 coin in the *100 Greatest U.S. Modern Coins*. Population: 60 in 70 Deep Cameo, (1/15). NGC ID# 28WZ, PCGS# 9887

TERRITORIAL GOLD

C. Bechtler Gold Dollar, MS61 30G., K-1

- 3301** (1831-34) C. Bechtler Dollar, 30G. MS61 PCGS. K-1, R.4. While this Bechtler gold dollar variety is not particularly rare, Mint State examples are seldom encountered. The Bechtler family of Rutherfordton, North Carolina were the first and only prolific producers of gold coins in the South, and they continued operations through most of the 1830s and 1840s. Although they produced larger denomination coins, gold dollars were their primary product, filling a need that didn't exist until the first gold dollars were produced by the U.S. Mint in 1849. Although lightly hairlined, this example has attractive copper-gold and green-gold surfaces with faintly reflective fields and full luster. The catalog number assigned by Donald Kagan, K-1, suggests that this may have been the first Bechtler gold dollar variety produced. Population: 4 in 61, 6 finer (1/15). PCGS# 10064

C. Bechtler Gold Dollar, AU55 K-4, N Reversed, 28 G.

- 3302** (1837-42) C. Bechtler Dollar, N Reversed AU55 PCGS. K-4, R.4. This luminous representative has lovely khaki-gold toning, and the only relevant mark is a slender vertical line through the U in RUTHERF. Substantial luster brightens the legends. Somewhat wavy, as produced. Population: 27 in 55, 17 finer (1/15). Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3529. From The Collection of Philip M. Peterson. PCGS# 10055

(1837-42) Bechtler Dollar, AU58 Popular Reversed N, K-4 Variety

- 3303** (1837-42) C. Bechtler Dollar, N Reversed AU58 NGC. CAC. K-4, R.4. The reversed N in ONE identifies the K-4 variety of this popular Carolina gold issue, produced by Christian Bechtler between 1837 and 1842. This impressive near-Mint example exhibits just a touch of wear on the design elements and the lightly abraded yellow and rose-gold surfaces retain traces of original mint luster. Listed on page 381 of the 2015 Guide Book. Census: 17 in 58, 29 finer (1/15). PCGS# 10055

C. Bechtler K-10 Two and a Half Mint State Details, 67G., 21 C.

- 3304** (1837-42) C. Bechtler Quarter Eagle, 67G. 21C. — Cleaned — ANACS. Unc Details, Net AU50. K-10, R.5. A lustrous and unworn orange-gold representative of this very scarce Bechtler denomination. Bright and faintly hairlined from a wipe, and minor laminations are noted beneath the L in GOLD and between the 25 in 250. A late die state with a partially filled first A in CAROLINA. Listed on page 381 of the 2015 Guide Book. Ex: St. Louis Central States (Heritage, 5/2007), lot 2425. From The Collection of Philip M. Peterson.

**C. Bechtler Five, XF45 Details
K-20, 134 G., With Star**

- 3305** (1837-42) C. Bechtler Five Dollar, 134 G, With Star — Cleaned, Lamination — ANACS. XF45 Details. K-20, R.4. A peach-gold and rose-red Bechtler type coin with ample luster lingering in the legends. A boomerang-shaped lamination beneath the L in CAROLINA is accompanied by a few pinscratches, and the surfaces are mildly bright. Listed on page 381 of the 2015 *Guide Book*.
Ex: Stecher Collection, Part Two (Heritage, 5/2007), lot 4453.
From The Collection of Philip M. Peterson.

**C. Bechtler Five Dollar, VF30 Details
K-23, Georgia Gold, RUTHERF:**

- 3306** (1834-37) C. Bechtler Five Dollar, RUTHERF: — Repaired, Cleaned — ANACS. VF30 Details. K-23, R.5. A challenging pioneer gold variety from late in Christopher Bechtler's private minting career. This thickly hairlined green-gold example is repaired on the reverse border at 1 and 7 o'clock. Listed on page 382 of the 2015 *Guide Book*.
Ex: St. Louis Central States (Heritage, 5/2007), lot 4454.
From The Collection of Philip M. Peterson.

**1849 Norris, Gregg & Norris Five Dollar, AU53
K-3, No Period Variety**

- 3307** 1849 Norris, Gregg & Norris Five Dollar, Reeded Edge, AU53 PCGS. K-3, R.6. No period is visible after the Y in ALLOY, the scarcer of the two Kagin Reeded Edge varieties. Since the obverses of K-3 and K-4 appear identical aside from the presence or absence of the period, it is possible that the period faded (or was lapped) from the die during the course of its production. Norris, Gregg, & Norris is considered to be the first pioneer gold coiner on the West Coast, although Moffat & Co. began production shortly thereafter. This green-gold five dollar piece is evenly struck and has scattered obverse field marks. An opportunity to acquire a very scarce territorial type coin. Population: 6 in 53, 17 finer (1/15).
Ex: Summer FUN Signature (Heritage, 6/2008), lot 2438. PCGS# 10282

1849 Moffat Five Dollar, K-4, VF30
Early West Coast Gold Coiner

- 3308** 1849 Moffat & Co. Five Dollar VF30 NGC. K-4, R.5. An early San Francisco private gold coiner, Moffat & Co. outlasted less reputable rival firms and was chosen to run the U.S. Assay Office established in 1851. The present midgrade representative has problem-free apricot-gold surfaces. Liberty's hair and coronet are worn but the letters in MOFFAT remain legible. Listed on page 384 of the 2015 Guide Book.

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3541.
From The Collection of Philip M. Peterson. PCGS# 10240

1851 Humbert Fifty Dollar, AU Details
Reeded Edge, 887 Thous., K-6

- 3309** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. — Improperly Cleaned — NCS. AU Details. K-6, R.4. A sun-gold representative of the famous Old West "slug." A later variety from the first year of operation, with the date on the obverse exergue instead of the edge. The canary-gold surfaces are moderately bright but the wings and scrollwork show exquisite detail. The left-side edges have a few minor dings, and sundry minor marks include a slender line to the west of the date. Listed on page 385 of the 2015 Guide Book.

Ex: Fern. E. Wagner Trust (Heritage, 6/2008), lot 2433, which realized \$23,000.

From The Collection of Philip M. Peterson. PCGS# 10214

1852/1 K-9 Humbert Twenty Dollar
AU Sharpness

- 3310** 1852/1 Humbert Twenty Dollar — Tooled — NCS. AU Details. K-9, R.6. A rare variety significant as an early departure from the standard fifty dollar denomination. The fields are smoothed throughout both sides. The center of the shield also shows smoothing. Dentils are strengthened near an obverse rim ding at 7 o'clock. Listed on page 386 of the 2015 Guide Book.

From The Collection of Philip M. Peterson. PCGS# 10193

1853 K-18 Assay Office Twenty
AU Sharpness, 900 Thous.

- 3311** 1853 Assay Office Twenty Dollar, 900 Thous. — Whizzed — NCS. AU Details. K-18, R.2. A yellow-gold Assay Office twenty that displays only a trace of high point wear on the eagle's neck. The surfaces are granular and exhibit scattered marks, the most noticeable on the E in AMERICA and the lower right border of the scrollwork. Listed on page 388 of the 2015 *Guide Book*.
From The Collection of Philip M. Peterson. PCGS# 10013

1853 Assay Office Twenty, AU50
900 Thous., K-18
Original Toning

- 3312** 1853 Assay Office Twenty Dollar, 900 Thous. AU50 NGC. K-18, R.2. An original orange-red and olive-green example. Luster emerges from the legends. The eagle's arrows and shield display moderate wear. Abrasions are surprisingly few, although on the reverse rim we note a tick at 6:30 and a minor ding at 3:30. Listed on page 388 of the 2015 *Guide Book*.
From The Collection of Philip M. Peterson. PCGS# 10013

Miners Bank Ten, K-1, XF Details
Rare Gold Rush Merchant

- 3313** (1849) Miners Bank Ten Dollar — Rim Filed, Improperly Cleaned — NCS. XF Details. K-1, R.6. The Miners Bank issuer is infrequently found in most Gold Rush type collections. The firm was among the first issuers of gold coins in California. Kagan says that "the exact founding date of the firm is difficult to determine since its members formed a number of partnerships. Private paper currency was emitted under the name MINERS' BANK (presumably signed by Wright and Haight); dry goods were sold by WRIGHT & OWENS; WRIGHT & CO. was a bank, and an institution issued private gold coins with the name MINERS BANK."
Most Miners Bank tens were melted during the 1850s, since merchants refused to accept them at face value. They were discounted up to 20%, although assays confirmed an average value of \$9.87. The present survivor has minimal circulation wear but is hairlined and the reverse field is glossy. A small obverse rim cut is noted at 6:30. The rim filing is minimally apparent in the NCS encasement. Listed on page 389 of the 2015 *Guide Book*.
Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 1849.
From The Collection of Philip M. Peterson. PCGS# 10236

1850 Baldwin & Co. Five Dollar
AU Details, Kagin-2

- 3314 1850 Baldwin Five Dollar — Improperly Cleaned — NCS. AU Details. K-2, R.5.** George C. Baldwin and Thomas S. Holman bought out F.D. Kohler & Co., who gave the purchasers a glowing public recommendation. The coins issued by the firm, however, were modestly underweight on gold. When that became public knowledge, antipathy against Baldwin & Co. officials drove them from the state. Bankers bought examples at a deep discount and melted them for a tidy profit. The present orange-gold survivor is granular and softly struck, but no marks are readily apparent. Listed on page 391 of the 2015 *Guide Book*.

Ex: Martin L. Diffenbacher, Jr. Collection (*Heritage*, 1/2009), lot 4217.

From The Collection of Philip M. Peterson. PCGS# 10025

1855 Kellogg Twenty, AU Details
Unlisted “K-3c” Marriage

- 3315 1855 Kellogg & Co. Twenty Dollar — Improperly Cleaned — NCS. AU Details. “K-3c”, R.5.** This elusive Short Arrows die marriage is unlisted in the classic Kagin reference. The date is fully left of the shoulder curl. The O in CO is embedded in Liberty’s hair. The present butter-gold example has scattered small field marks. Liberty’s cheek and neck are hairlined from a wipe. The issue is listed on page 395 of the 2015 *Guide Book*.

From The Collection of Philip M. Peterson. PCGS# 10225

1849 Oregon Five Dollar, K-1, VF25
Fewer Than 50 Pieces Known

- 3316 1849 Oregon Exchange Co. Five Dollar VF25 PCGS. K-1, R.5.** A territorial issue that most collectors only dream of owning. Not necessarily because of the strong prices associated with Oregon Exchange Company half eagles, but simply due to the limited extant population. It is believed that less than 50 examples have survived the original mintage of 6,000 pieces. A review of the NGC *Census Report* and the PCGS *Population Report* support the claim, as a combined total of only 49 1849 Oregon fives have been certified as of (1/15), which most certainly includes a few resubmissions.

This example clearly circulated, which adds to its historical significance and charm. The few abrasions observed on either side are commensurate with the assigned grade and we note two milling marks near the obverse rim at 3 o’clock. The obverse patina is an even dark tan hue, whereas the reverse tone is a significantly lighter orange-gold color. A pleasant example of this highly challenging issue. Population: 2 in 25, 21 finer (1/15). PCGS# 10288

**1860 Private Two and a Half, MS62
Clark, Gruber & Co., K-1**

- 3317** 1860 Clark, Gruber & Co. Quarter Eagle MS62 PCGS. K-1, R.4. A lovely apricot-gold example with lightly abraded, semiprooflike fields. Well struck for the variety, although Liberty's ear shows slight incompleteness. Unlike usually seen, each letter in CLARK & CO is sharply defined. Delicate die cracks connect the left-side stars. A second faint crack connects 186, and a third crack ventures from the coronet tip to the rim near star 6. Clark, Gruber & Co. was the most significant Colorado private gold coiner. Their building was purchased by the Federal government and operated as an assay office until 1904, when activities transferred to the nascent Denver Mint. Population: 10 in 62, 12 finer (1/15).
From The Collection of Philip M. Peterson. PCGS# 10135

**1860 Pike's Peak Ten Dollar
K-3, AU Details**

- 3318** 1860 Clark, Gruber & Co. Ten Dollar — Damaged — NCS. AU Details. K-3, R.5. In mid-August 1860, the firm of Clark, Gruber was striking approximately \$2000 in gold dust daily, converting the dust into ten, five, and two and a half dollar gold pieces. The 1860 ten dollar was of special interest to later collectors as the mountain depicted on the obverse was supposed to be a likeness of Pike's Peak. But the engraver back east had never seen the actual mountain, so the mountain can only be considered symbolic. The surfaces of this piece are bright green-tinted gold and display the typical number of abrasions seen on most Territorial gold coins. The damage referred to is mostly seen on the reverse where there are a series of short, deep scratches into the upper part of that side. Listed on page 398 of the 2015 *Guide Book*.
From The Collection of Philip M. Peterson. PCGS# 10137

**1861 Clark, Gruber & Co. Quarter Eagle, AU53
Rare K-5a Variety**

- 3319** 1861 Clark, Gruber & Co. Quarter Eagle AU53 PCGS. K-5a, R.7. The star above P in PIKES shows signs of recutting, identifying the K-5a variety. Many researchers now believe the K-5a is just a different die state of the K-5 variety. This attractive AU53 example displays well-detailed design elements with a touch of softness on the centers and just a trace of actual wear. Listed on page 399 of the 2015 *Guide Book*. Population: 5 in 53, 36 finer (1/15). PCGS# 10139

**1861 Clark, Gruber Ten, Choice VF
K-7, Liberty Head**

- 3320** 1861 Clark, Gruber & Co. Ten Dollar VF35 PCGS. K-7, R.4. A green-gold example of the second and final year of Clark, Gruber private coinage. The motifs imitate the Federal design, a departure from the Pikes Peak depiction in 1860. The moderately circulated surfaces are inoffensively abraded except for a small cluster of marks on the field near Liberty's mouth.
Ex: Long Beach Signature (Heritage, 2/2007), lot 5338.
From The Collection of Philip M. Peterson. PCGS# 10141

CALIFORNIA FRACTIONAL GOLD

A.R. Jackman Presentation Piece Engraved 1857, Salt Lake City, Utah 1853 BG-429 Half Dollar Host

3321 1853 Liberty Round 50 Cents, BG-429, Low R.4 — Engraved — NCS Genuine. Perhaps the earliest known numismatic piece of its kind from Utah, this engraved California gold half dollar is intriguing both for its known and unknown historic importance. The host coin is a BG-429 Small Head, Bust Close to First Star, Period One small denomination gold piece dated 1853, and engraved for presentation to A.R. Jackman, December 15, 1857.

Ammi Rumsey Jackman was one of the first Utah pioneers, arriving at the Great Salt Lake Valley on September 30, 1847. He was born in Genesee County, New York in 1825. He left New York at age 13 and worked for a time on the steamboats in Missouri, where his family converted to Mormonism in the 1830s and soon moved to Nauvoo, Illinois. He became a member of the Mormon Battalion that started West at the time of the exodus after the assassination of the Mormon leader and prophet, Joseph Smith. Jackman traveled with the second party of emigrants to Salt Lake.

Upon arrival, he was one of the first volunteers to carry the mail back to the East, riding for "B.Y. Express" and later for the Pony Express. He made the same journey back and forth six or seven times, a long journey often made in cruel and harrowing circumstances. A devout Mormon, Ammi Jackman was also a veteran of the Black Hawk (Santpete) wars of 1849-1851 and was witness to more than two decades of regional fighting both with Indians and at times with federal troops.

Jackman's name is found in both the 1870 Territorial Census (spelled incorrectly) and in the 1880 Census, although Mormons typically avoided the U.S. Census takers. His name also appears as a signatory witness on a bill of sale for slaves in Salt Lake City, a little-researched but significant bit of information for interested specialists. His occupation was officially "clerk in store," but obviously his involvement in the Mormon community went far beyond those duties. He passed away after a six-month illness at age 74 in 1898.

The exact engraving on this tiny gold piece is intricately done and reads "A.R. JACKMAN G.S.L. CITY DEC. 15. 1857." The inscription encircles the obverse. The fact that this gold piece was presented just a few months after the infamous "Mountains Meadows Massacre" near Cedar City, Utah in 1857 may or may not have any significance.

Ex: Latter-Day Saints Collection, Sale 45 (Goldberg Auctions, 4/2008), lot 717.

COINS OF HAWAII

1883 Hawaii Half Dollar, MS66 None Numerically Finer

- 3322 1883 Hawaii Half Dollar MS66 PCGS. CAC.** Four regular-issue silver denominations were coined for Hawaii in 1883, all designed by Charles Barber and struck at the San Francisco mint on planchets of the U.S. standard. Half dollars were produced in the largest quantity (nearly 700,000 pieces), but when Hawaii became a U.S. Territory in 1900, the legal tender status of Hawaiian coinage was removed and most coins were eventually melted, after which the half dollar suddenly became one of the scarcer issues.

This lustrous Premium Gem is among the finest certified survivors, and exhibits blended aquamarine and golden-silver hues over each side. Remarkably sharp definition is seen on the hair and beard of the portrait, as well as the shield stripes on the reverse, with overall excellent eye appeal. Population: 5 in 66 (1 in 66+), 0 finer (1/15). PCGS# 10991

PATTERNS

1855 Larger-Size Flying Eagle Cent Judd-171, Copper-Nickel Alloy, MS62

- 3323 1855 Flying Eagle Cent, Judd-171, Pollock-196, Low R.7, MS62 NGC.** The obverse features an eagle flying to the left, surrounded by 13 stars with the date at the bottom. The reverse shows a wreath with four leaves under the E in STATES. Struck in copper-nickel alloy with a plain edge. The former NGC holder indicated this is Judd-171 (60% copper and 40% nickel), rather than Judd-171A, struck in German silver (75% copper, 12% nickel, 13% zinc). According to USPatterns.com and the Judd reference (tenth edition), it is thought that examples struck in German silver are originals and coins struck in bronze are restrikes, although some bronze coins may be originals. Like this piece, bronze restrikes should show evidence of clashed dies. The surfaces display beige-tan patina and a uniformly incomplete strike. PCGS# 11736

1867 Judd-572 Five Cents, PR63 Brown

- 3324 1867 Shield Five Cents, Judd-572, Pollock-648, R.7, PR63 Brown PCGS.** A regular issue With Rays die striking, produced in copper with a plain edge. Extensively mellowed with countless tiny carbon flecks found primarily on the reverse. As was pointed out in a previous sale: "The Proof 1867 With Rays Shield Nickel is a prohibitively expensive rarity, and the present pattern is not only more affordable, but is also even more rare than its famous copper-nickel counterpart." PCGS# 60782

1867 Shield Nickel, PR65 Red and Brown Judd-572, Struck in Copper

- 3325 1867 Shield Five Cents, Judd-572, Pollock-648, Low R.7, PR65 Red and Brown NGC.** Struck from regular issue plain edge With Rays dies, but in copper instead of the usual cupronickel alloy. This lovely Gem is predominantly orange and cherry-red. The strike is full and no marks are detected. The reverse border displays minute carbon. PCGS# 70782

End of Session One

SESSION TWO

COLONIALS

- 3326** (1694) London Elephant Token, Thick Planchet, AU55 PCGS. Hodder 2-B, W-12040, R.2. Struck in Copper. A medium-brown example — lighter on the obverse, slightly deeper brown on the reverse. Evenly struck and attractive with a smooth obverse, while the reverse has several mint-made planchet streaks and flan irregularities. Listed on page 46 of the 2015 *Guide Book*. Population: 18 in 55, 49 finer (1/15). PCGS# 55

1747 Machin's Mills Halfpenny, VF30 King George II, Vlack 1-47A

- 3327** 1747 Machin's Mills Halfpenny VF30 NGC. Vlack 1-47A, W-7660, R.5. A backdated George II variety struck during the 1780s by Machin's Mint, whose primary output was contemporary counterfeit George III British halfpennies. Toned deep mahogany-brown with pleasing sharpness and moderate granularity (as coined) on the head and neck of the king. Struck slightly off center toward 7 o'clock but the legends are virtually complete. Listed on page 67 of the 2015 *Guide Book*. PCGS# 445

- 3328** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU53 PCGS. N. 13-X, W-6855, R.2. Plentiful pockets of lime-green luster accompany tan-brown toning on the high points and open fields. Struck on a well-made planchet and essentially free from marks. A Bank of New York variety often selected by Early American type collectors. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

1787 Fugio Cent, MS64 Brown Pointed Rays, N. 13-X

- 3329** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. N. 13-X, W-6855, R.2. A coruscating near-Gem with deep mahogany-brown toning. Devoid of flan imperfections or visible marks. The vertical die crack at 6 o'clock on the reverse, and the clash marks from the chain links along the obverse margin, help to confirm the popular Bank of New York variety. Listed on page 87 of the 2015 *Guide Book*.
Ex: Essex Palm Collection (Heritage, 1/2007), lot 189.
From The Collection of Philip M. Peterson. PCGS# 883

- 3330** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge, PR65 Brown PCGS. Baker-3C, W-10310, R.6. 114.5 gn, per the Norweb catalog. Deep mahogany-brown with ice-blue and olive-green undertones. A fully struck and magnificent Gem. Double struck, the obverse (hammer) die rotated slightly clockwise between impressions while the hammer (reverse) die remained fixed. Listed on page 80 of the 2015 *Guide Book*.
Ex: Norweb Collection (Stack's, 11/2006), lot 2006, which realized \$1,955.

From The Collection of Philip M. Peterson. PCGS# 682

- 3331** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR65 Red and Brown PCGS. CAC. Baker-3, W-10370, R.5. This intricately struck Gem features peripheral brick-red color, while the fields and devices have mellowed in medium brown hues. A tiny planchet flaw (as made) on the field near the olive branch stem. Rulau and Fuld attribute these restrikes of the 1783 issue to London dealer W.S. Lincoln in 1860. Listed on page 80 of the 2013 *Guide Book*.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5044. PCGS# 686

- 3332** 1791 Washington Large Eagle Cent MS62 Brown PCGS. Baker-15, W-10610, R.2. A sharply struck, appealing, glossy olive-brown example of this popular early Federal-era issue. Glimpses of lighter tan-brown appear under a strong light, and this piece might have achieved a higher grade were it not for some light planchet roughness near the obverse rim at 8 o'clock and 5 o'clock. Nonetheless, this remains a highly collectible example.
Ex: Long Beach Signature (Heritage, 2/2007), lot 2054.
From The Collection of Philip M. Peterson. PCGS# 702

1793 Ship Halfpenny, MS61 Brown Lettered Edge, Baker-18

- 3333** 1793 Washington Ship Halfpenny, Copper, Lettered Edge MS61 Brown PCGS. Baker-18, W-10855, R.4. A deep mahogany-brown example of this scarce Washington variety. Marks are few and the definition is fairly sharp, considering the advanced buckling of the reverse field usual for the variety. Listed on page 83 of the 2015 *Guide Book*. Population: 5 in 61 Brown, 4 finer (1/15).
Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 24.
From The Collection of Philip M. Peterson. PCGS# 734

**1799 Funeral Urn Medal, Good 6
Baker-166A, Die Variety 1-B**

- 3334** 1799 Washington Funeral Urn Medal Good 6 NGC. Baker-166A, Die Variety 1-B. The Funeral Urn medal is credited to Jacob Perkins of Newburyport, Massachusetts. All examples show a small hole at 12 o'clock, since the medals were intended to worn at Washington's civic funeral, held on February 22, 1800. The present cream-gray example was likely carried as a pocket piece after the ceremony, although the legends remain readable. No marks are noticeable.

HALF CENTS

- 3335** 1793 C-3, B-3, R.3 — Repaired, Reverse Lamination — PCGS Genuine. Good Details. A post-strike lamination affects half of the reverse, between 1:30 and 7:30. An unusual mint error on a scarce introductory single-year type. The left obverse field is smoothed near the profile, and the reverse is re-engraved near the IT in UNITED. Recolored and moderately bright. Our EAC grade AG3. PCGS# 35009 Base PCGS# 1000

- 3336** 1804 Spiked Chin, C-8, B-7, R.1, MS62 Brown NGC. Manley Die State 3.0. Golden-brown clings to the design, although the fields and devices are deep brown. Carbon is trivial for the grade, and luster shimmers when the piece is rotated beneath a light. Minute ticks on the portrait are all that limit the grade. Our EAC grade AU55. Ex: *St. Charles Signature (Heritage, 10/2009), lot 59; Tampa FUN Signature (Heritage, 1/2011), lot 3101, which realized \$2,645.* PCGS# 35167 Base PCGS# 1075

**1804 Half Cent, MS63 Brown
C-8, 'Spiked Chin'**

- 3337** 1804 Spiked Chin, C-8, B-7, R.1, MS63 Brown NGC. Manley Die State 3.0 with minimal obverse dentilation. A bolt, or similar metal object, was struck into the obverse die to create the popular *Guide Book* "Spiked Chin" variety. A coruscating and unabraded example with dappled golden-brown and russet toning. The central reverse is displays a trace of lacquer. Our EAC grade MS60. Ex: *Orlando FUN Signature (Heritage, 1/2007), lot 306.* From *The Collection of Philip M. Peterson*. PCGS# 35167 Base PCGS# 1075

**1804 Half Cent, MS63 Brown
Plain 4, No Stems, C-13**

- 3338** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Brown NGC. Manley Die State 2.0. A lovely Draped Bust type coin with lustrous and virtually unmarked chocolate-brown surfaces. Carbon is confined to a small spot on the top of Liberty's drapery. The die state precludes obverse dentilation, but the major devices are nicely brought up. Our EAC grade XF45. PCGS# 35176 Base PCGS# 1063

**1832 C-2 Half Cent, MS65 Brown
Exceptional Quality**

- 3339** 1832 C-2, B-2, R.1, MS65 Brown PCGS. CAC. Manley Die State 1.0. A fully struck chocolate-brown and olive-green Gem that provides sweeping luster and exemplary preservation. A loupe is needed to locate infrequent minute carbon. A desirable Classic Head type coin. Among the finest certified, since C-2 is unavailable above the MS65 level. Our EAC grade MS60. PCGS# 35276 Base PCGS# 1159

LARGE CENTS

**1793 Chain Cent, Good Details
AMERICA, S-3**

- 3340** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Damaged — NGC Details. Good. All four date digits are clear on the present Chain cent, and the high R in LIBERTY provides a secondary diagnostic. The dark surfaces are evenly granular, the portrait exhibits light pinscratches, the rims display several small dings, and a slender vertical lamination is noted on the upper reverse field. Our EAC grade Fair 2.

**1793 Wreath Cent, VF Details
S-8, Vine and Bars Edge**

- 3341** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — **Environmental Damage** — NGC Details. VF. All legends are readable with the unaided eye on this deeply toned russet-brown Wreath cent. The surfaces are evenly granular, but no obvious abrasions emerge upon inspection. A collectible example of the scarce single-year type. Our EAC grade VG8.

**1793 Wreath Cent, VF Details
Vine and Bars Edge, S-8**

- 3342** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — **Tooled** — NGC Details. VF. No tooling is readily evident on this well defined and minimally marked Wreath cent. The walnut-brown surfaces are minutely granular and mildly glossy. Overall, much more pleasing than implied by the NGC notation. A diagonal die crack bisects the reverse, usual for Sheldon-8. An important single-year type. Our EAC grade Fine 12..
- 3343** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, **Good 4 PCGS**. Most legends are clear and readable on this deep gunmetal-gray early type coin. Only the fraction is indistinct. Evenly granular, and we note moderate rim marks near 12:30 on the obverse and 1 o'clock on the reverse. Certified in an old green label holder. Our EAC grade Good 4.
From The Collection of Philip M. Peterson. PCGS# 35459 Base PCGS# 1347
- 3344** 1793 Wreath, Lettered Edge, S-11c, B-16c, **Low R.3** — **Scratches** — NGC Details. **Good**. A steel-gray example with clear types. ONE CENT and LIBERTY are bold. Both sides display numerous thin marks made during an idle hour long ago. Slightly out of round, as made since the edge lettering is undisturbed across the irregular portion between 3 and 5 o'clock. Our EAC grade AG3.

**1793 Liberty Cap Cent, Good Details
S-13, Clear Legends**

- 3345** 1793 Liberty Cap, S-13, B-20, **Low R.4** — **Environmental Damage** — NGC Details. **Good**. All legends are readable on this scarce first-year cent. The deep lavender-brown surfaces are granular to porous, a couple of thin marks are noted on the left obverse, and a small rim ding is noted at 4 o'clock. The Liberty Cap is the rarest of the three major 1793 design varieties. Our EAC grade Good 4.
- 3346** 1794 Head of 1794, S-59, B-57, R.3, **VF25 PCGS**. The left ribbon bow is recut, a diagnostic feature of the reverse die and this variety. Light olive-green surfaces with a hint of gold and splashes of darker color. This is an attractive example with only minor surface marks. Our EAC grade Fine 15.
Ex: Long Beach Signature (Heritage, 9/2006), lot 134.
From The Collection of Philip M. Peterson. PCGS# 35639 Base PCGS# 901374
- 3347** 1800/1798 Style One Hair, S-191, B-2, R.3, **VF25 NGC**. A deep gunmetal-gray cent with pleasing sharpness on Liberty's hair. A late die state with most of the denominator obscured by the rising field. Metal flow into the sinking lower reverse die explains the soft impression on the ER in LIBERTY. A minor rim ding at 4 o'clock provides the sole detractor. Our EAC grade Fine 12. PCGS# 36146 Base PCGS# 1452
- 3348** 1802 S-236, B-16, R.1 — **Damage** — **PCGS Genuine. Unc. Details**. A rim-to-rim die crack across the right side of the wreath identifies Sheldon-236. A well struck and unworn representative with good luster and an unabraded reverse. The obverse displays several marks on Liberty's chin and chest and near the hair ribbon. The reverse has a spot beneath the ER in AMERICA. Our EAC grade VF20. PCGS# 36317 Base PCGS# 1470
- 3349** 1803 No Stems, S-243, B-1, R.2, **XF40 NGC**. No Stems, a double fraction bar, and a widely repunched second S in STATES make S-243 a memorable 1803 marriage. Nonetheless, the second use of the reverse die, following the 1802 S-241. This well defined chocolate-brown representative is smooth aside from a small obverse rim nick at 4:30. Our EAC grade VF25. PCGS# 36419 Base PCGS# 921501
- 3350** 1804 S-266b, B-1, R.2, **AG3 PCGS. CAC**. An intermediate die state with a cud over RTY. This key date cent has a clear date. LIBERTY and AMERICA are bold. STATES is weak, as is much of UNITED and OF. The walnut-brown and gunmetal-blue surfaces are minimally granular. Each side has a couple of small rim nicks. Our EAC grade Fair 2. PCGS# 36422 Base PCGS# 1504

**1804 S-266c Cent, VG10
Bold Legends**

- 3351** 1804 S-266c, B-1, R.2, VG10 PCGS. The final major die state with a large cud over MERIC. The sole die marriage of the low mintage date. A medium brown and olive-green representative with sharp legends and partial hair definition. Small abrasions are distributed but none are individually significant. Our EAC grade Good 5. PCGS# 36422 Base PCGS# 1504

**1804 Cent, VF Details
S-266c, Late Die State**

- 3352** 1804 S-266c, B-1, R.2 — **Damaged** — NGC Details. VF. A chocolate-brown example with faint to moderate vertical pinscratches on the portrait. All legends are bold. The borders appear flattened near 4:30 and 9 o'clock and an obverse rim ding is noted at 6:30. The sole official die marriage of the low mintage date. The late die state with a large rim cud on each side. Our EAC grade Good 4.

- 3353** 1806 S-270, B-1, R.1 — **Improperly Cleaned** — NGC Details. AU. This boldly detailed representative was likely once recolored but has since mellowed into attractive jade-green and chestnut-brown shades. No marks are perceptible but the reverse border is moderately granular. Our EAC grade VF25.

- 3354** 1807/6 Blunt 1, S-272, B-2, High R.4, Good 4 NGC. A coveted *Guide Book* variety, the Blunt 1 overdate is much rarer than the S-273 Pointed 1 overdate. This deep brown example has a bold date and fully readable legends. The lightly granular surfaces show few marks, and among those only a reverse rim knock at 1 o'clock merits mention. AG3. PCGS# 36439 Base PCGS# 1525

- 3355** 1811 S-287, B-1, R.2 — **Environmental Damage** — NGC Details. XF. A well defined deep olive-brown example of this scarcer Classic Head date. No marks are apparent, but the surfaces are evenly granular and a depressed area is noted on the lower reverse rim. Our EAC grade VG10.

- 3356** 1821 N-1, R.1, XF45 PCGS. Noyes Die State A, perfect dies. This is one of only two varieties for the 1821 large cent, identified by the close proximity of the second S in STATES to the adjacent wreath leaf. This Choice XF example is well-detailed with smooth, auburn-brown surfaces. The strike is well-centered and even, and there are no mentionable environmental impairments. Our EAC grade VF20. PCGS# 36706 Base PCGS# 1621

**1823/2 N-1 Cent, XF40
Key Matron Head Date**

- 3357** 1823/2 N-1, R.2, XF40 PCGS. The often-seen late die state with merged dentils beneath the 8 in the date and stars 1 through 4. A medium brown representative with pleasing definition and a hint of granularity on the reverse. The left obverse has a few inoffensive marks and the reverse rim shows a small nick before 6 o'clock. Our EAC grade VF25. PCGS# 36760 Base PCGS# 1630

**1836 N-3 Cent, MS65 Brown
Lingering Traces of Mint Red**

- 3358** 1836 N-3, R.1, MS65 Brown PCGS. CAC. Plentiful pockets of red outline design elements, but the open fields and high points are chocolate-brown. A magnificent Gem whose bold strike and smooth surfaces ensure exemplary eye appeal. The late die state with a rim break over star 6 and a slender rim-to-rim crack that passes across the tops of ONE. Our EAC grade MS60. PCGS# 37117 Base PCGS# 1726

- 3359** 1839/6 Plain Cords, N-1, R.3 — **Environmental Damage, Burnished** — NGC Details. XF. A distinctive overdate variety that returns the obsolete Plain Cords portrait retired by the Mint in 1837. The late die state with lengthy horizontal cracks across Liberty's eye and ear. The lavender-brown surfaces are moderately granular and both sides are mildly glossy from a wipe. Our EAC grade VG10.

- 3360** 1842 Large Date, N-7, R.2, MS64 Brown PCGS. Grellman Die State a. A lovely Choice chocolate-brown cent that retains glimpses of the initial orange color in protected regions. Lustrous and minimally marked. The strike is sharp aside from minor blending near the top of the ear. Our EAC grade AU50. PCGS# 405821 Base PCGS# 1835

- 3361** 1852 N-12, N-13, R.1, MS66 Brown NGC. Grellman Die State c. Predominantly chocolate-brown with glimpses of faded red in protected areas. Unabraded and spot-free. N-12 and N-13 are respectively the early and late die states of the same marriage. The present high grade example is the terminal die state with an orange-peel texture (as made) throughout the obverse. Our EAC grade MS60. PCGS# 147260 Base PCGS# 1898

- 3362** 1852 N-22, N-9, R.1, MS66 Red and Brown PCGS. Grellman Die State d. Newcomb separately designated the early and late states of this marriage, respectively as N-22 and N-9. This lustrous orange-red late die state cent has a sharp strike and unabraded surfaces. Our EAC grade MS63. PCGS# 147285

FLYING EAGLE CENTS

- 3363 1857 MS64 NGC.** The lightly marked, lustrous surfaces of this attractive Choice example show a mix of original red and lavender patina. The design elements are sharply rendered and eye appeal is quite strong. NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, MS65 Radiantly Lustrous

- 3364 1857 MS65 PCGS.** Vibrant bronze-gold mint luster delivers eye-catching appeal on each side of this Gem Flying Eagle type coin. Close study with a loupe reveals scattered small marks in the fields, primarily on the obverse, but these are mint-made, as result of debris on the die face. The usual striking softness is noted on the eagle's tailfeathers and head, as well as the corresponding portions of the reverse wreath, but the centers are sharp. A faint peppering of tiny specks is discernable with magnification. Only 15 coins are numerically finer at PCGS (1/15). NGC ID# 2276, PCGS# 2016

- 3365 1858 Small Letters MS63 PCGS.** Low Leaves Reverse. Close E in ONE. A sharply struck and coruscating representative. Only trivial contact is evident, although a lens shows a few minute spots, mostly on the reverse. Encapsulated in an old green label holder. NGC ID# 2279, PCGS# 2020

- 3366 1858 Small Letters MS64 PCGS. CAC.** Eagle Eye Photo Seal, card not included. Low Leaves Reverse. Open E in ONE. A fully struck, unabraded, and beautiful apricot-gold near-Gem. The eye appeal surpasses the numerical grade. Lightly die doubled on the E in ONE. Housed in a green label holder. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3367 1859 MS64 NGC.** Always popular because of its status as a one-year type, this lustrous near-Mint example displays a copper-orange patina that belies its copper-nickel composition. The coin is a trifle soft on the feather detail and the hair curls as if struck from worn dies, which is not surprising since the average die pair struck more than 200,000 pieces. Still, a vibrant and lustrous example with strong eye appeal. NGC ID# 227E, PCGS# 2052
- 3368 1859 MS64 PCGS.** This is an appealing Choice example of this one-year Laurel Wreath type, boasting sharp design elements and minimally disturbed satiny luster. Bronze-gold surfaces yield to brighter sun-gold hues in the recesses, while a few minute specks are noted for accuracy. NGC ID# 227E, PCGS# 2052
- 3369 1859 MS64 NGC.** The lustrous copper red surfaces of this impressive Choice example have mellowed to lilac in a few areas. The design elements are well-detailed and few signs of contact are evident. NGC ID# 227E, PCGS# 2052
- 3370 1866 MS65 Red and Brown PCGS.** Full design definition is produced on both sides of this Gem Red and Brown 1866 Indian cent. Substantial mint red remains overall, although overtones of amber and auburn-brown preclude a full Red designation from PCGS. No significant abrasions are observed. There is a lump of metal within the upper loop of the first 6 in the date, but this is not one of the repunched date varieties listed in the *Cherry-pickers'* reference. Population: 82 in 65 Red and Brown, 4 finer (1/15). NGC ID# 227P, PCGS# 2086

- 3371 1870 MS64 Red and Brown PCGS.** Both sides of this sharply detailed Indian cent exhibit about half of the original orange mint color, attractively blended with bluish-brown and pale violet toning. NGC ID# 227U, PCGS# 2098

- 3372 1899 MS66 Red PCGS.** Glowing fiery-orange mint frost is the chief attribute this Premium Gem 1899 Indian cent possesses, although sharp design elements also contribute to the immense eye appeal. Close study with a lens reveals a few tiny, grade-consistent ticks on the obverse portrait, as well as a small speck near the reverse rim at 9 o'clock. PCGS has certified 13 numerically finer full Red examples (1/15). NGC ID# 228U, PCGS# 2204

PROOF INDIAN CENTS

- 3373 1886 Type One PR66+ Brown PCGS.** The last feather points between the I and C in AMERICA, identifying the Type One variety. The original red surfaces of this high-end Premium Gem have mellowed to vivid shades of violet, with sharply detailed design elements and deeply reflective fields underneath. Population: 26 in 66 (4 in 66+) Brown, 8 finer (1/15). NGC ID# 22A7, PCGS# 2345

- 3374 1894 PR65 Brown PCGS. CAC.** This is a well-preserved Gem example of this proof issue, boasting sharp detail on the headdress feathers and ribbon. The fields and devices exhibit a thick, glossy texture, rather than deep mirroring, while the surfaces display primarily auburn-brown toning, with tinges of coppery-red and steel-blue observed when tilted beneath a light. Population: 8 in 65 Brown, 4 finer (1/15). NGC ID# 22AG, PCGS# 2369

LINCOLN

1907 Lincoln Plaque by Brenner Mounted on Green Marble With Easel

- 3375 1907 Abraham Lincoln Bronze Plaque by Victor D. Brenner.** A half-length portrait of the martyred president faces right, with the upper coat and profile in a design that any beginning collector of classic Lincoln cents will instantly recognize. At the lower edge is ABRAHAM LINCOLN / 1809 1865. Along the right side is COPYRIGHT 1907 BY V.D. BRENNER. On the lower right field, the date is repeated, and above it is a symbol depicting an arrow left within a circle. Mounted on the original green marble. The bronze plaque measures 7" x 9.5" and the green marble mount measures 8.5" x 10.75". The plaque has a beautiful, deep chocolate patina. Retains its original brass easel on the verso. Sculptor Victor D. Brenner was chosen by President Roosevelt to design the Lincoln cent, first issued in Lincoln's birth centennial year.

LINCOLN CENTS

- 3376 1909 VDB MS67 Red PCGS. CAC.** A fabulous Superb Gem from the first year of the Lincoln design, with sharply detailed design elements throughout and bold designer's initials. The original red surfaces are impeccably preserved and vibrant mint luster enhances the terrific eye appeal. PCGS has certified only one numerically finer example (1/15). NGC ID# 22AZ, PCGS# 2425
- 3377 1909 VDB Die Doubled Obverse, FS-1101, MS64 Brown NGC.** All four digits in the date and RTY in LIBERTY show distinct doubling, identifying the popular FS-1101 Doubled Die Obverse variety. This well-detailed Choice example offers lightly marked light brown surfaces with some original red at the borders. Census: 11 in 64 Brown, 3 finer (1/15). PCGS# 37631 Base PCGS# 82423
- 3378 1909-S VDB MS63 Red and Brown PCGS.** This Select Mint State example gives the first-glance impression of full Red color, although closer study reveals subtle burgundy and auburn-brown overtones that slightly mute the brilliance. The strike is bold and the surfaces are free of major abrasions, although the occasional speck is present. NGC ID# 22B2, PCGS# 2427
- 3379 1909-S VDB MS64 Red and Brown PCGS.** The original red surfaces of this sought-after series key have mellowed to light brown and lilac in some areas, with somewhat subdued mint luster and well-detailed design elements. NGC ID# 22B2, PCGS# 2427
- 3380 1909-S VDB MS64 Red and Brown PCGS.** The original red surfaces of this attractive Choice example have mellowed to light brown in some areas but the design elements are well-detailed and the all-important designer's initials are bold. *From The Collection of Philip M. Peterson.* NGC ID# 22B2, PCGS# 2427
- 3381 1909-S VDB MS65 Red and Brown PCGS.** Much closer to Red than Brown, although the base of Lincoln's coat shows a subtle gray streak. Potent luster sweeps this boldly struck and virtually unabraded Gem. Certified in a first generation holder. NGC ID# 22B2, PCGS# 2427
- 3382 1909-S VDB MS65 Red and Brown PCGS.** The mostly red surfaces of this important series-key have mellowed to light brown and lilac in a few places, with vibrant mint luster and a few microscopic specks of carbon on the reverse. The design elements are sharply detailed and the designer's initials are bold. PCGS has graded 37 numerically finer examples (1/15). NGC ID# 22B2, PCGS# 2427
- 3383 1909-S VDB MS65 Red and Brown PCGS.** A sharply detailed Gem representative of this important series key, with mostly red surfaces that show few signs of contact and retain much original mint luster. The design elements are sharply detailed and eye appeal is quite strong. PCGS has graded 37 numerically finer examples. (1/15). NGC ID# 22B2, PCGS# 2427
- 3384 1909-S VDB MS64 Red PCGS.** A lovely peach-gold Choice cent that boasts dynamic luster and an intricate strike. The popular and low mintage series key. Housed in a rare Doily label holder, certified by PCGS circa December 1989. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red

First Generation Holder

- 3385 1909-S VDB MS65 Red PCGS.** A beautiful orange-gold Gem that boasts an intricate strike and dynamic cartwheel luster. Marks are essentially absent, and the minimal carbon is mostly located near AMERICA. A minor retained lamination is noted above LIBERTY. The portrait high points display hints of ruby-red. Housed in a first generation holder. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red

Lustrous Green-Gold Surfaces

- 3386 1909-S VDB MS65 Red NGC.** A beautiful butter-gold and sea-green Gem of the popular introductory San Francisco variety. Lustrous and unabraded with only infrequent minute carbon. Encased in a prior generation holder. Throughout most of the 20th century, millions of collectors searched pocket change and bank rolls for this issue and very seldom encountered examples. NGC ID# 22B2, PCGS# 2428
- 3387 1910-S MS66 Red NGC.** A gorgeous fire-red and orange Premium Gem. Essentially devoid of spots and marks. The strike shows incompleteness only near the upper half of the O in ONE. Housed in a pre-hologram holder. Census: 43 in 66 Red, 4 finer (1/15). NGC ID# 22B6, PCGS# 2440
- 3388 1911-S MS65 Red PCGS.** A magnificent peach-gold Gem. Lustrous and fully struck with outstanding eye appeal and only microscopic imperfections. A desirable example of this elusive early branch issue. Certified in a first generation holder. NGC ID# 22B9, PCGS# 2449
- 3389 1912-S MS65 Red PCGS.** A much better date, the 1912-S is seldom seen in Gem condition. Well struck except on the LU in PLURIBUS and the O in ONE. Pumpkin-gold overall with scattered tiny spots and an area of gray patina on the left reverse. Certified in a first generation holder. Population: 63 in 65 (3 in 65+) Red, 1 finer (1/15). NGC ID# 22BC, PCGS# 2458

**1912-S Cent, MS65 Red
Conditionally Rare Issue**

3390 1912-S MS65 Red NGC. A peach-red Gem with hints of lime-green at the centers. Boldly struck and lustrous. Pristine save for a fleck beneath the G in GOD and a subtle graze on the field near the forehead. A conditionally challenging early branch mint issue. Certified in a former generation holder. Census: 26 in 65 Red, 1 finer (1/15). NGC ID# 22BC, PCGS# 2458

3391 1913-D MS65 Red NGC. CAC. A beautiful orange-red Gem of this elusive branch mint Lincoln. Outstanding from a technical perspective, but the dies were long in use and portions of the legends and devices are blurry, as made. Census: 28 in 65 Red, 3 finer (1/15). Ex: *Dallas Signature (Heritage, 12/2005), lot 174, which realized \$1,495.* NGC ID# 22BE, PCGS# 2464

3392 1913-S MS65 Red and Brown NGC. A sharply struck semikey Gem. The coruscating orange-gold surfaces are only moderately mellowed. No marks or spots are evident. Housed in a former generation holder. NGC ID# 22BF, PCGS# 2466

3393 1914-D MS62 Brown NGC. A blend of olive-brown and auburn hues spread over much of both sides of this Mint State 1914-D Lincoln cent, but allow a degree of coppery-orange luster to shine through in the protected regions. A few small specks are present in the right obverse field, but this coin is without a doubt one of the most appealing Brown coins available in this grade. NGC ID# 22BH, PCGS# 2471

**1914-D Cent, MS63 Red and Brown
Lowest-Mintage Denver Issue**

3394 1914-D MS63 Red and Brown PCGS. A crisply struck and coruscating example of the famously low mintage issue. Plentiful orange-red lingers across both sides. The portrait high points, right obverse field, and lower reverse are brown. A spot is noted on the N in CENT. Encased in a first generation holder. Much scarcer in the present quality than the 1909-S VDB. NGC ID# 22BH, PCGS# 2472

3395 1914-S MS65 Red and Brown PCGS. The olive-green and lilac surfaces are only minimally separated from a full Red designation. A few pinpoint flecks are of little import. Housed in a first generation holder. NGC ID# 22BJ, PCGS# 2475

3396 1915 MS66 Red NGC. CAC. Peach-red dominates this lustrous and fully struck Premium Gem. Carbon and contact are practically absent. Gorgeous and virtually unimprovable. Certified in a pre-hologram holder. Census: 13 in 66 (1 in 66+) Red, 1 finer (1/15). NGC ID# 22BK, PCGS# 2479

3397 1915-D MS65 Red PCGS. CAC. A coruscating orange-red Gem that boasts a full strike and only minimal contact. Carbon is limited to a single speck on the back of Lincoln's neck. Encased in a first generation holder. NGC ID# 22BL, PCGS# 2482

3398 1915-S MS65 Brown PCGS. CAC. Sea-green toning adorns this precisely struck Gem, but hints of orange-red remain in protected regions. Devoid of contact. A conditionally scarce early branch issue, housed in a first generation holder. NGC ID# 22BM, PCGS# 2483

3399 1915-S MS65 Brown PCGS. CAC. The 1915-S Lincoln cent becomes elusive at the Gem grade level, regardless of color designation. This Brown example exhibits an unusual amount of coppery-pink color amid burgundy and steel-blue overtones. The design elements are well-defined, accentuated by distinctly matte-like luster. Population: 11 in 65 Brown, 1 finer (1/15). NGC ID# 22BM, PCGS# 2483

3400 1916-D MS65 Red PCGS. Early branch mint Lincoln cents with full mint Red surfaces are hard to come by. This Gem 1916-D representative displays strong luster and intense brick-red coloration over each side. The strike detail is remarkably bold, as many coins were struck from widely spaced and worn dies. Population: 51 in 65 (2 in 65+) Red, 15 finer (1/15). NGC ID# 22BP, PCGS# 2491

3401 1916-D MS65 Red PCGS. The 1916-D Lincoln cent's mintage of nearly 36 million coins does not allude to the scarcity of Gems with original Red coloration. This representative offers satiny luster and well-struck devices over coppery-orange surfaces. The obverse fields show some flowlines from die fatigue, along with scattered charcoal color. Population: 51 in 65 (2 in 65+) Red, 15 finer (1/15). NGC ID# 22BP, PCGS# 2491

3402 1916-S MS64 Red PCGS. An orange-gold Choice cent that boasts vibrant luster and a mark-free appearance. A small splash of olive-green is noted at the obverse center, and a slender curved gray streak rises through portions of STATES and AMERICA. Encapsulated in a green label holder. NGC ID# 22BR, PCGS# 2494

3403 1916-S MS64 Red PCGS. An exquisite better date cent that boasts coruscating luster and exceptionally smooth surfaces. Sun-gold throughout aside from a blush of cherry-red above LIBERTY. Certified in a first generation holder. NGC ID# 22BR, PCGS# 2494

3404 1917-S MS64 Red PCGS. A sizeable die chip appears in the right obverse field above the date and other signs of die fatigue are evident on each side. Satiny luster and pumpkin-orange coloration blanket well-struck surfaces that show minimal carbon specks. Population: 61 in 64 (1 in 64+) Red, 18 finer (1/15). NGC ID# 22BU, PCGS# 2503

3405 1919-D MS65 Red and Brown PCGS. The well-preserved surfaces of this delightful Gem are mostly original red, with a few hints of light brown and vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. Population: 27 in 65 Red and Brown, 3 finer (1/15). NGC ID# 22BZ, PCGS# 2517

3406 1920-D MS65 Red NGC. A lovely pumpkin-gold Gem that boasts an intricate strike and sweeping cartwheel luster. Only minuscule marks emerge beneath a lens. The reverse displays minor carbon. Certified in a prior generation holder. NGC ID# 22C4, PCGS# 2527

3407 1922-D MS65 Red PCGS. A beautiful orange-gold Gem. Fully struck and lustrous with minor carbon and a virtual absence of contact. The reverse exhibits three bold radial cracks. Encased in a first generation holder. Population: 90 in 65 Red, 10 finer (1/15). NGC ID# 22C8, PCGS# 2539

3408 1922-D MS65 Red PCGS. Apple-green margins frame orange-red centers. A powerful loupe is required to locate incidental imperfections. Lustrous and fully struck. This better date cent is housed in an early green label holder. NGC ID# 22C8, PCGS# 2539

3409 1922 No D, Strong Reverse, FS-401, VF35 PCGS. Die Pair 2. A Choice VF example of the famous No D variety with chocolate-brown surfaces that show faint gold and lavender overtones. Glossy luster and few abrasions.
Ex: Houston Signature (Heritage, 12/2009), lot 138, which realized \$1,725. PCGS# 37676 Base PCGS# 3285

3410 1922 No D, Strong Reverse, FS-401, XF40 PCGS. A chocolate-brown example of the key date No D cent. TRUST and the second 2 in the date are sharp, characteristic of the desirable Strong Reverse variety. Smooth aside from one hair-thin line each on Lincoln's vest and the right wheat ear. Encapsulated in a first generation holder. PCGS# 37676 Base PCGS# 3285

3411 1922 No D, Strong Reverse, FS-401 — Environmental Damage — PCGS Genuine. AU Details. Substantial mint gloss rolls across this unblemished key date cent. The reverse shows only a trace of wear. The surfaces are microgranular, but to a lesser extent than implied by the PCGS designation. The obverse is tan-brown and the reverse is sea-green. PCGS# 37676 Base PCGS# 3285

1922 No D, Strong Reverse Cent, AU50 Considerable Luster Remaining

3412 1922 No D, Strong Reverse, FS-401, AU50 PCGS. CAC. Die Pair 2. A lightly circulated example of the much-favored Strong Reverse, No D 1922 cent. Blue and violet overtones grace the still-lustrous brown surfaces that lighten over the modestly worn spots such as Lincoln's bearded jawline. Lightly marked for the grade and a great collector coin. PCGS# 37676 Base PCGS# 3285

3413 1923 MS67 Red PCGS. Without the Red designation the 1923 cent is a relatively common issue, but when that color category is combined with a Superb Gem grade, rarity and a significant price are the result. This MS67 Red example is vibrant peach and copper-gold with only minor spotting below the word LIBERTY and at the lower reverse. Population: 14 in 67 Red, 1 finer (1/15). NGC ID# 22CA, PCGS# 2545

3414 1924-D MS64 Red PCGS. A nicely struck and mark-free near-Gem. Generally orange-gold, although the portrait high points and nearby field are silver-gray. A conditionally rare branch mint issue. Encapsulated in a first generation holder. NGC ID# 22CD, PCGS# 2554

1925-S Cent, MS64 Red Seldom Seen in Gem Red Grade

3415 1925-S MS64 Red PCGS. CAC. The 1925-S Lincoln cent issue is notable, as are the 1924-S, 1926-S, and 1927-S, for being elusive in Gem Red condition. (The 1926-S is far and away the rarest.) This near-Gem Red example of the 1925-S shows largely brick-red color with a few streaks of light-brown, well within the Red context. The strike is sharp on the obverse, adequate on the reverse. Carbon is absent. Population: 56 in 64 Red, 10 finer (1/15). NGC ID# 22CH, PCGS# 2566

3416 1926-S MS64 Red and Brown NGC. Jade-green and rose-red shades enrich this lustrous and unabraded Choice branch mint cent. A slender area of gray toning is noted beneath the EN in CENT. Certified in an early generation holder. NGC ID# 22CL, PCGS# 2574

1927 Lincoln Cent, Bold MS67 Red Important Registry Set Example

3417 1927 MS67 Red PCGS. CAC. Lincoln cent specialists and Registry enthusiasts will appreciate this magnificent Superb Gem offering. Light golden-copper coloration adorns both sides with an overlay of softly frosted luster. Lincoln's portrait details and all legends exhibit impeccable definition. Two ticks below the N in CENTS surely prevent an even higher grade. Population: 43 in 67 (1 in 67+) Red, 0 finer (1/15). NGC ID# 22CM, PCGS# 2578

3418 1927-S MS65 Red and Brown PCGS. CAC. A lustrous and unabraded peach-red Gem. Carbon is inconsequential and the strike is exacting. The eye appeal is superior to many examples certified as full Red. Housed in a first generation holder. NGC ID# 22CP, PCGS# 2583

3419 1927-S MS64 Red PCGS. CAC. A lovely orange-gold Choice cent. Nicely struck and thoroughly lustrous with an unmarked appearance. Although readily available in circulated grades, the 1927-S becomes very scarce in the present quality. Certified in a first generation holder. NGC ID# 22CP, PCGS# 2584

3420 1929-S MS66 Red NGC. CAC. Sharply detailed design elements and vibrant mint luster are the calling cards of this remarkable Premium Gem, with impeccably preserved original red surfaces and no trace of carbon. Census: 24 in 66 Red, 3 finer (1/15). NGC ID# 22CW, PCGS# 2602

3421 1932 MS67 Red NGC. Outstanding orange-red color endows this highly lustrous and fully struck Superb Gem. A strong loupe is required to locate the few minuscule imperfections. Housed in a former generation holder. Census: 13 in 67 Red, 0 finer (1/15). NGC ID# 22D5, PCGS# 2623

3422 1932-D MS67 Red NGC. A gorgeous pumpkin-orange Superb Gem that boasts potent luster and a bold strike. Essentially devoid of either contact or carbon. Certified in a prior generation holder. Census: 13 in 67 Red, 0 finer (1/15). NGC ID# 22D6, PCGS# 2626

3423 1933 MS67 Red PCGS. CAC. The original red surfaces of this spectacular Superb Gem show no mentionable surfaces flaws and no sign of carbon. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 47 in 67 (1 in 67+) Red, 0 finer (1/15). NGC ID# 22D7, PCGS# 2629

3424 1936-S MS67 Red PCGS. A sharply detailed Superb Gem Lincoln cent, with original red surfaces that radiate vibrant mint luster and show no mentionable distractions. Eye appeal is tremendous. Population: 54 in 67 (1 in 67+) Red, 0 finer (1/15). NGC ID# 22DG, PCGS# 2656

3425 1937 MS67+ Red PCGS. CAC. Glowing coppery-orange luster is uninterrupted as it illuminates both sides of this Plus-designated Superb Gem Registry coin. The strike is bold and the eye appeal is exceptional. Only one coin is certified numerically finer at PCGS, with none so-graded at NGC (1/15). NGC ID# 22DH, PCGS# 2659

3426 1941 Doubled Die Obverse, FS-101, MS66 Red NGC. LIBERTY, TRUST, and the 4 in the date display impressive die doubling. Potent luster sweeps this mark-free orange-red and lime-green Premium Gem. The portrait has lavender high points. Carbon is essentially absent. PCGS# 37780 Base PCGS# 92695

3427 1946 MS67 Red PCGS. Rich coppery-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied with 20 others as the finest certified at PCGS (1/15). NGC ID# 22EK, PCGS# 2743

**1947 Lincoln, MS67 Red
None Certified Finer at Either Service**

3428 1947 MS67 Red PCGS. The appeal of this pink and fire-Red cent is substantial, easily earning it the Superb Gem grade for its visual attractiveness and total absence of any spots or carbon. Satiny luster prevails over a few ticks on the shoulder from the strike being a whisper short of full in that troublesome area. A great candidate for a high-grade set. Population: 22 in 67 Red, 0 finer (1/15). NGC ID# 22EN, PCGS# 2752

**1947 Cent, MS67 Red
Exceptional Copper-Orange Appeal**

3429 1947 MS67 Red PCGS. CAC. Spectacular copper-orange color and radiant mint luster blend over each side to endow this Superb Gem with enviable visual appeal, as affirmed by the green CAC label. This well-struck coin shows only a few minute ticks visible with magnification and is one of just 22 examples certified MS67 Red by PCGS, with none finer (1/15). NGC ID# 22EN, PCGS# 2752

**1948 Cent, Frosty MS67 Red
Among the Finest Certified**

3430 1948 MS67 Red PCGS. This is a remarkably frosty, vividly copper-orange Registry coin. The usual mint-made chatter is evident on Lincoln's shoulder, but there are almost no other disturbances in the vibrant luster. The design elements are well-defined and the eye appeal is superb. This piece is tied with just 16 others as the finest at PCGS (1/15). NGC ID# 22ES, PCGS# 2761

**1948 Cent, MS67 Red
Deep Original Patina**

3431 1948 MS67 Red PCGS. Mercurial mint luster shifts and alters the visual palette of pink, orange, and ruby-red toning for this Superb Gem cent when viewed from different angles, or when rotated under light. A full strike is confirmed by the lofty grade. Just a few light freckles populate the reverse, but this coin is remarkably clean and smooth with undeniable eye appeal. Population: 17 in 67 Red, 0 finer (1/15). NGC ID# 22ES, PCGS# 2761

3432 1949 MS67 Red PCGS. CAC. Frosty, coppery-red mint bloom illuminates boldly struck devices on each side of this well-preserved Superb Gem representative. A few faint freckles are noted on both sides upon close examination, though the appeal is hardly inhibited. This piece is tied for the finest certified at PCGS (1/15). NGC ID# 22EV, PCGS# 2770

3433 1949-D MS67 Red PCGS. This is a fiery-red example with satiny luster and only a few areas of minor strike incompleteness. Although the issue is common across virtually all grade levels, comparable Superb Gems are very scarce. In fact, PCGS has certified just 41 submissions in 67 Red and none finer, nor has NGC graded a numerically finer example (1/15). NGC ID# 22EW, PCGS# 2773

3434 1952 MS67 Red PCGS. Frosty, coppery-orange luster illuminates carefully preserved surfaces on each side of this Superb Gem Registry coin. Close study with a loupe reveals evidence of minor die fatigue in the recesses, but the design sharpness is largely unaffected. Population: 17 in 67 (1 in 67+) Red, 0 finer (1/15). NGC ID# 22F6, PCGS# 2797

3435 1953 MS67 Red PCGS. At a time when coin collecting was on the rise, the Philadelphia Mint was producing astronomical mintages, to the tune of 256,883,800 Lincoln cents in 1953. Despite this figure, only a small handful have been seen at the Superb Gem grade level. PCGS has graded just 15 coins in MS67, with none finer (1/15), making this an excellent opportunity for the Registry-Set specialist.

This remarkable example offers blazing mint luster over cherry-red surfaces. The strike is sharp throughout and unlike most pieces, no noticeable blemishes are present. As part of the FUN Signature sale in January 2014, Heritage auctioned a PCGS MS67 Red example, which realized \$14,100. NGC ID# 22F9, PCGS# 2806

1953 Cent, MS67 Red Among the Finest Known

3436 1953 MS67 Red PCGS. This blazing, fire-orange cent is destined for one of the most advanced Lincoln cent sets by virtue of its vivid, original coloration and exceptional luster. There are few traces of carbon or other untoward distractions, and the strike is bold. Nearly 257 million pieces were struck...PCGS has located just 15 Superb Gems. Population: 15 in 67 Red, 0 finer (1/15). NGC ID# 22F9, PCGS# 2806

3437 1953-D MS67 Red PCGS. Despite more than 700 million cents produced at the Denver Mint in 1953, precious few coins are sharp enough for a Superb Gem grade when fully Red, and none are finer at either service. This example glows with swirling mint luster and lovely lilac accents over dense copper-red coloration. Full details bolster the motifs. Only a few minuscule marks are seen anywhere on the coin. Population: 33 in 67 Red, 0 finer (1/15). NGC ID# 22FA, PCGS# 2809

3438 1955 MS67 Red PCGS. The original red surfaces of this spectacular Superb Gem radiate vibrant mint luster and show no mentionable distractions. The design elements are well-detailed and eye appeal is outstanding. Population: 24 in 67 Red, 0 finer (1/15). NGC ID# 22FF, PCGS# 2824

3439 1955 Doubled Die Obverse, FS-101 — Questionable Color — PCGS Genuine. Unc. Details. A sea-green representative with glimpses of peach near the rims. Well struck, unabraded, and coruscating. The prominently doubled die obverse is highly attractive. The reverse has a few streaks of darker toning. PCGS# 37910 Base PCGS# 2825

1955 Lincoln Cent, MS63 Brown Doubled Die Obverse, FS-101

3440 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC. The 1955 doubled die obverse is among a select grouping of issues whose importance is often recognized even by those outside the hobby. It is highly coveted in all grades by amateurs and advanced specialists alike. This pleasing Select example exhibits rich blue and purple patina with iridescent orange accents. The design motifs are well-detailed with a touch of softness of Lincoln's portrait. Small marks are evenly scattered over each side. PCGS# 37910 Base PCGS# 2825

3441 1955 Doubled Die Obverse, FS-101, MS63 Brown NGC. Cherry-red fills the legends but the majority of this coruscating key date cent is deep mint-green. Crisply struck and only lightly abraded. The strongest doubled die of the denomination. PCGS# 37910 Base PCGS# 2825

3442 1960 Large Date MS67 Red PCGS. A supremely lustrous Superb Gem cent with rich, even cherry-red toning and razor-sharp strike definition. Other than a couple of tiny specks in the lower right obverse field, both sides of the piece are carbon-free. A beautifully preserved coin with impressively clean surfaces, worthy of the finest Lincoln cent set. Population: 11 in 67 Red, 0 finer (1/15). NGC ID# 22FW, PCGS# 2860

3443 1960 Large Date MS67 Red PCGS. A scant 11 MS67 Red coins stand out from the pack as the finest certified at PCGS (1/15). This impressive Registry Set candidate boasts vivid coppery-orange luster and well-defined motifs, while the surfaces are largely devoid of perceptible flaws. NGC ID# 22FW, PCGS# 2860

3444 1960-D MS67 Red PCGS. Large Date. Amazingly, PCGS has certified just 15 Large Date examples in MS67 Red (with none finer) from the mintage of nearly 1.6 billion pieces. This peach-orange example is struck from a late die state, with a pair of interesting die chips filling the loop of the 9 in the date. Population: 15 in 67 Red, 0 finer (1/15). NGC ID# 22FY, PCGS# 2866

3445 1960-D MS67 Red PCGS. Large Date. Strong mint luster radiates from the original Red surfaces of this flame-orange cent, one of the few certified by PCGS at the Superb Gem grade level. Other than a few microscopic flecks on the reverse, only a few tiny, pinpoint marks are seen with a glass. Population: 15 in 67 Red, 0 finer (1/15). NGC ID# 22FY, PCGS# 2866

3446 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC. This *Guide Book* doubled die variety is nearly as impressive as its famous 1955 predecessor. All obverse legends are strongly doubled clockwise, and both hubbings are of equal strength. The pristine fire-red surfaces display hints of apple-green. Certified in a first generation holder. PCGS# 38013 Base PCGS# 2950

**1992-D Lincoln Cent, AU58
Close AM, FS-901 Variety**

- 3447 1992-D Close AM, FS-901, AU58 PCGS.** This business-strike 1992-D Lincoln cent was struck using the same reverse die used on proof coins of that date, easily recognized by the closely spaced AM in AMERICA. The sharply impressed design elements show just a trace of high-point wear and the lightly abraded red and brown surfaces retain much original mint luster. Population: 7 in 58, 0 finer (1/15). PCGS# 391427 Base PCGS# 83099

- 3448 1995 Doubled Die Obverse, FS-101, MS69 Red NGC.** The incredible, needle-sharp strike on a planchet that approaches perfection explains the grade here. The lapels on the coat, the beard details, even all of the individual steps on the Lincoln Memorial are boldly delineated. Census: 37 in 69 Red, 3 finer (1/15).
Ex: Orlando FUN Signature (Heritage, 1/2012), lot 4414. PCGS# 38105 Base PCGS# 3127

PROOF LINCOLN CENTS

- 3449 1936 Type One—Satin Finish PR65 Red and Brown PCGS.** The mostly red surfaces of this impressive Gem have mellowed to light brown and lilac in a few areas, but the design elements are sharply detailed and the fields are reflective and unmarked. Population: 32 in 65 Red and Brown, 5 finer (1/15). NGC ID# 22L2, PCGS# 3331
- 3450 1937 PR66+ Red PCGS. CAC.** An intricately struck representative with deeply mirrored fields and minimal carbon. Orange borders outline sun-gold centers. A costly acquisition any finer. The right border of Lincoln's coat is absent, as made from a lapped die. NGC ID# 22L4, PCGS# 3338

**1937 Cent, PR67 Red
Registry Set Candidate**

- 3451 1937 PR67 Red PCGS.** A number of 1937 proof Lincoln cents survive, but this remarkable Superb Gem is tied with just 11 others as the finest non-Cameo full Red example certified at PCGS (1/15). Bright coppery-gold color accentuates the fully mirrored fields and sharp devices. Subtle field-motif contrast is present on each side, although it is not quite bold enough to warrant a Cameo designation. NGC ID# 22L4, PCGS# 3338
- 3452 1939 PR67 Red PCGS.** This spectacular Superb Gem proof boasts fully mirrored fields and bold design elements. The extreme outer peripheries show hints of orange-gold color, although the majority of each side is awash in fresh, coppery-pink patina. No marks or carbon spotting are observed. Population: 31 in 67 Red, 0 finer (1/15). NGC ID# 22L6, PCGS# 3344

TWO CENT PIECES

- 3453 1864 Large Motto MS65 Red PCGS. CAC.** This delightful Gem represents the more available Large Motto design. The design elements are sharply detailed and the original red surfaces radiate vibrant mint luster with few signs of contact. NGC ID# 22N9, PCGS# 3578

**1865 Two Cent, Fancy 5, MS66 Red
Pristine Preservation**

- 3454 1865 Fancy 5 MS66 Red NGC.** Lustrous copper-gold surfaces prevail throughout both sides of this Premium Gem, although a single dark spot appears in the left obverse field, and a dab of rose color in the reverse center. Some wispy die cracks have the date as their focal point. Pristine preservation in the form of a total absence of mentionable abrasions puts this piece among the few finest numerically graded of the issue, save for a single piece at PCGS and two at NGC. Census: 27 in 66 (1 in 66 ★) Red, 2 finer (1/15). PCGS# 38258 Base PCGS# 3584

- 3455 1867 MS64 Brown NGC.** This Choice Mint State 1867 two cent piece retains modest bronze-gold luster beneath mottled auburn overtones on each side, although the color is not quite intense enough to warrant a Red and Brown designation from NGC. The design elements are well-defined and there are no significant abrasions. The reverse is extensively cracked, with machine doubling on much of the peripheral legend. Census: 63 in 64 Brown, 28 finer (1/15). NGC ID# 22NB, PCGS# 3591

PROOF TWO CENT PIECES

**1864 Two Cent Piece, PR65 Red and Brown
Large Motto Variant**

- 3456 1864 Large Motto PR65 Red and Brown NGC.** Although somewhat overshadowed by its Small Motto counterpart, the Large Motto 1864 proof two cent piece is elusive in its own right. This Gem example displays evenly distributed bronze-gold color with the occasional rose or olive overtone. The strike is full and the fields exhibit ample reflectivity. Census: 39 in 65 Red and Brown, 9 finer (1/15). NGC ID# 274T, PCGS# 3622
- 3457 1868 PR65 Red and Brown NGC. CAC.** Fully struck design elements complement highly reflective, honey-orange fields on each side of this Gem proof, while subtle olive and burgundy overtones attest to the Red and Brown color designation. Census: 40 in 65 Red and Brown, 25 finer (1/15). NGC ID# 274X, PCGS# 3637

1870 Two Cent Piece, PR65 Red Cameo
The Only Cameo Certified at PCGS

3458 1870 PR65 Red Cameo PCGS. Frosty luster illuminates the razor-sharp motifs on each side of this Gem proof Cameo. Consistent coppery-red color blankets the mirrored fields, and the surfaces are largely devoid of contact marks or hairlines. A couple small specks are detected with a lens. This remarkable coin ranks as the only Cameo certified at PCGS (1/15), and is therefore arguably one of the most important examples of this proof issue. PCGS# 83644

3459 1872 PR65 Brown PCGS. CAC. Despite the Brown designation, the well-preserved surfaces of this attractive Gem retain about 50 percent of their original red color. The design elements are sharply detailed and the fields are brightly reflective. Population: 14 in 65 Brown, 3 finer (1/15). NGC ID# 2752, PCGS# 3648

THREE CENT SILVER

3460 1858 MS65+ PCGS Secure. This is a super type coin, with soft, satin luster radiating from the essentially pristine silver-gray surfaces. The 1858 three cent silver was the last of the Type Two issues, with two lines bordering the obverse star. Bold clash marks appear on each side, typical for the type. A tiny dark spot in the obverse shield is among the few picky distractions, but the PCGS Plus grade affirms the high quality. Population: 59 in 65 (4 in 65+), 49 finer (1/15). NGC ID# 2227, PCGS# 3674

3461 1871 MS66 NGC. Semiprooflike fields reside beneath layers of lilac-gray, olive, and champagne toning on each side of this Premium Gem condition rarity. A trifle of softness is noted on the central shield and the reverse arrow shafts, but the overall quality is outstanding, a hallmark of this late series issue with a mintage of only 3,400 pieces. Census: 35 in 66 (2 in 66 ★), 20 finer (1/15). NGC ID# 222M, PCGS# 3692

PROOF THREE CENT SILVER

3462 1859 PR64 Cameo PCGS. CAC. The sharply detailed frosty design elements of this attractive Choice example contrast boldly with the deeply mirrored fields, and the well-preserved surfaces show vivid traces of greenish-gold and cerulean-blue toning. Population: 6 in 64 Cameo, 4 finer (1/15). PCGS# 83708

THREE CENT NICKELS

3463 1871 MS66 PCGS. CAC. This lustrous and essentially pristine representative displays pastel lime-green and lilac toning. The obverse strike is intricate, while the reverse shows only minor inexactness on the dentils and denominational pillars. Population: 29 in 66 (2 in 66+), 1 finer (1/15). NGC ID# 22NN, PCGS# 3737

3464 1876 MS65+ PCGS. CAC. Three cent nickel production dipped to new low in 1876, with only 162,000 pieces struck. Gems are scarce, and finer pieces are rare. This Plus-graded example displays strong, satiny luster beneath a blush of light golden toning. The strike is sharp and there are no obtrusive abrasions. Population: 34 in 65 (1 in 65+), 8 finer (1/15). NGC ID# 275A, PCGS# 3744

3465 1884 XF45 PCGS. CAC. The 1884 three cent nickel issue boasts the second-lowest mintage in the series with a production of only 1,700 coins. This Choice XF example offers steel-gray surfaces and minimal marks. The well-struck devices retain a substantial amount of detail despite slight high-point rub. Population: 8 in 45, 25 finer (1/15). NGC ID# 275F, PCGS# 3752

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR65 Cameo
Razor-Sharp Motifs

3466 1865 PR65 Cameo PCGS. The first proof issue in the nickel three cent series had a recorded mintage of just 500 pieces, distributed in silver proof sets, plus an unknown number of additional coins sold as part of minor proof sets. This Gem Cameo exhibits remarkably bold design definition, with mirrored fields and light golden-gray luster. Some microscopic toning specks are detectable on each side with a loupe, but do not detract. Population: 32 in 65 (1 in 65+) Cameo, 36 finer (1/15). PCGS# 83761

3467 1870 PR66 Cameo PCGS. Minimally toned save for a hint of gold-green at the extreme rims. Nickel-white interiors have a classic frost-and-mirror appearance. A small depression on the lower part of the middle III in the denomination is as-struck and does not affect the coin's technical grade. Population: 12 in 66 Cameo, 1 finer (1/15). PCGS# 83766

3468 1872 PR66 Cameo PCGS. CAC. This delightful Premium Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. The well-preserved surfaces show no mentionable distractions and eye appeal is terrific. Population: 9 in 66 Cameo, 0 finer (1/15). PCGS# 83768

3469 1879 PR67+ Cameo PCGS. CAC. Faint traces of ice-blue and pale champagne toning grace otherwise brilliant mint bloom on each side of this Superb Gem Cameo. The strike is boldly executed, though excessive die polishing has partially effaced the reverse ribbon ends, as is typical of this type in general. No marks are present, affirming the lofty PR67+ grade from PCGS. Population: 41 in 67 (1 in 67+) Cameo, 1 finer (1/15). PCGS# 83775

3470 1881 PR67 PCGS. CAC. This delightful Superb Gem displays sharply detailed design elements and well-preserved surfaces with reflective prooflike fields. Overall eye appeal is outstanding. Population: 62 in 67, 3 finer (1/15). NGC ID# 2763, PCGS# 3777

- 3471 1881 PR67 Cameo PCGS. CAC.** From a proof mintage of 3,575 coins, this Superb Gem Cameo showcases distinct field-device contrast, with frosted motifs and mirrored fields. A light golden glaze covers both sides, while the underlying surfaces are seemingly devoid of imperfections. Population: 29 in 67 Cameo, 3 finer (1/15). PCGS# 83777

**1881 Three Cent Nickel, PR68 Cameo
Pristine White Surfaces**

- 3472 1881 PR68 Cameo NGC.** A pristine stone-white specimen with frosted devices and flashy fields, ideal for the advanced Registry collector. Lapping at the Mint has removed select portions of the lower wreath and Liberty's hair, as coined. The loops of the 8s in the date show repunching. Census: 11 in 68 Cameo (2 in 68 ★ Cameo), 0 finer (1/15). PCGS# 83777

- 3473 1888 PR67 Cameo PCGS. CAC.** This incredible Superb Gem is among the finest-certified Cameos at either major grading service. Intense mint frost over the devices boldly contrasts with the mirrored fields, while strike is bold and each side exhibits just a touch of pale champagne toning. Population: 12 in 67 Cameo, 0 finer (1/15). PCGS# 83785

SHIELD NICKELS

- 3474 1872 MS66 PCGS.** This high-mintage issue is rare at the current MS66 grade level, and prohibitively so any finer. This is a lustrous, boldly struck Premium Gem with several wispy die cracks noted on the obverse and a shallow planchet flaw observed on the upper reverse periphery, between S and OF. Splendidly preserved with lovely light toning and unabraded surfaces. Population: 21 in 66 (1 in 66+), 1 finer (1/15). NGC ID# 22P6, PCGS# 3799
- 3475 1873 Closed 3, Doubled Die Obverse, FS-101, MS64 NGC.** The entire obverse is lightly die doubled north. This Choice example is well-struck, with satiny golden-gray luster. A few small abrasions contribute to the grade, but do not overly impact the eye appeal. PCGS# 38395 Base PCGS# 3801
- 3476 1879 MS62 PCGS.** An attractive MS62 example of this low-mintage issue, with well-detailed design elements and lustrous, lightly marked surfaces that show a few microscopic alloy spots on close inspection. Population: 10 in 62, 88 finer (1/15). NGC ID# 276D, PCGS# 3808
- 3477 1882 MS66 PCGS.** Trivial repunching appears in the date digits of this lovely Premium Gem Shield nickel. Both sides are highly lustrous with wisps of peripheral gold toning. Population: 84 in 66 (4 in 66+), 6 finer (1/15). NGC ID# 22PC, PCGS# 3812

PROOF SHIELD NICKELS

- 3478 1867 No Rays PR65 PCGS.** A hint of yellow-gold patina is seen over watery fields of seemingly limitless depth, while the design elements exhibit bold definition. The recorded mintage for this second-year No Rays type is just 600 pieces, although a small number of additional proofs were also distributed through minor proof sets. Still, the issue is scarce at the Gem grade level. Population: 34 in 65, 10 finer (1/15).
Ex: ANA Signature (Heritage, 8/2007), lot 344. NGC ID# 22PF, PCGS# 3821

**1867 No Rays Nickel, PR66
None Certified Finer by Either Service**

- 3479 1867 No Rays PR66 PCGS. CAC.** A satiny sheen floats over the unmarked proof surfaces of this impressive Premium Gem proof nickel. Although Mint records are incomplete for the exact Proof mintage in 1867, the number exceeded 600 pieces to one extent or another, with estimates as high as 1,100 proofs issued. This is an especially attractive survivor, with iridescent colors and an overall golden hue. The strike is full. CAC approved, one of just two PR66 nickels to earn the endorsement. Population: 10 in 66, 0 finer (1/15). NGC ID# 22PF, PCGS# 3821

- 3480 1867 No Rays PR65 Cameo PCGS. CAC.** The startling gold-on-black contrast on each side of this conditionally scarce Gem proof is outstanding, and the design motifs are fully struck. A beautiful, brilliant piece devoid of noteworthy surface flaws. This No Rays issue is not often seen in grades any finer than PR64. Population: 47 in 65 Cameo, 17 finer (1/15). PCGS# 83821

**1869 Shield Nickel, PR66+ Cameo
Brilliant, Deep-Mirrored Surfaces**

- 3481 1869 PR66+ Cameo PCGS. CAC.** The frosted motifs contrast sharply with the starkly silver surfaces, which are deeply reflective and without distraction save for some microscopic lint marks. The strike is complete except for slight flatness of two star centers above and below the 5. A Plus-graded Premium Gem, one of three so-graded at this level by PCGS. Population: 14 in 66 (3 in 66+) Cameo, 1 finer (1/15). PCGS# 83823

1870 Shield Nickel, PR66+ Cameo
Outstanding Technical and Aesthetic Appeal

- 3482 1870 PR66+ Cameo PCGS.** Cameo representatives form a minority of the surviving 1870 proof Shield nickel population, and the present coin is decidedly among the finer-known examples. Field-motif contrast is bold on this piece, and the design elements are equally sharp. The fields show numerous die striations, as made, amid the deep mirroring. A blush of blended rainbow colors along the right obverse border is the only suggestion of toning on this high-end Premium Gem proof. Population: 20 in 66 (3 in 66+) Cameo, 1 finer (1/15). PCGS# 83824

1872 Shield Nickel, PR67 Cameo
Unlisted Doubled Die Obverse

- 3483 1872 PR67 Cameo NGC.** This doubled die obverse variety is unlisted in the *Cherrypickers'* reference; it is similar to FS-101, but the doubling is noticeably more pronounced, with the spread obvious on virtually all obverse relief elements. This example displays superb preservation beneath a warm champagne hue over each side. The strike is bold and there is ample contrast between the frosty devices and the highly reflective fields. Census: 5 in 67 Cameo, 0 finer (1/15). PCGS# 83826

- 3484 1874 PR66 PCGS. CAC. Fletcher-4.** The 4 in the date is repunched north. A trace of golden toning adorns this satiny and intricately struck high grade specimen. The shield stripes have a couple of unobtrusive areas of gray patina. The obverse exhibits myriad vertical die polish lines, as coined. NGC ID# 276R, PCGS# 3828

- 3485 1875 PR66 PCGS. CAC.** The design elements of this impressive Premium Gem are sharply detailed throughout, but the reflectivity of the fields is limited by shades of pink and mauve toning. From a proof mintage of just 700 pieces. Population: 15 in 66, 0 finer (1/15). NGC ID# 276S, PCGS# 3829

- 3486 1875 PR66 Cameo PCGS. CAC.** Proof 1875 Shield nickels are uncommonly found with a Cameo finish, and no Deep/Ultra Cameo pieces have been certified. Stunning field-motif contrast is apparent over both sides, each of which exhibits sharply struck design elements. Impeccable preservation throughout further enhances the coin's outstanding eye appeal, appropriately recognized by CAC. Population: 10 in 66 Cameo, 1 finer (1/15). PCGS# 83829

1876 Nickel, PR67
Lovely Multicolor Patina

- 3487 1876 PR67 NGC.** This spectacular Superb Gem exhibits razor-sharp definition on the frosty design elements. The fields are moderately mirrored and display lovely autumn-brown, powder-blue, and lilac toning. The date displays minor strike doubling. Census: 5 in 67 (1 in 67 ★), 0 finer (1/15). NGC ID# 276T, PCGS# 3830

- 3488 1878 PR65 PCGS.** Delicate powder-blue and almond-gold toning graces this lustrous and boldly struck proof-only Gem. A tiny spot atop the cross and another west of the large 5 are all that deny perfection. Encapsulated in an old green label holder.
Ex: FUN Signature (Heritage, 1/2005), lot 5725, which realized \$1,380. NGC ID# 276V, PCGS# 3832

- 3489 1881 PR67 Cameo PCGS.** Boldly struck devices exhibit thick mint frost on each side of this Superb Gem proof, while the deeply mirrored, unblemished fields deliver pronounced contrast. An appealing, brilliant date representative. Population: 24 in 67 Cameo, 0 finer (1/15). PCGS# 83836

1883 Shield Nickel, PR67 Cameo
None Numerically Finer at PCGS

- 3490 1883 PR67 Cameo PCGS.** This Superb Gem Cameo ranks among the finest 1883 proof Shield nickels certified at PCGS, the first of three different nickel five cent types struck in 1883. This piece is boldly struck, with stark field-device contrast. The obverse displays just a hint of light golden color, while the reverse is more deeply toned in shades of lavender and ice-blue, with golden tinges around the periphery. Population: 11 in 67 (1 in 67+) Cameo, 0 finer (1/15). PCGS# 83838

LIBERTY NICKELS

- 3491 1883 No Cents MS67 NGC.** Blazing cartwheel luster and a hint of wheat-gold color proclaim the stellar quality of this exceptionally preserved type coin. The strike is good, although a few left side stars are not full struck. The obverse has a pronounced wire rim, as made. Census: 68 in 67 (4 in 67 ★), 0 finer (1/15). *Ex: Long Beach Signature (Heritage, 6/2005), lot 5555, which realized \$1,495. NGC ID# 2772, PCGS# 3841*

1883 No Cents Liberty Nickel, MS67 Tied for Finest-Certified at PCGS

- 3492 1883 No Cents MS67 PCGS.** A small group of just 25 coins, the present example included, are the finest certified No Cents 1882 Liberty nickels at PCGS (1/15). This piece is fully deserving of its lofty grade, showcasing radiant, uninhibited mint luster beneath just a suggestion of light golden toning. The lower-left portion of the wreath and a few obverse stars are deficiently struck, but the eye appeal is hardly impeded. NGC ID# 2772, PCGS# 3841

1883 No Cents Liberty Nickel, MS67 Semiprooflike Fields

- 3493 1883 No Cents MS67 PCGS. CAC.** Semiprooflike fields provide an eye-catching backdrop for the well-struck, frosty devices on this Superb Gem No Cents nickel. Abrasions are essentially nonexistent, and we note only two small strike-throughs, one near star 11 and the other on Liberty's cheek, neither obtrusive. A faint golden hue adds just a touch of warmth to each side. Population: 25 in 67, 0 finer (1/15). NGC ID# 2772, PCGS# 3841

- 3494 1884 MS66 PCGS.** Despite the large mintage of more than 11 million pieces, the 1884 Liberty nickel is rare in MS66 condition, and finer examples are virtually unobtainable. This impressive Premium Gem displays sharply detailed design elements and well-preserved lustrous surfaces under light shades of golden-tan and lavender-gray toning. Population: 30 in 66 (4 in 66+), 0 finer (1/15). NGC ID# 22PJ, PCGS# 3845

- 3495 1892 MS65 PCGS. CAC.** This attractive Gem is features sharply detailed central design elements, but the peripheral devices are a little soft. A network of die cracks connects many of the stars. The nickel-gray surfaces are brightly lustrous, with few signs of contact. PCGS has graded 20 numerically finer examples (1/15). NGC ID# 2777, PCGS# 3853

- 3496 1893 MS65 Prooflike NGC.** This lightly toned Gem has dazzling luster and no remotely reportable marks. The strike is sharp save for the first two stars and the left ear of corn. A lower mintage date that becomes elusive in higher Mint State grades. As of (1/15), the only 1893 nickel certified as Prooflike by NGC. *Ex: St. Charles Signature (Heritage, 10/2009), lot 249. NGC ID# 2778, PCGS# 3854*

- 3497 1894 MS66 PCGS.** Issued on the heels of the financial Panic of 1893, even small change was spent rather than saved, and Mint production was spotty at best. This attractive nickel is one of the few Premium Gem examples that survive, with golden-lilac toning and sharp definition on the elements. Only about four dozen Premium Gem 1894 nickels are certified by both services combined, with no finer examples at PCGS. Population: 28 in 66 (3 in 66+), 0 finer (1/15). NGC ID# 2779, PCGS# 3855

- 3498 1894 MS66 NGC.** A stunning example of the scarce 1894 Liberty nickel, this Premium Gem exhibits a bold strike, including a strong ear of corn at the lower left reverse, and gorgeous intermingled blue and gold toning. Census: 20 in 66, 2 finer (1/15). NGC ID# 2779, PCGS# 3855

- 3499 1895 MS66 NGC.** The 1895 is typically seen with inferior quality of striking, though such is not the case with this piece. The design elements are generally well-defined, with complete centrils on the stars and above-average strength on the lower-left portion of the wreath. Cartwheel luster overwhelms the pastel lavender, powder-blue, and lemon-gold toning. Census: 11 in 66 (1 in 66+), 0 finer (1/15). NGC ID# 277A, PCGS# 3856

1895 Liberty Nickel, MS66 None Finer at PCGS

- 3500 1895 MS66 PCGS Secure. CAC.** The design elements of this attractive Premium Gem are sharply detailed, unusual on the 1895 issue, which is often seen softly struck. The well-preserved surfaces are blanketed in shades of golden-tan and lavender-gray toning that slightly subdues the mint luster. Population: 17 in 66, 0 finer (1/15). NGC ID# 277A, PCGS# 3856

1905 Liberty Nickel, MS66+ Among the Finest at PCGS

- 3501 1905 MS66+ PCGS. CAC.** Although nearly 30 million nickels were manufactured in 1905, only a select few survive in this rarified grade and with such marked visual appeal. A layer of light-gold toning embraces each side with frosty luster radiating through the patina. The devices are boldly impressed, notably on Liberty's hair curls and the lower wreath. Only a few of stars are a touch soft. A delightful, carefully preserved Premium Gem with strong Registry potential. Population: 80 in 66 (7 in 66+), 0 finer (1/15). NGC ID# 277G, PCGS# 3866

- 3502 1912-S MS64 PCGS.** An attractive Choice example of this low-mintage key from the final year of the Liberty design, with lightly marked lustrous surfaces that are blanketed in shades of golden-brown and lavender-gray toning. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Rarely Encountered Finer**

- 3503 1912-S MS65 PCGS.** This is an unusually well-struck example of this semikey San Francisco issue, also boasting thick, glossy luster with blended pastel shades of lavender-gray and lilac-blue toning. The 1912-S had the lowest mintage of the series, with only 238,000 coins produced. Only 20 examples are certified numerically finer than this piece at PCGS (1/15). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

**1888 Liberty Nickel, PR67
Tied for Finest at PCGS**

- 3504 1888 PR67 PCGS. CAC.** A slim total of just six 1888 nickels have earned the PR67 certification at PCGS from a mintage of 4,582 proofs — a testament to the outstanding quality of this brilliant, attractive representative. The obverse is untuned brilliant-white, with mirrored surfaces, frosted portrait, and a needle-sharp strike. The reverse shows mirrored margins with a satiny center, slightly light of strike on the ear of corn and the ribbon bow. Still, a far more attractive proof than nearly all of this date, and rare as such. Population: 6 in 67, 0 finer (1/15). NGC ID# 277W, PCGS# 3886

**1890 Liberty Nickel, PR67 Cameo
Among the Finest Certified**

- 3505 1890 PR67 Cameo NGC.** Soft frost over the devices delivers just enough field-motif contrast to warrant the Cameo designation, while a warm golden halo surrounds the peripheries. The strike is sharp, save for the lower-left portion of the wreath, which is often weak on this type. From a mintage of only 2,740 proofs, this piece is tied with one other for the finest-certified Cameo at NGC (1/15). Ex: FUN Signature (Heritage, 1/2007), lot 2164. PCGS# 83888

**1891 Liberty Nickel, PR67 Cameo
Only Two Numerically Finer at NGC**

- 3506 1891 PR67 Cameo NGC.** Proof 1891 nickels are not generally elusive in an absolute sense, but representatives breaking the Superb Gem grade barrier are, with or without cameo contrast. This piece is an exceptional coin in both strike and preservation, and displays a pleasing degree of field-motif contrast. The obverse is awash in cool ice-blue and light golden toning, while the reverse displays deeper hues of olive-gold and pale lavender. Census: 4 in 67 Cameo (1 in 67 ★ Cameo, 1 in 67+★ Cameo), 2 finer (1/15). PCGS# 83889

**1891 Nickel, PR66 Ultra Cameo
Strong Field-Motif Contrast**

- 3507 1891 PR66 Ultra Cameo NGC.** Strong white-on-black contrast shows on this attractive Premium Gem. Fully detailed except on the left ear of corn on the reverse wreath. Deeply reflective with just a blush of light golden color, this example ranks high among proof survivors of the issue with just three examples certified numerically finer by NGC and none so by PCGS. Census: 4 in 66 Ultra Cameo, 3 finer (1/15). PCGS# 93889
- 3508 1895 PR67 NGC.** The 1895 proof Liberty Head nickel is generally a well-made issue, and its mintage of 2,062 pieces was the lowest proof total up to that point. High-end examples are somewhat scarce, but some exceptional specimens, such as the coin here offered, can be located with some searching. This remarkable Superb Gem displays pastel shades of lavender, gold, and ice-blue toning over the seemingly perfect surfaces, complementing the mirrored fields and razor-sharp devices. Census: 3 in 67, 1 finer (1/15). Ex: Central States Signature (Heritage, 4/2011), lot 3098. NGC ID# 2785, PCGS# 3893

- 3509 1898 PR65 Deep Cameo PCGS.** Thickly frosted devices and blackened fields showcase eye-catching contrast on this Gem Deep Cameo. The lower-left portion of the wreath is soft, as usual, though the design elements are otherwise well brought up. The delicate, light golden surfaces reveal a few faint, grade-defining hairlines when studied with a loupe. Population: 3 in 65 Deep Cameo, 4 finer (1/15). PCGS# 93896

**1898 Liberty Nickel, PR66 Ultra Cameo
Tied for Finest-Certified at NGC**

- 3510 1898 PR66 Ultra Cameo NGC.** This fully struck proof nickel displays deeply-mirrored, jet-black fields and heavily frosted snow-white design motifs. A wispy, mint-made lint mark is seen in the left obverse field, bisecting the tip of Liberty's nose, and another resides near the tip of Liberty's crown. The well-preserved surfaces are flawless. Census: 2 in 66 Ultra Cameo, 0 finer (1/15). PCGS# 93896

**1905 Nickel, PR66+ Cameo
Razor-Sharp Strike**

- 3511 1905 PR66+ Cameo PCGS.** Blushes of light golden-brown toning adorn the obverse border. The reverse is brilliant, as is the obverse center. This fully struck Premium Gem exhibit noticeable contrast between the glassy fields and the major devices. Cameo specimens are very scarce. Population: 10 in 66 (2 in 66+) Cameo, 1 finer (1/15). PCGS# 83903

**1905 Liberty Nickel, PR67 Cameo
Among the Finest-Known**

- 3512 1905 PR67 Cameo NGC. CAC.** A sparkling Superb Gem with blushes of pastel patina over both sides that add significantly to the already strong visual appeal of this uncommonly fine, well-preserved specimen. Certainly among the finest 1905 proof nickels in existence. Census: 3 in 67 Cameo, 0 finer (1/15).
Ex: ANA Signature (Heritage, 7/2005), lot 5644. PCGS# 83903

- 3513 1907 PR66 Cameo PCGS. CAC.** A spectacular Premium Gem Cameo, this 1907 proof Liberty nickel is largely devoid of toning, with deep mirrors and sharply brought up devices. Contrast is distinct and the preservation is outstanding. Population: 19 in 66 (1 in 66+) Cameo, 5 finer (1/15). PCGS# 83905

- 3514 1907 PR67 Cameo NGC.** A nicely struck and essentially brilliant Superb Gem. A few tiny spots of milky toning are present on the obverse and a single pinpoint flan flake is visible behind Liberty's head, but these are minor quibbles in context. The 1907 nickel had the lowest proof production total of the series, and Cameo representatives are seldom seen in any grade. Census: 5 in 67 Cameo, none finer (1/15).
Ex: FUN Signature (Heritage, 7/2010), lot 3294. PCGS# 83905

- 3515 1909 PR67 Cameo PCGS. CAC.** A two-sided brilliant proof, with both the obverse and reverse deeply mirrored and strongly contrasted motifs. Other than the expected softness on the left ear of corn, the strike is bold. A tiny lintmark above the second 9 in the date is visible under magnification. Just one numerically finer Cameo at PCGS. Population: 26 in 67 (3 in 67+) Cameo, 1 finer (1/15). PCGS# 83907

BUFFALO NICKELS

**1913-D Nickel, MS67
Satiny Type One Example**

- 3516 1913-D Type One MS67 PCGS. CAC.** Top-notch surface quality and rich satin luster combine with a bold strike and attractive toning to define this Superb Gem nickel. The obverse is well produced, lustrous, and appealing with golden accents over pearlescent gray fields and motifs. The reverse displays dramatic, steel-blue tones with lilac highlights and nearly full details on the bison. An excellent Type One nickel in all ways. Population: 59 in 67 (2 in 67+), 2 finer (1/15). NGC ID# 22PX, PCGS# 3916

**1914/3 Nickel, MS62
Scarce Philadelphia Overdate**

- 3517 1914/3 FS-101 MS62 NGC.** The *Cherrypickers' Guide* states "the overdate is seen as the straight top bar of an underlying 3 at the top of the 4, and the start of the diagonal of the 3 on the upper right outside of the 4." Streaks of walnut-brown toning overlie dusky dove-gray surfaces. Satiny and unabraded with a typical strike. PCGS# 147844 Base PCGS# 93924

**1915 Buffalo Nickel, MS67
Ideal Type Candidate**

3518 1915 MS67 PCGS. CAC. This 1915 nickel is known as an excellent issue for type purposes. Representatives are among the sharpest struck in the series, the surfaces often exhibit attractive frosty luster, and they can be located in high grades. This eye-appealing Superb Gem is an ideal type candidate for the previously mentioned reasons. The definition is pinpoint-sharp, and the surfaces are lightly toned. Problem-free throughout. None numerically finer at PCGS (1/15). NGC ID# 22R7, PCGS# 3927

3519 1915-S MS64 PCGS. An attractive Choice example of this early series issue, with well-detailed design elements and well-preserved lustrous surfaces that show highlights of greenish-gold and lavender toning. NGC ID# 22R9, PCGS# 3929

3520 1916 Doubled Die Obverse, FS-101 — Acid Treated — ANACS. AG3 Details. The variety is attributable by the die doubling on the three feathertips, and faint evident of the secondary date near the loops of the 9 and 6. Both sides display a granular diagonal wood grain texture, but the olive-brown surfaces offer surprising detail for the About Good level. PCGS# 145628 Base PCGS# 3931

3521 1916 Doubled Die Obverse, FS-101 — Acid Treated — ANACS. AG3 Details. Telltale die doubling on the 9 and 6 in the date, as well as the feather tips, confirms the key date 1916 Doubled Date variety. The sharpness appears better than the AG level, although the golden-brown and stone-gray surfaces display a vertical wood grain texture. PCGS# 145628 Base PCGS# 3931

3522 1916-S MS65 PCGS. Sharply struck for the issue with brilliant, lustrous surfaces and remarkably few marks of any kind. Translucent amber-gold and lilac toning adds appeal. The bison is particularly well-struck, although the Indian's braid knot and the hair details above it show slight blending. A satiny Gem of considerable charm. NGC ID# 22RC, PCGS# 3933

3523 1918 MS65 PCGS. Attractive shades of champagne-gold and ice-blue toning blanket the well-preserved surfaces of this spectacular Gem, with vibrant mint luster and sharply detailed design elements underneath. NGC ID# 22RG, PCGS# 3937

3524 1918-S MS63 PCGS. This well-detailed Select example shows a touch of the usual softness on the braid and the bison's shoulder. Satiny mint luster shows beneath pleasing bluish-gray and pale gold patina. NGC ID# 22RK, PCGS# 3940

3525 1919-S MS63 PCGS. The design elements of this attractive Select example are well-detailed, with a touch of softness on the usual problem areas, like the hair above the braid and the bison's head. The lustrous surfaces show only minor signs of contact. NGC ID# 22RN, PCGS# 3943

3526 1920-D MS63 PCGS. CAC. Dusky shades of silver-gray and golden-brown toning visit the lightly marked surfaces of this impressive Select example, with well-detailed design elements and slightly subdued satiny mint luster. NGC ID# 22RR, PCGS# 3945

**1920-S Nickel, MS64
Light Golden Toning**

3527 1920-S MS64 PCGS. CAC. The 1920-S ranks among the scarcest issues in Uncirculated grades, and most such pieces are indifferently struck from overused dies. The present unblemished near-Gem shows moderate incompleteness at the centers but the legends and bison's extremities are well defined. The lustrous surfaces display wheat-gold and olive-green toning. NGC ID# 22RS, PCGS# 3946

3528 1921-S AU55 PCGS. This impressive Choice AU specimen shows just a trace of wear on the bison's head and the hair above the braid, and the lightly abraded nickel-gray surfaces show a few hints of greenish-gold toning. NGC ID# 22RU, PCGS# 3948

3529 1923 MS66+ PCGS. The 1923 is somewhat scarcer than most other Philadelphia issues in top grades. This Premium Gem example displays luminous luster emanating from minimally marked and generally well-struck surfaces. A touch of softness is noted above the bison's horn and on the central obverse hair strands. Population: 158 in 66 (11 in 66+), 14 finer (1/15). NGC ID# 22RV, PCGS# 3949

3530 1924-S AU58 NGC. Only a trace of friction is detectable over the high points of this nearly Mint State 1924-S nickel. Strong detail remains beneath dusky golden-gray toning, with the strike being well above-average for the issue. Several minor planchet laminations are visible around the Indian's eye and in the above field. NGC ID# 22RZ, PCGS# 3953

3531 1925-D MS64 PCGS. CAC. Lightly toned in shades of ice-blue and golden-tan, this attractive Choice example exhibits well-detailed design elements and lightly marked surfaces with satiny mint luster on both sides. NGC ID# 22S3, PCGS# 3955

**1925-S Nickel, MS64
Conditionally Scarce Issue**

3532 1925-S MS64 PCGS. The date and mintmark are sharply defined, though peripheral weakness occurs on both sides. Wide spacing of the dies accounts for the typical incompleteness on the hair braid. Champagne-gold and lavender hues color surfaces that show lightly scattered marks over the high points. The issue is scarce in Choice condition, and there are only 28 numerically finer submissions at PCGS (1/15). NGC ID# 22S4, PCGS# 3956

**1925-S Nickel, MS64
Seldom Seen Finer**

- 3533 1925-S MS64 PCGS. CAC.** One of the key dates in Choice condition among regular issues in the Buffalo series, the 1925-S is also invariably found weakly struck on both sides. On this example, the obverse is a bit sharper than the reverse, with some notable softness on the highpoints but with the horn fully defined. The smooth, satiny luster is overlaid with a light coating of bluish-gray, with hints of golden and rose coloration in the protected areas.
Ex: Long Beach Signature (Heritage, 9/2003), lot 6185; Long Beach Signature (Heritage, 9/2004), lot 5975; FUN Signature (Heritage, 1/2005), lot 5896. NGC ID# 22S4, PCGS# 3956

**1925-S Buffalo Nickel, MS64
Attractive Multicolor Toning**

- 3534 1925-S MS64 PCGS. CAC.** *Ex: Teich Family Collection.* The 1925-S Buffalo nickel is known for its generally weak strike. This well-detailed Choice example shows a touch of softness in the usual areas, but the definition is better-than-average overall. The lustrous surfaces are enhanced by attractive shades of champagne-gold, ice-blue, and mint-green toning. PCGS has graded only 28 coins in higher numeric grades (1/15). NGC ID# 22S4, PCGS# 3956

- 3535 1926-D MS64 PCGS.** Thick, satiny mint luster yields an almost glossy sheen on both sides of this olive-gold 1926-D Buffalo nickel. There is a touch of softness on the bison's shoulder and the hair immediately above the Indian's braid, but the definition is actually well above-average for this mid-1920s Denver issue. No significant abrasions are present. NGC ID# 22S6, PCGS# 3958

**1926-S Buffalo Nickel, AU58
Lowest Mintage in the Series**

- 3536 1926-S AU58 PCGS.** Well-known as the lowest-mintage issue in the Buffalo nickel series, only 970,000 1926-S nickels were produced. Many examples were struck using worn dies from the previous year, resulting in typical softness on the date and hair braid, as well as the bison's head and shoulder. Such characteristics are on display with this near-Mint representative. A layer of golden-brown toning blankets each side. Imperceptible friction is all that prevents an Uncirculated designation. A nice key date representative. NGC ID# 22S7, PCGS# 3959

- 3537 1935 MS67 PCGS. CAC.** PCGS has only certified one submission finer than this sensational Superb Gem nickel (2/15). Both sides have bold design motifs and pristine nickel-gray surfaces, with wisps of pale blue and gold toning. NGC ID# 22SN, PCGS# 3974

PROOF BUFFALO NICKELS

- 3538 1913 Type Two PR66 NGC.** Subtle autumn-gold, ice-blue, and orange shades encompass this well struck and coruscating matte proof. Inspection beneath a loupe fails to locate even the most trivial imperfection. NGC ID# 278S, PCGS# 3990

- 3539 1936 Type Two — Brilliant Finish PR66 PCGS.** Wisps of caramel-gold toning adorn this well struck and nicely mirrored specimen. Devoid of contact, and limited in grade solely by a few pinpoint flecks on the right field. A briefly issued brilliant proof type. NGC ID# 278Y, PCGS# 3995

- 3540 1936 Type Two — Brilliant Finish PR67 NGC.** Although presenting an untuned appearance, a few subtle splashes of rose patina are noticed here and there. The mirrored brilliance is truly dazzling and the design elements are fully detailed. NGC has certified 16 numerically finer examples (1/15). NGC ID# 278Y, PCGS# 3995

1936 Type Two — Brilliant Finish Nickel, PR67

- 3541 1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** A medley of pastel yellow-gold, violet, sky-blue, and light green colors that are apparent under magnification is confined mostly to the fields of this Brilliant Superb Gem proof, while the central devices are primarily light champagne-gold. Both sides are fully struck and preserved.
Ex: Houston Signature (Heritage, 12/2008), lot 1007. NGC ID# 278Y, PCGS# 3995

JEFFERSON NICKELS

1938-D Jefferson Nickel, MS67+ Full Steps Registry Set Essential

- 3542 1938-D MS67+ Full Steps PCGS.** This outstanding Plus-designated Full Steps Superb Gem is tied for the finest certified at PCGS, and is therefore an important opportunity for the Registry Set competitor to advance or affirm their ranking. The strike is sharp and both sides display thick, satiny luster underlying blended golden-gray, lavender, and olive-green toning. Population: 58 in 67 (4 in 67+) Full Steps, 0 finer (1/15). NGC ID# 22T5, PCGS# 84001

- 3543 1939-S Reverse of 1938 MS67 PCGS.** Rich, satiny luster blankets both sides of this sharply struck Superb Gem, while dusky golden peripheries surround fully brilliant centers. Close examination reveals some faint die erosion lines in the fields near the borders, not uncommon for this issue. None have graded numerically finer at PCGS (1/15). NGC ID# 2794, PCGS# 4006

- 3544 1940 MS67+ Full Steps PCGS.** This must-have Registry coin is not only among the finest certified at either leading service, but is also finer than the example in the current highest-rated Registry Set, if only by the margin of the coveted Plus designation. Delicate champagne luster highlights the beautifully preserved surfaces on both sides. Some minor die fatigue is evident in the peripheral recesses, but the design sharpness is not inhibited. Population: 50 in 67 (4 in 67+) Full Steps, 0 finer (1/15). NGC ID# 22TD, PCGS# 84007

- 3545 1940 MS67+ Full Steps PCGS.** This important Registry Set Candidate is tied for finest certified at PCGS (1/15), and also ranks nearly half of a grade point finer than the example represented in the current highest-rated Registry Set. Remarkably frosty, nickel-gold luster in largely undisturbed on each side, highlighting bold design elements. A must-have condition rarity for the Jefferson nickel specialist. Population: 50 in 67 (4 in 67+) Full Steps, 0 finer (1/15). NGC ID# 22TD, PCGS# 84007

- 3546 1942-P Type Two MS67 Full Steps PCGS.** Virtually complete steps appear on the reverse of this Type Two nickel with its large P mintmark above the dome of Monticello. Both sides are fully lustrous with medium intensity iridescent toning. Population: 43 in 67 (1 in 67+) Full Steps, 0 finer (1/15). NGC ID# 22TM, PCGS# 84016

1943/2-P Nickel, MS66 Full Steps Doubled Die Obverse

- 3547 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** This sought-after *Guide Book* variety was created when an outdated 1942 obverse die was rehubbbed with the 1943 date. Remnants of the underlying 2 in the date and slight doubling of the peripheral legends are products of the rehubbbed. This example displays frosty, fresh mint luster with the occasional hint of light golden color. The strike is sharp and the surfaces are largely free of disturbances. PCGS# 38500 Base PCGS# 84019

1943/2-P Nickel, MS66 Full Steps In-Demand FS-101 Overdate

- 3548 1943/2-P Doubled Die Obverse, FS-101, MS66 PCGS. CAC.** The lower diagonal stroke of the 2 is bold underneath the 3 on this popular variety, and it is especially bold on this uniformly frosty Premium Gem Full Steps example, seemingly an early strike from fresh dies. Light golden patina further enhances the appearance, and the steps are no-questions full throughout. Population: 32 in 66 (1 in 66+) Full Steps, 3 finer (1/15). PCGS# 38500 Base PCGS# 84019

- 3549 1944-D MS67+ Full Steps PCGS.** The sheer rarity of numerically finer examples makes high-end MS67 representatives of this wartime Denver issue highly sought-after by Registry Set collectors and series specialists. This Plus-graded piece is sharply struck, with frosty, uninhibited mint luster. Both sides exhibit intermingled mint-green, lemon-gold, sky-blue, and pale lavender hues. Only four coins are numerically finer at PCGS (1/15). NGC ID# 22TV, PCGS# 84023

**1945-D Nickel, MS67+ Full Steps
Extremely Rare Any Finer**

3550 1945-D MS67+ Full Steps PCGS. A high-end Registry-quality coin, this Plus-graded Superb Gem 1945-D nickel displays not only bold detail, but luminous, frosty surfaces that yield rich toning in shades of champagne, mint-gold, and lavender-gray. Close examination fails to reveal any noteworthy abrasions. Population: 80 in 67 (7 in 67+) Full Steps, 2 finer (1/15). NGC ID# 22TY, PCGS# 84026

3551 1945-S MS67+ PCGS. For Registry Set collectors, the Plus designation is often a deciding factor in the ranking of various sets, and this outstanding piece is one of just 10 non-Full Steps MS67 examples so-graded at PCGS, with just one MS68 coin numerically finer (1/15). Both sides display soft lemon-gold toning, with subtle rainbow hues intermixed. The preservation is exceptional, although some central striking weakness precludes a Full Steps designation. NGC ID# 22TZ, PCGS# 4027

PROOF JEFFERSON NICKELS

**1939 FS-901 Nickel, PR67
Reverse of 1940, Straight Steps**

3552 1939 Reverse of 1940 PR67 PCGS. CAC. FS-901. Most 1939 proofs continued the Reverse of 1939 with indistinct "wavy" steps at the base of Monticello. Only a small percentage of proofs showed the new and improved "straight steps" Reverse of 1940. The present Superb Gem has full definition on the straight steps. The surfaces are virtually immaculate and show light peach toning across portions of the reverse border. Population: 23 in 67, 1 finer (1/15). NGC ID# 22YB, PCGS# 94176

3553 1971 No S PR69 Cameo NGC. The 1971 No S Jefferson nickel is number 30 in the *100 Greatest U.S. Modern Coins*. This virtually perfect specimen is fully detailed with lightly toned mirrored fields and bold field/device contrast. Census: 13 in 69 Cameo (1 in 69 ★ Cameo), 0 finer (1/15). NGC ID# 22YN, PCGS# 84204

**1971 No S Nickel, PR68 Ultra Cameo
Key Guide Book Variety**

3554 1971 No S PR68 Ultra Cameo NGC. The 1971 No S Jefferson nickel proof is a key proof issue in the series, ranked number 30 in Schechter and Garrett's *100 Greatest U.S. Modern Coins* (2011). A blunder at the Philadelphia Mint resulted in the S mintmark being left off the dies used to strike proofs in 1971, affecting 1,655 proof sets. This Superb Gem displays bold Ultra Cameo contrast between seemingly bottomless fields and thickly frosted relief elements. The brilliant surfaces are essentially pristine. Census: 3 in 68 Ultra Cameo, 5 finer (1/15). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIME

**1800 V-1, LM-1 Half Dime, VF30
Problem-Free, Originally Toned**

3555 1800 V-1, LM-1, R.3, VF30 PCGS. A minimally abraded midgrade example of the scarce Heraldic Eagle type. The obverse displays medium tan-brown toning. The brilliant central reverse is bounded by deep russet and forest-green shades. Free from remotely consequential marks, and PLURIBUS UNUM is readable. A small edge flaw at 2:30 is of mint origin. PCGS# 38601 Base PCGS# 4264

BUST HALF DIMES

3556 1832 V-8, LM-5, R.1, MS64 PCGS. The second S in STATES is filled on this available variety. The present example exhibits outstanding eye appeal, suitable for type or date representation. Satiny luster illuminates well-struck devices, while the reverse is brilliant and the obverse displays shades of amber, violet, and navy blue toning. PCGS# 38667 Base PCGS# 4279

3557 1835 Large Date, Large 5C, V-11, LM-4, R.3, MS63 Prooflike NGC. The present brilliant and flashy Select half dime would undoubtedly have been cataloged as a proof prior to the 1970s. The strike is intricate except on the upper right obverse dentils. A loupe reveals only incidental imperfections. Struck a few degrees off center toward 1 o'clock. PCGS# 38710

**1835 Capped Bust Half Dime, MS65
V-4, LM-7, Large Date, Large Denomination**

- 3558 1835 Large Date, Large 5C, V-4, LM-7, R.3, MS65 PCGS.** Lustrous and bold, with only slight softness at the wing junction with the top left (facing) shield point. Richly toned at the borders in cerulean blue, russet, and reddish-gold shades, merging into golden-ivory centers. Few abrasions are seen, none of which require individual mention. An area variously described as die clashing or metal flow lines appears as a crescent in front of Liberty's portrait, disguised by the swirling mint luster. A bold die crack connects the outer points of stars 12 through 9. The scarcer of two varieties with the Large Date and Large 5C. PCGS# 38711 Base PCGS# 4282

- 3559 1837 Large 5C, V-1, LM-5, R.1, MS64 NGC.** The obverse of this attractive Choice example is sharply struck, but the central reverse shows a touch of softness. Prooflike reflectivity is evident in the fields and no large or distracting contact marks are present. Census: 34 in 64, 17 finer (1/15). PCGS# 38733 Base PCGS# 4289

SEATED HALF DIMES

- 3560 1837 No Stars, Large Date (Curl Top 1) MS65 PCGS.** A remarkably well-preserved Gem, this example of the short-lived No Stars type is boldly struck on the central devices and seemingly devoid of any perceptible abrasions. Deep olive and golden-gray toning slightly mutes the luster, although the surfaces remain distinctly satiny. The left obverse rim is weak due to die fatigue, also seen in the presence of several die cracks on both sides. NGC ID# 232M, PCGS# 4311

- 3561 1837 No Stars, Small Date (Flat Top 1) MS64 PCGS. V-1.** A lovely cream-gray near-Gem that boasts a precise strike and smooth surfaces. Interesting die breaks are noted near the right (facing) knee and elbow, diagnostic of this intriguing variety. Population: 47 in 64, 40 finer (1/15). NGC ID# 232M, PCGS# 4312

- 3562 1838 Large Stars, No Drapery MS65 NGC.** Satiny mint luster resides beneath deep lavender-gray, aquamarine, and mint-gold toning on each side of this Gem No Drapery type coin. The design elements are well-struck and the surfaces are free of major abrasions. NGC ID# 2TXX, PCGS# 4317

- 3563 1839 No Drapery MS65 NGC.** This impressive Gem exhibits razor-sharp definition on all design elements, with well-preserved lustrous surfaces under shades of lavender and gray toning. Census: 36 in 65, 32 finer (1/15). NGC ID# 232S, PCGS# 4319

- 3564 1845 MS66 PCGS.** This spectacular Premium Gem displays sharply detailed design elements and well-preserved lustrous surfaces under shades of greenish-gold and lavender-gray toning. Population: 18 in 66 (2 in 66+), 7 finer (1/15). NGC ID# 2337, PCGS# 4335

- 3565 1857 MS66+ NGC.** Faint wheat-gold toning is present on this coruscating and practically pristine Premium Gem. The strike is sharp except on the obverse dentils. Both sides display extensive clash marks, as made. Census: 56 in 66 (3 in 66+), 15 finer (1/15). NGC ID# 233S, PCGS# 4365

**1867-S Seated Half Dime, MS66
Among the Finest Survivors**

- 3566 1867-S MS66 NGC.** From a mintage of 120,000 pieces, the 1867-S Seated Liberty half dime is seldom encountered in Mint State grades. This spectacular Premium Gem exhibits sharply detailed design elements with evidence of clashing on both sides. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. Census: 3 in 66, 0 finer (1/15). NGC ID# 234M, PCGS# 4391

PROOF SEATED HALF DIME

**1868 Half Dime, PR66 Cameo
Stark Field-Motif Contrast**

- 3567 1868 PR66 Cameo PCGS. CAC.** With a mintage of 600 pieces, the 1868 proof half dime is not a rare issue in the absolute sense, but those pieces qualifying for the Cameo category are. This Premium Gem example displays deeply mirrored fields behind frost-white devices, while a hint of pale golden color resides around the outer peripheries. The upper-left portion of the wreath is a trifle soft, as usual. Population: 10 in 66 (1 in 66+) Cameo, 2 finer (1/15). PCGS# 84451

EARLY DIMES

- 3568 1805 5 Berries, JR-1, R.3, VG10 PCGS.** A cream-gray Draped Bust type coin that has pleasing sharpness for its designated grade. Most of E PLURIBUS UNUM is sharp, and the wings display considerable plumage detail. The peripheral letters and stars are bold and there are no remotely consequential marks. PCGS# 38768 Base PCGS# 4478

- 3569 1807 JR-1, R.2, Fine 12 ANACS.** The sole die marriage of the date. Deep lavender and silver-gray toning blankets this Draped Bust type coin. Marks are minor overall despite a tick on the shield and a hair-thin line through the left (facing) wing. Certified in an ANA cache holder.

Ex: Long Beach Signature (Heritage, 2/2006), lot 7665. PCGS# 38770 Base PCGS# 4480

BUST DIMES

- 3570** 1820 Medium 0, JR-7, R.2, AU55 PCGS. Forest-green and autumn-brown shades endow the peripheries of this well struck and beautifully toned Capped Bust dime. Liberty's cheek and neck are moderately bright, as is the field near RICA. PCGS# 38787 Base PCGS# 4493

1835 JR-1 Dime, Richly Toned MS64

- 3571** 1835 JR-1, R.1, MS64 PCGS. The JR-1 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance.
Ex: *Central States Signature* (Heritage, 4/2011), lot 3275. PCGS# 38879 Base PCGS# 4527

SEATED DIMES

1837 Seated Dime, MS64 Small Date, No Stars

- 3572** 1837 No Stars, Small Date, MS64 PCGS. Fortin-103a. An intermediate die state with a distinctive reverse crack from 9:30 to the E in DIME. Faint butter-gold patina graces this fully struck and coruscating near-Gem. Unabraded except for a brief thin line on the right obverse field. The sole Philadelphia date without stars. Population: 16 in 64, 9 finer (1/15). NGC ID# 237R, PCGS# 4562

1837 Seated Dime, MS64 Deeply Toned Small Date Representative

- 3573** 1837 No Stars, Small Date, MS64 NGC. Fortin-103, R.5. Rich iridescent toning, especially on the obverse, is the key attribute of this pleasing near-Gem, showing hues of teal, violet, and amber-gold. The coin is also well-struck, lustrous, and nicely preserved. Die clash marks are noted on the reverse. The obverse shows a few minor blemishes that preclude a finer grade designation.
Ex: *Dallas Signature* (Heritage, 10/2006), lot 693. NGC ID# 237R, PCGS# 4562

- 3574** 1854 Arrows MS65 PCGS. Fortin-104a. A Top 100, late die state variety, with numerous peripheral die cracks on the obverse. This satiny Gem example is moderately well-struck, with only a touch of softness on the lower-right wreath leaves. Sun-gold, olive, and ocean-blue hues encompass each side, with the deeper colors more prominent on the obverse. Population: 21 in 65, 12 finer (1/15). NGC ID# 239A, PCGS# 4605

- 3575** 1855 Arrows MS64 PCGS. This fully lustrous Choice Mint State piece has champagne surfaces with lovely light gold and iridescent toning. Trivial die cracks are visible at the lower obverse. Population: 11 in 64, 11 finer (1/15). NGC ID# 239C, PCGS# 4607

- 3576** 1858-S — Improperly Cleaned — NGC Details. Unc. A meager mintage of 60,000 pieces, combined with a high attrition rate along the West Coast, ensures that the 1858-S is a formidable rarity with full design definition. The present cream-gray and tan-brown example has a complete strike and is free from mentionable marks. Careful rotation reveals a patch of hairlines on the right obverse field.

1860-O Dime, Deeply Toned VF35 Essential Key Date Among Seated Dimes

- 3577** 1860-O VF35 PCGS. CAC. Fortin-101. The sole variety known for this key-date Seated dime issue, struck to the extent of only 40,000 coins on the eve of the Civil War hostilities. Most certified survivors today are no better than VF20 to VF25. Deep purple-aqua patina appears on each side, and the surfaces are somewhat porous, as usually seen for this issue. The 1860-O is likely about R.5 in this Choice VF grade. Despite minor problems, this is a coin that will appeal to many Seated dime collectors, and the CAC endorsement is added approval. Population: 6 in 35, 20 finer (1/15). NGC ID# 239E, PCGS# 4632

3578 1867 MS63 ANACS. Only 6,000 Seated Liberty dimes were struck in 1867, making the date scarce-to-rare in all grades. This pleasing Select example offers well-detailed design elements and lightly marked surfaces that show prooflike reflectivity under shades of greenish-gold and cerulean-blue toning. NGC ID# 239U, PCGS# 4645

3579 1872-CC — Environmental Damage — PCGS Genuine. XF Details. Fortin-101. A nicely defined but evenly granular example of this rare early issue. The fields and borders are russet-gray but the device high points are slate. Gerry Fortin notes, “many examples have surface porosity problems which are typical for the Carson City dimes of 1871 through 1874.” NGC ID# 23A8, PCGS# 4657

1873-CC Arrows Dime
XF Sharpness
Key CC-Mint Type

3580 1873-CC Arrows — Damage — PCGS Genuine. XF Details. Those who pursue a Carson City type set will find that the Arrows dime is a stopper. PCGS has certified only 83 examples of the '73-CC, and the '74-CC is even rarer. Among 1873-CC Arrows dimes, PCGS has graded just one coin above AU53. The present XF Details example has been wiped, and protected areas display deep gray verdigris from exposure to the environment. The right obverse field has a few hair-thin marks. NGC ID# 23BH, PCGS# 4666

1877-CC Dime, MS66
Type Two Reverse, Fortin-103 Variety

3581 1877-CC MS66 PCGS. Fortin-103, R.3. An available Carson City issue with a generous mintage of 7.7 million pieces. This frosted, Premium Gem example displays russet and lilac toning over lustrous, sharply struck silver surfaces. The Fortin variety is indicated by die clashing on the Type Two reverse, with numerous faint die cracks through the obverse legend and at the base of the date. Few examples have achieved a higher grade at PCGS. Population: 39 in 66 (4 in 66+), 5 finer (1/15). NGC ID# 23AM, PCGS# 4683

1878-CC Dime, MS65
Semiprooflike and Undisturbed

3582 1878-CC MS65 NGC. Fortin-101, R.4. Type One Reverse. Clear die doubling on the Es in ONE DIME confirms this scarcer Fortin variety. The Carson City Mint produced only 200,000 dimes in 1878 and high grade examples are rare. The present Gem features forest-green and lilac patination over nicely struck, flashy, and minimally marked surfaces. Census: 8 in 65 (2 in 65 ★), 11 finer (1/15). NGC ID# 23AR, PCGS# 4686

1879 Dime, MS67 Prooflike
Repunched Date, F-104a

3583 1879 MS67 Prooflike NGC. Fortin-104a, R.4. A scarce prooflike example of Fortin-104a, with repunching of the 1 and 8 of the date, and less obviously on the 9. The fields are remarkably prooflike on both sides, with attractive iridescent border toning in shades of blue, amber-gold, and lemon-yellow. The strike is incomplete on the obverse high points, with softness at Liberty's head and foot, although the reverse is bold except for slight weaknesses at the reverse bow knot and ribbons. Seldom seen in this Superb Gem prooflike condition, the sole such coin identified at NGC. PCGS# 74687

PROOF SEATED DIMES

3584 1863 PR65 Cameo PCGS. Fortin-101, R.4. After striking a limited 460 proofs, this die pair was employed for all 14,000 circulation strikes coined in 1863. This Gem proof example displays bold design definition and substantial contrast. Warm golden toning is present over the central regions, yielding to deeper amber, navy, and mint-green colors around the peripheries. Population: 8 in 65 (1 in 65+) Cameo, 6 finer (1/15). PCGS# 84756

1881 Seated Dime, Fortin-102, PR67
Impressive, Beautifully Toned Specimen

- 3585 1881 PR67 PCGS. CAC. Fortin-102, R.3.** This proof variety is characterized by extensive recutting on the obverse legend and the dies have been lapped, leaving the first S in STATES and the O in OF incomplete at the top. Beautiful hues of deep green, rose, purple-lavender, and electric-blue adorn the carefully preserved surfaces of this Superb Gem proof, lending exceptional eye appeal. The razor-sharp strike impression leaves complete definition on all of the myriad design details, except for some of the left-side reverse dentils. The 1881 Seated Liberty proof dime is a low-mintage issue (975 pieces) under considerable pressure from date collectors because of its limited business strike production, 24,000 pieces.
Ex: Lake Michigan and Springdale Collections (American Numismatic Rarities, 6/2002), lot 1263. NGC ID# 23D6, PCGS# 4778

- 3586 1890 PR66 PCGS. CAC.** Attractive mottled champagne-orange and olive patina confirm the originality of this conditionally scarce Premium Gem proof. The coin's strike definition is impressive and nearly full, and the surfaces are well-preserved. Few examples have achieved this lofty grade designation, and Superb Gems are especially rare. Population: 16 in 66, 7 finer (1/15). NGC ID# 23DE, PCGS# 4787

BARBER DIMES

- 3587 1893/2 MS62 PCGS.** Die markers for this elusive variety include light horizontal die cracks above the bust truncation and from the bust tip. This satiny, well struck, and unblemished representative has forest-green margins and dusky dove-gray centers. Certified in an old green label holder. NGC ID# 23DP, PCGS# 4799
- 3588 1893-O MS65 PCGS.** Light chestnut-tan toning visits the peripheries of this lustrous and well struck New Orleans Gem. Pristine aside from inconsequential contact on the portrait. Population: 12 in 65, 10 finer (1/15). NGC ID# 23DR, PCGS# 4801

1897 Dime, MS67
Among the Finest Certified

- 3589 1897 MS67 NGC.** Availability of 1897 Barber dimes begins a gradual decline in succeeding Gem grades, with fewer than a dozen Superb Gems known. This beautifully preserved piece exhibits rich blue and lavender accents beneath overall golden-gray toning, with satiny mint luster shining through. The strike is sharp, and the eye appeal is immense. NGC and PCGS combined have certified just 12 examples in this grade, with none numerically finer (1/15). PCGS# 4812

- 3590 1900-O MS64+ NGC.** The design elements of this high-end Choice example are sharply detailed and the well-preserved surfaces radiate satiny mint luster throughout. Eye appeal is outstanding. Census: 13 in 64 (1 in 64+), 16 finer (1/15). NGC ID# 23ED, PCGS# 4822

- 3591 1901 MS66 PCGS. CAC.** Impressively lustrous and strikingly toned. The obverse of this Premium Gem has deep turquoise and emerald patina, while the reverse shows similar colors mixed with orange-gold at the margins and a pale champagne center. Population: 19 in 66 (2 in 66+), 1 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2009), lot 485. NGC ID# 23EF, PCGS# 4824

1905-O Micro O Dime, AU58
Elusive Guide Book Variety

- 3592 1905-O Micro O AU58 PCGS.** The tiny, round O mintmark punch that produced this interesting *Guide Book*-listed Barber dime variety was likely intended for a quarter die rather than a dime. (This may seem counterintuitive until one recalls that the reverses have different designs. The Barber quarter design has less room for a mintmark. On the dime, the mintmark nestles nicely underneath the bowknot. On the quarter, the mintmark must squeeze in between the tail feathers and the denomination.) The surfaces of this lightly circulated example alternate pearl-gray and smoke-gray patina that largely masks a couple of small marks on Liberty's cheek. Problem-free Mint State examples of this variety are quite elusive, making this near-Mint piece a tempting alternative. Population: 6 in 58, 7 finer (1/15). PCGS# 94836

- 3593 1906-O MS66+ PCGS. CAC.** Vivid gold, steel-blue, and reddish-gold toning provides exceptional eye appeal for this fully struck New Orleans Mint dime. Awarded both the Plus designation from PCGS and CAC approval, the 1906-O is conditionally scarce in Premium Gem and finer grades. Population: 23 in 66 (3 in 66+), 7 finer (1/15). NGC ID# 23EZ, PCGS# 4840

- 3594 1909-O MS64 PCGS. CAC.** Pale blue and peach patina adds color to this Barber dime, struck in the waning days of the New Orleans Mint. Detail is pleasing, and faintly textured surfaces are smooth with a shiny spot noted to the left of the mintmark. Population: 23 in 64, 32 finer (1/15).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3349. NGC ID# 23FD, PCGS# 4852

PROOF BARBER DIMES

- 3595 1892 PR66 Cameo NGC.** This is a strongly contrasted silvery-white survivor, crisply detailed with beautifully preserved mirrors. Though this first-year Barber dime issue has the highest mintage among proofs of the design, high-end Cameo specimens remain particularly elusive. Census: 7 in 66 Cameo, 16 finer (1/15).
Ex: Baltimore Signature (Heritage, 3/2009), lot 916. PCGS# 84875

- 3596 1892 PR66 Cameo PCGS.** The surfaces are almost perfectly preserved, and it is obvious that this coin's owners have taken great care with it since the year of issue. The fields are deeply mirrored and the devices noticeably frosted — the contrast most evident on the obverse. Wondrously toned in shades of emerald-green, rose, and blue. First year of issue for the Barber type and always of great interest to collectors. Population: 14 in 66 Cameo, 9 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2009), lot 541. PCGS# 84875

- 3597 1897 PR65 NGC.** Despite pastel toning, both sides of this Gem proof exhibit subtle field-device contrast. Iridescent patina on the obverse exhibits deeper violet and blue tinges near the rim, while the reverse shows a more blended array of rainbow toning over the lower-right regions.
Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3360. NGC ID# 23GA, PCGS# 4881

1898 Barber Dime, PR67 Cameo
Visually Captivating and Conditionally Scarce

- 3598 1898 PR67 Cameo PCGS.** Although not as rare as the later proof issues from this series in Cameo condition, the 1898 is definitely scarce at the PR67 grade tier with Cameo surfaces, and rare any finer. This is a beautifully contrasted example with pinpoint strike definition and deep watery reflectivity in the fields. An essentially perfect, visually captivating Superb Gem proof. Population: 10 in 67 (1 in 67+) Cameo, 3 finer (1/15). PCGS# 84882

1900 Barber Dime, PR67
Deeply Toned, Conditionally Rare

- 3599 1900 PR67 PCGS.** A deep blanket of lavender-green patina covers each side of this infrequently encountered Superb Gem example. The motifs are struck with razor-sharp precision. When the piece is rotated beneath a lamp, the toning turns to lighter iridescent hues of apple-green, blue, and pastel-violet. A virtually perfect, conditionally rare specimen. Population: 11 in 67 (1 in 67+), 1 finer (1/15). NGC ID# 23GD, PCGS# 4884

1905 Barber Dime, PR67 Cameo
None Numerically Finer at PCGS

- 3600 1905 PR67 Cameo PCGS. CAC.** A spectacular Superb Gem proof, this starkly contrasted Cameo showcases bold white-on-black contrast, with only a hint of lavender-gold color in the reverse recesses. The strike is razor-sharp, and a couple almost undetectable disruptions in the field near the CA in AMERICA appear to be all that kept this piece from an even finer grade. Population: 5 in 67 Cameo, 0 finer (1/15). PCGS# 84889

- 3601 1908 PR65 Cameo NGC.** Fully struck motifs rise above prominently mirrored fields. Caramel-gold toning is moderately more extensive on the obverse than the reverse. Only a few pinpoint imperfections constrain the third party grade. PCGS# 84892

- 3602 1909 PR65 Cameo NGC.** This intricately struck Gem displays pleasing contrast between the glassy fields and the frosty devices. Hints of peach-gold toning fill the margins but this low mintage proof dime is primarily brilliant. PCGS# 84893

MERCURY DIMES

1916-D Dime, XF Details
Pleasing Key Date Representative

- 3603 1916-D — Cleaning — PCGS Genuine. XF Details.** The Denver Mint struck a meager quantity of Mercury dimes in the design's first year of implementation — just 264,000 pieces, the lowest production by far in the series. This lightly circulated representative is entirely brilliant with small, wispy hairlines scattered over each side from the noted cleaning. The bright surfaces retain partial luster in the recesses, and the overall appearance is pleasing in spite of the Details grade. NGC ID# 23GY, PCGS# 4906

- 3604 1919 MS66 Full Bands PCGS. CAC.** Spectacular mint frost highlights needle-sharp design features on each side of this Full Bands Premium Gem. Light golden tints preclude full brilliance, and heighten the overall appeal. Population: 74 in 66 (3 in 66+) Full Bands, 14 finer (1/15). NGC ID# 23H8, PCGS# 4923

- 3605 1920-D MS64 Full Bands PCGS.** The 1920-D Mercury dime is a slightly better date with Full Bands definition. This Choice example is remarkably appealing for the grade, exhibiting thick, matte-like luster and minimally disturbed surfaces. The strike is razor-sharp throughout, and both sides display blended shades of lavender-gray, violet, and sun-gold toning. NGC ID# 23HC, PCGS# 4931

- 3606 1920-S MS64 Full Bands PCGS.** This impressive Choice example exhibits sharply detailed design elements throughout, with Full Bands definition on the fascies. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 23HD, PCGS# 4933

- 3607 1920-S MS64 Full Bands PCGS. CAC.** The 1924-S is a slightly better date with Full Bands definition, particularly in the finer Mint State grades. This Choice example displays satiny luster beneath pale golden-gray hues, while deeper russet and olive toning is also seen around the reverse periphery. Few abrasions are detectable. PCGS has seen 41 numerically finer Full Bands submissions (1/15). NGC ID# 23HD, PCGS# 4933

- 3608 1923-S MS64 Full Bands PCGS.** The 1923-S is one of the more challenging Mercury dime issues with Full Bands definition, and is rarely seen with such above the MS64 grade level. This Choice example is well-struck, with frosty, minimally disrupted mint luster shining through a veil of glowing champagne patina. NGC ID# 23HH, PCGS# 4941

- 3609 1930 MS66+ Full Bands PCGS. CAC.** A boldly defined Premium Gem, this Mercury dime exhibits bold central bands with hints of champagne toning over its lustrous silver surfaces. NGC ID# 23J5, PCGS# 4979

**1930-S Mercury Dime, MS66+ Full Bands
Lustrous, Gold-Toned Example**

3610 1930-S MS66+ Full Bands PCGS. A lovely, high-end Premium Gem and a condition rarity so nice. Although available in grades up to MS65 without too much effort, finer examples more considerably more challenging. Golden luster blazes across the mark-free surfaces of this example, with boldly struck motifs and fully raised bands. From a later die state, with the oft-seen die crack from wing tip to the margin and another crack from the lowermost hair curls descending down into the neck. Die striations angle across the obverse, visible with a glass. Population: 83 in 66 (5 in 66+) Full Bands, 14 finer (1/15). NGC ID# 23J6, PCGS# 4981

3611 1937-S MS67+ Full Bands PCGS. CAC. Vivid shades of cobalt-blue and greenish-gold toning enhance the impeccably preserved surfaces of this high-end Superb Gem, with Full Bands definition on the fasces and vibrant mint luster throughout. Population: 98 in 67 (5 in 67+) Full Bands, 1 finer (1/15). NGC ID# 23JL, PCGS# 5009

3612 1940-D MS68 Full Bands PCGS. CAC. A few blushes of mottled, multicolored patina on portions of each side are the only visible alteration in this coin's pristine appearance from the time of striking. Despite a preponderance of Gems, this outstanding representative has few peers. Population: 24 in 68 Full Bands, 0 finer (1/15).
Ex: Long Beach Bulletin (9/2003), lot 659; FUN Signature (Heritage, 1/2004), lot 5762; Pittsburgh Signature (Heritage, 8/2004), lot 5830. NGC ID# 23JV, PCGS# 5025

3613 1942/1 FS-101 AU58 NGC. CAC. This well-known overdate variety is a popular semikey in the Mercury dime series. This near-Mint State example displays satiny luster beneath evenly distributed olive-gold toning. A trace of friction precludes a Mint State designation, but hardly impedes the details. PCGS# 145473 Base PCGS# 5036

**1942/1 Mercury Dime, MS62
Popular Overdate Issue**

3614 1942/1 FS-101 MS62 NGC. This extremely popular overdate is also a doubled die obverse, with the doubling most apparent on the date and slightly evident on the motto IN GOD WE TRUST. This attractive MS62 example offers well-detailed design elements and lustrous lightly marked surfaces. Census: 33 in 62, 38 finer (1/15). PCGS# 145473 Base PCGS# 5036

3615 1945-S Micro S, FS-512, MS66 Full Bands PCGS. The popular variety with a tiny but sharp San Francisco mintmark. The present brilliant Superb Gem has booming luster and exemplary preservation. *Cherrypickers'* states that "this variety has the only mintmark punch of this size and type known to have been used during the 1940s." PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

3616 1938 PR68 NGC. Vivid bands of royal-blue, violet, lemon-gold, and lime-green toning surround much of the obverse peripheries and are seen to a lesser extent around the reverse rims, leaving the centers brilliant. The strike is full, and the fields display substantial mirroring, though not particularly deep. From a proof mintage of 8,728 coins. Census: 44 in 68 (4 in 68 ★), 1 finer (1/15). NGC ID# 27DJ, PCGS# 5073

3617 1940 PR68 PCGS. A virtually perfect coin, this spectacular PR68 specimen exhibits fully struck design elements and impeccably preserved brilliant mirrored fields with incredible eye appeal. Population: 24 in 68, 0 finer (1/15). NGC ID# 27DL, PCGS# 5075

TWENTY CENT PIECE

3618 1875-CC AU58 NGC. BF-2, R.1. Medium olive-gold and silver-gray toning embraces this sharply struck Carson City type coin. The satiny surfaces display occasional minor marks and flecks. The 5 in the date is lightly repunched. NGC ID# 23R6, PCGS# 5297

EARLY QUARTERS

3619 1805 B-3, R.1, VF20 NGC. Tompkins Die State 5, with extensive cracks and clash marks on each side. An evenly worn, well-detailed mid-grade example of this available Draped Bust quarter variety, ideal for type or date representation. Both sides show uniform steel-gray color, with an even strike and no detracting cuts or scratches as are seen on many other circulated examples of this issue. PCGS# 38925 Base PCGS# 5313

3620 1806 B-9, R.1, VF25 PCGS. CAC. Tompkins Die State 6/5. A late die state of this interesting Browning variety, noteworthy for a heavy vertical crack through the 1 in the date. Olive-green margins frame lightly abraded stone-gray fields and devices. Nice appeal, CAC approved.
Ex: Orlando Signature (Heritage, 1/2008), lot 1088, which realized \$1,610. PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

3621 1818/5 B-1, R.2, AU55 NGC. A slight remnant of the underlying 5 in the date is visible within the upper loop of the 8. One of two varieties for the issue that feature the overdate. A silver-gray example with slight evidence of die clashing on both sides and numerous light abrasions over the surfaces. Some areas of mint luster remain at the margins and around the central motifs. Census (for the variety): 5 in 55, 66 finer (1/15). PCGS# 38953 Base PCGS# 5323

3622 1825/4(2) B-2, R.2, AU53 ANACS. A silver-gray representative with jade-green and tan-brown toning near the rims. Luster brims from design recesses. No marks are noticeable aside from a small cluster between the first two stars. PCGS# 38975 Base PCGS# 5336

SEATED QUARTERS

3623 1843-O Large O, FS-501, XF40 PCGS. CAC. Only a single 1843-O reverse die shows the Large O mintmark, likely intended for the half dollar denomination. PCGS has certified just 16 Large O quarters with an AU53 as the single finest by two grades. The present XF40 example is well defined and unblemished with medium silver-gray toning. PCGS# 395927 Base PCGS# 5405

3624 1853 Arrows and Rays MS62 PCGS. An attractive MS62 example of this popular short-lived design type, with well-detailed design elements and somewhat subdued mint luster under dusky shades of lavender, gray, and amber patina. NGC ID# 23U4, PCGS# 5426

1854 Seated Liberty Quarter, MS65
Excellent Arrows Type Coin

- 3625 1854 Arrows MS65 NGC.** A delightful Gem specimen from the second year of the short-lived Arrows design, this coin features sharply detailed design elements and well-preserved lustrous surfaces, under attractive shades of greenish-gold, silver-gray, and lavender toning. Census: 19 in 65, 7 finer (1/15). NGC ID# 23U6, PCGS# 5432

1854-O Huge O Quarter, VF20
FS-501, Important Guide Book Variety

- 3626 1854-O Huge O, Briggs 1-A, FS-501, VF20 PCGS.** The antithesis of a variety such as the 1892-O Micro O half dollar; here the gigantic mintmark is too large, with a misshapen and obviously hand-worked O that bulges markedly on the left side. This slate-gray piece shows light-gray high points, expected wear, and relatively minor marks. Always in demand. PCGS# 395933 Base PCGS# 5434

- 3627 1861-S VF20 NGC. Briggs 1-A.** With a scant mintage of only 96,000 coins, the 1861-S Seated quarter is elusive in all grades. The present piece is a delightful mid-grade example, boasting moderate, even wear and appealing battleship-gray color. The surfaces are remarkably smooth and devoid of problems. Census: 3 in 20, 17 finer (1/15). NGC ID# 23TU, PCGS# 5455

- 3628 1867 XF45 PCGS.** A Choice XF specimen from a mintage of just 20,000 pieces, this coin displays slight wear on the design elements and the lightly marked gray surfaces are visited by shades of lavender and blue toning. Population: 9 in 45, 32 finer (1/15). NGC ID# 23UD, PCGS# 5470

- 3629 1867 XF45 PCGS. Briggs 1-A.** Despite the low mintage of just 20,000 pieces, this issue is more available than expected in relation to its small production. This Choice XF example shows a thin gold overtone (strongest at the rims) and lightly abraded surfaces. Strong detail remains for the assigned grade, with a touch of remaining mint luster at the margins. Population: 9 in 45, 32 finer (1/15). NGC ID# 23UD, PCGS# 5470

1872 Seated Quarter, MS64
Conditionally Rare

- 3630 1872 MS64 PCGS. Briggs 1-A.** The 1872 is one of the more often seen Seated quarter issues from this period, but it is nonetheless a rare date in Mint State. This Choice example glows with thick, satiny luster underlying dusky golden-gray and olive toning on each side. Several obverse stars are a trifle weak, but the overall definition is pleasing, and there are no significant abrasions noted. Population: 11 in 64, 2 finer (1/15). NGC ID# 23UR, PCGS# 5481

- 3631 1873 Open 3 MS64 NGC.** Although the Closed 3 variety is even more elusive, the 1873 Seated Liberty quarter with an Open 3 in the date is definitely rare in higher Mint State grades. This well-detailed Choice specimen retains much original mint luster under shades of purple, greenish-gold, and lavender-gray toning. Census: 8 in 64, 3 finer (1/15). NGC ID# 23UV, PCGS# 5485

- 3632 1876 Repunched Date, FS-304, MS64+ PCGS.** Type Two Reverse. The loop of the 6 exhibits obvious repunching. Powder-blue and wheat-gold toning drapes unmarked surfaces. Booming luster and a sharp strike further ensure that the present near-Gem ranks among the finest examples. PCGS# 147857 Base PCGS# 5501

- 3633 1877 MS64 Prooflike NGC. CAC.** A dazzling, deeply reflective Prooflike near-Gem that at first glance appears to be a proof. The obverse has wide horizontal bands of rose, blue, and rose again, while the reverse is brilliant in the center with the same rose and blue color around the margin. Sharply struck.
Ex: Houston Signature (Heritage, 12/2009), lot 527; Orlando FUN Signature (Heritage, 1/2012), lot 5716, which realized \$1,955. NGC ID# 23V5, PCGS# 5504

- 3634 1890 MS65 NGC. Briggs 2-B.** The vertical shield lines are recut. Frosty mint luster shines through light golden centers, with blue, amber, and violet peripheral toning in the margins. Boldly struck devices only add to the immense visual appeal of this Gem representative. Census: 32 in 65, 50 finer (1/15). NGC ID# 23VP, PCGS# 5523

PROOF SEATED QUARTERS

- 3635 1865 PR64 PCGS.** Swirling iridescent shades of golden-brown, honey-gold, and powder-blue embrace this boldly struck near-Gem. A small toning spot is noted between the eagle's right wing and the S of STATES. A mere 500 proofs were struck of this popular Civil War date. Population: 35 in 64, 18 finer (6/09).
Ex: New York Signature (Heritage, 6/2005), lot 5522. NGC ID# 23WT, PCGS# 5561

- 3636 1872 PR64 Cameo PCGS.** Narrow bands of cherry-red and cobalt-blue toning proclaim the eye appeal of this well struck Choice proof. Glassy fields accompany icy devices. The sole imperfection is a hair-thin line at the tip of the eagle's beak. Population: 18 in 64 (4 in 64+) Cameo, 15 finer (1/15). PCGS# 85571

1874 With Arrows Quarter, PR64
Subtle Field-Device Contrast

- 3637 1874 Arrows PR64 PCGS. Briggs 5-D.** Deeply reflective fields and satiny devices provide modest cameo contrast on each side of this Choice proof, while the peripheral regions also show pale amber-gold toning. The strike is sharp and only a few faint hairlines in the fields limit the technical grade. PCGS has certified 47 numerically finer non-Cameo examples (1/15). NGC ID# 23XS, PCGS# 5575

- 3638 1884 PR63 NGC. Gold CAC.** A magnificently toned specimen with iridescent ocean-blue, plum-red, orange, and straw-gold shades throughout both sides. The strike is precise and the devices are frosty. From a meager proof mintage of 875 pieces. NGC ID# 23XG, PCGS# 5585

BARBER QUARTERS

1893-O Barber Quarter, MS66
Seldom Seen Finer

- 3639 1893-O MS66 PCGS. CAC.** A slight tinge of ocean-blue patina enhances the lustrous, silver-gray fields and crisp devices of this Premium Gem quarter. The frosty surfaces are nearly unblemished, with only a pair of tiny ticks on the cheek and a shallow, short nick on the shield. The strike is equally pleasing despite the usual minor incompleteness at the right (facing) talon and adjacent plumage. PCGS reports just three numerically finer pieces. Population: 10 in 66, 3 finer (1/15). NGC ID# 23XX, PCGS# 5605

1896 Quarter, MS66
Frostlike and Brilliant

- 3640 1896 MS66 PCGS. CAC.** A brilliant, frosted Premium Gem, untoned and stark white with blazing mint luster. The full strike raises the appeal from super to stunning. A loupe reveals a few tiny ticks, yet none of these are visible in hand to distract from the bold visual impression of this exceptional quarter. Population: 8 in 66 (1 in 66+), 5 finer (1/15). NGC ID# 23Y7, PCGS# 5613

- 3641 1896-S Fine 12 PCGS. CAC.** Boasting a scant mintage of only 188,039 coins, the 1896-S ranks among the three rarest issues in the Barber quarter series, trailing only the lower-mintage 1901-S and the 1913-S. This mid-grade example is a delightfully original representative, with deep olive toning in the recesses and lighter golden-gray color over the devices. Evenly worn, with much detail remaining. NGC ID# 23Y9, PCGS# 5615

1913 Barber Quarter, MS65
Elusive in Finer Grades

- 3642 1913 MS65 PCGS. CAC.** Aside from the three keys, namely the 1896-S, 1901-S, and 1913-S, the 1913 Barber quarter had the second-lowest mintage in the series (484,000 pieces). Gem examples are seldom available, and finer pieces are decidedly rare. This piece displays frosty mint luster with just a hint of pale champagne color and minimal abrasions. The eagle's right (facing) talons and shoulder exhibit some of the usual softness. Population: 34 in 65 (2 in 65+), 9 finer (1/15). NGC ID# 23ZU, PCGS# 5664

PROOF BARBER QUARTERS

- 3643 1893 PR65 Cameo PCGS. CAC.** This attractive Gem displays sharply detailed frosty design elements that contrast boldly with the reflective surfaces to create a noticeable cameo effect. The well-preserved surfaces show hints of greenish-gold and cobalt-blue toning. Population: 17 in 65 (1 in 65+) Cameo, 33 finer (1/15). PCGS# 85679

- 3644 1894 PR64 Cameo NGC.** Heavily frosted, razor-sharp devices provide bold contrast with the fully mirrored fields on this Choice proof Cameo. The peripheries exhibit just a touch of golden color, while the interiors are devoid of discernable toning. Hairlines are minimal, and a single tiny tick on Liberty's cheek appears to be all that kept this piece from a finer grade. Census: 19 in 64 Cameo, 43 finer (1/15). PCGS# 85680

- 3645 1897 PR65 Cameo NGC.** This is a sparkling Gem with pinpoint sharpness and excellent contrast between the gleaming fields and heavily frosted devices. Both sides are primarily brilliant, but with small areas of light golden color seen upon close examination. Census: 8 in 65 Cameo (1 in 65 ★ Cameo), 40 finer (1/15). Ex: FUN Signature (Heritage, 1/2004), lot 6127. PCGS# 85683

**1898 Quarter, PR66 Cameo
Starkly Contrasted**

- 3646 1898 PR66 Cameo PCGS.** Well-made, high-grade Cameo representatives of this date are slightly more plentiful than those of many other issues in the series, making the 1898 an ideal candidate for type purposes. This incredible Premium Gem displays strong black-on-white contrast from all angles, with boldly struck design elements and nearly unblemished surfaces. A faint creamy-golden hue graces each side, adding to the excellent visual appeal. Population: 10 in 66 (2 in 66+) Cameo, 21 finer (1/15).
Ex: *FUN Signature* (Heritage, 7/2007), lot 774; *Dallas Signature* (Heritage, 11/2007), lot 611. PCGS# 85684

**1900 Barber Quarter, PR67
Dramatic Toning Accents**

- 3647 1900 PR67 NGC.** From a mintage of 912 pieces, the 1900 proof Barber quarter is quite scarce in Superb Gem condition. The present coin is a sharp example, with deep mirrors and a bold strike. The reflective surfaces are enhanced by areas of green and lavender toning, with occasional spots of deep russet. Census: 21 in 67 (3 in 67 ★), 7 finer (7/14). NGC ID# 242F, PCGS# 5686
- 3648 1904 PR66 NGC.** Gleaming, profoundly reflective fields are the hallmark of this brilliant Premium Gem proof, although boldly struck design elements also contribute to the immense eye appeal. Modest field-device contrast is present, but it is not stark enough to warrant a Cameo designation. Census: 38 in 66 (1 in 66+, 1 in 66 ★), 39 finer (1/15). NGC ID# 242K, PCGS# 5690
- 3649 1905 PR65 NGC.** A hint of light golden color encircles the peripheries of this Gem proof Barber quarter, leaving the central regions brilliant. Cameo contrast is minimal on this piece, a product of the way the Mint manufactured proof dies during this period, but the strike is bold and the surfaces are free of distractions. NGC ID# 242L, PCGS# 5691
- 3650 1908 PR66 NGC.** From a meager proof mintage of 545 pieces, this delightful Premium Gem displays sharply detailed design elements and deeply reflective fields under shades of greenish-gold and cerulean-blue toning. Census: 29 in 66, 29 finer (1/15). NGC ID# 242P, PCGS# 5694

**1908 Quarter, PR67 Cameo
Repunched Date**

- 3651 1908 PR67 Cameo NGC.** A hint of golden toning visits the reverse field and the upper right obverse border, but the icy motifs are brilliant. The strike is bold except on the right (facing) claw. The date is lightly repunched below the base of the 19 and within the upper loop of the 8. Seldom encountered with the present degree of cameo contrast. Census: 7 in 67 Cameo, 2 finer (1/15). PCGS# 85694
- 3652 1909 PR66 PCGS.** A vivid mix of greenish-gold, lavender, and blue toning visits the impeccably preserved surfaces of this delightful Premium Gem, with sharply detailed design elements and mirrored fields, under the patina. Population: 33 in 66 (1 in 66+), 28 finer (1/15). NGC ID# 242R, PCGS# 5695
- 3653 1909 PR66 Cameo NGC.** Dappled tan-gold toning graces the portrait and lightly visits the remainder of this sharply struck specimen. The fields are blatantly mirrored and no contact marks are apparent. A mere 650 proofs were issued. PCGS# 85695

**1911 Barber Quarter, PR67 Cameo
Brilliant White-on-Black Contrast**

- 3654 1911 PR67 Cameo NGC.** Frost-white devices and fully mirrored fields deliver stark contrast on each side of this Superb Gem Cameo. The strike is sharp throughout, with particular notice given to the upper-right corner of the shield, which is typically weak, even on proofs. Beautifully preserved and devoid of color. Census: 9 in 67 Cameo, 14 finer (1/15). PCGS# 85697

**1912 Barber Quarter, PR67
Modest Cameo Contrast**

- 3655 1912 PR67 PCGS.** The certified population of proof 1912 Barber quarters thins considerably in the finer grades of preservation. This Superb Gem example is not designated as a Cameo, although subtle field-motif contrast is unmistakable. A few faint hairlines are almost undetectable beneath a blanket of warm champagne toning. The eagle's right (facing) talons exhibit the only mentionable striking weakness, where it is minor. Population: 10 in 67, 3 finer (1/15). NGC ID# 242U, PCGS# 5698

**1913 Quarter Dollar, PR67+
Conditionally Rare**

- 3656 1913 PR67+ NGC.** Ex: Eric P. Newman Collection. Modest field-motif contrast shows on this high-end Superb Gem. Whispers of gold-brown concentrate at the borders, while Liberty's cap assumes multicolored toning. The design elements are solidly struck and close examination reveals no mentionable marks. From a relatively small mintage of 613 pieces, the 1913 proof quarter is notably rare in the higher numerical grades, and this is the sole coin with the NGC Plus designation at the grade level. Census: 16 in 67 (1 in 67+), 5 finer (1/15). NGC ID# 242V, PCGS# 5699

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, Good 6
Deeply Toned, Collectible Example**

- 3657 1916 Good 6 NGC.** CAC. Although not the rarest overall, the 1916 Standing Liberty quarter is arguably the most sought-after issue in the series, drawing strong demand even in low circulated condition. This well-worn example is rather appealing for the grade, with deep amber-gold and olive toning that lightens somewhat over the central obverse. The rims are complete and the date, although weak, is legible. NGC ID# 242Y, PCGS# 5704

- 3658 1917 Type One MS66 Full Head PCGS.** An intricately impressed high grade example of the briefly produced Type One design. The lustrous surfaces display rich jade-green, violet-red, and golden-brown shades at the margins. Marks are unobtrusive and confined to the right-side wall of Liberty's gate. NGC ID# 242Z, PCGS# 5707

- 3659 1917 Type One MS66 Full Head PCGS. CAC.** The 1917 Type One Standing Liberty quarter is typically seen with varying degrees of matte-like or granular luster, and deeply frosted pieces are challenging to locate. This Premium Gem is a refreshing exception to the rule, showcasing vibrant luminescence and warm champagne toning. The strike is well-executed throughout, and the surfaces are devoid of any significant abrasions. NGC ID# 242Z, PCGS# 5707

- 3660 1917-D Type One MS65+ Full Head PCGS. CAC.** Light pink and blue tints reside over immensely lustrous, faintly textured surfaces, while the left reverse border also exhibits an arc of mint-gold color. The leading edge of the eagle's left (facing) wing is soft, but the obverse is sharply brought up. A radial die crack is beginning from the rim above the first T in STATES.
Ex: *Houston Signature (Heritage, 12/2010)*, lot 3576; *Central States Signature (Heritage, 4/2011)*, lot 3568. NGC ID# 2432, PCGS# 5709

- 3661 1917-S Type One MS65 Full Head PCGS.** A splendid branch mint Gem of this briefly issued subtype. The strike is precise, and the powder-blue and butter-gold fields and motifs are void of detractors. Booming luster sweeps both sides. NGC ID# 2433, PCGS# 5711

- 3662 1917-S Type One MS66 Full Head PCGS. CAC.** Crisp detail and potent obverse luster are the calling-cards of this Type One Premium Gem with Full Head details. Light splashes of gold patina add color to otherwise near-brilliant surfaces which are carefully preserved. Elusive any finer, with just 11 such Full Head pieces known to PCGS (1/15).
Ex: *Central States Signature (Heritage, 4/2011)*, lot 3572. NGC ID# 2433, PCGS# 5711

- 3663 1917 Type Two MS66 Full Head PCGS.** A spectacular Premium Gem from the first year of the Type Two design, with sharply detailed design elements and full definition on Liberty's head. The virtually pristine lustrous surfaces show a few hints of pale gold toning. Population: 80 in 66 (4 in 66+) Full Head, 10 finer (1/15). NGC ID# 2434, PCGS# 5715

- 3664 1917-D Type Two MS66 PCGS. CAC.** A bright and minimally toned example of the first Type Two D-mint Standing Liberty quarter. While Liberty's head is soft at the temple, the shield is better-defined than usual, with sharp vertical and horizontal lines and just a few weak rivets. Intense luster and abrasion-free surfaces complete the eye appeal. Population: 20 in 66, 2 finer (1/15).
Ex: *Central States Signature (Heritage, 4/2011)*, lot 3574. NGC ID# 2435, PCGS# 5716

**1918 Quarter, MS66 Full Head
Razor-Sharp Central Devices**

- 3665 1918 MS66 Full Head NGC.** The 1918 is a favorite issue among many collectors, as it can be located with profound striking sharpness on the shield, head, and eagle's feathers, areas that are typically disappointing on branch mint issues of the pre-1925 Type Two design. This example is an outstanding representative in that regard, and also boasts a bold date and crisp central gown folds. The surfaces are warmly toned golden, with glimpses of frost that twinkle in the context of more swirling patina. Census: 33 in 66 (2 in 66+) Full Head, 3 finer (1/15).
Ex: Central States Signature (Heritage, 4/2011), lot 3577. NGC ID# 2437, PCGS# 5721

**1918-D Quarter, MS65 Full Head
Elusive This Fine**

- 3666 1918-D MS65 Full Head PCGS. CAC.** The 1918-D is a conditionally scarce and often overlooked early branch mint issue, especially in Full Head grades. This piece displays above-average definition overall, with extraordinary mint luster that is thick and frosted over each side. While basically presenting as a brilliant coin, close examination reveals subtle rose and lilac patina. Population: 55 in 65 (2 in 65+) Full Head, 20 finer (1/15).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3553. NGC ID# 2438, PCGS# 5723

- 3667 1918-S MS66 NGC. CAC.** The 1918-S Standing Liberty quarter is a rare issue in Premium Gem condition. The present coin is a well detailed Premium Gem with vibrant mint luster and just a touch of gold toning. Census: 22 in 66 (1 in 66 ★), 6 finer (1/15). NGC ID# 2439, PCGS# 5724

- 3668 1918-S MS64 Full Head PCGS.** The 1918-S is notorious for being weakly struck, which makes finding a Full Head representative rather difficult. This Choice example is well-defined in the aforementioned area, but nonetheless exhibits some typical softness in the center of both sides. A touch of lilac-gold toning supports the satiny, minimally disturbed luster. There are 47 numerically finer Full Head examples at PCGS (1/15). NGC ID# 2439, PCGS# 5725

**1918/7-S Quarter, Choice XF
Bold Overdate, Problem-Free**

- 3669 1918/7-S FS-101 XF45 NGC.** An obvious overdate with the downstroke of the 7 underdigit prominent within the 8. A lightly toned, problem-free example of this key *Guide Book* variety. Luster brightens the borders and wings. Wear on the eagle's breast and Liberty's knee confirms a short stint in World War commerce. PCGS# 395949 Base PCGS# 5726

- 3670 1919 MS66 Full Head NGC.** This spectacular Standing Liberty quarter is sharply detailed in most areas, with Full Head definition and just a touch of softness on some shield rivets. The virtually pristine brilliant surfaces radiate vibrant mint luster throughout. Census: 49 in 66 Full Head, 17 finer (1/15). NGC ID# 243B, PCGS# 5729

**1919-S Quarter Dollar, MS64
Profound Central Sharpness**

- 3671 1919-S MS64 PCGS. CAC.** Even though this Choice 1919-S Standing Liberty quarter is not a Full Head coin it should not be overlooked by series specialists. Liberty's head — a trifle weak at the temple — is quite literally the *only* relief element that is not absolutely complete. The shield lines and rivets are uncommonly well-defined, the stars are crisp, the date is bold, and the eagle's breast and wing feathers are much sharper than is typical for this San Francisco issue. Traces of champagne and ice-blue color accent frosty, largely undisturbed luster. NGC ID# 243D, PCGS# 5732

**1921 Quarter, Toned MS66
Lustrous and Appealing**

3672 1921 MS66 NGC. Vibrant, frosty luster backlights a veil of warm sun-gold and lavender toning on each side of this Premium Gem key-date quarter. Liberty's head is a trifle soft, but the shield, stars, and the eagle's feathers are well-defined. The 1921 Standing Liberty quarter's mintage of more than 1.9 million coins was not unusually low for the series, but large quantities of this issue were lost to attrition, primarily due to the date being worn off in circulation. Census: 23 in 66 (1 in 66+), 1 finer (1/15). NGC ID# 243H, PCGS# 5740

3673 1923 MS67 PCGS. CAC. Bright silver luster swirls over each side, and the lower obverse and upper reverse show gold-orange patina. Well struck save for the usual trouble-spots at head and lower shield. Population: 36 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 243J, PCGS# 5742

3674 1923-S AU55 PCGS. The 1923-S Standing Liberty quarter is always in demand, regardless of grade. This Choice AU example combines the detail and general eye appeal of a lower-end Mint State example with the affordability of a circulated piece, making it an attractive prospect for the budget-minded collector. Just a suggestion of light golden toning resides over bright, silvery surfaces. NGC ID# 243K, PCGS# 5744

1923-S Quarter, Lightly Toned MS66

3675 1923-S MS66 NGC. The Premium Gem population of 1923-S quarters is fairly balanced between non-Full Head and Full Head coins, with those of both categories being scarce. This piece is a little too soft on Liberty's head to qualify for a Full Head designation, but the remaining relief elements, including the date numerals, stars, and shield show above-average definition. Pale champagne toning settles over immensely lustrous surfaces. Census: 20 in 66, 4 finer (1/15). Ex: *Central State Signature* (Heritage, 4/2011), lot 3594. NGC ID# 243K, PCGS# 5744

**1924-D Quarter, MS65 Full Head
Uncommonly Well-Defined**

3676 1924-D MS65 Full Head PCGS. This is a lovely Gem representative of this elusive D-mint issue. Both sides are carefully preserved, with an uncommon lack of abrasions. In addition to Liberty's head, the inner shield and gown lines display better-than-average striking definition. There is slight softness of detail near the top of the date, but every digit is readily plain. A smattering of hazy-lilac patina does not interfere with this coin's bright, satiny texture. Ex: *Dallas Signature* (Heritage, 12/2005), lot 698; *Central States Signature* (Heritage, 4/2011), lot 3598. NGC ID# 243M, PCGS# 5749

3677 1924-S MS66 PCGS. This Premium Gem 1924-S representative shows a touch of softness on Liberty's toes and the shield, and the head is just a little flat, although the overall definition is above-average for the issue. Striking problems were rampant at the San Francisco Mint in 1924, as the dollar and cent coins are typically seen with soft details, as well. This coin offers incredible mint luster and light gold-tinted surfaces. Both sides are clashed with extensive die striations seen in the recesses, a phenomenon to which this issue seems unusually prone. Population: 33 in 66 (1 in 66+), 2 finer (1/15). Ex: *ANA Signature* (Heritage, 3/2011), lot 3604. NGC ID# 243N, PCGS# 5750

3678 1925 MS66 Full Head NGC. The 1925 Standing Liberty quarter is a slightly underrated coin in Premium Gem and finer Full Head grades, being seen less often than the certified population reports would suggest is possible. The present example is a lovely coin, showing well above-average design definition, particularly on the head, shield, and stars. Pale golden-gray toning yields tinges of lavender and amber on each side, while satiny underlying luster is essentially undisturbed. Census: 39 in 66 (1 in 66+) Full Head, 14 finer (1/15). NGC ID# 243P, PCGS# 5753

**1926-S Quarter, MS66
None Numerically Finer at PCGS**

3679 1926-S MS66 PCGS. CAC. The 1926-S in Gem or finer condition is an somewhat underappreciated coin. Full Head examples are rarities comparable to the 1926-D and 1920-D and S, but even non-Full Head pieces are rare at the Premium Gem level. This coin is a little too soft to warrant a Full Head designation, but its outstanding preservation is reason enough for high collector attention. The obverse boasts mottled lilac-rose and turquoise patina, with the reverse more delicately tinted from the same palette. Some diagonal die polishing striations are noted in the recesses on each side, and there are bold clash marks in the drapery folds around Liberty's legs. Ex: *FUN Signature* (Heritage, 1/2007), lot 4207; *FUN Signature* (Heritage, 1/2008), lot 1291. NGC ID# 243T, PCGS# 5758

3680 1927 MS67 NGC. From a large mintage of nearly 12 million pieces, the 1927 Standing Liberty quarter is an available date and a popular type coin. Although the present coin is not quite in the Full Head category, the strike is generally sharp, and the surfaces are pristine. Dappled lavender, lilac, and mint-gold hues intermingle over luminous surfaces on each side. Among non-Full Head coins, NGC has seen only four examples at the MS67 level (one in MS67+), with none numerically finer; PCGS contributes another four representatives in this grade, also with none finer (1/15).
Ex: *Central States Signature* (Heritage, 4/2010), lot 788. NGC ID# 243U, PCGS# 5760

3681 1929 MS66 Full Head PCGS. CAC. Frosty luster underlies blended lavender-gold and powder-blue toning on each side of this Premium Gem Full Head example. The shield and central gown folds are a trifle soft, as usual, but the definition is above-average overall. Only a few minute ticks preclude an even finer numeric assessment. There are only seven numerically finer Full Head coins at PCGS (1/15).
Ex: *Denver Signature* (Heritage, 8/2006), lot 1340; *FUN Signature* (Heritage, 1/2007), lot 4216; *Houston Signature* (Heritage, 12/2008), lot 1337; *ANA Signature* (Heritage, 3/2011), lot 3608. NGC ID# 2442, PCGS# 5773

3682 1929-D MS64 Full Head PCGS. The 1929-D Standing Liberty quarter is much scarce in Full Head grades than is generally realized. This Choice example also displays above-average definition on the shield rivets and stars, with frosty luster that illuminates pale golden-gray toning over each side. No significant abrasions are observed. NGC ID# 2443, PCGS# 5775

3683 1930 MS67 NGC. CAC. Light olive-gold toning is present at the borders, accented occasionally in blue-violet color. This Superb Gem is subtly frosted and well-preserved, with pleasing definition on the shield and stars. Census: 5 in 67, 0 finer (1/15).
Ex: *Central States Signature* (Heritage, 4/2011), lot 3610. NGC ID# 2445, PCGS# 5778

WASHINGTON QUARTERS

3684 1932 MS66+ PCGS. Golden toning on the rims gives way to powder-blue and lemon-yellow shades, with lilac centers on both sides of this high-end Premium Gem quarter. A boldly struck example, with sharp definition on the motto, Washington's hair, and the eagle's central details. Just three pieces are graded numerically finer at PCGS (1/15). NGC ID# 2447, PCGS# 5790

3685 1932 MS66+ PCGS. CAC. In the first year of the venerable Washington quarter dollar series, the Philadelphia Mint struck just more than 5.4 million examples, more than 10 times the mintage at either Denver or San Francisco. Easily the best choice for first-year type purposes, this Premium Gem representative should serve the needs of the high-end date or type specialist in this immensely popular series. This piece is somewhat softly struck but boasts immaculately clean surfaces and soft, shimmering mint luster. The silver-gray coloration is enhanced by light accents of gold and reddish-tan on both sides. Population: 213 in 66 (20 in 66+), 3 finer (1/15). NGC ID# 2447, PCGS# 5790

3686 1932-D MS63 NGC. This is a frosty, gold-tinted example of this key Denver issue. A few faint disruptions in the luster account for the grade, but none are individually significant. The design sharpness is outstanding. NGC ID# 2448, PCGS# 5791

3687 1932-D MS64 PCGS. CAC. The 1932-D Washington quarter is the key date in the series. This attractive Choice example offers sharply detailed design elements and lustrous, lightly marked surfaces. PCGS has graded 76 numerically finer examples (1/15). NGC ID# 2448, PCGS# 5791

1934 Light Motto Quarter, MS67 Immaculate and Beautifully Toned

3688 1934 Light Motto, FS-401, MS67 PCGS. The so-called Light Motto variety of this issue displays soft definition on IN GOD WE TRUST. This Superb example also shows intense mint luster and beautiful sky-blue and pale gold toning, accented by trace amounts of mint-green color. The surfaces are immaculate on both sides. The serious Registry Set collector of this series should pay close attention to this lot. Population: 22 in 67 (3 in 67+), 0 finer (1/15). PCGS# 146000 Base PCGS# 5794

3689 1935-S MS67 PCGS. This vibrantly lustrous Superb Gem is tied with 34 others as the finest at PCGS (1/15), and is thereby of great importance to the Registry Set competitor. A few small tinges of amber color accent soft champagne toning over each side, while the strike is sharp and the preservation is outstanding. NGC ID# 244F, PCGS# 5799

3690 1939-S MS67 PCGS. CAC. Small splashes of light golden and forest-green accent nearly brilliant luster on the obverse, while faint pastel-gray tints much of the reverse. Sharply struck with virtually undisturbed mint frost on both sides. None have graded numerically finer at PCGS (1/15). NGC ID# 244T, PCGS# 5810

3691 1944-D MS67+ PCGS. CAC. Frosty, vibrant surfaces yield deep amber and sun-gold hues over much of the left-hand regions of each side. The strike is sharp and the preservation is impeccable. This is a prime Registry Set candidate, with only one piece numerically finer at PCGS (1/15). NGC ID# 2459, PCGS# 5825

3692 1962 MS67 NGC. The obverse of this satiny Superb Gem Washington quarter exhibits amber and iridescent toning, while the reverse is brilliant and untuned, save for slight peripheral gold. Census: 74 in 67 (4 in 67 ★), 1 finer (1/15). NGC ID# 246P, PCGS# 5872

3693 1963 MS67 PCGS. This spectacular Superb Gem exhibits well-detailed design elements and impeccably preserved surfaces with ample mint luster under vivid shades of lavender and greenish-gold toning. Population: 15 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 246S, PCGS# 5874

EARLY HALF DOLLARS

3694 1795 2 Leaves, O-116, R.4, Fine 12 NGC. A majority of this Flowing Hair type coin displays deep forest-green toning, but the obverse field is golden-brown and the portrait high points are stone-gray. All legends are sharp, and the hair and wings show some inner detail. The obverse border shows minor adjustment marks, as coined. We note a couple of thin marks on the left obverse and a small reverse rim nick at 7:30. PCGS# 39232 Base PCGS# 6052

**1795 O-119 Flowing Hair Half, Fine 15
Natural, Problem-Free Surfaces**

- 3695** 1795 2 Leaves, O-119, R.4, Fine 15 NGC. Nice eye appeal and technical quality for the assigned grade, with smooth, natural silver-gray surfaces and considerable detail remaining on the eagle's wings. The rims and dentils are strong for this Choice Fine early half. The diagnostic die defect above star 15 appears as a pair of lumps, and a leaf point touches the base of the I in UNITED, confirming the Overton-119 variety. PCGS# 39236 Base PCGS# 6052

**1805 O-111 Half Dollar, Choice XF
Popular Bust Type Coin**

- 3696** 1805 O-111, R.2, XF45 PCGS. A charming Bust type coin with noticeable luster and delicate gold toning at the borders. Abrasions are minor and mostly relegated to the field beneath the R in LIBERTY. An intermediate die state, clashed on the fields and cracked on the right reverse border, but without a horizontal crack between the AM in AMERICA. PCGS# 39285 Base PCGS# 6069

**1805 O-111 Half Dollar, AU53
Colorful Border Toning**

- 3697** 1805 O-111, R.2, AU53 NGC. Splashes of forest-green and hints of walnut-brown overlie steel-gray surfaces. Well defined and partly lustrous. Marks are inconsequential aside from a reverse rim nick at 7 o'clock and a slender line on Liberty's neck. The usual clashed and cracked die state, but without a radial crack between the AM in AMERICA. PCGS# 39285 Base PCGS# 6069
- 3698** 1806 Pointed 6, Stem, O-116, R.3, XF45 NGC. Pointed 6, With Stem. A lightly gold-toned example of the popular Overton-116 variety, struck from a late state of the dies with die clashing on both sides plus numerous die cracks circling the obverse. Substantial mint luster remains, although numerous hairlines are visible at an angle on the bright surfaces. Softness on the eagle's left (facing) wing is typical for the variety, a result of the late die state. PCGS# 39319 Base PCGS# 6071

BUST HALF DOLLARS

**1807 'Bearded Goddess' Half Dollar
O-111b, Fine Details**

- 3699** 1807 Capped Bust, Bearded Goddess, O-111b, R.5 — Scratches — NGC Details. Fine. The most famous die break among all early half dollar varieties. The thick, curved crack connects Liberty's chin to her chest, and is listed in the Guide Book as the "Bearded" Liberty. A nicely defined example with blended wheat-gold and stone-gray toning. Both sides are faintly hairlined, and a few faded thin marks are noted on the left and right obverse field. From The Skidaway Island Collection.

**1807 Large Stars Bust Half, AU53
O-112, Pleasing 50 Over 20 Variety**

- 3700** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 NGC. An always-favorite Guide Book variety, the O-112 Capped Bust design was the concept of John Reich that supplanted Robert Scot's Draped Bust motif. The design was in effect a short-lived, two-year type, because it was remodeled in 1809 into a smaller, more matronly portrait and with subtle changes to the eagle and shield. This example of the First Style Capped Bust half is lightly toned with champagne-gold shades and nice remaining luster. The large stars on the obverse and the reverse legend are drawn close to the borders. Die clashing appears on both sides, but few marks are present. Sharp detail remains and the over-denomination clearly visible. From The Skidaway Island Collection. PCGS# 39356 Base PCGS# 6086

- 3701** 1807 Capped Bust, Small Stars, O-113, R.2, XF40 NGC. Richly blended wheat-gold and dove-gray toning embraces this moderately worn and inoffensively abraded example. O-113 exhibits small stars distant from the rims, and is significantly scarcer than the Large Stars O-112. Designated as O-113a by NGC, but the requisite die crack through S OF AMER is absent. From The Skidaway Island Collection. PCGS# 39359 Base PCGS# 6087

- 3702** 1808/7 O-101, R.1, AU50 NGC. The serif of a 7 protrudes from the final 8 in the date. The borders exhibit extensive bright luster and several spindly die cracks. The minimally toned surfaces display a few faded thin marks. Ex: Santa Clara Signature (Heritage, 11/2002), lot 7219, which realized \$718.75. From The Skidaway Island Collection. PCGS# 39378 Base PCGS# 6091

- 3703 1808 O-104, R.2, AU55 NGC.** A lovely almond-gold and cream-gray representative. Wear is moderate and satin luster emerges from the plumage and legends. Marks are inconsequential aside from a few faint hairlines.
Ex: Long Beach Signature (Heritage, 9/2006), lot 9262, which realized \$2,185.
From The Skidaway Island Collection. PCGS# 39365 Base PCGS# 6090
- 3704 1808 O-105, R.3, AU53 NGC.** Luster illuminates the stars, legends, curls, and plumage of this evenly struck almond-gold Bust half. A hint of almond-gold toning visits slate surfaces. Smooth aside from a few faded hair-thin marks near the chin.
From The Skidaway Island Collection. PCGS# 39367 Base PCGS# 6090
- 3705 1808 O-107a, R.2, AU58 NGC.** The die state is intermediate between O-107 and O-107a. A die crack passes through the portrait between star 5 and star 9, but no cracks are present near the date and UNITED. Luster brightens the borders, wings, shield, and hair. This dusky gray Bust half has pleasantly unmarked surfaces, and the strike is bold aside from the initial letters on the scroll.
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 795, which realized \$1,725.
From The Skidaway Island Collection. PCGS# 39371 Base PCGS# 6090

**1808 O-108 Half Dollar, AU58
 Original, Silver-Gray Appeal**

- 3706 1808 O-108, R.3, AU58 NGC.** A generous amount of remaining mint luster glows beneath silver and slate-gray surfaces of this attractive, R.3 Overton die pair. The coin is essentially problem-free for the grade with no remotely mentionable distractions. The devices are appreciably bold, with only a little light wear across the higher points of the design. Eye appeal is outstanding.
Ex: Long Beach Signature (Heritage, 2/2003), lot 7701; ANA Signature (Heritage, 8/2007), lot 796.
From The Skidaway Island Collection. PCGS# 39372 Base PCGS# 6090
- 3707 1808 O-109a, R.3, AU50 NGC.** Numerous lengthy cracks on the obverse and upper reverse allow prompt attribution. Dusky tan-brown and stone-gray toning embraces subdued but unblemished surfaces.
From The Skidaway Island Collection. PCGS# 39375 Base PCGS# 6090
- 3708 1808 O-110, R.5 — Improperly Cleaned — NGC Details. XF.** The rarest die marriage of 1808, O-110 has a tiny center dot above the eagle's left (facing) shoulder. This peach-gold and pearl-gray representative is well defined and displays moderate hairlines. The obverse border is granular near the bust tip.
From The Skidaway Island Collection. PCGS# 39376 Base PCGS# 6090
- 3709 1809 XXX Edge, O-101, R.5 — Reverse Scratched — NGC Details. XF.** The U in UNITED is widely repunched. The obverse displays faint die cracks only at the base of the date and between stars 5 and 6. These die cracks are undescribed in the Overton reference, presumably due to an absence of better grade examples. The present piece has delicate golden toning and noticeable remaining luster. Several thin scratches are noted on the lower left obverse field, and near the eagle's head and left (facing) wing.
From The Skidaway Island Collection. PCGS# 39379 Base PCGS# 6093

- 3710 1809 Normal Edge, O-102a, R.1, AU58 NGC.** A lustrous and unblemished example with rich ocean-blue and tan-gold toning across the margins. The variety is technically between O-102 and O-102a, since a die crack is noted above UNITED STATES OF, but is not present above AMERICA. The present cataloger has yet to encounter an example with a die crack over AMERICA. Overton's description of O-102a was written during the 1960s, a less formal era of die study.
From The Skidaway Island Collection. PCGS# 39391 Base PCGS# 6092
- 3711 1809 Normal Edge, O-104, Low R.5, AU50 NGC.** Repunching on the obverse stars and die cracks across the left reverse periphery identify this rare variety half dollar. A hint of honey toning overlies stone-gray surfaces. Lightly marked save for a small bright area on the field beneath the right (facing) wing.
From The Skidaway Island Collection. PCGS# 39393 Base PCGS# 6092
- 3712 1809 Normal Edge, O-105, R.2, AU58 NGC.** Exquisite peach-gold, aquamarine, and lilac toning endow the lustrous borders of this lightly circulated half dollar. The strike shows softness on Liberty's chin and opposite on the top of the left (facing) wing, but both sides are free from reportable abrasions.
From The Skidaway Island Collection. PCGS# 39394 Base PCGS# 6092
- 3713 1809 Normal Edge, O-106, R.3 — Rotated Dies — AU53 NGC.** Golden-brown and blue-green shades embrace the borders. The motifs display moderate wear but luster glimmers from the legends and no marks are consequential. O-106 is attributed by the lengthy diagonal die line from the right shield corner. The dies are rotated approximately 80 degrees clockwise from coin turn.
From The Skidaway Island Collection. PCGS# 39395 Base PCGS# 6092
- 3714 1809 III Edge, O-109a, R.2, AU53 NGC.** A distinctive variety with a heavy crack through the center of the letters in AMERICA. The borders are attractively patinated orange-gold and powder-blue. Substantial luster brightens design elements, and the sole consequential mark is a nick on the obverse rim near star 2.
From The Skidaway Island Collection. PCGS# 39387 Base PCGS# 6094
- 3715 1809 XXX Edge, O-110, High R.4, XF45 NGC.** A radial die crack through star 4 and a repunched U in UNITED combine to designate this challenging Overton marriage. A straight row of "shark teeth" above the eagle's head is also characteristic of O-110. This stone-gray and chestnut-tan example is smooth aside from a thin mark on the lower shoulder curl.
Ex: Westmoreland, Virginia Collection, Part Two (Heritage, 1/2007), lot 4350.
From The Skidaway Island Collection. PCGS# 39382 Base PCGS# 6093
- 3716 1809 III Edge, O-111a, R.2, AU58 NGC.** A faint radial die crack at 4 o'clock on the reverse confirms the Overton subvariety. This briefly circulated representative has glimpses of chestnut toning but is predominantly pearl-gray. Luster is plentiful and no abrasions detract.
Ex: Jerry Kochel Collection (Heritage, 7/2008), lot 490.
From The Skidaway Island Collection. PCGS# 39389 Base PCGS# 6094
- 3717 1809 Normal Edge, O-114, R.5 — Reverse Graffiti — NGC Details. XF.** The very scarce O-114 is a distinctive variety due to many die lines near the A in STATES and the D in UNITED. The present example is deeply patinated in lavender-blue and lilac-red shades. A small X is pinscratched on the field left of the beak, and a slender cut is noted on the reverse rim at 6 o'clock, but no other marks are apparent.
From The Skidaway Island Collection.
- 3718 1810 O-103, R.2, AU58 NGC.** A die lump on the jaw and granularity on the C in 50 C are diagnostic for Overton-103. A momentarily circulated representative that boasts sweeping luster and merely a hint of peripheral rose patina. The fields are smooth and the portrait displays only minor marks.
From The Skidaway Island Collection. PCGS# 39408 Base PCGS# 6095

- 3719 1810 O-104a, R.3, AU55 NGC.** A die crack through the tops of D STAT confirms the Overton subvariety. A brilliant and coruscating representative that boasts exemplary surfaces. Struck from multiply clashed dies.
Ex: *West Palm Beach Signature* (Heritage, 6/2008), lot 977, which realized \$1,155.75.
From *The Skidaway Island Collection*. PCGS# 39410 Base PCGS# 6095
- 3720 1810 O-106, R.4, AU50 NGC.** This stone-gray half dollar is free from contact aside from faded thin marks beneath the ear and above the eagle's head. Luster illuminates the plumage, stars, and legends. The rim is incompletely brought up at 11:30 and opposite on the reverse at 5 o'clock.
Ex: *Long Beach Signature* (Heritage, 2/2008), lot 541.
From *The Skidaway Island Collection*. PCGS# 39412 Base PCGS# 6095
- 3721 1810 O-108a, R.3, AU55 NGC.** Light caramel-gold and blue-green toning endows the margins of this generally lustrous representative. Smooth aside from a couple of small mint-made flan flaws on Liberty's neck and the field beneath the right scroll end.
From *The Skidaway Island Collection*. PCGS# 39417 Base PCGS# 6095
- 3722 1810 O-109, R.3, AU53 NGC.** Medium autumn-brown and gunmetal toning accompanies clashed and partly lustrous surfaces. Smooth save for two tiny digs on the left obverse field. An interesting network of spindly die cracks on the left reverse margin characterize the moderately scarce Overton-109.
From *The Skidaway Island Collection*. PCGS# 39418 Base PCGS# 6095
- 3723 1810 O-110, R.2, AU55 PCGS.** A colorful Bust half dollar that exhibits concentric ocean-blue, apricot-gold, and violet-red shades. Lightly abraded aside from a few thin marks between the vertical shield stripes. PCGS# 39420 Base PCGS# 6095
- 3724 1811/10 O-101, R.1, AU55 NGC.** Cartwheel sheen traverses both sides of this minimally circulated example. A loupe reveals only trivial contact. A late die state without reverse dentilation. The borders exhibit radial flow lines, as coined.
From *The Skidaway Island Collection*. PCGS# 39421 Base PCGS# 6099
- 3725 1811 Large 8, O-103, R.3, AU53 NGC.** Field die lines near the bust tip promptly attribute this attractive Bust half. Autumn-gold and sea-green toning drapes the borders. The surfaces are surprisingly unabraded and show ample glimpses of remaining luster. Both sides exhibit prominent clash marks.
From *The Skidaway Island Collection*. PCGS# 39423 Base PCGS# 6096
- 3726 1811 Small 8, O-106, R.3, AU55+ NGC.** Cartwheel luster crosses much of this minimally abraded example. The pastel powder-blue, lemon-gold, and apricot toning is compelling. The reverse die has several distinctive characteristics, including die lines above the left (facing) shoulder and a crack across a majority of the border.
From *The Skidaway Island Collection*. PCGS# 39429 Base PCGS# 6097
- 3727 1811 Small 8, O-108a, R.2, AU55 NGC.** A silver-gray representative with unblemished and partially lustrous surfaces. A late die state without reverse dentilation and multiple clash marks on the field above the eagle's neck. The crack through UNITED confirms the Overton subvariety.
From *The Skidaway Island Collection*. PCGS# 39432 Base PCGS# 6097
- 3728 1811 Small 8, O-109, R.2, AU58 NGC.** A heavy radial die crack crosses the left border of the first S in STATES and attributes this collectible Overton marriage. Dusky russet-brown and forest-green toning encompasses satiny and minimally marked surfaces.
From *The Skidaway Island Collection*. PCGS# 39433 Base PCGS# 6097

1811 Capped Bust Half, AU58 Challenging Variety, Richly Toned

- 3729 1811 Small 8, O-112, Low R.4, AU58 NGC.** Small 8. A network of bold die cracks encircle most of the obverse, with a diagnostic radial crack through star 9 and into Liberty's hair to the neck. A scarce R.4 variety, this deeply toned example displays red and gold highlights with steel-blue base toning. Nearly full mint luster shines through the toning. Minimal rub on the high points defines the near-Mint grade. A sharp and attractive example of this challenging variety.
From *The Skidaway Island Collection*. PCGS# 39438 Base PCGS# 6097
- 3730 1811 Small 8, O-113, R.5, AU53 NGC.** A difficult die variety distinguished by clash marks and cracks through STATES. Struck several degrees off center toward 5 o'clock. The right-side borders are softly impressed, but the remainder of the design is nicely struck. Unmarked aside from a small dark area on the drapery near the bust tip. Liberty's nose is tripled.
From *The Skidaway Island Collection*. PCGS# 39440 Base PCGS# 6097
- 3731 1812 Large 8, O-106, R.3, AU55 NGC.** Dramatic die cracks on both sides allow quick attribution of the scarce O-106. Herrman's census shows only three Mint State examples, all graded PCGS MS64 and likely different appearances of the same coin. This Choice AU representative has dove-gray toning and ample glimpses of sweeping luster. One hair-thin line is noted on the cheek.
From *The Skidaway Island Collection*. PCGS# 39451 Base PCGS# 6100
- 3732 1812 Large 8, O-108, R.2, AU58 NGC.** Three different cracks through the second T in STATES attribute O-108. A relatively early die state without clash marks or a crack through 50 C. Lustrous and unblemished with good eye appeal and medium olive-gold toning.
From *The Skidaway Island Collection*. PCGS# 39453 Base PCGS# 6100
- 3733 1813 50 C Over UNI, O-101, R.2, AU55 NGC.** Peach-gold borders cede to slate-gray centers. Crisply struck and partially lustrous. Unclashed and only minimally marked. An early die state with bold fragments of the misplaced UNI letters. Liberty's profile is strike doubled.
From *The Skidaway Island Collection*. PCGS# 39473 Base PCGS# 6104
- 3734 1813 O-103, R.2, AU55 NGC.** An attractive honey-gold example. Much luster remains, and abrasions are confined to a cluster of wispy marks on the field near the eagle's neck. An early die state with several light die lines through UNIT and no chips from the inside corner of the 3 in the date. Nonetheless, a faint double clash mark is perceptible beneath the first U in UNUM.
From *The Skidaway Island Collection*. PCGS# 39461 Base PCGS# 6103
- 3735 1813 O-107a, R.1, AU58 NGC.** Rose-red and forest-green toning is confined to the borders. Luster dominates all but the open fields. Unabraded and appealing. A late die state with several advanced cracks and clashed letters above the date from UNUM.
From *The Skidaway Island Collection*. PCGS# 39468 Base PCGS# 6103

- 3736 1813 O-108, R.3, AU55 NGC.** Plentiful luster brightens protected areas of the present Capped Bust half dollar. Occasional streaks of honey-gold and charcoal toning visit both sides. Tiny marks are distributed but more apparent on the central obverse. Liberty's profile is strike doubled.
From *The Skidaway Island Collection*. PCGS# 39469 Base PCGS# 6103
- 3737 1813 O-109, R.3, AU55 NGC.** An unmarked cream-gray Choice AU example with a few specks of deeper charcoal toning. The central reverse exhibits bold clash marks. The die state is fairly late with more than half of the dentilation absent.
Ex: *Long Beach Bullet (Heritage, 6/2005)*, lot 830.
From *The Skidaway Island Collection*. PCGS# 39471 Base PCGS# 6103
- 3738 1814/3 O-101a, R.2, AU53 NGC.** Bright luster illuminates the borders of this overdated half dollar. Glimpses of gray patina visit unmarked stone-white surfaces. An intermediate die state. The obverse is O-101a with cracks through the stars and date, but the reverse is still O-101 without a crack near UNITED. Both sides display bold clash marks, as made.
Ex: *Orlando FUN Signature (Heritage, 1/2007)*, lot 61897, which realized \$1,500.75.
From *The Skidaway Island Collection*. PCGS# 39488 Base PCGS# 61061
- 3739 1814 O-102a, R.3, AU55 NGC.** Rose-red, aquamarine, and golden-brown toning illuminates the borders of this lightly circulated and unblemished half dollar. Several letters in LIBERTY are boldly clashed on the central reverse.
From *The Skidaway Island Collection*. PCGS# 39476 Base PCGS# 6105
- 3740 1814 O-109, R.2, AU58 NGC.** Attractive for the grade, this cream-gray piece offers hints of chestnut color about the borders. The star centrils are needle-sharp. Close examination reveals a few wispy blemishes near the third star. A late die state with bold clash marks throughout the fields.
Ex: *Palm Beach Signature (Heritage, 3/2005)*, lot 512, which realized \$805.
From *The Skidaway Island Collection*. PCGS# 39486 Base PCGS# 6105

1815/2 O-101a Half Dollar, VF20

- 3741 1815/2 O-101a, R.3, VF20 PCGS.** A rising die crack through 50 C confirms the scarcer Overton subvariety. A stone-white example with powder-blue and almond-gold undertones. The fields are strongly clashed but marks are essentially confined to a single short line beneath the M in AMERICA. The stopper to a date collection of Capped Bust halves. PCGS# 39492 Base PCGS# 6108
- 3742 1817/3 O-101a, R.2, XF45 NGC.** A problem-free collector coin with rich tan-brown, stone-gray, and rose-red toning. An obvious overdate that shows the center and lower curve of a 3. One wonders why the leftover 1813 die was not placed into service earlier, since the 1814 mintage exceeded a million pieces. An early die state of O-101a without the small break at the upper corner of the 5 in 50 C.
From *The Skidaway Island Collection*. PCGS# 39512 Base PCGS# 6111

- 3743 1817 O-104a, R.6 — Mount Removed — NGC Details. Fine.** Cracks through the left-side stars, and die lines near the C in 50 C, combine to confirm this rare Overton marriage. This representative has attractive golden-brown and navy-blue toning. The edge has a mount at 12 o'clock and the nearby rims show scratches from solder effacement. The obverse is convex and the reverse is concave, with wear concentrated near Liberty's chin and neck.
From *The Skidaway Island Collection*. PCGS# 39495 Base PCGS# 6109
- 3744 1817 O-110a, R.2, AU58 NGC.** A slender die crack through the tips of the arrowheads confirms the later Overton subvariety. An attractively toned and unblemished representative with medium caramel-gold and sea-green shades that deepen near the rims.
From *The Skidaway Island Collection*. PCGS# 39503 Base PCGS# 6109
- 3745 1817 O-112a, R.2, AU58 NGC.** A partly lustrous chestnut-brown near-Mint example. No marks merit individual mention. Vertical die lines near the neck are diagnostic for the present marriage. The later subvariety with a crack across the top of UNITED. A triple set of clash marks appears on both fields.
From *The Skidaway Island Collection*. PCGS# 39507 Base PCGS# 6109
- 3746 1818/7 Large 8, O-101a, R.1, AU58 NGC.** Peach-red and blue-green borders encompass nearly brilliant centers. Unmarked, well struck, and partly lustrous. A blatant overdate with the "horns" of the 7 above the second 8 in the date. The late die state with "bar" clash marks through the ear and an arc-shaped crack across the lower left reverse.
From *The Skidaway Island Collection*. PCGS# 39541 Base PCGS# 6115
- 3747 1818 O-104a, R.3, AU55 NGC.** Lengthy heavy obverse die cracks allow ready attribution of O-104a. This partially lustrous example has autumn-brown centers and steel-gray high points. The peripheries display deep ocean-blue and peach-red toning.
From *The Skidaway Island Collection*. PCGS# 39518 Base PCGS# 6113
- 3748 1818 O-105, R.3, AU58 NGC.** A stone-gray representative with minimal marks and a small streak of deeper toning near star 3. Pockets of luster are prevalent. The bold die crack through star 12 is a pick-up point for O-105, as is the trio of merged dentils past 6 o'clock on the reverse.
Ex: *Allgood Collection (Heritage, 1/2011)*, lot 10717, which realized \$1,035.
From *The Skidaway Island Collection*. PCGS# 39519 Base PCGS# 6113
- 3749 1818 O-108, R.1, AU58 NGC.** Peach-gold dominates the peripheries, although hints of cherry-red and navy-blue are also present. Luster fills the borders and motifs. Nicely struck and impressively devoid of abrasions. An early die state without any clash marks.
From *The Skidaway Island Collection*. PCGS# 39524 Base PCGS# 6113
- 3750 1818 O-111, R.1, AU58 PCGS. CAC.** A refreshingly unabraded tan-gold, cream-gray, and steel-blue Borderline Uncirculated example. Overton-111 is often attributed by a tiny mint-made spike from the top of Liberty's cap. PCGS# 39528 Base PCGS# 6113

**1818 O-112a Capped Bust Half, AU58
Seldom Offered Late Die State**

- 3751 1818 O-112a, R.5, AU58 NGC.** A picture-perfect example of the rare, near-terminal state of the obverse die, with the long obverse die crack that originates at the border below the first 8 in the date and travels up and through the right-hand stars, through Liberty's cap, and terminates outside star 6. A second crack emanates from beneath the first 1 of the date and travels left through Liberty's bust and stars 1 to 5. The Overton reference suggests 1818 Halves from the late state O-112 dies are "rare" with these cracks, suggesting rapid die deterioration in this late state.

The present example is free of all but the lightest rub across the highpoints and a few small, well scattered abrasions. Silver-gray in the centers, there are some orange-russet highlights around the peripheries that are more extensive on the obverse. Well centered on the planchet, and obviously earmarked for inclusion in an advanced collection. The last time we handled the latest die state of the O-112 variety was this very coin in 2003.

Ex: Long Beach Signature (Heritage, 2/2003), lot 7722.

From The Skidaway Island Collection. PCGS# 39530 Base PCGS# 6113

- 3752 1819/8 Large 9, O-103a, R.4, AU55 NGC.** Multiple lengthy reverse die cracks confirm the later Overton subvariety. A very scarce die marriage, especially when encountered with partial mint luster and an absence of abrasions. Deep gunmetal-blue and apricot-gold toning encompasses well struck surfaces.

From The Skidaway Island Collection. PCGS# 39558 Base PCGS# 6119

- 3753 1819 O-111, R.2, AU58 NGC.** A satiny steel-gray Borderline Uncirculated Bust half. Smooth overall, with unimportant contact beneath Liberty's eye and the left scroll end. Liberty's profile is strike doubled.

Ex: Dallas Signature (Heritage, 11/2007), lot 729, which realized \$1,035.

From The Skidaway Island Collection. PCGS# 39549 Base PCGS# 6117

- 3754 1820/19 Curl Base 2, O-102, R.1, AU55 NGC.** A silver-gray, chestnut-tan, and olive-gold Choice AU representative. Unmarked and attractive with ample satin luster. Overton-102 is the sole overdated 1820 Curl 2 variety.

From The Skidaway Island Collection. PCGS# 39574 Base PCGS# 6126

- 3755 1820 Square Base 2, Large Date, Knob, O-105, R.1, AU55 NGC.** Forest-green and orange-gold toning accompanies the margins of this briefly circulated example. Thin marks are noted beneath Liberty's eye and near her chin. Two Square Base, Knob 2 marriages are known, but the rarity of O-104 compels *Guide Book* variety collectors to acquire O-105.

From The Skidaway Island Collection. PCGS# 39567 Base PCGS# 6122

- 3756 1821 O-106, R.1, AU58 NGC.** A die line above the base of the shield provides an O-106 identifier. Attractive golden-brown toning dominates both sides, although the margins offer occasional blushes of blue-green. No marks are remotely consequential.

From The Skidaway Island Collection. PCGS# 39584 Base PCGS# 6128

- 3757 1822 O-107, R.2, AU58 NGC.** The "Button in Cap" variety with a small but conspicuous round die lump on a fold near the top of Liberty's cap. The variety is available in VF but underappreciated at the near-Mint level. This well struck half has richly dappled gunmetal-blue and walnut-brown toning. Devoid of any noticeable marks.

Ex: Milwaukee Signature (Heritage, 8/2007), lot 8153.

From The Skidaway Island Collection. PCGS# 39593 Base PCGS# 6129

- 3758 1822 O-110a, R.2, AU58 NGC.** Autumn-brown and sky-blue toning embrace this lustrous and splendidly smooth near-Mint representative. The strike is sharp throughout, and wear is mostly confined to the top of the eagle's head.

From The Skidaway Island Collection. PCGS# 39598 Base PCGS# 6129

- 3759 1822 O-111, R.2, AU58 NGC.** Morgan dollar specialists enjoy "Pitted Reverse" varieties, caused by localized areas of rust that form on improperly stored dies. Bust half dollar collectors also have a "Pitted Reverse" variety to pursue: the O-111 1822, which shows clumps of die rust beneath both wings. This glossy near-Mint example is sharply struck and free from evident marks. Deeply toned tan-brown and gunmetal-gray.

From The Skidaway Island Collection. PCGS# 39599 Base PCGS# 6129

- 3760 1822 O-112, R.4, AU50 NGC.** A very scarce die marriage, often attributed by the extension of the fourth (from bottom) horizontal shield line into the right (facing) wing. The present example has bright luster throughout the borders and devices. Void of consequential contact, and the peripheral peach-gold patina contributes further to the eye appeal.

Ex: New York Signature (Heritage, 12/2011), lot 3572, which realized \$1,150.

From The Skidaway Island Collection. PCGS# 39600 Base PCGS# 6129

- 3761 1822 O-114, R.3, AU58 NGC.** Satin luster graces this splendidly detailed and moderately abraded lilac, tan-gold, and apple-green near-Mint half dollar. Scattered wispy obverse marks are only visible beneath a loupe.

Ex: Rocky Top Collection of Bust Half Dollars (Heritage, 2/2007), lot 3408.

From The Skidaway Island Collection. PCGS# 39602 Base PCGS# 6129

- 3762 1822 O-114, R.3, MS61 NGC.** Star 7 is high and nearly touches the cap, characteristic of O-114. Dusky steel-gray and golden-brown toning blankets this satiny Capped Bust half. The strike is good, and relevant marks are confined to a thin horizontal line on Liberty's neck. PCGS# 39602 Base PCGS# 6129

**1823 O-101 Half Dollar, AU55
Scarce Broken 3 Variety**

- 3763 1823 Broken 3, O-101, R.3, AU55 NGC.** Golden-brown and forest-green toning embraces the right borders of this generally lustrous and minimally abraded Choice AU Bust half. Minutely granular near the stem of Liberty's cap, but no other detractions are detected. The scarce early die state with an ungainly "Broken" 3 in the date. Most examples of the marriage are O-101a, struck after the 3 was repaired at the Mint. PCGS# 39620 Base PCGS# 6132

3764 1823 O-109, High R.5 — Improperly Cleaned — NGC Details. VF. The rare O-109 is distinctive for several lengthy obverse cracks that interlink across the periphery. The present dove-gray and walnut-brown example is mildly subdued but inoffensively abraded. Liberty's chin is strongly strike doubled.
From *The Skidaway Island Collection*. PCGS# 39614 Base PCGS# 6131

3765 1824/1 O-102, High R.5 — Rim Damage — NGC Details. Fine. Cream-gray legends and motifs contrast with steel-gray fields. The obverse is microgranular and the reverse is glossy. The obverse rim has inoffensive dings at 1 and 7 o'clock. A highly elusive die marriage.
From *The Skidaway Island Collection*.

3766 1824 O-105, R.2, MS61 NGC. Deep walnut-brown and dove-gray toning blankets this exceptionally unabraded and satiny representative. The stars are lightly impressed but the central devices are well defined. Liberty's chin is strike doubled. PCGS# 39625 Base PCGS# 6137

3767 1824/4 O-110, R.2, MS61 NGC. Cartwheel sheen traverses this surprisingly unabraded and attractive half dollar. Wisps of gold toning adorn stone-gray surfaces. Many of the stars show incompleteness but the major types are bold. Liberty's profile is strike doubled. PCGS# 39644 Base PCGS# 6140

3768 1825 O-103, Low R.4, AU58 NGC. A satiny near-Mint half dollar bathed in sea-green, stone-gray, and autumn-brown toning. Refreshingly free from contact. A evenly struck and attractive example of this better Overton variety. Liberty's profile is strike doubled.
Ex: *Rosemont Central States Signature (Heritage, 4/2008)*, lot 1051.
From *The Skidaway Island Collection*. PCGS# 39649 Base PCGS# 6142

3769 1825 O-104, High R.4, AU53 NGC. Better grade examples of O-104, such as the present coin, can be attributed by the presence of a die lump on the field below the left scroll end. A pleasing example that displays traces of almond-gold and cream-gray toning. Partly lustrous and relatively unabraded. Liberty's chest is strike doubled.
Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 8383.
From *The Skidaway Island Collection*. PCGS# 39650 Base PCGS# 6142

3770 1825 O-106a, R.3, AU58 NGC. Rose-gold toning visits the margins of this primarily brilliant Capped Bust half. Luster is plentiful and marks are few. The die state is intermediate between O-106 and O-106a. Overton's first crack (through 50 C) is present but his second crack (through UNITED) is absent.
Ex: *Orlando FUN Signature (Heritage, 1/2008)*, lot 8683.
From *The Skidaway Island Collection*. PCGS# 39653 Base PCGS# 6142

3771 1825 O-117, R.4, AU58 NGC. The upright of the 5 in the date is repunched, diagnostic for this better Overton marriage. Wisps of tan-brown toning are minimal on the obverse and moderate on the reverse. Luster illuminates the peripheries and motifs. A few tiny spots are distributed, but there are no detrimental abrasions.
From *The Skidaway Island Collection*. PCGS# 39664 Base PCGS# 6142

3772 1826 O-101, R.1, AU58 PCGS. Exquisite plum-red, peach-gold, and navy-blue toning encompasses the borders of this boldly struck and essentially unabraded half dollar. Luster dominates the margins and motifs. PCGS# 39666 Base PCGS# 6143

1826 Half Dollar, MS61 Very Scarce O-103

3773 1826 O-103, Low R.5, MS61 NGC. A repunched upright on the 5 in 50 C is the best identifier for the very scarce O-103. The present satiny half dollar has deep walnut-brown and powder-blue patina. Marks are absent save for a few unimportant lines on the obverse field. The strike is good, although the right-side stars show incompleteness.
From *The Skidaway Island Collection*. PCGS# 39669 Base PCGS# 6143

3774 1826 O-106a, R.3, AU58 NGC. Splashes of jade-green and walnut-brown overlie stone-gray surfaces. A satiny and well defined representative with unabraded fields and only a couple of minor hair-thin marks on the portrait.
From *The Skidaway Island Collection*. PCGS# 39674 Base PCGS# 6143

3775 1826 O-118a, R.1, MS63 NGC. Apple-green and golden-russet patina endows the peripheries of this satiny and minimally abraded half dollar. A mint error, the present piece is struck a few degrees off center toward 6 o'clock. PCGS# 39692 Base PCGS# 6143

3776 1827 Square Base 2, O-117, R.3, AU55 NGC. Rich navy-blue and plum-red peripheries encompass light golden-brown centers. Substantial cartwheel sheen illuminates refreshingly smooth surfaces. Slight wear on the curls confirms a momentary stint in circulation.
From *The Skidaway Island Collection*. PCGS# 39713 Base PCGS# 6144

3777 1827 Square Base 2, O-124a, R.5, XF45 NGC. Dusky steel-gray, olive, and powder-blue toning embraces this rare variety half dollar. The curls and drapery exhibit moderate wear but both sides lack any noticeable abrasions. Many Capped Bust specialists collect 1827 halves by variety, and O-124a is one of the stoppers.
From *The Skidaway Island Collection*. PCGS# 39723 Base PCGS# 6144

3778 1827 Square Base 2, O-125, R.3, AU58 NGC. A diagonal line through the T in LIBERTY is Dr. Peterson's pick-up point for O-125. Light tan-brown and ocean-blue toning accompanies lustrous and essentially unabraded surfaces. The centers are nicely struck, although the stars are mostly soft.
From *The Skidaway Island Collection*. PCGS# 39724 Base PCGS# 6144

3779 1827 Square Base 2, O-127, R.5, XF40 NGC. Peach-gold fields accompany aquamarine borders and high points. No marks are apparent on this moderately circulated but problem-free example. A challenging variety noted for "ear bars" on Liberty, caused by a die clash against the shield.
From *The Skidaway Island Collection*. PCGS# 39726 Base PCGS# 6144

3780 1827 Square Base 2, O-129, R.4, MS61 NGC. A recut second S in STATES and a merged final vertical shield stripe help identify this better Overton marriage. This satiny beauty is faintly toned in golden-gray tints, and the strike is strong save for the left side stars. No detrimental marks are encountered.
Ex: *Westmoreland, Virginia Collection (Heritage, 2/2006)*, lot 1236.
From *The Skidaway Island Collection*. PCGS# 39728 Base PCGS# 6144

- 3781 1827 Square Base 2, O-140, R.4, AU58 NGC.** A wisp of gold toning visits lustrous, well struck, and minimally marked surfaces. A superior example of this better Overton marriage. Die lines near the date are diagnostic, as is the extension of a middle vertical shield line deep into the horizontal lines.
From The Skidaway Island Collection. PCGS# 39739 Base PCGS# 6144
- 3782 1827 Square Base 2, O-144, High R.5, XF45 NGC.** A stubby die line from the bust tip is a key diagnostic for the rare O-144. Flow lines from the reverse letters to the rim ensure the attribution. Only a hint of almond-gold toning visits smooth stone-gray surfaces. Bright luster fills the borders.
From The Skidaway Island Collection. PCGS# 39744 Base PCGS# 6144
- 3783 1827 Square Base 2, O-145, R.5 — Improperly Cleaned — NGC Details. VF.** A high elusive die marriage noted for repunching on the serif of the C in 50 C. A die line from the bust tip provides further confirmation. Rich golden-brown and navy-blue toning covers the borders but the motifs are pearl-gray. Careful examination reveals minor hairlines strictly assessed by NGC.
From The Skidaway Island Collection. PCGS# 39745 Base PCGS# 6144
- 3784 1827 Curl Base 2, O-147, R.4, AU58 NGC.** 49 different die marriages of 1827 half dollars are known, but only two varieties, O-146 and O-147, have a Curl Base 2. Fortunately for *Guide Book* collectors, the O-146 is fairly plentiful, but the O-147 is very scarce. The present Borderline Uncirculated example has deep fire-red, navy-blue, and lavender toning. The satiny surfaces are smooth aside from a tick beneath the right scroll end.
From The Skidaway Island Collection. PCGS# 39750 Base PCGS# 6145
- 3785 1828 Curl Base 2, No Knob, O-104, R.3, AU55 NGC.** Rich forest-green, autumn-brown, and plum-red toning encompasses this sharply struck half dollar. A cluster of narrowly spaced marks is noted on the field beneath the right scroll end. O-104 can be attributed by the specific extension of vertical shield lines into the horizontal lines.
From The Skidaway Island Collection. PCGS# 39757 Base PCGS# 6148
- 3786 1828 Curl Base 2, No Knob, O-105, R.5, AU50 NGC.** The reverse with a repunched U in UNITED is paired with a No Knob, Curl 2 obverse. A rare die combination. The present piece displays dusky powder-blue and walnut-brown toning. Impressively devoid of marks despite a short stint in Jackson-era commerce.
From The Skidaway Island Collection. PCGS# 39758 Base PCGS# 6148
- 3787 1828 Curl Base 2, Knob, O-106, High R.4, AU55 NGC.** Gunmetal-blue and caramel-gold embrace this briefly circulated but well defined better variety half dollar. Wear is chiefly confined to the curls near the ear and the top of the eagle's head. Luster glimmers from design elements. The reverse is unabraded and the obverse lacks mentionable marks.
From The Skidaway Island Collection. PCGS# 39759 Base PCGS# 6149
- 3788 1828 Square Base 2, Small 8s, Large Letters, O-121, R.3, AU55 NGC.** A lavender-gray, olive-green, and wheat-gold half dollar with traces of dirt in reverse crevices. The curls display moderate wear but luster shimmers from recesses. Abrasions are relegated to the field near the eagle's neck.
From The Skidaway Island Collection. PCGS# 39776 Base PCGS# 6151

**1828 Bust Half, Choice XF
Elusive O-123a, Square 2
Small 8s, Large Letters**

- 3789 1828 Square Base 2, Small 8s, Large Letters, O-123a, R.5, XF45 NGC.** The very scarce O-123a exhibits several interesting features, including a "railroad tracks" die marker left of the tail, a cluster of die lines west of the date, and a buckled field between stars 5 and 6. The present problem-free dove-gray example is nicely defined and void of noticeable marks.
From The Skidaway Island Collection. PCGS# 508130 Base PCGS# 6151
- 3790 1829/7 O-101, R.1, AU58 NGC.** Only a whisper of golden toning visits the fields and devices, but the rims offer deeper shades of fire-red and cobalt-blue. Well preserved and coruscating. The tail feathers are partially lapped, as usual for O-101. But unlike O-101a, the arrow shafts are intact east of the right (facing) claw.
From The Skidaway Island Collection. PCGS# 39807 Base PCGS# 6155
- 3791 1829/7 O-102, R.2, AU58 NGC.** The stem of a 7 is clear within the 2 in the date. A lightly toned and lustrous Borderline Uncirculated half dollar. The margins exhibit hints of ocean-blue and tan-brown. Free from relevant contact, and the curls display only slight wear.
From The Skidaway Island Collection. PCGS# 39809 Base PCGS# 6155
- 3792 1829 Small Letters, O-106, High R.5, AU58 NGC.** The semicircular crack from the 2 in the date to star 10 attributes this rare die marriage. An impressive representative with faint gold toning and an absence of evident abrasions. Nicely struck and partly lustrous.
From The Skidaway Island Collection. PCGS# 39785 Base PCGS# 6154
- 3793 1829 Small Letters, O-107, R.3, AU58 NGC.** Sea-green and rose-red grace the borders but this near-Mint example is generally toned olive-gray. Luster brightens design elements and there are no noticeable marks. Die lines near the bust tip identify the somewhat scarce O-107.
From The Skidaway Island Collection. PCGS# 39786 Base PCGS# 6154
- 3794 1829 Small Letters, O-109a, R.4, AU53 NGC.** The die state is between O-109 and O-109a. A crack joins the tops of UNITED but no crack is present through S OF AM. Regardless, a very scarce Overton marriage seldom encountered in the present quality. A stone-gray and wheat-gold example with moderate wear and unmarked surfaces.
*Ex: Dallas Signature (Heritage, 10/2008), lot 7769.
From The Skidaway Island Collection. PCGS# 39790 Base PCGS# 6154*
- 3795 1829 Medium Letters, O-116, R.4, AU58 NGC.** Medium to deep apple-green and chestnut toning. Well struck except for a portion of the eagle's left (facing) wing. The borders and devices offer vibrant luster. Smooth save for a few faint slide marks on the cheek. An original example of this scarcer variety.
*Ex: New York Signature (Heritage, 7/2002), lot 8097.
From The Skidaway Island Collection. PCGS# 39801 Base PCGS# 6154*

3796 1830 Small 0, O-104, R.3, AU58 NGC. Exemplary for the grade, this lustrous and delicately toned half dollar shows only infrequent incidental contact. The strike is crisp on the major devices although the stars are lightly brought up.
Ex: Milwaukee Central States Signature (Heritage, 5/2004), lot 7371.
From The Skidaway Island Collection. PCGS# 39813 Base PCGS# 6156

3797 1830 Small 0, O-109, R.3, AU58 NGC. A dusky olive-gray and walnut-brown Borderline Uncirculated example. No marks are remotely consequential, and the original toning contributes further to the eye appeal. A late die state with outer star points drawn to the rim.
From The Skidaway Island Collection. PCGS# 39820 Base PCGS# 6156

3798 1830 Small 0, O-112, High R.4, AU55 NGC. Peach, aquamarine, and cherry-red iridescence graces the margins of this lightly circulated Capped Bust Half. Substantial bright luster is present. The reverse border possesses a couple of hair-thin marks. A scarce die marriage, in between O-112 and O-112a with the stars drawn to the edge but no break within the 3.
Ex: Long Beach Bullet (Heritage, 6/2004), lot 458.
From The Skidaway Island Collection. PCGS# 39823 Base PCGS# 6156

1830 O-114 Half Dollar, VF30 Rare Large Letters Reverse

3799 1830 Large Letters, Small 0, O-114, R.5, VF30 NGC. A key *Guide Book* variety, the 1830 Large Letters is relegated to a single Overton marriage, O-114. Since that die pair is rare, examples are coveted in all grades by collectors of the series. This dusky caramel-gold and gunmetal half dollar has pleasing surfaces despite moderate wear. A late obverse die state with absent dentils and the stars drawn toward the edge.
From The Skidaway Island Collection. PCGS# 39836

1830 O-123 Half Dollar, MS64 Large 0, Iridescent Toning

3800 1830 Large 0, O-123, R.1, MS64 PCGS. Attractive bands of apple-green, cherry-red, and sun-gold toning endow the margins of this satiny Choice Bust type coin. The strike is crisp except for softness on star 7 and the drapery clasp. Abrasions are absent aside from a wispy field mark near star 9. PCGS# 39834 Base PCGS# 6157

3801 1831 O-115, R.4, MS62 NGC. A much better Overton variety, among the scarcest 1831 marriages. This satiny example has a rose-gold and olive-green obverse. The reverse displays deeper aquamarine and lavender shades. Impressively unabraded and evenly struck. A fairly late die state with elongated outer star points. PCGS# 39852 Base PCGS# 6159

1831 Half Dollar, VF Details Key O-120 Marriage

3802 1831 O-120, R.6 — Improperly Cleaned — NGC Details. VF. A buckled obverse field attributes Overton-120, which is by far the rarest 1831 marriage. The die was either inadequately prepared or made from substandard steel. The result was early die failure and a rare variety. This cream-gray midgrade representative has a good appearance despite hairlined surfaces.
From The Skidaway Island Collection.

3803 1832 Small Letters, O-114, High R.4, AU55 NGC. Delicate gold toning visits partially lustrous and essentially mark-free surfaces. The strike show blending on the LU in PLURIBUS. A late die state with elongated outer star points and flowlined borders, as made.
From The Skidaway Island Collection. PCGS# 39873 Base PCGS# 6160

3804 1832 Small Letters, O-121, R.3, AU58 NGC. Forest-green and golden-brown shades adorn this satiny and minimally abraded half dollar. The strike is good despite incompleteness on the right-side stars. O-121 is identified by repunching on the flag of the 1 in the date.
From The Skidaway Island Collection. PCGS# 39881 Base PCGS# 6160

3805 1833 O-105, R.2, MS62 NGC. A lustrous and unmarked Bust half with light to medium cream-gray and apricot toning. The second S in STATES is widely repunched, and provides the best identifier for O-105. Designated as O-105a by NGC, but that variety is unconfirmed by researcher Stephen J. Herrman. Overton's O-105a characteristics include a crack through the second T in STATES, not present on this coin or, perhaps, any other example of O-105.
From The Skidaway Island Collection. PCGS# 39892 Base PCGS# 6163

1833 Half Dollar, O-108, MS64 A Sharp, Satiny Date Representative

3806 1833 O-108, R.1, MS64 PCGS. CAC. With regular silver dollar production suspended until 1840, half dollars were the denomination of choice for banks and depositors during the 1830s. In 1833, the Mint struck more than 5.2 million halves, and this issue remains moderately plentiful in the lower Mint State grades for date collectors. Above the MS64 level, however, it becomes conditionally scarce. This Choice example is unusually well-struck, apparently from fresh dies, with no evidence of die fatigue or cracks. The stars and denticles are crisp, as are the central devices. Satiny luster shines through pale lavender-gray and blue-gold toning, while the underlying surfaces are free of all but a few trivial marks on Liberty's cheek. PCGS has certified only 23 numerically finer representatives (1/15). PCGS# 39896 Base PCGS# 6163

- 3807 1833 O-112, R.2, MS62 PCGS.** A repunched star 10 is the primary pick-up point for this collectible Overton variety. A lustrous representative with minimal marks and good eye appeal. Nearly brilliant save for a slender grease streak beneath the final two stars. The rims show softness of strike near 3 and 9 o'clock. PCGS# 39901 Base PCGS# 6163

**1833 Half Dollar, XF40
Challenging O-115 Variety**

- 3808 1833 O-115, High R.5, XF40 NGC.** Dr. Glenn Peterson notes that the top of the 5 in 50 C has a defective shape unique to the challenging O-115 marriage. This moderately circulated example offers deep lavender-gray, olive-green, and tan-brown toning. Liberty's profile is lightly strike doubled. Evident marks are confined to a small reverse rim nick at 8 o'clock. *From The Skidaway Island Collection.* PCGS# 39904 Base PCGS# 6163

**1834 O-101 Half Dollar, MS64
Large Date, Large Letters**

- 3809 1834 Large Date, Large Letters, O-101, R.1, MS64 PCGS. CAC.** The stand of the 5 in 50 C is repunched, diagnostic for the collectible Overton-101. A lustrous near-Gem with light to medium apricot-gold, lilac, and powder-blue toning. Smooth aside from a hair-thin line on the field near the nose and a slender vertical mark on the cheek. PCGS# 39905 Base PCGS# 6164
- 3810 1834 Small Date, Small Letters, O-117, R.2, MS62 NGC.** A repunched crossbar on the A in STATES is the pick-up point for the conditionally scarce O-117. Herrman's quarterly shows many AU examples but the variety is seldom encountered in Uncirculated quality. The present satiny half dollar has pleasing surfaces and peripheral golden-brown and cobalt-blue patina. PCGS# 39922 Base PCGS# 6166
- 3811 1834 Small Date, Small Letters, O-118, R.4, AU58 NGC.** Rose-red and cobalt-blue grace the margins of this partly lustrous half dollar. Marks are confined to a line beneath the N in UNITED. A rare variety in the present quality. The date is repunched south, and die lines extend from two serifs of the second T in STATES. Should this important RPD variety ever attain *Guide Book* status, it would become costly to procure. *From The Skidaway Island Collection.* PCGS# 39923 Base PCGS# 6166
- 3812 1835 O-102, R.3, AU58 NGC.** Cartwheel luster is substantial on this lightly worn Capped Bust type coin. A few stars are incompletely brought up but the strike is otherwise bold. Bagmarks are absent but minor hairlines appear beneath a lens. *From The Skidaway Island Collection.* PCGS# 39928 Base PCGS# 6168

- 3813 1836 Lettered Edge, O-115, R.3, AU58 NGC.** Gunmetal gray surfaces with faint blue, violet, and gold highlights. The die states are advanced, with most of the milling either weak or missing on both the obverse and reverse. A satiny and original example of this collectible final-year Lettered Edge variety. *Ex: Jules Reiver Collection (Heritage, 1/2006), lot 23346; Dallas Signature (Heritage, 11/2007), lot 763.* *From The Skidaway Island Collection.* PCGS# 39950 Base PCGS# 6169

- 3814 1836 50/00, Lettered Edge, O-116, R.2, AU55 NGC.** Star 12 is boldly repunched, but the primary feature of interest is the slender curve of a 0 to the left of the 5 in 50 C. The 50 Over 00 variety is listed in the *Guide Book* and commands a significant premium. This lustrous and well struck Choice AU example has autumn-brown, fire-red, and blue-green peripheral patina. Only scattered tiny ticks emerge beneath a loupe. *From The Skidaway Island Collection.* PCGS# 39964 Base PCGS# 6170

- 3815 1836 Lettered Edge, O-117, R.3, MS61 NGC.** Aquamarine and wheat-gold toning intermingle across this satiny final-year lettered edge half. No marks are evident, but a trace of struck-in grease is noted near the eagle's neck. *From The Skidaway Island Collection.* PCGS# 39952 Base PCGS# 6169

- 3816 1836 Lettered Edge, O-120, Low R.4, AU58 NGC. CAC.** A slender band of peach-gold toning endows the left obverse margin, but the remainder of this lustrous half dollar remains white. The strike is inexact on the eagle's head but the surfaces are uncommonly free from contact. *Ex: Rosemont Central States (Heritage, 4/2011), lot 10611.* *From The Skidaway Island Collection.* PCGS# 39961 Base PCGS# 6169

**1836 O-121 Half, AU Details
Rarest 1836 Lettered Edge Die Pair**

- 3817 1836 Lettered Edge — Improperly Cleaned — O-121, High R.5, NGC Details. AU.** Tail feather through olive stem and a scarce Bar-Dot variety. Many advanced collections of Bust halves lack this rare Overton die pair. The diagnostic tail feather through the olive stem identifies the reverse die (shared with O-105), paired with an obverse with star 8 recut and a dot to the right of the date. Only minor evidence remains of the "corrugated bars" typical of the reverse die, signifying its later use. Bright from cleaning, this example shows light wear as well as slight hairlining and a minor struck-in grease mark to the left of the date. *From The Skidaway Island Collection.* PCGS# 39962 Base PCGS# 6169
- 3818 1836 Lettered Edge, O-122, R.2, MS61 NGC.** Dusky golden-brown and gunmetal-gray toning encompasses this well struck and satiny half dollar. Marks are minor aside from a few slender ticks near Liberty's jaw. O-122 is attributed by a small die line near the upper left serif of the E in STATES. *From The Skidaway Island Collection.* PCGS# 39963 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, VF30 Low Mintage and Historic

- 3819** 1836 Reeded Edge, GR-1, R.2, VF30 NGC. The low mintage Reeded Edge 1836 half dollar has long been a favorite among both collectors and speculators. The issue is also historic, as the first steam press product of the denomination. The present midgrade silver-gray representative lacks mentionable marks aside from a thin line above OF. Wear is even save for softness on the TA in STATES. PCGS# 531046 Base PCGS# 6175

1837 Reeded Edge Half, GR-12, MS63 Well-Detailed Type Coin

- 3820** 1837 GR-12, R.2, MS63 PCGS. CAC. This is an early die state for this moderately available variety, with the obverse cracks faint. The reverse is just beginning to crack through the bottom of UNITED. The surfaces show few abrasions, with satiny luster shining through mottled lavender-gray and olive-gold toning. There is trivial peripheral weakness on some of the stars and border legends, but the central devices are sharp. PCGS# 531058 Base PCGS# 6176

1839 GR-5 Half Dollar, MS63 Final Capped Bust Issue

- 3821** 1839 Large Letters, GR-5, R.2, MS63 NGC. This is the final Capped Bust half dollar issue struck in the transitional year that marked the beginning of the Seated Liberty design. This frosty, light gold-toned example shows sharp central design elements, with just trivial weakness on select peripheral elements. Both sides have a few minor ticks and tiny rim bruises that limit the grade, but the eye appeal is exceptional for the MS63 grade. Census: 15 in 63, 49 finer (1/15).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3645. PCGS# 531102 Base PCGS# 6179

SEATED HALF DOLLARS

- 3822** 1847 MS63 NGC. CAC. Ex: "Col." E.H.R. Green. This attractive Select example shows bright, semi-reflective fields. In this case each side is blanketed by cobalt-blue toning, yet the die polish in the fields still flashes strongly through the color. Sharply struck throughout.
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society. NGC ID# 24HA, PCGS# 6257 Base PCGS# 6257

- 3823** 1851-O AU58 NGC. WB-101, Die Pair 1, R.4. The New Orleans Mint stepped on the brakes for its half dollar production in 1851, recognizing that the market ratio of silver to gold was out of balance. The intrinsic silver value of half dollars exceeded their face value, and any coins placed in circulation were destined to disappear as soon as they reached commerce. As a result, just 402,000 pieces were minted. This untuned, silver-gray example shows sharp, near-Mint motifs with only minor marks, but many hair-thin lines exist in the fields. A bit of mint luster remains at the margins.
Ex: Summer FUN Signature (Heritage, 7/2011), lot 1157. NGC ID# 24HK, PCGS# 6267 Base PCGS# 6267

1853 Half Dollar, MS63 Single-Year Arrows and Rays Subtype

- 3824** 1853 Arrows and Rays MS63 NGC. WB-101. Faint chestnut toning visits this satiny and lightly abraded example. The centers are prominently clashed. Well-struck, although Liberty's thigh lacks complete detail. The single-year Arrows and Rays type was a dramatic means to inform the public that the bullion content of half dollars was reduced from the prior year, the intention being to keep the coins in circulation rather than letting them be hoarded and melted along with the older, heavier issues.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3648. NGC ID# 24JJ, PCGS# 6275 Base PCGS# 6275

- 3825** 1854 Arrows MS63 NGC. WB-101. Variegated peach-gold, blue-green, and slate embrace this satiny silver type coin. Impressively unabraded, although both sides display bold clash marks, as made. Census: 32 in 63 (2 in 63+), 45 finer (1/15). NGC ID# 24JL, PCGS# 6279 Base PCGS# 6279

**1856-O FS-301 Half Dollar, MS64
Obliquely Repunched Date, WB-102**

- 3826** 1856/1856-O FS-301, WB-102, Die Pair 9, R.2, MS64 PCGS. A bold repunching of the date shows a strongly overdated die with the secondary date running uphill to the right, with a level date recut over the misaligned digits. The 1 of the date is repunched north, the 8 slightly southeast, and the 56 boldly southeast. One of the most dramatic recut dates in the Seated half series, which is renowned for weirdly misplaced dates and odd repunchings. A near-Gem example, with a bold strike and softly lustrous, pearlescent gray surfaces. PCGS# 413722 Base PCGS# 6288

**1861-O Seated Half, XF45
Confirmed CSA Issue, WB-102, FS-401**

- 3827** 1861-O C.S.A. Obverse, FS-401, XF45 PCGS. WB-102, Die Pair 11, R.3. The obverse is famous as the same die used to strike the four "original" Confederate half dollars. A diagnostic crack emerges from the dentil to the right of star 7, running to the bridge of Liberty's nose, and traveling south to emerge from the chin to the shoulder. In its earliest use, the obverse is paired with a normal "eagle" reverse — struck by the Confederacy, but of the traditional Seated half design. This Choice XF example is a silver-gray coin, with LIBERTY bold on the shield and strong remaining details. PCGS# 39968 Base PCGS# 39968
- 3828** 1862-S MS61 PCGS. WB-101, Die Pair 1, R.3. Large S Mintmark. Just six die pairs were used to strike more than 1.3 million coins, with fewer Mint State survivors than expected for the mintage. This example is brilliant and lustrous beneath a hint of golden-gray patina. One or two hair-thin lines in the right field and a few random, minor marks account for the assigned grade. From an early die state, with full dentils and only slight weakness at the eagle's right talon. Population: 3 in 61, 34 finer (1/15). NGC ID# 24JA, PCGS# 6308 Base PCGS# 6308

**1864-S Half Dollar, MS63
WB-101, Large S Mintmark**

- 3829** 1864-S MS63 NGC. WB-101, Die Pair 1, R.2. Aside from a few of the stars on the obverse, this Select Uncirculated example is boldly struck and boasts remarkable, distraction-free surfaces. A light-gold patina sweeps over the fields and devices, with silver-lilac accents on the portrait and across the eagle. The die pair marks the final appearance of the Type 1 reverse on any S-Mint half dollar, with the L in HALF noticeably narrower than the L in DOL. Ex: Stack's (10/02), lot 596; FUN Signature (Heritage, 1/2005), lot 7322. NGC ID# 24JE, PCGS# 6312 Base PCGS# 6312

**1872-S WB-102 Seated Half, MS63
Bold, Brilliant Example**

- 3830** 1872-S MS63 NGC. WB-102, Die Pair 4, R.3+. Medium-small S Mintmark. The die pair is quickly identified by the unusually placed mintmark, positioned extremely low and to the right over the left serif of D in DOLLAR. A pair of diagnostic die cracks confirm the obverse — one through Liberty's foot, the other from star 7 through Liberty's head and star 8 to the edge above the cap. A bold strike emphasizes the untuned, silver-white fields and devices, and sharp cartwheel luster flashes over both sides. A few light field lines do not detract from the Mint-fresh appeal. NGC ID# 24K9, PCGS# 6335 Base PCGS# 6335
- 3831** 1885 AU55 PCGS. WB-101. Circulated examples of this low-mintage issue (just 5,200 coins struck) are actually seen less frequently than Mint State pieces. This Choice AU representative shows just a brush of wear over well-struck devices, with remnants of luster in the recesses. Milky-gray and pale golden toning blanket each side. Population: 2 in 55, 84 finer (1/15). NGC ID# 24KY, PCGS# 6367 Base PCGS# 6367
- 3832** 1889 MS64 PCGS. WB-101. From a typically low mintage of 12,000 pieces, the 1889 Seated Liberty half dollar is a very scarce issue in high grade. This charming MS64 specimen is sharply detailed throughout and the well-preserved surfaces show a mix of vibrant mint luster and prooflike reflectivity on both sides. Population: 49 in 64, 33 finer (1/15). NGC ID# 24L4, PCGS# 6371 Base PCGS# 6371

PROOF SEATED HALF DOLLARS

1865 Half Dollar, Flashy PR64

- 3833 1865 PR64 PCGS.** Variegated walnut-brown and stone-gray adorn this fully struck and flashy near-Gem. Exemplary despite a single small spot near the left (facing) elbow. Only 500 proofs were coined for this historic year, which witnessed the end of the Civil War and the first Presidential assassination. Population: 50 in 64 (1 in 64+), 21 finer (1/15).
Ex: ANA Signature (Heritage, 3/2010), lot 1010. NGC ID# 27TS, PCGS# 6419

1867 Seated Half, PR65 Cameo Splendid Color and Contrast

- 3834 1867 PR65 Cameo PCGS.** A needle-sharp full strike is only one of many attractions on this well-contrasted Gem proof With Motto 1867 Seated half. The reverse shows rich fire-red and orange-gold with a contrasting silvery central device. The obverse shows similar color accented with a thin rim of electric-blue and violet. A top-notch example from this issue of 625 proof coins. Population: 9 in 65 Cameo, 6 finer (1/15). PCGS# 86425
- 3835 1869 PR64 PCGS.** Deep navy-blue and forest-green margins encompass dusky plum-mauve centers. The well struck and unmarked surfaces exhibit underlying flash. A scant 600 proofs were issued. NGC ID# 27U4, PCGS# 6427
- 3836 1870 PR64 PCGS. WB-101.** This impressive Choice specimen is sharply detailed on the obverse, but a touch of softness shows on the eagle's leg. The fields are deeply reflective, under shades of champagne-gold and lavender toning. Population: 60 in 64, 16 finer (1/15). NGC ID# 27U5, PCGS# 6428

1873 Seated Half, PR65 Popular No Arrows Variant

- 3837 1873 No Arrows PR65 PCGS. CAC.** One of just 600 No Arrows proof halves for the year, all struck from dies with the Closed 3 logotype in the date. Beautifully, albeit subtly contrasted with powerful mirrors that shine through lemon-gold central toning and peach and blue-green peripheral shadings. Population: 17 in 65, 17 finer (1/15).
Ex: Dallas Signature (Heritage, 10/2008), lot 933. NGC ID# 27U8, PCGS# 6431

1873 Arrows Half, PR64 Cameo Sharply Contrasted

- 3838 1873 Arrows PR64 Cameo PCGS.** The Arrows type of 1873 and 1874 is one of the most recognizable and sought-after types in 19th century U.S. numismatics. This near-Gem has the added attraction of strong cameo contrast on each side; the obverse is arguably Deep Cameo. A few light hairlines can be made out with a loupe, and the obverse shows just a hint of light toning while the reverse is brilliant. Population: 9 in 64 Cameo, 6 finer (1/15). PCGS# 86434

1874 Arrows Half, PR64 Subtle Field-Device Contrast

- 3839 1874 Arrows PR64 PCGS. WB-101.** The weight of half dollars was changed in 1873, from 12.44 to 12.50 grams and arrows were added to each side of the date to signify the weight change. Proofs of this short-lived design type are always highly sought-after by collectors. This 1874 piece has sparkling, mirrored fields beneath speckled rose-russet toning on the obverse and pale gold color on the reverse. Few technical distractions are apparent on this near-Gem. Population: 60 in 64, 25 finer (1/15).
Ex: Dallas Signature (Heritage, 10/2008), lot 934; Houston Signature (Heritage, 12/2009), lot 751. NGC ID# 27UV, PCGS# 6435

1876 Seated Liberty Half, PR65 Cameo
Mirrorlike Fields, Bold Contrast

- 3840 1876 PR65 Cameo NGC.** Type One Reverse. Essentially brilliant at the centers with rose-gold margins and hints of forest-green near the rims. Radiant devices contrast with the darkly mirrorlike fields. A sharp strike despite minor incompleteness on the eagle's left (facing) claw. Census: 13 in 65 Cameo, 8 finer (1/15).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4163, which realized \$3,220. PCGS# 86437 Base PCGS# 86437

- 3841 1878 PR64 Cameo NGC.** Brilliant and untuned save for a small blush of orange-gold toning at the lower obverse rim. The deep mirrors contrast nicely with the fully struck and smoothly frosted devices. A few delicate hairlines — particularly in the right obverse field — define the assigned near-Gem grade, although the eye appeal is excellent. Census: 30 in 64 Cameo (1 in 64+ Cameo, 1 in 64 ★ Cameo), 28 finer (1/15). PCGS# 86439

1881 Seated Half, PR65 Cameo
Brilliant, Contrasted Surfaces Throughout

- 3842 1881 PR65 Cameo NGC. CAC.** The decade of the 1880s is a highly collectible one for half dollars and quarters. Almost without exception, the dates have low-production numbers as both proof and circulation strikes, and they can only occasionally be located in well-preserved condition. This is a brilliant example of a low total-mintage date with strong contrast evident between the fields and devices. The strike details are complete throughout. Census: 19 in 65 Cameo (1 in 65 ★ Cameo), 20 finer (1/15). PCGS# 86442

1882 Seated Half, PR66
Nicely Contrasted Brilliant Proof

- 3843 1882 PR66 NGC.** Apparently just a whisper shy of the Cameo designation from NGC, since nice field-device contrast is the overall visual impression from this well-produced Premium Gem proof. A few microscopic lines in the right obverse field are of minimal concern, and a touch of gold on the rims gives this otherwise brilliant example a stately appeal. Census: 19 in 66 (1 in 66 ★), 5 finer (1/15). NGC ID# 27UH, PCGS# 6443

1884 Seated Half Dollar, PR66
Low-Mintage Date

- 3844 1884 PR66 PCGS. CAC.** Beautiful powder-blue and caramel-gold shades embrace this flashy and nicely struck Choice proof. A planchet imperfection on the lower right obverse field is of Mint origin and extends into Liberty's left leg. A couple of hair thin marks appear on the reverse. Population: 13 in 66, 3 finer (1/15). NGC ID# 27UK, PCGS# 6445

1885 Half Dollar, PR66
Vivid, Concentric Toning

- 3845 1885 PR66 NGC.** Set in the middle of a low-mintage decade for business strikes as well as proofs, only 930 proof half dollars were struck in 1885. This is a spectacular Premium Gem that displays concentric toning in hues of deep red and blue with considerable reflectivity at the margins. Brightly mirrored fields are deep and delightful, and the strike is crisp and bold as expected. Census: 20 in 66 (1 in 66 ★), 9 finer (1/15). NGC ID# 27UL, PCGS# 6446

1885 Seated Half, PR66 Cameo
Deeply Mirrored, Appealing Rim Toning

- 3846 1885 PR66 Cameo NGC.** The 1885 was struck near the nadir of total output for Seated halves. Only 5,200 strikes were produced for circulation, plus 930 proofs; making the proof examples highly popular with collectors. Apple-green and orange-gold embrace this flashy and well-preserved example. Fully struck throughout. Census: 16 in 66 Cameo (1 in 66+ Cameo, 3 in 66 ★ Cameo), 10 finer (1/15).
Ex: Houston Signature (Heritage, 11/2012), lot 4810. PCGS# 86446

1888 Seated Liberty Half, PR65 Cameo
Attractive Deep Mirrors and Frosted Devices

- 3847 1888 PR65 Cameo NGC.** A flashy Gem with luminous devices and glassy fields. Champagne-gold toning clings to the margins. A good strike with minor incompleteness on Liberty's hair and the eagle's left (facing) claw. One of the late-series, low-mintage dates, presumably of limited production because the Mint relegated its resources to striking tremendous numbers of legally compelled silver dollars. Census: 16 in 65 Cameo (1 in 65 ★ Cameo), 8 finer (1/15). Ex: Summer FUN (Heritage, 7/2010), lot 3745. PCGS# 86449

1889 Seated Half, PR65
Exceptional Toning on Each Side

- 3848 1889 PR65 PCGS. CAC.** Only 711 proofs were struck of this scarce, low total-mintage half dollar. This is a wondrously beautiful coin. The center has an off-center oval of brilliance that is surrounded by violet and cobalt-blue. The reverse displays lighter and more diverse shades. In spite of the significant toning, the fields are brightly reflective. Population: 12 in 65, 18 finer (1/15). NGC ID# 27UR, PCGS# 6450

- 3849 1890 PR64 Cameo PCGS.** Only 590 proof Seated Liberty half dollars were struck in 1890. This impressive Choice example displays sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. The well-preserved surfaces are visited by shades of greenish-gold and cobalt-blue toning. Population: 14 in 64 (1 in 64+) Cameo, 17 finer (1/15). PCGS# 86451

1890 Seated Half, PR65 Cameo
Noteworthy Brilliant Proof

- 3850 1890 PR65 Cameo PCGS.** This 1890 Gem proof is virtually untuned and well-struck. Frosted devices provide nice Cameo contrast with deeply reflective fields. Curiously, this appealing proof has a small planchet void on the reverse beneath the ER in AMERICA, which is worth noting but is of little visual consequence. Population: 8 in 65 (1 in 65+) Cameo, 9 finer (1/15). PCGS# 86451

BARBER HALF DOLLARS

- 3851 1892 MS64 NGC.** Only a whisper of golden toning adorns this thoroughly lustrous and beautifully preserved near-Gem. A tiny spot is noted above the right shield tip may be all that denies an even higher grade. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

- 3852 1892 MS64 NGC.** This is an appealing, Choice example of this first-year Barber half dollar issue. The design elements are sharply defined, with luminous, satiny luster shining through transparent gunmetal-gray toning. No significant abrasions are observed. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

1892-S Barber Half Dollar, MS65
Popular Mintmark Type Coin

- 3853 1892-S MS65 PCGS. CAC.** The 1892-S represents the first year of the Barber design, an important consideration for mintmark type collectors. The 1892-S is a condition rarity at the MS65 grade level. This impressive Gem displays well-detailed design elements and well-preserved surfaces with satiny mint luster and shades of pinkish-gray toning. Population: 13 in 65, 4 finer (1/15). NGC ID# 24LJ, PCGS# 6464

1893-S Half Dollar, Toned MS63
Difficult to Locate in Mint State

- 3854 1893-S MS63 NGC.** The 1893-S half dollar, from a production of 740,000 pieces, is a difficult issue to locate in mint condition, fewer than 100 examples of which have been seen by NGC and PCGS. And most of these fall into the MS60 to MS63 range. Only one coin grades higher than MS65 (a PCGS MS66). The reddish-gray, lavender, and violet lustrous surfaces of the present Select offering exhibit well-struck devices except for weakness on the upper-right shield corner and the arrow feathers. Roller marks are visible on both sides. Census: 17 in 63, 12 finer (1/15). NGC ID# 24LM, PCGS# 6467

- 3855 1906 MS64 PCGS.** This sharply detailed Choice specimen displays vivid shades of greenish-gold and lavender-gray toning, with vibrant mint luster under the patina and outstanding eye appeal. Population: 76 in 64 (2 in 64+), 28 finer (1/15). NGC ID# 24MU, PCGS# 6504

- 3856 1907-D MS64 PCGS.** This sharply detailed Barber half dollar is patinated in vivid shades of greenish-gold and lavender, with vibrant mint luster underneath the toning and few signs of contact. Population: 52 in 64 (2 in 64+), 40 finer (1/15). NGC ID# 24MZ, PCGS# 6509

PROOF BARBER HALF DOLLARS

- 3857 1896 PR63 NGC.** A sharp strike and subtle field-motif contrast are the chief attributes this Select proof possesses, complementing a light golden hue over each side. Scattered hairlines limit the grade, but are not detracting to the unaided eye. NGC ID# 24NY, PCGS# 6543

1898 Half Dollar, PR65+ Cameo Top-Shelf Eye Appeal

- 3858 1898 PR65+ Cameo PCGS. CAC.** The proof silver coins produced in Philadelphia from 1896 to 1898 rightly are celebrated for their high technical quality and all-around eye appeal. This PR65+ Cameo example of the half dollar has clear contrast through a faint layer of champagne-to-gray patina. PCGS has graded just 18 finer Cameo representatives (1/15). PCGS# 86545

1900 Barber Half, PR65 Light Golden Patina

- 3859 1900 PR65 PCGS.** Subtle field-device contrast is evident on both sides of this Gem proof with its lovely champagne toning and occasional freckles of tan-gray. The design features are boldly detailed, save for minor softness on the upper right shield corner. Coins bearing the 1900 date are extremely popular with collectors. Population: 37 in 65, 20 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2008), lot 782; Long Beach Signature (Heritage, 2/2009), lot 1406. NGC ID# 24P4, PCGS# 6547
- 3860 1903 PR64 NGC.** This attractive Choice example exhibits the all-brilliant finish used on proofs of this era, with sharply detailed design elements and deeply mirrored fields, but only modest contrast. The surfaces are well-preserved and the reverse is visited by shades of greenish-gold and light blue toning. NGC ID# 24P7, PCGS# 6550

1910 Half Dollar, Sharp Gem Proof

- 3861 1910 PR65 NGC.** Just a hint of light golden toning accents the deeply mirrored fields and razor-sharp devices of this Gem proof Barber half. Faint die striations in the fields are seen with low-power magnification, and mask any grade-limiting hairlines that may also be present. Subtle field-motif contrast is observed, although not enough to warrant a Cameo designation from NGC. Census: 39 in 65, 52 finer (1/15). NGC ID# 24PE, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

- 3862 1916-S AU55 PCGS.** A Choice AU specimen from the first year of the Walking Liberty design, this coin exhibits a better-than-average strike for an early series issue and the lustrous surfaces show remarkably few abrasions. NGC ID# 24PN, PCGS# 6568
- 3863 1916-S AU58 NGC.** This low-mintage San Francisco Mint issue represents the first year of the Walking Liberty design. The well-detailed design elements show just a trace of wear and the lustrous surfaces are free of large or distracting abrasions. NGC ID# 24PN, PCGS# 6568
- 3864 1917-D Reverse MS62 PCGS.** Delicate shades of golden-tan and silver-gray toning visit the lightly marked surfaces of this impressive MS62 specimen, with well-detailed design elements and satiny mint luster throughout. The 1917-D Walking Liberty half dollar with the mintmark on the reverse is more elusive than its Obverse counterpart, despite its higher mintage. NGC ID# 24PS, PCGS# 6571
- 3865 1917-S Obverse AU58 PCGS.** The 1917-S Walking Liberty half dollar claims a low mintage of 952,000 pieces. This attractive near-Mint specimen displays well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 24PT, PCGS# 6572

1917-S Walking Liberty Half, MS64+ Frosty, Choice Surfaces

- 3866 1917-S Reverse MS64+ PCGS. CAC.** Reverse Mintmark. Soft luster glows beneath the pearlescent, thickly frosted surfaces of this near-Gem Walker. The surfaces are essentially free of abrasions and are well-struck for the issue, which is nearly always weak through the centers. Some deep russet toning clings to the edges. Plus-graded by PCGS with CAC endorsement. NGC ID# 24PU, PCGS# 6573

**1918 Walking Liberty Half, MS65
Outstanding, Highly Attractive Example**

3867 1918 MS65 PCGS. CAC. This Gem represents the first year of the Walking Liberty half series to be produced with only the reverse mintmark type, and it is a remarkably attractive specimen of this early date. The strike definition is essentially full on both sides, including Liberty's branch hand, and vibrant mint luster radiates across clean, beautifully preserved surfaces. A partial blanket of speckled golden-brown and olive patina over both obverse and reverse confirms the originality of this outstanding example. NGC ID# 24PV, PCGS# 6574

3868 1919-S — Improperly Cleaned — NGC Details. AU. The 1919-S ranks among the most conditionally rare issues of the series. This lightly circulated half dollar has a mildly glossy appearance. Careful rotation reveals wispy hairlines, but marks are minor overall. NGC ID# 24R2, PCGS# 6579

3869 1920-D AU58 NGC. CAC. The 1920-D Walking Liberty half dollar is a challenging issue in high grade. This AU58 example displays well-detailed design elements with just a trace of high-point wear and lightly abraded lustrous surfaces with traces of pale gold and amber toning. NGC ID# 24R4, PCGS# 6581

3870 1920-D AU58 PCGS. CAC. The smooth surfaces of this near-Mint example show no large or distracting abrasions and retain much of their satiny mint luster. The well-detailed design elements show just a trace of high-point wear. NGC ID# 24R4, PCGS# 6581

3871 1921 VF30 NGC. The unprecedented coinage of silver dollars in 1921, compelled by the Pittman Act, led to a drastically reduced production of dimes and half dollars that year. This rare 1921 Walker displays original cream-gray color with charcoal toning in protected areas. The reverse has a small rim nick at 11:30, but there are no other remotely consequential marks. NGC ID# 24R6, PCGS# 6583

3872 1921-D VF20 PCGS. The lowest mintage issue of the series, the 1921-D is pursued by set collectors in all grades. The present dove-gray and wheat-gold representative shows moderate high point wear but problem-free surfaces ensure substantial eye appeal. NGC ID# 24R7, PCGS# 6584

3873 1921-S VF30 PCGS. The 1921-S Walking Liberty half dollar is a low-mintage key. This pleasing VF30 example shows moderate wear on the design elements, but the silver-gray surfaces are free of large or distracting abrasions. NGC ID# 24R8, PCGS# 6585

3874 1923-S AU55 NGC. Wheat-gold fields and ice-blue high points adorn partly lustrous and lightly worn surfaces. This better date half dollar shows minimal marks and offers attractive eye appeal. NGC ID# 24R9, PCGS# 6586

3875 1923-S AU58 PCGS. This brightly lustrous near-Mint example exhibits just a trace of wear on the well-detailed design elements and the lightly marked surfaces show a few hints of golden-tan toning. NGC ID# 24R9, PCGS# 6586

3876 1929-D MS64 PCGS. A scarce Denver issue with a mintage slightly above 1,000,000 pieces. This lustrous Choice example displays delicate tan toning. The strike is sharp on the skirt lines. The fields and eagle display wispy marks, and a small spot is noted on the rim near the B in LIBERTY. NGC ID# 24RC, PCGS# 6589

3877 1933-S MS63 PCGS. This attractive Select Walking Liberty half dollar exhibits well-detailed design elements, with clear separation between Liberty's thumb and finger, but some head details area little soft. The lightly marked surfaces display slightly subdued satiny mint luster. NGC ID# 24RE, PCGS# 6591

3878 1933-S MS64 PCGS. A coruscating near-Gem with chestnut-gray toning aside from a smattering of tiny lavender freckles near the rims. The strike is uncommonly sharp, a characteristic of the scarce issue. The upper right portion of the walking Liberty is glossy, as ejected from the dies. NGC ID# 24RE, PCGS# 6591

**1938-D Half Dollar, MS66+
Outstanding Eye Appeal**

3879 1938-D MS66+ PCGS. CAC. A band of light rainbow toning over the right obverse border is virtually the only color on this satiny and largely brilliant Premium Gem. The strike is strong overall with just the slightest softness on the branch hand and eagle's leg. With a mintage of just 491,600 pieces, the 1938-D enjoys the third-lowest production in the entire series after the 1921 Philadelphia and Denver issues. Contemporary collectors took note of this early on, and a sizeable percentage of the mintage was saved in Uncirculated condition. Still, PCGS reports just 40 finer pieces (1/15). NGC ID# 24RV, PCGS# 6605

3880 1942 MS67+ NGC. CAC. This high-end Superb Gem displays sharply detailed design elements and well-preserved surfaces with ample mint luster and a few hints of greenish-gold toning. NGC has graded only four numerically finer examples (1/15). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

3881 1943-S MS66+ PCGS. CAC. FS-101. Trumpet tail S. Tan-gold and powder-blue shades grace this lustrous and high grade half dollar. The strike is above average, especially on the skirt lines and Liberty's head. Similar to many '43-S half dollars, the obverse is die doubled, evident on IN GOD WE TRUST, the sun's rays, and the base of Liberty's dress. NGC ID# 24SB, PCGS# 6620

3882 1947 MS67 PCGS. This frosty, sharply struck Superb Gem is among the finest examples of this final-year issue that are obtainable by collectors. Surface abrasions are almost nonexistent, and both sides are awash in lovely champagne toning. Population: 55 in 67 (4 in 67+), 0 finer (1/15). NGC ID# 24SM, PCGS# 6630

PROOF WALKING LIBERTY HALF DOLLARS

1936 Half Dollar, PR65
First Walking Liberty Proof Issue

3883 1936 PR65 PCGS. The Philadelphia Mint resumed its commercial proof set offerings in 1936, and a modest mintage of 3,901 proof Walking Liberty half dollars was accomplished. This attractive Gem exhibits sharply detailed design elements and deeply reflective fields, with delicate shades of champagne-gold toning and ample eye appeal. NGC ID# 27V4, PCGS# 6636

3884 1938 PR67 PCGS. Fully struck devices and highly reflective fields reside beneath a thin blanket of milky-gold toning on each side of the Superb Gem proof Walker. Housed in a green label holder. PCGS has certified just 13 numerically finer examples (1/15). NGC ID# 27V6, PCGS# 6638

FRANKLIN HALF DOLLARS

3885 1949-D MS66 Full Bell Lines PCGS. Softly frosted luster is luminous through considerable patina, medium-gray on the obverse with a gold-gray reverse and deep violet rim toning that is most obvious in a crescent centered to the right of the eagle beside the Liberty Bell. Tiny marks at and below the bell's full lines contribute to the grade. Population: 52 in 66 (4 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24SU, PCGS# 86654

3886 1949-D MS66 Full Bell Lines PCGS. A spectacular Premium Gem, with sharply detailed design elements and full definition on the bell lines. The well-preserved surfaces radiate vibrant mint luster, under attractive shades of lavender and golden-brown toning. Eye appeal is outstanding. Population: 52 in 66 (4 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24SU, PCGS# 86654

3887 1949-D MS66 Full Bell Lines PCGS. Mint State Full Bell Line 1949-D Franklin half dollars are readily available through the Gem level of preservation, after which the population drops precipitously. The two major services have graded only 57 Premium Gems and none finer. Occasional freckles of russet and olive run over the obverse, while this color palette becomes more extensive on the reverse. Sharply struck and nicely preserved. Population: 52 in 66 (4 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24SU, PCGS# 86654

3888 1949-D MS66 Full Bell Lines PCGS. This second-year issue from the Denver Mint had one of the lower business strike mintages in the Franklin half dollar series, at just over 4.1 million pieces. This lustrous, carefully preserved example is among the finer-graded pieces, as neither major service has rated any coins finer than MS66, with Full Bell Lines. A sharply struck Premium Gem with minimal surface marks and a slight degree of speckled dark-green and reddish-tan peripheral toning on each side. Population: 52 in 66 (4 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24SU, PCGS# 86654

3889 1953 MS66 Full Bell Lines PCGS. Among the finest certified, this Full Bell Lines 1953 Franklin half will be of great importance to the Registry Set collector. Frosty mint luster shines through a veil of pale lavender-blue toning, while deeper shades of gold, amber, and russet lightly speckle the margins. The devices are well-struck and the preservation is excellent. Population: 45 in 66 (3 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24T6, PCGS# 86664 Base PCGS# 86664

3890 1957-D MS66+ Full Bell Lines PCGS. CAC. This Plus-designated Registry coin is just a whisker shy of Superb Gem quality, showcasing frosty, uninhibited luster and sharply defined motifs. Silver-gray toning yields deeper hues of olive, rose, and sun-gold on each side, revealed most fully when tilted beneath a light. Only 14 Full Bell Lines examples are numerically finer at PCGS (1/15). NGC ID# 24TF, PCGS# 86673 Base PCGS# 86673

1959 Half Dollar, MS66 Full Bell Lines
None Finer at PCGS

3891 1959 MS66 Full Bell Lines PCGS. Delicate peripheral gold toning is restricted to the obverse of this fully brilliant and frosty silver half dollar. The strike is bold, bringing out the elusive bell lines on the reverse of this highly attractive Franklin half dollar. Population: 46 in 66 (3 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24TJ, PCGS# 86676

3892 1960 MS66 Full Bell Lines PCGS. An attractively toned Registry Set candidate, this Premium Gem Full Bell Lines Franklin half exhibits bold definition on all design elements, with frosty, largely undisturbed mint luster. Both sides display an even balance of lemon-gold and lavender-blue toning, with the occasional glimpse of amber and olive. Population: 52 in 66 (2 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24TL, PCGS# 86678 Base PCGS# 86678

3893 1960 MS66 Full Bell Lines PCGS. Softly frosted mint luster illuminates sharp motifs and well-preserved surfaces on this Premium Gem Registry coin. The obverse is deeply dappled in amber-red and olive toning, while the reverse is more lightly colored in pastel lavender and mint-gold hues. Population: 52 in 66 (2 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24TL, PCGS# 86678 Base PCGS# 86678

3894 1960-D MS66 Full Bell Lines PCGS. Splashes of maroon, olive, and amber toning are seen over much of the left-hand obverse, while the remainder of each side is largely pale champagne in color. The strike is bold and the preservation is outstanding on this Registry-quality coin. Population: 25 in 66 (1 in 66+) Full Bell Lines, 1 finer (1/15). NGC ID# 24TM, PCGS# 86679

1961-D Half, MS66 Full Bell Lines
Registry Set Candidate

3895 1961-D MS66 Full Bell Lines PCGS. Ex: Radabaugh Collection. An important acquisition for the Registry Set collector, this Premium Gem is among the finest with Full Bell Lines at PCGS. Both sides are boldly struck, with frosty luster illuminating pale champagne toning. A delightful piece, with no distracting breaks in the luster. Population: 19 in 66 (1 in 66+) Full Bell Lines, 0 finer (1/15). NGC ID# 24TP, PCGS# 86681

3896 1962 MS65 Full Bell Lines PCGS. Just a suggestion of light golden color is detected on this seemingly brilliant Full Bell Lines Gem. The strike is sharp throughout, and the satiny surfaces reveal only a few minute ticks to limit the grade. There are only six numerically finer examples at PCGS (1/15). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1951 Half Dollar, PR67 Cameo
Among the Finest Certified

3897 1951 PR67 Cameo NGC. Early proof Franklins are rarely found with contrast, and this Superb Gem is among the finest certified 1951 Cameo proof. Both sides have exceptional field-device contrast with brilliant silver surfaces showing no toning. The strike is bold and the eye appeal is grand. Census: 25 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (1/15). NGC ID# 27VB, PCGS# 86692

3898 1958 PR67 Ultra Cameo NGC. Not a bit of toning interrupts the dramatic, deep-mirrored silver appeal of this technically Superb Franklin half. The smooth and white-frosted devices float in bold contrast over the reflective surfaces. Only slight blending on the bell lines prevents a higher proof designation. Census: 15 in 67 Ultra Cameo (1 in 67 ★ Ultra Cameo), 14 finer (1/15). NGC ID# 27VH, PCGS# 96699

KENNEDY HALF DOLLAR

3899 1964-D MS67 PCGS. Type One Reverse with sans serif FG initials. Iridescent honey-gold toning graces most of the obverse, although the upper border offers aquamarine and lilac-red. The reverse is primarily brilliant but shows glimpses of tan patina. Lustrous, nicely struck, and essentially unimprovable. Population: 33 in 67, 1 finer (1/15). NGC ID# 24U3, PCGS# 6707 Base PCGS# 6707

End of Session Two

SESSION THREE

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 15
B-5, BB-27, Three Leaves Reverse

- 3900** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 NGC. Head of '95. By far the most plentiful Flowing Hair dollar variety with the signature "bar" in the left obverse field opposite star 5, near the uppermost hair curl. Bronzelike toning covers the surfaces, with the motifs several shades lighter for a two-tone patina. All of the devices are clear including the date and most of the dentils, except where the rims narrow due to a slightly off-center strike. A small planchet flaw (as made) is seen at 6 o'clock on the reverse. PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Flowing Hair Dollar
VF Details, Three Leaves Reverse

- 3901** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaning — PCGS Genuine. VF Details. A deeply patinated example of the coveted Flowing Hair type. Rotation beneath a light reveals navy-blue and wheat-gold undertones. The surfaces are glossy and faintly hairlined. Unobtrusive field marks are noted near the eagle's neck. The wreath has a couple of small green specks. PCGS# 39977 Base PCGS# 6852

1798 Silver Dollar, VF Details
Small Eagle, 15 Stars, B-2, BB-81

- 3902** 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3 — Damage — PCGS Genuine. VF Details. Bowers Die State II. Three small digs on the eagle's belly and a small roundish mark near Liberty's chin correspond to the PCGS designation. The slate-gray surfaces are mildly bright and the upper reverse field has a couple of faded hair-thin marks. Nonetheless, a nicely defined example of the scarce Small Eagle 1798 dollar. PCGS# 40007 Base PCGS# 6868

- 3903** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Whizzed — NGC Details. XF. Bowers Die State II. A nicely defined Heraldic Eagle type coin. The cream-gray and chestnut-brown surfaces are hairlined but display few abrasions. PCGS# 40030 Base PCGS# 6873

- 3904** 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, VG8 PCGS. Bowers Die State II. A scarce Bolender variety. The obverse field is rising near the 9 in the date; the end of the line for its long-in-use die, which had previously coined BB-113 through BB-118. A mildly luminous and minutely granular stone-gray early dollar. No marks are remotely of interest. PCGS# 40036 Base PCGS# 6873

1799/8 Silver Dollar, Choice VF
13 Stars Reverse, B-1, BB-142

- 3905** 1799/8 13 Stars Reverse, B-1, BB-142, R.4, VF35 NGC. Bowers Die State III with advanced crumbling near the I in AMERICA. The present autumn-brown, forest-green, stone-gray, powder-blue, and rose-red early dollar displays ample design definition although portions of PLURIBUS are indistinct. Abrasions are essentially confined to a couple of slender lines on the right obverse field. PCGS# 40065 Base PCGS# 6884

- 3906** 1799 7x6 Stars, B-10, BB-163, R.2, VF30 PCGS. Bowers Die State III. Medium autumn-brown, blue-green, and slate-gray toning graces this middle grade early silver dollar. All letters in E PLURIBUS UNUM are sharp. Minimally abraded except for a couple of ticks on the field beneath the chin. PCGS# 40054 Base PCGS# 6878

3907 1799 7x6 Stars, B-14, BB-167, R.3, VF30 PCGS. Die State II with small die flaws beneath the AM in AMERICA. The cream-gray toning is moderately deeper near the rims. Well defined for the VF30 level, since all letters in E PLURIBUS UNUM are sharp. Relevant marks are confined to a single hair-thin mark below the fletchings. The obverse exhibits faint hairlines. Housed in a green label holder. PCGS# 40058 Base PCGS# 6878

**1800 Wide Date, Low 8 Dollar, VF35
Scarce B-10, BB-190 Variety**

3908 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF35 PCGS. Bowers-Borckardt Die State III, Liberty's highest hair curl lapped, die crack through rim and I in AMERICA to leaf pair. The surfaces are rose-gray with a few scattered small marks and the circulation wear expected at this level. A few areas show deep charcoal-gray color. A pleasing example of this scarce variety. PCGS# 40076 Base PCGS# 6888

3909 1800 AMERICA I, B-19, BB-192, R.2 — Cleaning — PCGS Genuine. VF Details. Bowers Die State IV. A nicely defined cream-gray Bust dollar. Moderately glossy and hairlined, but the rims are free from nicks and none of the few small abrasions merit singular description. PCGS# 40082 Base PCGS# 6892

SEATED DOLLARS

**1840 Seated Dollar, AU58
Album-Toned, Attractive Example**

3910 1840 AU58 NGC. There was no great demand for silver dollars in 1840, which were struck in part to alleviate large number of half dollars that were required as the "coins of choice" for commerce. Most silver dollars from the 1840s circulated domestically to one extent or another, as did this lightly worn example. The attractive album toning suggests a long period of time in collector hands as well. Prooflike surfaces remain visible around the stars and devices, with only minor bagmarks and abrasions distributed over the still-lustrous surfaces. Sharp details remain at the star centers, on Liberty's features and gown, and across the eagle's entire plumage. Deep blue and gold margins with wide, square rims surround amber-gold centers. Just 61,005 silver dollars were produced for the year. NGC ID# 24YA, PCGS# 6926

3911 1841 AU58 PCGS. Only a trace of wear shows on the high points of the design elements and this attractive near-Mint specimen exhibits lightly abraded surfaces, with slightly subdued prooflike reflectivity in the fields. Population: 36 in 58, 57 finer (1/15). NGC ID# 24YB, PCGS# 6927

3912 1844 AU50 NGC. The quad-stripes in the obverse shield identify circulation strike 1844 Seated dollars. All 20,000 examples were minted from a single die pair. This pleasing AU example has partially reflective fields and attractive surfaces showing hints of blue-steel peripheral toning. NGC ID# 24YE, PCGS# 6930

3913 1844 AU53 PCGS. Gold CAC. Rich fire-red, sea-green, sun-gold, and lilac toning encompasses moderately abraded surfaces. Luster emerges from protected areas. LIBERTY and the shield are die doubled, as always for business strikes of this low mintage date. Certified in a green label holder. NGC ID# 24YE, PCGS# 6930

3914 1849 AU55 NGC. Just a trace of wear shows on the high points of the sharply impressed design elements of this popular Seated Liberty dollar, and the brightly lustrous surfaces are lightly abraded. A planchet lamination (as struck) travels across the shield and into the field on the reverse. NGC ID# 24YL, PCGS# 6936

**1850 Seated Dollar, AU53
Modest Mintage, Many Melted**

3915 1850 AU53 PCGS. In the wake of the great California gold discovery, production of silver dollars dropped precipitously. Of the few coins struck, many were melted. This AU53 survivor of the 1850 issue has soft luster flickering beneath light, even patina. The obverse is mint-green and sage with the deepest color along parts of the margins. The reverse has deeper, rosy tones. Population: 19 in 53, 92 finer (1/15). NGC ID# 24YM, PCGS# 6937

3916 1853 AU53 NGC. Substantial luster remains visible on both sides of this light silver-gray Seated dollar. Both sides show trivial grade-consistent marks. The 1853 is a scarce date, although the collector will be able to locate an example such as this one with a brief search. NGC ID# 24YS, PCGS# 6941

**1853 Seated Dollar, AU58
Some Luster Remaining**

3917 1853 AU58 NGC. The 1853 Seated dollar is a less often seen issue in any grade, as a large percentage of the already small 46,110-coin mintage was either exported or eventually melted for the coins' silver content. This is a distinctly attractive near-Mint example, showing remnants of original luster in the protected regions and pale golden-gray color overall. The design elements exhibit just a touch of high-point friction, but are sharply impressed. NGC ID# 24YS, PCGS# 6941

- 3918 1859 AU55 PCGS.** Just a trace of wear shows on the well-detailed design elements of this Choice AU specimen and the lightly abraded, lustrous surfaces are blanketed in colorful shades of violet, gray, and golden-brown toning. Population: 19 in 55, 42 finer (1/15). NGC ID# 24YX, PCGS# 6946

1859-O Seated Dollar, Brilliant MS62

- 3919 1859-O MS62 PCGS.** The 1859-O is one of the most available No Motto Seated dollars in Mint State, making it ideal for type representation. This example is untoned with vibrant luster. Light, scattered abrasions define the grade, but none are individually noteworthy. The top of Liberty's head and several stars show some of the typical weakness, but the central elements are well-defined. NGC ID# 24YY, PCGS# 6947
- 3920 1865 XF40 NGC.** Light silver surfaces exhibit peripheral champagne toning that is confined to the rim on this important Civil War issue. Both sides have traces of mint luster in the protected areas. NGC ID# 24Z8, PCGS# 6955
- 3921 1867 AU50 NGC.** Satin luster resides on both sides of this attractive Seated dollar that exhibits splashes of gold and iridescent toning, primarily close to the borders. Hints of field reflectivity remain. NGC ID# 24ZA, PCGS# 6960
- 3922 1871 MS62 NGC.** The 1871 Seated Liberty dollar is an available date in circulated grades but Mint State examples are elusive. This attractive MS62 specimen offers well-detailed design elements and satiny lustrous surfaces with a scattering of minor contact marks. Census: 28 in 62, 85 finer (1/15). NGC ID# 24ZG, PCGS# 6966

1872-CC Dollar, XF Details Only 3,150 Pieces Struck

- 3923 1872-CC — Smoothed — PCGS Genuine. XF Details.** A well defined representative of this challenging Carson City emission. The meager mintage of 3,150 pieces ensures a paucity of survivors. The field near the 1 in the date is inconspicuously smoothed. The gunmetal and chestnut-tan surfaces are moderately hairlined. NGC ID# 24ZK, PCGS# 6969

TRADE DOLLARS

- 3924 1873-CC XF45 PCGS. CAC.** An attractive Choice XF example, this first-year Carson City Trade dollar exhibits natural bluish-steel and subtle gold toning over silver-gray surfaces. NGC ID# 252X, PCGS# 7032
- 3925 1873-CC AU55 ANACS.** This sharply defined first-year Carson City Trade dollar exhibits delicate gold and pale blue toning over satiny silver surfaces. Struck from normal dies without the blundered obverse. NGC ID# 252X, PCGS# 7032

1875-CC Trade Dollar, MS63 Lustrous, Brilliant, Good Strike

- 3926 1875-CC Type One Reverse MS63 NGC.** A brilliant Select Carson City type coin with booming luster and good eye appeal. The strike is crisp except for minor blending on the eagle's right (facing) claw. Scattered small field marks are consistent with the grade. Despite a mintage of 1,573,700 pieces, most examples were exported and eventually melted. Census: 25 in 63, 18 finer (1/15). PCGS# 40108 Base PCGS# 7038
- 3927 1876-CC AU55 ANACS.** Type One Obverse, Type Two Reverse. This is the usual hub combination for 1876-CC Trade dollars. A lovely Choice AU, this example has substantial light silver luster, displaying lilac and champagne toning on each side. NGC ID# 253A, PCGS# 7042
- 3928 1878-CC AU50 ANACS.** The key issue to the Carson City Trade dollars, the 1878-CC had a reported mintage of 97,000 coins. Delicate champagne toning adheres to the rims of this otherwise brilliant light silver-gray Trade dollar. Trivial marks fail to diminish the eye appeal of this piece. NGC ID# 253F, PCGS# 7047
- 3929 1878-S MS62 PCGS.** Type Two Obverse and Reverse. Trade dollar production was halted in the first half of 1878 by Secretary of the Treasury John Sherman, but not before more than 4.1 million pieces were struck at the San Francisco Mint. This sharply brilliant representative is lustrous and frosty, with a gentle hint of almond gold patina sprinkling the reverse margin. Only a few delicate lines and tiny abrasions interrupt the smooth surfaces. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

- 3930 1875 PR61 NGC.** Type Two Reverse. A fully struck and lightly toned specimen. The left obverse is dusky and slightly granular, but both sides appear devoid of contact marks. Only 700 proofs were issued. NGC ID# 27YL, PCGS# 7055

1875 Trade Dollar, Toned PR64 Type One Reverse

- 3931 1875 PR64 NGC.** Type One Reverse with berry under claw. Both reverse subtypes are known on proofs of this date, and are approximately equal in rarity. This is a fully struck and nicely mirrored specimen that exhibits deep, iridescent orange-gold, ice-blue, and honey-gold patina. A scant 700 proofs were issued. NGC ID# 27YL, PCGS# 7055

3932 1876 PR60 NGC. Type One Obverse. Type Two Reverse. The most prevalent subtype combination for Centennial-year proofs, although others are known. The eagle's right (facing) leg is lightly brought up but the remainder of the strike is bold. The untoned surfaces display a few ticks and the reverse rim has unobtrusive dings at 8:30 and 9:30. NGC ID# 27YM, PCGS# 7056

3933 1880 — Stained — NGC Details. Proof. This proof-only Trade dollar is unworn but the almond-gold surfaces are subdued and faintly hairlined. The strike is good despite minor blending on a few stars and Liberty's hair. NGC ID# 27YS, PCGS# 7060

3934 1882 — Improperly Cleaned — NGC Details. Proof. A well struck specimen with lemon-gold borders and stone-gray centers. The fields are noticeably bright and display infrequent unimportant marks. A proof-only date with a production of just 1,097 pieces. NGC ID# 27YU, PCGS# 7062

MORGAN DOLLARS

3935 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS. CAC. A brilliant Gem with booming luster and a bold strike. The fields are well preserved and the cheek displays only delicate contact. A desirable representative of the briefly coined design subtype. PCGS# 133818 Base PCGS# 7072

3936 1878 7TF Reverse of 1878 MS65 PCGS. VAM-195. Magnificent bands of cherry-red, apple-green, and lemon-gold toning adorn the margins. Lustrous and fully struck with a smooth reverse and only minor obverse marks. The D in DOLLAR has a broken base, and a diagonal line through the IB in LIBERTY confirms the attribution. NGC ID# 253K, PCGS# 7074

3937 1878 7TF Reverse of 1879 MS65+ PCGS. This high-end Gem exhibits well-detailed design elements and well-preserved lustrous surfaces. The slanting top arrow feather identifies the Reverse of 1879. PCGS has graded 20 numerically finer examples (1/15). NGC ID# 253L, PCGS# 7076

3938 1878-CC MS65 PCGS. Thickly frosted, untuned mint bloom captivates the eye on this Gem first-year Carson City Morgan. The eagle's talons lack full definition, but the hair above Liberty's ear is decidedly sharp. A few minor disruptions on the obverse limit the grade, but hardly affect the eye appeal. A high-quality coin for the grade. NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, AU55 Key Carson City Issue

3939 1879-CC AU55 PCGS. The 1879-CC is the second-rarest Morgan dollar from the Carson City Mint, with a low-mintage of 756,000 pieces. This attractive Choice AU specimen shows just a trace of high-point wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar Mint State Details

3940 1879-CC — Altered Surfaces — PCGS Genuine. Unc Details. VAM-4. The slightly dusky golden-gray surfaces are subdued but nonetheless demonstrate unbroken cartwheel sheen. Marks are inconsequential save for a tick on the eagle's breast. A very scarce and highly popular Carson City issue. VAM-4 is interesting for its minor die doubling on Liberty's profile and a lightly repunched mintmark. NGC ID# 253T, PCGS# 7086

1879-CC 'Capped Die' Dollar Uncirculated Details, VAM-3

3941 1879-CC Capped Die, VAM-3 — Filed Rims — PCGS Genuine. Unc. Details. A Top 100 Variety. Large Over Small CC. The curious variety with myriad pinpoint die lumps near the mintmark. These lumps were likely deliberately made on the working die by a mint worker to conceal the use of mintmark punch intended for a smaller diameter denomination. The present lustrous and untuned example appears to grade MS64 upon cursory inspection, but close study reveals filing on the obverse rim between 1 and 2 o'clock. PCGS# 133869 Base PCGS# 7088

3942 1879-O MS65 PCGS. Vivid shades of greenish-gold, lavender-gray, and turquoise toning blanket the surfaces of this attractive Gem, with well-detailed design elements and vibrant mint luster throughout. NGC ID# 253V, PCGS# 7090

3943 1879-O MS62 Deep Mirror Prooflike PCGS. CAC. The 1879-O Morgan is a particularly elusive issue with Deep Mirror Prooflike mirroring. This representative is mildly abraded, as the grade suggests, but possesses distinct cameo contrast and boldly struck devices. Orange-gold peripheral toning yields to brilliant centers. NGC ID# 253V, PCGS# 97091

3944 1879-S Reverse of 1878 MS64+ PCGS. A degree of semiprooflike mirroring in the fields and sharply struck design elements contribute to the eye appeal of this Plus-designated Choice example. Light disruptions in the luster on the obverse limit the grade, but no heavy abrasions are present. A suggestion of light golden color is noted upon close examination. NGC ID# 253W, PCGS# 7094

3945 1880-CC 8 Over High 7, VAM-5, MS65 PCGS. CAC. A Top 100 Variety. A hint of golden patina visits this thoroughly lustrous, well preserved, and fully struck Gem. A conservatively graded example of the popular overdated Carson City VAM. Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3860. PCGS# 133877 Base PCGS# 7102

3946 1880-CC 8 Over Low 7, VAM-6, MS65 PCGS. A Top 100 Variety. Among the most obvious overdates of the Morgan series. The crossbar, downstroke, and stem of the 7 are all present, as are minute “ears” above the 8. The present brilliant and carefully preserved Gem has mirrored fields and a good strike. PCGS# 133878 Base PCGS# 7104

3947 1880-CC 8 Over Low 7, VAM-6, MS65 PCGS. CAC. No lens is needed to see the underdigit 7 on this overdated Carson City dollar. A lightly toned and nicely struck Gem. Minor grazes on the motifs fail to challenge the designated grade. PCGS# 133878 Base PCGS# 7104

3948 1880-CC MS65 PCGS. CAC. The 1880-CC Morgan dollar is prized by collectors because of its low mintage of 591,000 pieces. This well-detailed Gem displays well-preserved brilliant surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 2542, PCGS# 7100

3949 1880-CC MS65 Prooflike PCGS. A slightly better Carson City issue, the 1880-CC Morgan is especially elusive in Gem Prooflike condition, and is rarely seen finer within this category. The present piece displays stark cameo contrast and reveals only minor ticks on each side. Some minor striking softness is noted on the hair above Liberty's ear. Only 11 Prooflike examples are numerically finer at PCGS (1/15). NGC ID# 2542, PCGS# 7101

3950 1880-CC Reverse of 1879, 8/7 Dash, MS66 PCGS. VAM-8. Ex: Bermuda. A high grade Carson City representative that boasts dynamic luster and a hint of tan-gray toning. The minor softness at the centers is typical for the issue. VAM-8 has tiny die lumps in the center of both Cs in the mintmark and a die gouge through the M in AMERICA. PCGS# 41142 Base PCGS# 7100

3951 1880-O MS64 PCGS. Small or Micro O. Hints of gold and silver-gray toning visit this predominantly brilliant New Orleans near-Gem. Dynamic luster illuminates well struck devices and exceptionally smooth fields. NGC ID# 2543, PCGS# 7114

3952 1880-O MS64 PCGS. CAC. Small or Micro O. This well struck near-Gem displays vibrant cartwheel luster and has merely a trace of gold toning on each side. The reverse is beautifully preserved, and the face has only incidental abrasions. Ex: Long Beach Signature (Heritage, 9/2008), lot 2628, which realized \$1,725. NGC ID# 2543, PCGS# 7114

1880-O Silver Dollar, MS64+ Rarely Encountered Finer

3953 1880-O MS64+ PCGS. CAC. A plentiful issue in lower grades, the 1880-O Morgan suddenly becomes rare at the Gem grade level. This Plus-graded near-Gem displays untuned, frosty cartwheel luster and above-average striking sharpness for the issue. A few faint surface grazes on the cheek preclude full Gem status, but leave this piece with substantial appeal for the grade. Only 35 coins are numerically finer at PCGS (1/15). NGC ID# 2543, PCGS# 7114

3954 1880-S MS67 PCGS. CAC. Vivid shades of greenish-gold and lavender-gray toning blanket the obverse of this spectacular Superb Gem, while the reverse is only lightly toned. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 2544, PCGS# 7118

1880-S Morgan Dollar, MS68 Flashy White Surfaces

3955 1880-S MS68 NGC. CAC. The obverse is decidedly prooflike and the reverse is moderately prooflike, despite the absence of any such designation on the NGC insert. This boldly struck and nearly fully brilliant Superb Gem is delightfully devoid of visible contact, and would provide an exceptional addition to a 19th century silver type set. Ex: Sacramento Signature (Heritage, 3/2011), lot 3884. NGC ID# 2544, PCGS# 7118

3956 1881-CC MS64 Deep Mirror Prooflike PCGS. An attractive Choice Morgan dollar from the famous Carson City Mint, this piece displays sharply detailed frosty design elements that contrast boldly with the deeply reflective prooflike fields. Only minor signs of contact are evident and eye appeal is outstanding. NGC ID# 2547, PCGS# 97127

3957 1881-S MS67+ NGC. CAC. The 1881-S Morgan dollar is a well-produced, plentiful issue, making it a favorite choice of type collectors. This high-end Superb Gem offers impeccably preserved lustrous surfaces and sharply detailed design elements with extraordinary eye appeal. NGC ID# 2549, PCGS# 7130

3958 1881-S MS67+ PCGS. CAC. This high-end Superb Gem possesses terrific eye appeal to complement its high technical quality. The impeccably preserved surfaces are blanketed in vivid shades of golden-brown, lavender, and blue toning, with vibrant mint luster and sharply detailed design elements underneath the patina. NGC ID# 2549, PCGS# 7130

1881-S Morgan Dollar, MS68 Exceptional Superb Gem

3959 1881-S MS68 PCGS. Incredibly, PCGS has certified more than 100 MS68 examples of this issue, with two pieces even finer in MS69. A testament to the quality of the San Francisco issue, the large number of Superb Gems remains inadequate for a huge collecting public looking for the finest possible example of the Morgan design. This fully struck coin will satisfy the most particular buyer, with smooth, mark-free surfaces and a vibrant crescent of rainbow toning framed against the brilliant silver portrait. The mint luster is outstanding. NGC ID# 2549, PCGS# 7130

3960 1882 MS66 PCGS. A beautiful piece with lovely toning that results in outstanding visual appeal. Well struck with vibrant luster and a couple of faint field grazes on the obverse that are well concealed by the deep patina. Only eight coins are graded finer at PCGS (1/15). NGC ID# 254A, PCGS# 7132

- 3961 1882 MS66 PCGS. CAC.** A less often seen issue in MS66, the 1882 Morgan becomes genuinely rare any finer. This piece exhibits thick, frosty luster with beautifully preserved, untuned surfaces. The strike is well-executed and the eye appeal is excellent, as affirmed by the CAC green label. PCGS has certified only eight numerically finer representatives (1/15). NGC ID# 254A, PCGS# 7132

**1882 Morgan Dollar, MS66+
Very Rare Any Finer**

- 3962 1882 MS66+ PCGS. CAC.** The thoroughly brilliant surfaces display cartwheel luster. The strike is sharp not only on the hair over Liberty's ear but the breast feathers of the eagle. Though the 1882 Morgan dollar is available for a price in Premium Gem, PCGS has graded only eight coins numerically finer (1/15). NGC ID# 254A, PCGS# 7132

**1882-CC Morgan, MS66 Deep Mirror Prooflike
Spectacular White-on-Black Contrast**

- 3963 1882-CC MS66 Deep Mirror Prooflike PCGS.** The 1882-CC Morgan dollar is one of the more often seen Carson City issues overall, but its availability wanes in the finer Deep Mirror Prooflike grades. This Premium Gem example delivers pronounced cameo contrast with thickly frosted, sharp devices and fully mirrored, brilliant fields. A few grade-consistent disruptions are noted in the left obverse field, but the preservation is otherwise outstanding. Population: 72 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (1/15). NGC ID# 254B, PCGS# 97135

- 3964 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. This scarce overmintmarked variety is virtually unobtainable any finer than the present near-Gem. The lustrous and nicely struck stone-white surfaces offer smooth fields, a mark-free eagle, and only minor contact on Liberty's cheek. PCGS# 133891 Base PCGS# 7138

- 3965 1883 MS65 Deep Mirror Prooflike PCGS.** The obverse of this Gem Deep Mirror Prooflike example exhibits bold cameo contrast, while the chief attribute on the reverse is a splash of blended rainbow toning that resides over much of the left side. The design elements are sharply brought up, while the only grade-limiting surface flaws are a few small grazes in the left obverse field. Population: 89 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (1/15). NGC ID# 254G, PCGS# 97143

- 3966 1883 Sextupled Stars, VAM-10, MS62 PCGS.** A Top 100 Variety. The right-side obverse stars are multiply die doubled. A brilliant and lustrous silver dollar that has a good strike and a clean reverse. The left obverse displays the expected number of minor marks. A conditionally rare VAM, unobtainable as a Gem. PCGS# 133896 Base PCGS# 7142

1883-CC Silver Dollar, MS67

- 3967 1883-CC MS67 NGC. VAM-8.** A desirable high grade Carson City type coin. Dramatic jade-green, plum-red, and golden-brown toning dominates the left obverse and visits the upper left reverse margin. Well struck and lustrous. A lens reveals minor facial marks obscured by the rich colors. The 18 in the date is repunched. NGC ID# 254H, PCGS# 7144

**1883-CC Silver Dollar, MS66
Stark Deep Mirror Prooflike Example**

- 3968 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC.** In the Carson City short set of Morgan dollars, the 1883-CC is one of the more readily available issues in high grade, but the certified population decreases in the upper ranges of the Deep Mirror Prooflike category. This Premium Gem example is a fully contrasted cameo, with brilliant fields and sharp, frost-white devices. Only a few minute ticks on the obverse preclude an even finer numeric grade. PCGS has seen just two numerically finer Deep Mirror Prooflike examples (1/15). NGC ID# 254H, PCGS# 97145

- 3969 1884 MS66+ PCGS. CAC.** This high-end Premium Gem exhibits well-detailed design elements with just a trace of softness on the hair above the ear. The well-preserved surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 254L, PCGS# 7150

- 3970 1884-CC MS66+ PCGS.** This high-end Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved brilliant surfaces radiate vibrant mint luster throughout. Overall eye appeal is terrific. NGC ID# 254M, PCGS# 7152

- 3971 1884-CC MS66+ PCGS. CAC.** This high-end Premium Gem is delicately frosted with soft but distinctive cartwheels. A minimally toned marvel that is just one right-field graze away from Superb Gem status.

Ex: New York Signature (Heritage, 12/2011), lot 3971. NGC ID# 254M, PCGS# 7152

**1884-CC Dollar, MS67
Frosty Carson City Type Coin**

3972 1884-CC MS67 PCGS. VAM-6. The release of hundreds of thousands of 1884-CC coins from the GSA hoard in the 1970s ensures the date as one of the most available Carson City issues and a popular choice for type purposes. The issue only becomes scarce in this lofty grade, above which pieces prove virtually unobtainable. This is a frosty, all-brilliant Superb Gem with needle-sharp detail and undesignated cameo contrast. Marks are expectedly scant, and PCGS has certified just three numerically finer submissions (1/15). NGC ID# 254M, PCGS# 7152

3973 1884-CC MS65 Deep Mirror Prooflike NGC. VAM-4A. Lovely arcs of ocean-blue and autumn-brown toning enrich the upper right obverse border. The remainder of this flashy Carson City dollar is brilliant. The lower cheek retains mint-made roller marks and the left obverse field exhibits moderate contact. NGC ID# 254M, PCGS# 97153

3974 1884-CC MS66 Deep Mirror Prooflike PCGS. For the Morgan dollar enthusiast, it is hard not to love this remarkable Carson City representative. Fully mirrored fields provide a stellar backdrop for the sharp, thickly frosted devices, while outstanding preservation ensures a lack of any distracting abrasions. A small tinge of golden toning at 1 o'clock on the reverse rim is the only trace of color. PCGS reports just three numerically finer coins within the Deep Mirror Prooflike category (1/15). NGC ID# 254M, PCGS# 97153

3975 1884-O MS67 PCGS. The 1884-O Morgan sports a hefty mintage approaching 10 million pieces. Moreover, thousands of coins have been certified through MS66. The population drops significantly at the MS67 level, and PCGS and NGC have seen a mere two pieces numerically finer (1/15). This Superb Gem is awash with pleasing luster and exhibits well-struck design elements, including almost full detail in the hair over Liberty's ear. A few light scuffs are within the parameters of the grade designation. NGC ID# 254N, PCGS# 7154

3976 1884-O MS67 NGC. This Superb Gem is highly lustrous with exceptional eye appeal that results from the gold, green, and iridescent toning on the obverse. The reverse is fully brilliant and untoned. PCGS has only certified one finer example (1/15). NGC ID# 254N, PCGS# 7154

3977 1884-S AU58 PCGS. The 1884-S Morgan dollar experienced heavy circulation in the 19th century, and Mint State survivors are elusive today. This near-Mint example provides a slightly more affordable alternative for the budget-minded collector, retaining moderate luster and strong detail. Just a blush of light golden color is observed on each side. NGC ID# 254P, PCGS# 7156

3978 1884-S AU58 NGC. This attractive near-Mint Morgan dollar exhibits sharply detailed design elements with just a trace of wear on the high points and lustrous surfaces with a scattering of minor abrasions on both sides. NGC ID# 254P, PCGS# 7156

3979 1884-S AU58 PCGS. This attractive near-Mint specimen exhibits sharply detailed design elements with barely perceptible traces of wear on the high points and lightly abraded lustrous surfaces with a few spots of amber toning. NGC ID# 254P, PCGS# 7156

3980 1884-S AU58 PCGS. This attractive near-Mint Morgan dollar exhibits just a trace of wear on the well-detailed design elements and the lightly abraded surfaces radiate vibrant mint luster throughout. A few hints of golden-tan toning add to the considerable eye appeal. NGC ID# 254P, PCGS# 7156

3981 1884-S AU58 PCGS. CAC. Substantial luster is the chief attribute of this nearly Uncirculated 1884-S Morgan, accentuated by just a tinge of light golden color. Only a brush of friction is evident over the eagle's breast and the hair above Liberty's ear. NGC ID# 254P, PCGS# 7156

3982 1885 MS67 PCGS. CAC. The obverse of this spectacular Superb Gem is blanketed in vivid shades of golden-brown and violet toning, while the reverse remains essentially brilliant. The design elements are well-detailed and eye appeal is terrific. PCGS has graded two numerically finer examples (1/15). NGC ID# 254R, PCGS# 7158

3983 1885-CC MS66 PCGS. The 1885-CC Morgan dollar is always in demand and examples are quite elusive in grades above the MS66 level. This well-detailed Premium Gem displays well-preserved lustrous surfaces with a few hints of golden-tan and lavender toning. NGC ID# 254S, PCGS# 7160

3984 1885-CC MS65 Deep Mirror Prooflike NGC. The deeply reflective fields of this well-preserved Gem Morgan dollar contrast boldly with the sharply detailed frosty devices, producing a marked cameo effect. The well-preserved surfaces show a few hints of lavender toning. NGC has graded 20 numerically finer examples (1/15). NGC ID# 254S, PCGS# 97161

**1885-O Dollar, MS66 Deep Mirror Prooflike
Only One Numerically Finer at PCGS**

3985 1885-O MS66 Deep Mirror Prooflike PCGS. The design elements of this delightful Premium Gem exhibit razor-sharp definition throughout, with a rich coat of mint frost that contrasts profoundly with the deeply reflective fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Population: 47 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (1/15). NGC ID# 254T, PCGS# 97163

3986 1885-S MS65 PCGS. Both sides of this Gem Morgan dollar have frosty silver luster shining through delicate champagne toning. Pastel gold and iridescent toning appears in a crescent at the left obverse. PCGS has only certified 41 finer examples (1/15). NGC ID# 254U, PCGS# 7164

**1886-O Morgan Dollar, MS63
Sharply Detailed O-Mint Example**

3987 1886-O MS63 PCGS. This attractive Select Morgan dollar exhibits an unusually sharp strike for a New Orleans Mint issue and the lustrous surfaces show only scattered minor contact marks. Subtle shades of golden-brown toning enhance the considerable eye appeal. The 1886-O becomes elusive in grades above the MS63 level. NGC ID# 254W, PCGS# 7168

**1887/6 Silver Dollar, MS65+
Outstanding Surface Quality**

3988 1887/6 VAM-2, MS65+ PCGS. CAC. A Top 100 Variety. The remnant of an underlying 6 is evident to either side of the upright of the 7 in the date. This Plus-designated Gem example is remarkably well-preserved, with semiprooflike fields and sharp devices. Just a hint of light golden color is evident over each side, and the only grade-limiting surface flaws are seen in the form of a few faint luster grazes on Liberty's cheek. PCGS has certified only 14 numerically finer examples (1/15). PCGS# 133908 Base PCGS# 7174

3989 1887-S MS65 PCGS. An intriguing Gem example, with sharply detailed design elements and some light striations across the portrait. Hints of golden-brown, bluish-gray, and amber toning visit the peripheries. PCGS has graded 25 numerically finer examples (1/15). NGC ID# 2554, PCGS# 7180

3990 1887-S MS62 Deep Mirror Prooflike PCGS. The design elements of this impressive MS62 example are sharply detailed and frosty, and the fields are deeply reflective throughout. A scattering of minor contact marks explains the grade. Population: 18 in 62 Deep Mirror Prooflike, 47 finer (1/15). NGC ID# 2554, PCGS# 97181

3991 1888-O MS66 PCGS. A particularly elusive date in MS66, the 1888-O Morgan dollar becomes prohibitively rare any finer. This Premium Gem is awash in frosty mint luster that exhibits just a hint of light golden color. There are no distracting abrasions and the central regions display much better definition than is typically seen on this New Orleans issue. There are no numerically finer representatives at PCGS (1/15). NGC ID# 2556, PCGS# 7184

3992 1888-O MS66 PCGS. CAC. Frosty, brilliant luster illuminates unusually well-struck design elements on this Premium Gem 1888-O Morgan dollar. Were it not for a couple almost imperceptible disruptions in the luster in the left obverse field, this coin would surely warrant an even finer grade. As it stands, PCGS has not certified any numerically finer representatives (1/15). NGC ID# 2556, PCGS# 7184

**1888-O Silver Dollar, MS66+
None Certified Finer at PCGS**

3993 1888-O MS66+ PCGS. CAC. Exceptionally clean surfaces earn this Premium Gem dollar the PCGS Plus designation, symbolic of the finest 1888-O dollars seen by that service. No more than a handful of minor marks can be found anywhere on the coin, and none are of any significance. The strike is above-average for this strike-challenged O-Mint issue, with only slight blending above the ear and on the eagle's legs. A thin border of orange-gold toning at the margins and glowing silver luster adds to the coin's original appeal. NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS65 Deep Mirror Prooflike
Rare Any Finer**

3994 1888-O MS65 Deep Mirror Prooflike PCGS. Housed in a green-label PCGS holder, this exceptional Gem has flashy silver surfaces with mirrored fields and lustrous devices. Both sides are brilliant and untuned with only a handful of modest, grade-appropriate marks. Population: 62 in 65 Deep Mirror Prooflike, 4 finer (1/15). NGC ID# 2556, PCGS# 97185

**1888-O Dollar, MS65 Deep Mirror Prooflike
Elusive With This Much Eye Appeal**

3995 1888-O MS65 Deep Mirror Prooflike PCGS. The deeply mirrored, radiant fields of this Gem Deep Mirror Prooflike Morgan exhibit a faint suggestion of ice-blue color when tilted beneath a light, while the frost-white devices provide for outstanding cameo contrast. The strike is bold, and only a few faint luster grazes on Liberty's cheek limit the grade of this eye-catching Gem. Population: 62 in 65 Deep Mirror Prooflike, 4 finer (1/15). NGC ID# 2556, PCGS# 97185

3996 1888-S MS65 PCGS. A brilliant and frosty-white Gem, with a bolder strike than sometimes seen for this lower-mintage San Francisco issue. A smooth cheek on Liberty offsets a few hair-thin lines in the surrounding fields. The eagle shows a bit of incompleteness on the breast feathers, with an area of thick mint frost below. Untoned with strong cartwheel luster. Just 30 pieces certified numerically finer at PCGS (1/15). NGC ID# 2557, PCGS# 7186

3997 1889 MS66 PCGS. The 1889 Morgan dollar is marginally available in MS66, but finer pieces are prohibitively rare, putting increased collector demand on high-end Premium Gems. This example is beautifully preserved, with frosty mint luster and well-defined motifs. The reverse is brilliant, but the obverse showcases vivid toning in shades of amber, crimson, sun-gold, lilac, and mint-green, with the occasional forest-green and violet tinge. Only four coins are certified numerically finer at PCGS (1/15). NGC ID# 2558, PCGS# 7188

**1889 Morgan Dollar, MS66+
Rare Any Finer**

3998 1889 MS66+ PCGS. Strong cartwheel luster shows minimal patina. Interior definition is generally pleasing, though a few strands of Liberty's hair are soft, and the surfaces are smooth even by Premium Gem standards. Amply appealing. PCGS has graded 24 examples in MS66+ and only four coins finer (1/15). NGC ID# 2558, PCGS# 7188

3999 1889-CC VF25 NGC. The 1889-CC Morgan dollar is the key to the Carson City series. This VF25 example retains most of the original design detail in Liberty's hair and eagle's wings, and the pleasing surfaces are lightly abraded. NGC ID# 2559, PCGS# 7190

4000 1889-CC — Cleaning — PCGS Genuine. XF Details. A stone-gray Carson City key date dollar with deeper gunmetal toning in design recesses. The cheek has a tiny dig but no other marks are consequential. Careful rotation reveals horizontal obverse hairlines. NGC ID# 2559, PCGS# 7190

4001 1889-CC — Repaired — PCGS Genuine. XF Details. Deep forest-green and golden-brown toning blankets glossy surfaces. The reverse field is unobtrusively smoothed above the left star. A thin mark crosses Liberty's neck. Rarest of the Carson City Morgan issues. NGC ID# 2559, PCGS# 7190

4002 1889-CC XF40 PCGS. This is a pleasantly original, collector-grade example of this key Carson City Morgan dollar. Both sides show light, grade-consistent wear, with uniform olive-gray patina. The 1889-CC experienced extensive circulation in the 19th century, and few high-grade coins were set aside by collectors. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF40
Pleasing Originality**

4003 1889-CC XF40 PCGS. CAC. The few marks from transport and circulation are totally non-distracting on this attractive, originally toned Carson City dollar. Medium-silver color reveals traces of remaining luster and glimpses of reflective fields that were at one time prooflike. A problem-free example for the grade, and a perfect collector coin for the advanced circulated set. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, XF45
Rarest Carson City Morgan**

4004 1889-CC XF45 NGC. The low mintage of just 350,000 pieces creates non-stop demand for this rare Carson City issue. Soft luster remains at the margins and intermittently across the fields of this light-gold, Choice XF example. A peppering of light marks dot the surfaces,, but none are severe. Nice rims and decent central detail remain. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, Choice XF
Strong Patina**

4005 1889-CC XF45 NGC. In 1889 the Carson City Mint re-opened its coinage operations, though the 1889-CC and subsequent issues were not saved in Treasury holdings like their predecessors. This Choice XF example has faint glimmers of luster beneath rich toning, patchy blue-to-violet and mint-green on the obverse with more even balance of colors on the reverse. A great collector coin. NGC ID# 2559, PCGS# 7190

4006 1889-CC — Cleaning — PCGS Genuine. AU. This key date Carson City dollar is well struck and has only a whisper of wear, but the pearl-gray surfaces are microgranular and lackluster. Free from bagmarks but faintly hairlined. NGC ID# 2559, PCGS# 7190

**1889-S Dollar, Premium Gem
Strong Cartwheel Luster**

4007 1889-S MS66 PCGS. Silver fields show bright cartwheel luster and few distractions. A crisply detailed Premium Gem from a mintage of 700,000 pieces, scarce as a Premium Gem and all but unobtainable any finer: the sole such coin in the combined certified population is PCGS-graded (1/15). NGC ID# 255B, PCGS# 7194

4008 1890 MS65 NGC. The 1890 Morgan dollar is conditionally rare in grades above the MS65 level. This sharply detailed Gem offers well-preserved surfaces with vibrant frosty mint luster. NGC has graded only six numerically finer examples (1/15). NGC ID# 255C, PCGS# 7196

4009 1890-CC MS64 PCGS. CAC. VAM-5. A wisp of gold patina adorns this impressive Choice Carson City dollar. The fields are well preserved and the cheek shows only minor marks. Lustrous and precisely struck. The second C in the mintmark is obviously repunched. The early die state of VAM-5 without obverse cracks. NGC ID# 255D, PCGS# 7198

4010 1890-CC MS64+ PCGS. CAC. Thick, radiant mint frost is the chief attribute this Plus-designated MS64 coin possesses, a favorable characteristic of most Carson City issues in the Morgan dollar series. The strike is razor-sharp and the surfaces are devoid of color. A few faint luster grazes on the cheek are all that limit the grade. NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, Frosty MS65
Moderate Patina**

4011 1890-CC MS65 NGC. Pearl-gray centers are bounded by pale rose patina at the margins of this attractive Gem 1890-CC Morgan, showing deeper mauve-purple color on the lower reverse. Liberty's cheek shows only minor marks on the lower portion, and a bit of strike softness shows over the ear. A nicely frosted and attractive Gem, not easily improved upon at either major grading service. Census: 91 in 65, 3 finer (1/15). NGC ID# 255D, PCGS# 7198

**1890-CC Morgan, MS63
VAM-4, 'Tail Bar'**

4012 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. A heavy die gouge on the reverse connects the eagle's tailfeathers with the wreath leaves below. This variety is somewhat scarce in pleasing Mint State grades, and is rare at the Gem level. The present Select example is well-struck with satiny luster. Mottled olive-gray toning blankets both sides. PCGS# 133934 Base PCGS# 87198

4013 1890-O MS65 PCGS. Boldly struck for the issue, with surprising sharpness in the centers, claws, and lower wreath. A lustrous and brilliant Gem with impressive eye appeal and a nearly pristine cheek.
Ex: *FUN Signature (Heritage, 1/2003)*, lot 8062. NGC ID# 255E, PCGS# 7200

**1890-O 'Comet' Morgan Dollar, MS65
Frosty VAM-10, Early Die State**

4014 1890-O Comet, VAM-10, R.4, MS65 PCGS. A Hot 50 Variety. The Comet double die gouge running to the right of the 0 and left of the last star makes this a popular variety on the www.VAMWorld.com Hot 50 list. This Gem PCGS example is in the earlier, unpolished-obverse die state that distinguishes the VAM-10 from the later VAM-10a, and it lacks the die gouge above O(NE) on the reverse that is also characteristic of VAM-10a. This is an untuned, frosty example with good eye appeal and minimal marks. Population: 6 in 65, 0 finer (1/15). PCGS# 134017 Base PCGS# 7200

4015 1890-O MS64 Deep Mirror Prooflike PCGS. CAC. Ex: Key West Collection. This near-Gem example exhibiting Deep Mirror Prooflike surfaces remains largely brilliant, with a few small areas of toning present, primarily shades of gold on the lower reverse. A couple of tiny toning spots appear on the portrait. The strike is sharp, with only minor incompleteness at the centers. A few hair thin marks are present, but are not distracting. PCGS has assigned higher numeric grades to only 21 examples (1/15). NGC ID# 255E, PCGS# 97201

**1890-S Dollar, MS64 Deep Mirror Prooflike
Toned, Reflective Fields**

4016 1890-S MS64 Deep Mirror Prooflike PCGS. An unusual combination of distinct patina and mirrors, this mostly brilliant example offers compelling eye appeal. Well-defined central devices supply visible contrast to the fields. As a Deep Mirror Prooflike, the 1890-S dollar is a borderline rarity in MS64 and rare any finer; PCGS has graded just eight such pieces (1/15). NGC ID# 255F, PCGS# 97203

1891 Morgan Dollar, MS65
Very Rare in Higher Grades

4017 1891 MS65 PCGS. From a large mintage of nearly 8.7 million pieces, the 1891 Morgan dollar is a prime condition rarity in grades above the MS65 level. This attractive Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are visited by shades of greenish-gold and turquoise toning. PCGS has graded only three numerically finer examples (1/15). NGC ID# 255G, PCGS# 7204

4018 1891-CC MS64 PCGS. CAC. The well-detailed design elements show just a touch of the usual softness on the hair above the ear and the creamy surfaces radiate vibrant mint luster, with no mentionable distractions. Traces of lavender toning enhance the considerable eye appeal. NGC ID# 255H, PCGS# 7206

4019 1891-CC MS64+ NGC. CAC. This high-end Choice example offers sharply detailed design elements and brilliant surfaces with vibrant mint luster on both sides. A few roller marks on Liberty's cheek are the only marks of note. NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65
Richly Toned and Minimally Abraded

4020 1891-CC MS65 PCGS. VAM-6. TRUST and OF AMERICA are lightly die doubled. This fully patinated near-Gem displays deep cobalt-blue, tan-brown, and fire-red colors over each side. Beneath the significant toning is thick mint frost. The devices are sharply struck with only scattered minor marks (most of which are invisible beneath the toning). NGC ID# 255H, PCGS# 7206

4021 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. A lightly toned and crisply struck Choice Carson City dollar with potent luster and an exceptionally clean reverse. The obverse field is also smooth, and the cheek exhibits only faint grazes. The VAM variety is undesignated on the PCGS insert. PCGS# 133937 Base PCGS# 7206

1892 Morgan Dollar, MS65
Attractive Multi-Color Toning

4022 1892 MS65 PCGS Secure. This stunningly beautiful Gem 1892 Morgan shows full luster under the pinkish-orange obverse toning accented by a thin ring of pale ice-blue near the date, while the reverse is largely untoned save for a touch of peripheral gold. The few signs of contact are minor on each side. This condition rarity is surpassed by only five submissions at PCGS (1/15). NGC ID# 255L, PCGS# 7212

4023 1892-CC MS63 PCGS. CAC. An attractive Select specimen from the famous Carson City Mint, with sharply detailed design elements and vibrant mint luster. The lightly marked surfaces show hints of pale gold and turquoise toning. NGC ID# 255M, PCGS# 7214

1892-CC Silver Dollar, Vibrant MS64+

4024 1892-CC MS64+ PCGS. The certified population of the 1892-CC Morgan dollar declines significantly at the Gem grade level, making high-end Choice examples highly sought-after by budget-conscious collectors. This Plus-designated representative displays radiant luster beneath a light golden veil over each side. The design elements are well-defined, and there are no major abrasions observed. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64

4025 1892-CC MS64 PCGS. CAC. Hints of tan toning visit the lustrous and well preserved fields. The strike is good although the breast feathers show incompleteness. Minor facial grazes determine the grade. A better date Carson City near-Gem. The 89 in the date exhibit minor die fill. Encapsulated in an old green label holder. NGC ID# 255M, PCGS# 7214

1892-CC Silver Dollar, MS64
Lustrous, Mark-Free Fields

- 4026 1892-CC MS64 NGC. CAC.** A noticeable absence of marks across the fields of this brilliant, lustrous dollar make it a winner. Nearly brilliant and untoned, a slight accent of deep-red toning adds interest to the upper left quadrant of the obverse. The few abrasions sit on the high points of the eagle's breast and wing tips, while the boldly struck frosted motifs show a only minor grazes, earning this attractive near-Gem dollar CAC approval. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64 Prooflike
Brilliant, Reflective Fields

- 4027 1892-CC MS64 Prooflike PCGS.** A two-sided prooflike coin, brilliant and untoned. The strike is characteristically bold for this Carson City issue. A few cloudy sprinkles in the fields and some light scuffs on the frosted devices accompany a handful of tiny marks, but this near-Gem coin is an appealing example of the penultimate year for Carson City dollars. Population: 85 in 64 (4 in 64+) Prooflike, 13 finer (1/15). NGC ID# 255M, PCGS# 7215

- 4028 1892-S AU50 PCGS.** The 1892-S is one of several San Francisco issues in the Morgan dollar series that is fairly plentiful in circulated grades, but becomes genuinely scarce in Mint State. This AU representative retains strong detail, with remnants of luster in the protected regions of the fields. A touch of light golden color adds to the appeal. NGC ID# 255P, PCGS# 7218

- 4029 1893 MS63 PCGS.** An impressive Select example of this low-mintage issue, with sharply detailed design elements and vibrant mint luster throughout. The brilliant surfaces show only scattered minor signs of contact. NGC ID# 255R, PCGS# 7220

- 4030 1893 MS63 NGC. CAC.** An attractive Select example of this popular Philadelphia issue, from a low mintage of 389,792 pieces. The design elements are well-detailed and the lightly marked surfaces show hints of greenish-gold and lavender-gray toning. NGC ID# 255R, PCGS# 7220

- 4031 1893-O AU58 NGC.** The 1893-O Morgan dollar is a better date in the series, from a mintage of 300,000 pieces. This well-detailed near-Mint specimen shows just a trace of high-point wear and the lightly abraded surfaces retain significant amounts of original mint luster, under delicate shades of lavender toning. NGC ID# 255T, PCGS# 7224

- 4032 1893-S AG3 ANACS.** This is a pleasing, evenly worn and original example of this series key, in a grade that is within the financial reach of many more budget-conscious collectors. Smooth battleship-gray surfaces yield tinges of deeper color in the recesses. The date and mintmark are clear. NGC ID# 255U, PCGS# 7226

- 4033 1893-S VG8 PCGS.** The date, legends, mintmark, and motto remain bold on this important Morgan dollar key, and the major design elements are all complete in outline with some interior detail intact. The pleasing surfaces display hints of gold, gray, and pink toning. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, Fine 12
Low-Mintage Series Key

- 4034 1893-S Fine 12 PCGS.** With a series-low mintage of 100,000 pieces, collectors prize the 1893-S Morgan dollar in all grades and conditions. This pleasing Fine 12 example retains much interior design detail in Liberty's hair and the lavender-gray surfaces are free of large or distracting surface abrasions. NGC ID# 255U, PCGS# 7226

- 4035 1894 AU55 NGC.** This pleasing Choice AU example retains much of its original mint luster and the sharply impressed design elements show just a trace of high-point wear. The lightly abraded surfaces display hints of golden-tan and lavender-gray toning. NGC ID# 255V, PCGS# 7228

- 4036 1894 AU55 PCGS.** Substantial luster remains in the recesses of this Choice AU representative, while the only notable wear is seen on the eagle's breast and the hair above Liberty's ear. The coin appears brilliant at first glance, but exhibits a trace of light golden color when studied closer. NGC ID# 255V, PCGS# 7228

- 4037 1894 AU55 PCGS.** Both sides display gold accents around the legends and within the recesses of the central devices. Soft mint luster remains intact across the silver-gray surfaces, although it is somewhat muted by five points of wear. The surfaces show only light abrasions to earn the Choice About Uncirculated designation. A low-mintage issue, always desirable, with just 110,972 pieces were struck. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS61
Low-Mintage Philadelphia Issue

- 4038 1894 MS61 PCGS.** The 1894 Morgan dollar boasts a mintage of just 110,000 pieces, the second-lowest production total of the series. This attractive Mint State example is sharply detailed in most areas, with the faintest touch of softness on the hair above the ear. The creamy lustrous surfaces show the minimum number of minor contact marks for the grade. NGC ID# 255V, PCGS# 7228

- 4039 1894-O MS62 NGC.** Mottled areas of khaki-gold toning appears in irregular shapes across both sides of this silver-gray dollar. Mint luster shines through the toning. The strike is soft over the ear, as are most of this issue, with several light abrasions scattered about the obverse and reverse. A deeper scrape on the eagle's breast is the most noticeable mark. NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS63
Better New Orleans Issue**

- 4040 1894-O MS63 PCGS.** In the context of the series, the 1894-O Morgan dollar is seldom seen in Mint State, regardless of grade. This Select example displays smooth, satiny luster shining through a blanket of pale champagne toning. The reverse is remarkably well-preserved, while the obverse shows some light, grade-consistent grazes on the cheek. The eagle's breast and the hair above Liberty's ear show some of the striking weakness for which this New Orleans issue is well-known. NGC ID# 255W, PCGS# 7230
- 4041 1894-S MS64 PCGS.** The 1894-S Morgan dollar is a scarce issue in grades above the MS64 level. This attractive Choice example exhibits sharply detailed design elements and lightly toned surfaces that show a mix of satiny mint luster and prooflike reflectivity. NGC ID# 255X, PCGS# 7232
- 4042 1895-O AU55 PCGS.** A Choice AU specimen of this popular branch mint issue, with well-detailed design elements that show just a trace of high-point wear and lustrous surfaces that show a scattering of minor grade-consistent abrasions. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, Mint Details
Exceptional Eye Appeal**

- 4043 1895-O — Altered Surfaces — PCGS Genuine. Unc. Details.** Many collectors would be delighted to own the present key date New Orleans dollar, since the lightly toned surfaces offer booming luster and show fewer marks than most MS64 examples. The strike is incomplete at the centers, usual for the issue, but the remainder of the design is bold. Thorough evaluation beneath a loupe reveals subtle smoothing of a few unimportant hair-thin marks on the Liberty's cheek. NGC ID# 255Y, PCGS# 7236
- 4044 1895-S AU55 PCGS.** The high points of the well-detailed design elements of this attractive Choice AU specimen show slight traces of wear and the lightly abraded surfaces show a mix of satiny mint luster and prooflike reflectivity. NGC ID# 255Z, PCGS# 7238
- 4045 1895-S/S VAM-3 AU50 PCGS.** A Hot 50 Variety. Luster illuminates the borders of this briefly circulated rare date silver dollar. Marks are irrelevant aside from a faint horizontal line on Liberty's jaw. The VAM-3 mintmark was initially entered too far to the left, partially effaced, and entered again in the correct position. PCGS# 134020 Base PCGS# 7238

- 4046 1895-S/S VAM-3 AU53 NGC.** A Hot 50 Variety. The mintmark is clearly repunched, with a curve from the initial mintmark placement located west. The variety is undesignated on the holder. The present untuned key date dollar has lustrous borders and relatively few marks. The eagle's breast displays light wear. PCGS# 134020 Base PCGS# 7238

- 4047 1896 MS67 PCGS.** The 1896 Morgan dollar is a scarce issue in MS67 condition, and finer examples are extremely rare. This spectacular Superb Gem displays sharply detailed design elements and brightly lustrous surfaces with no mentionable distractions. PCGS has certified two numerically finer examples (1/15). NGC ID# 2562, PCGS# 7240

**1896 Morgan Dollar, MS67
Multicolor Toning on Both Sides**

- 4048 1896 MS67 PCGS. CAC.** This resplendent Superb Gem features dynamic multicolor toning over each side. Shades include ice-blue, purple-pink, orange, green, and yellow. Combined with a bold impression, booming luster, and virtually perfect surfaces, the result is a spectacular Morgan dollar representative. PCGS has certified only two coins in higher numeric grades (1/15). NGC ID# 2562, PCGS# 7240
- 4049 1896-O MS61 PCGS.** The 1896-O Morgan dollar is usually seen with excessive surface marks and is a challenging issue in all Mint State grades. This attractive MS61 example is sharply detailed and brightly lustrous, with a minimum number of minor contact marks for the grade. NGC ID# 2563, PCGS# 7242
- 4050 1896-O MS62 PCGS. VAM-7.** The 96 in the date is repunched south. Only a hint of tan toning visits this lustrous New Orleans silver dollar. The centers are typically impressed but the fields are smooth. The cheek exhibits wispy to moderate marks. A conditionally rare issue. NGC ID# 2563, PCGS# 7242

**1896-S Morgan Dollar, MS62
Challenging San Francisco Issue**

- 4051 1896-S MS62 PCGS.** From a generous mintage of 5 million pieces, the 1896-S Morgan dollar must have been melted extensively under the provisions of the Pittman Act because the issue is quite elusive today in the context of the series. This sharply detailed MS62 example offers lustrous surfaces under shades of greenish-gold and pinkish-gray toning. NGC ID# 2564, PCGS# 7244

**1898-S Dollar, MS66
VAM-4, Repunched Mintmark**

4052 1898-S MS66 PCGS. VAM-4. The serifs of the mintmark are repunched. A brilliant Premium Gem that offers potent luster and well preserved fields. The portrait displays only minor abrasions. A good strike despite slight blending of the high points at the centers. Population: 74 in 66 (4 in 66+), 3 finer (1/15). NGC ID# 256A, PCGS# 7256

4053 1899-O MS67 PCGS. The 1899-O Morgan dollar can only be called scarce in MS67 condition, but finer examples are virtually unobtainable. This sharply detailed Superb Gem is impeccably preserved, with vibrant mint luster throughout. PCGS has graded just one numerically finer example (1/15). NGC ID# 256C, PCGS# 7260

4054 1900 MS66+ PCGS. CAC. This high-end Premium Gem displays spectacular shades of golden-brown and purple toning, with sharply detailed design elements and vibrant mint luster under the patina. No mentionable distractions are evident and eye appeal is outstanding. PCGS has graded 38 numerically finer examples (1/15). NGC ID# 256E, PCGS# 7264

4055 1900 MS66+ PCGS. CAC. This high-end Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster on both sides. PCGS has graded 38 numerically finer examples (1/15). NGC ID# 256E, PCGS# 7264

4056 1900-O MS67 NGC. VAM-20. A hint of golden toning adorns the borders, though the remainder of this highly lustrous Superb Gem remains brilliant. Well struck and splendidly preserved. The 9 in the date is repunched. NGC ID# 256F, PCGS# 7266

4057 1901 AU58 PCGS. The sharply detailed design elements of this attractive near-Mint example show just the slightest trace of wear on the high points and the brightly lustrous surfaces show a scattering of minor abrasions, explaining the grade. NGC ID# 256J, PCGS# 7272

**1901 Morgan, MS61
Attractively Toned**

4058 1901 MS61 PCGS. The 1901 Morgan is widely recognized as one of the most elusive issues in the series in Mint State, and draws strong demand in all Uncirculated grades. This piece is free of singularly detracting abrasions, and we instead note just uniform chatter that limits the grade. Varying degrees of pale champagne toning warm both sides, with deeper violet and teal hues also seen along the left obverse periphery. NGC ID# 256J, PCGS# 7272

4059 1901-O MS66+ PCGS. Untoned and brilliantly lustrous, with a reeding mark on the neck truncation the sole abrasion of any note (and it is minor). The cheek is smooth and clean, while the strike is far better than usually seen on this New Orleans issue. PCGS shows just three numerically finer coins (1/15). This coin — already with the Plus designation — is extremely close to the next highest grade. NGC ID# 256K, PCGS# 7274

4060 1901-S MS64 PCGS. Attractive shades of champagne-gold and lavender-gray toning enhance the well-preserved surfaces of this impressive Choice example. The design elements are well-detailed and vibrant mint luster shines through the toning. NGC ID# 256L, PCGS# 7276

4061 1901-S MS64 PCGS. There are a number of 1901-S dollars in MS64 and lower grades, but Gems are seldom available. This piece is quite pleasing for the grade, with satiny luster and minimally disturbed surfaces. The strike is sharp and both sides exhibit a touch of pale champagne toning. NGC ID# 256L, PCGS# 7276

4062 1901-S MS64 PCGS. CAC. Lime-green and caramel-gold drape this lustrous better date silver dollar. The strike shows only minor inexactness at the centers, and marks are inconsequential save for a few thin lines on the eagle's breast. Certified in an old green label holder. NGC ID# 256L, PCGS# 7276

4063 1902-S MS64+ PCGS. A well-struck, highly lustrous Morgan dollar with untuned interiors and slight golden peripheral toning. Minimally abraded and definitely high-end, as confirmed by the + PCGS grade. NGC ID# 256P, PCGS# 7282

4064 1902-S MS65 PCGS. Deep, multicolor peripheral hues surround light golden-gray centers on this well-preserved Gem example. Slight striking softness is noted on the hair above Liberty's ear, but the definition is nonetheless above-average for the issue. Only 43 coins are numerically finer at PCGS (1/15). NGC ID# 256P, PCGS# 7282

**1902-S Dollar, MS65
Elusive Any Finer**

4065 1902-S MS65 PCGS. CAC. The interiors are silky silver with touches of gold-orange along the rims, particularly on the obverse. A degree of central striking softness is typical for the issue. Though available for a price in Gem, the 1902-S dollar is elusive any finer; PCGS has graded only 43 such pieces (1/15). NGC ID# 256P, PCGS# 7282

4066 1903-S Micro S, VAM-2, XF45 PCGS. A mintmark punch intended for Barber quarters was inadvertently used on a single die variety of 1903-S dollars. No Mint State examples are known, and the median grade at PCGS is VF20. This lightly marked Choice XF pearl-gray representative displays moderate high point wear but shows luster throughout the wings, curls, and legends. PCGS# 133967 Base PCGS# 7306

4067 1903-S Micro S, VAM-2, XF45 PCGS. A Top 100 Variety. A mintmark punch intended for Barber quarters was inadvertently entered into a single Morgan dollar reverse die. A stone-gray example with bold details and hints of remaining luster. Two small digs are located beneath the arrowheads and on the base of the D in DOLLAR. PCGS# 133967 Base PCGS# 7306

1904-O Silver Dollar, MS67
None Numerically Finer at PCGS or NGC

4068 1904-O MS67 PCGS. The brilliant silver luster and untuned, unmarked surfaces earn this radiant dollar its Superb Gem grade. The cheek is clean and rounded. Only slight blending above the ear of a few hair strands is of little concern, since the issue is known for a below-average strike at the centers, and the current coin far exceeds the normal quality of strike. A great coin for the purist who demands the finest. Population: 41 in 67, 0 finer (1/15). NGC ID# 256V, PCGS# 7292

4069 1904-S AU58 PCGS. Strong mint luster remains despite minimal circulation. Typical bagmarks and softness over the ear are less pronounced than on other examples at this grade level, and the cheek is reasonably clean. A true slider, properly graded. NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, MS62
Challenging Issue in High Grade

4070 1904-S MS62 NGC. The 1904-S Morgan dollar is an elusive issue in the context of the series, from a mintage of 2.3 million pieces. This MS62 example offers well-detailed design elements and lustrous surfaces that show the minimum number of contact marks for the grade. Subtle shades of golden-tan toning enhance the pleasing surfaces. NGC ID# 256W, PCGS# 7294

4071 1921-S MS65 PCGS. A sharply detailed Gem example from the last date of the Morgan dollar series, this coin displays well-preserved lustrous surfaces under attractive shades of golden-tan toning. The 1921-S is very scarce in grades above the Gem level. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1882 Morgan Dollar, PR64
Well-Produced Issue

4072 1882 PR64 PCGS. A generous mintage of 1,100 proof Morgan dollars was achieved in 1882 and the coins were particularly well-produced. This attractive Choice example exhibits razor-sharp definition on all design elements and the fields are deeply mirrored. The brilliant surfaces show no mentionable distractions and eye appeal is outstanding. Population: 82 in 64, 67 finer (1/15). NGC ID# 27Z6, PCGS# 7317

1889 Silver Dollar, PR64
Brilliant Surfaces, Razor-Sharp Strike

4073 1889 PR64 PCGS. A superior strike renders every detail on the design elements to full advantage, with intricate definition on Liberty's hair strands and the eagle's plumage. A satinlike coating of mint frost covers the central devices, but apparently not of sufficient contrast for a cameo designation. The fields are deep-mirrored but with some slight cloudiness over at the left obverse, resulting in the near-Gem classification. An attractive, untuned proof of high quality for the grade. Population: 42 in 64, 28 finer (1/15). NGC ID# 27ZJ, PCGS# 7324

4074 1893 PR58 PCGS. A brilliant, untuned, and intensely silver circulated proof, one of 792 such pieces struck in 1893. The reflective fields are busy and abraded, moreso on the obverse than the reverse, but the undeniable proof characteristics are unmistakable and remain despite the light wear and handling. NGC ID# 27ZN, PCGS# 7328

1893 Morgan Dollar, PR64
792 Examples Struck

- 4075 1893 PR64 PCGS.** Sharply detailed in most areas, this attractive Choice specimen shows a touch of softness on the hair above Liberty's ear and the eagle's breast. The well-preserved brilliant surfaces show a few highlights of pale gold toning at the rims and the fields are deeply reflective. Population: 48 in 64, 31 finer (1/15). NGC ID# 272N, PCGS# 7328

1894 Morgan Dollar, PR61
Colorful, Lightly Marked Surfaces

- 4076 1894 PR61 PCGS.** Highlights of greenish-gold toning enhance the deeply mirrored fields of this proof Morgan dollar, with most of the color on the reverse. The design elements are sharply detailed, as expected, and the surfaces show a minimum number of minor contact marks for the grade. From a mintage of 972 pieces. NGC ID# 2577, PCGS# 7329

1903 Morgan Dollar, PR64
Second Year of the All-Brilliant Finish

- 4077 1903 PR64 PCGS.** A smaller-than-average mintage of 755 proof Morgan dollars was accomplished in 1903, using the all-brilliant finish the Mint adopted for proof coins after 1902. This attractive Choice specimen exhibits sharply detailed design elements and deeply mirrored fields, with little of the cameo contrast of earlier years. Shades of pale gold toning add to the considerable eye appeal. Population: 70 in 64 (1 in 64+), 71 finer (1/15). NGC ID# 2823, PCGS# 7338

1904 Morgan Dollar, Flashy PR64+

- 4078 1904 PR64+ PCGS. CAC.** The obverse of this prominently mirrored proof Morgan dollar is primarily brilliant, and the reverse displays blushes of almond-tan toning. Slight incompleteness of strike is limited to the centers, and the glassy fields appear free from contact or hairlines. Only 650 proofs were minted in this final year of regular Morgan dollar production. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 4079 1921 MS65 PCGS. VAM-1G.** David Close discovered VAM-1G, a business issue that shares its obverse die with the rare matte proofs. The 1921 Peace dollar is a favorite among collectors for its status as a one-year High Relief type. This Gem example displays thick, frosty luster with just a hint of light golden toning. The central relief elements exhibit only minor softness, and grade-limiting abrasions are at a minimum. NGC ID# 2U4E, PCGS# 7356

1922-D Peace Dollar, MS66+
Just Three Pieces Numerically Finer at PCGS

- 4080 1922-D MS66+ PCGS. CAC.** Brilliant silver luster and a bold strike give this high-end Premium Gem significant eye appeal and a ranking close to the finest seen by PCGS. Only six other coins have received the Plus designation at this grade level, and only three coins are certified in a higher grade at PCGS (1/15). Outstanding quality, CAC endorsed. NGC ID# 257D, PCGS# 7358

1923-S Peace Dollar, MS65
Iridescent Rainbow Toning

- 4081 1923-S MS65 PCGS.** This San Francisco date is seldom seen without marks or with an adequate strike, yet this example displays nice luster and colorful toning over satiny, minimally marked surfaces. The strike is sharp for the issue, with only slight blending on the hair strands adjoining Liberty's cheek and on the eagle's central feathers. PCGS has certified just three numerically higher pieces (1/15). NGC ID# 257H, PCGS# 7362

4082 1923-S MS65 NGC. Thick mint frost resides beneath a thin golden veil on the obverse, and rich honey-gold and gunmetal-blue toning on the reverse. The strike is lacking slightly in central definition, though the outstanding preservation of the surfaces fully balances the eye appeal. The 1923-S is readily available in Choice and lower grades, but is scarce at the Gem level and decidedly rare any finer. Census: 81 in 65, 1 finer (1/15). NGC ID# 257H, PCGS# 7362

4083 1924 MS66+ PCGS. CAC. This high-end Premium Gem exhibits well-detailed design elements and especially vibrant frosty mint luster, with no mentionable distractions. Eye appeal is terrific. PCGS has graded 30 numerically finer examples (1/15). NGC ID# 257J, PCGS# 7363

1924 Dollar, MS67
Brilliant and Frosted, Elegant Example

4084 1924 MS67 NGC. A Superb Gem, frosted across both sides and elegant in its absence of marks. The coin radiates silver luster. A bold strike accentuates Liberty's hair and the eagle's plumage, while the overall quality puts this coin solidly among the finest seen by NGC. Just two coins are certified in a higher numeric grade: one by PCGS, the other by NGC (1/15). NGC ID# 257J, PCGS# 7363

4085 1924-S MS64 PCGS. The 1924-S Peace dollar becomes very scarce in grades above MS64. This attractive Choice example offers sharply detailed design elements and well-preserved lustrous surfaces with hints of golden-tan toning. NGC ID# 257K, PCGS# 7364

4086 1927 MS65 PCGS. The 1927 Peace dollar is a low-mintage issue and examples are very rare in higher grades. This delightful Gem displays sharply detailed design elements and vibrant mint luster under delicate shades of golden-tan toning. PCGS has graded nine numerically finer examples (1/15). NGC ID# 257S, PCGS# 7370

4087 1927 MS65 PCGS. The 1927 stands as one of only four issues in the Peace dollar series with a mintage below 1 million coins (848,000 pieces). Gem examples are only infrequently seen, and finer pieces are distinct condition rarities. This MS65 coin displays satiny luster, with evenly blended lavender-gold and champagne toning. The design elements are sharply impressed, and the surfaces are free of detracting abrasions. PCGS has seen only nine numerically finer representatives (1/15). NGC ID# 257S, PCGS# 7370

4088 1927-S MS64 PCGS. A low-mintage San Francisco issue that is always in demand among Peace dollar specialists. This near-Gem example shows a bold strike and attractive, natural silver-gray toning with gold accents on both sides. Subtle iridescence shimmers through the considerable mint luster. Scarce any finer. NGC ID# 257U, PCGS# 7372

4089 1927-S MS64 PCGS. The 1927-S Peace dollar is a sought-after low-mintage issue. This attractive Choice example displays sharply detailed design elements and vibrant mint luster throughout, with only minor signs of contact. NGC ID# 257U, PCGS# 7372

4090 1927-S MS64+ PCGS. The 1927-S Peace dollar is a notably scarce date in Gem condition, which puts increased demand on high-end Choice examples. This Plus-graded piece displays frosty original luster beneath consistent wheat-gold toning that exhibits a few deeper olive and amber hues along the upper obverse periphery. Well-struck, with minimal disturbances in the luster. NGC ID# 257U, PCGS# 7372

4091 1928 MS64 PCGS. The 1928 Peace dollar is a sought-after issue from a series-low mintage of 360,649 pieces. This sharply detailed Choice example displays brilliant well-preserved surfaces with vibrant mint luster throughout. NGC ID# 257V, PCGS# 7373

4092 1928 MS64 PCGS. CAC. A brilliant and highly lustrous example of this key Philadelphia issue, with only a mere dusting of gold toning scattered at intermittent areas near the margins. A few light marks on the portrait are mostly pinpricks, with a couple of minor reeding marks that determine the grade. Flashy cartwheel luster accentuates the bold strike and adds to the sharp, silver-white appeal. NGC ID# 257V, PCGS# 7373

4093 1928-S MS64 PCGS. CAC. Radiant, frosty luster underlies lightly mottled olive-gold toning on the obverse, and cartwheels unhindered on the brilliant reverse. The strike is pleasing and there are unusually few detectable abrasions. The obverse has a die doubled motto, usual for the conditionally rare issue. PCGS has seen only 57 numerically finer representatives (1/15). NGC ID# 257W, PCGS# 7374

4094 1928-S MS64 PCGS. CAC. The 1928-S Peace dollar is a challenging issue in grades above the MS64 level. This attractive Choice example offers well-detailed design elements and lustrous lightly marked surfaces with hints of golden-tan and turquoise toning. NGC ID# 257W, PCGS# 7374

4095 1928-S MS64 PCGS. CAC. The 1928-S Peace dollar is conditionally very scarce in grades above the Choice level. This impressive MS64 example exhibits well-detailed design elements and well-preserved lustrous surfaces under shades of silver-gray, golden-brown, and amber toning. NGC ID# 257W, PCGS# 7374

4096 1928-S MS64+ PCGS. CAC. Pastel jade-green, powder-blue, and honey-gold drape this lustrous and carefully preserved Choice Peace dollar. Portions of IN GOD WE TRUST are nicely die doubled, as usual for the conditionally rare issue. NGC ID# 257W, PCGS# 7374

1934-S Peace Dollar, MS62
Sought-After Key Issue

4097 1934-S MS62 PCGS. Only a little more than 1 million Peace dollars were struck at the San Francisco Mint in 1934, and many of those coins were released into circulation, making the issue one of the most challenging in the series in high grade. This lustrous MS62 example offers well-detailed design elements and lightly marked surfaces with pleasing golden-brown patina. NGC ID# 257Z, PCGS# 7377

1935-S Peace Dollar, MS66
Only Two Coins Numerically Finer at PCGS

- 4098 1935-S MS66 PCGS.** Four rays below ONE. The 1935-S Peace dollar is seldom seen in Premium Gem condition, and finer pieces are extremely rare. This example displays delicately preserved, frosty luster that shows just a hint of light golden toning. The design elements are sharply impressed. PCGS has encapsulated just two numerically finer representatives (1/15). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLAR

1972-D Eisenhower Dollar, MS67
Surprisingly Smooth Portrait

- 4099 1972-D MS67 NGC.** High-grade Eisenhower dollars are surprisingly elusive in general and for the 1972-D in particular. This Superb Gem has generous luster and minimal patina aside from a small spot off the bottom right corner of the surprisingly smooth portrait. Census: 4 in 67, 0 finer (1/15). NGC ID# 2588, PCGS# 7410

PROOF EISENHOWER DOLLAR

1971-S Silver Eisenhower Dollar
PR70 Deep Cameo

- 4100 1971-S Silver PR70 Deep Cameo PCGS.** Out of more than 4.2 million silver-clad proof Eisenhower dollars struck in the debut year of 1971 at San Francisco, only 17 have received the ultimate grade from PCGS (1/15). While this example's holder has accumulated some scratches that may appear in the images, the piece itself is blissfully flaw-free. NGC ID# 258S, PCGS# 97428

SUSAN B. ANTHONY DOLLAR

1979-P Susan B. Anthony Dollar, MS67+
Popular Wide Rim Variety

- 4101 1979-P Wide Rim, FS-301, MS67+ PCGS.** A slight design modification in 1979 resulted in a wider rim on the Susan B. Anthony dollar than had been previously used. This variety is sometimes referred to as the "Near Date" variety, since the date appears closer to the rim. The Wide Rim variety is significantly scarcer in MS67 than its Narrow Rim counterpart. This coin ranks as one of just 14 examples certified as MS67 at PCGS, and is the only one awarded a Plus designation; none are numerically finer at that service (1/15). Both sides display a lovely blend of sun-gold and sky-blue toning, with well-struck design elements and no significant abrasions. PCGS# 145367

GOLD DOLLARS

- 4102 1849 Open Wreath MS63 PCGS. Breen-6004.** The close stars, thin date numerals variety, likely coined during the waning days of the single-year Open Wreath subtype. This lustrous canary-gold example is well struck. Marks are confined to slender lines beneath the D in DOLLAR and the 4 in the date. NGC ID# 25B9, PCGS# 7502
- 4103 1849 Open Wreath MS64 NGC.** The 1849 gold dollar represents the first year of the denomination. This attractive Choice example sharply detailed, with vibrant mint luster and well-preserved-gold surfaces. NGC ID# 25B9, PCGS# 7502
- 4104 1849 Closed Wreath MS64 PCGS. Breen-6005.** A lustrous green-gold near-Gem. A hair-thin radial mark is noted on the field near the nose. The "Heavy Date" variety with deeply hubbed and less distinct date numerals than found on its Thin Numerals Breen-6006 successor. Despite the appearance of the date, the strike is bold, as seen on the wreath and Liberty's hair. PCGS# 7503
- 4105 1849-O Open Wreath MS62 PCGS. Variety 1.** Open Wreath. The obverse shows crisp detail, with sharp star centers and Liberty's hair strands individually bold. The luminous and frosty surfaces are predominantly orange-gold and attractive. R is doubled in DOLLAR, identifying the variety, and both sides show nice mint luster. A light scrape to the right of 1 and a copper alloy spot to the right of the wreath's bow are noted.
From The Collection of Philip M. Peterson. NGC ID# 25BE, PCGS# 7508
- 4106 1850 MS64 PCGS.** This attractive Choice specimen offers well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster and ample eye appeal. Population: 38 in 64 (4 in 64+), 21 finer (1/15). NGC ID# 25BF, PCGS# 7509
- 4107 1854 Type Two MS62 PCGS.** An attractive MS62 example of the first year of the short-lived Type Two design, with well-detailed design elements and prominent clash marks. The vivid orange-gold surfaces radiate vibrant mint luster. NGC ID# 25C3, PCGS# 7531
- 4108 1855 AU55 NGC.** The 1855 is one of the more obtainable Type Two gold dollar issues, ideal for the casual type collector. This Choice AU representative displays unusually smooth, green-gold surfaces that retain subtle hints of luster in the protected regions. A brush of wear precludes a Mint State grade, but the devices remain well-detailed. NGC ID# 25C4, PCGS# 7532

- 4109 1857 MS64 NGC. CAC.** Considerable mint frost covers both sides of this lustrous, olive-gold dollar. The strike is bold on the obverse, but somewhat less so on the reverse with a bit of weakness on the high points of the wreath. Orange accents give the coin a natural appeal, with only an occasional light graze on the frosted surfaces. Gem examples of the issue are rare...this near-Gem is a good alternative. Census: 36 in 64 (1 in 64+), 18 finer (1/15). NGC ID# 25CD, PCGS# 7544

1859-D Gold Dollar, AU53

- 4110 1859-D AU53 NGC. Variety 11-N.** A straw-gold Dahlonega dollar without any detrimental marks or flan imperfections. The fields are moderately clashed, and show delicate horizontal die lines near the denomination, but the eye appeal is undeniably pleasing. From a stingy mintage of 4,952 pieces. NGC ID# 25CN, PCGS# 7553

- 4111 1861 MS64 PCGS. CAC.** The 1861 gold dollar was struck in large numbers, but the issue is very scarce in grades above the MS64 level today. This impressive Choice specimen offers well-detailed design elements and lustrous orange-gold surfaces with considerable eye appeal. NGC ID# 25CU, PCGS# 7558

1883 Gold Dollar, MS67 Undisturbed Surfaces, Rich Color

- 4112 1883 MS67 PCGS. CAC.** Sea-green peripheries surround orange centers. The strike is precise except on the lower obverse and upper reverse dentils. Pristine aside from a tiny reverse spot near 4:30. The RT in LIBERTY is lapped from the die, as made. A low mintage of 10,800 pieces, although it appears that Philadelphia dealers with Mint connections (such as Haseltine and the Chapmans) secured a quantity of high grade examples. NGC ID# 25DM, PCGS# 7584

- 4113 1886 MS65 PCGS. CAC.** Both sides are boldly clashed on this Gem 1886 gold dollar, showing bright canary-gold color and excellent eye appeal. A loupe reveals no singular marks, but instead shows considerable prooflike reflectivity. Population: 44 in 65, 20 finer (1/15). NGC ID# 25DR, PCGS# 7587

- 4114 1889 MS66 NGC.** A well struck apricot-gold Premium Gem. Lustrous, exceptionally preserved, and ideal for a high grade type set. The lower portion of the wreath is die doubled, usual for this popular final-year issue. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67 Magnificent Final-Year Type Coin

- 4115 1889 MS67 NGC.** The 1889 gold dollar is one of the more common dates of the type, well-saved by collectors and dealers following its issue. Rich apricot-gold and mint-green patination endows both sides of this Superb Gem, each of which exudes dazzling luster. Exquisitely struck design features and impeccable preservation round out the magnificent eye appeal. Ex: Long Beach Signature (Heritage, 2/2010), lot 1446. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

1834 Large Head Two and a Half, MS61+ Eye-Appealing Wheat-Gold Surfaces

- 4116 1834 MS61+ NGC. Breen-6140, Variety 2, R.3.** Large Head. The prominent hair curls atop Liberty's head and the widely spaced AM on the No Motto reverse help in attribution of this Classic Head quarter eagle variety. A few marks on Liberty's cheek and elsewhere along with some evidence of die crumbling (for example, on Liberty's coronet) account for the grade, but the wheat-gold surfaces nonetheless retain a good amount of essential eye appeal. NGC ID# 25FS, PCGS# 7692

1839-D Two and a Half, VF30 Sole Dahlonega Classic Issue

- 4117 1839-D VF30 NGC. CAC. Winter 1-B, Variety 25, R.4.** The 1839-D is the only Dahlonega Classic quarter eagle issue, and its mintage of 13,674 pieces ensures that survivors are rare. A lemon-gold midgrade representative with refreshingly unmarked surfaces. The centers are lightly brought up but the dentils are well defined. NGC ID# 25G6, PCGS# 7700

LIBERTY QUARTER EAGLES

4118 1840-C — Damage — PCGS Genuine. AU Details. Variety 1. This well defined and moderately wavy green-gold Charlotte two and a half displays considerable luster. Small scrapes are noted on the obverse rim at 3, 8, and 11 o'clock, and the portrait shows lesser marks on the left border of the neck and bust truncation. NGC ID# 25GB, PCGS# 7718

4119 1842-O XF45 NGC. Variety 1. The 1842-O quarter eagle is a notably scarce issue in all grades, with just 100 to 125 examples believed extant from a mintage of 19,800 coins. The present piece is minimally abraded with bright green-gold patina. The XF45 grade seems appropriate for the amount of detail present, although much of the central weakness is due to a deficient strike, and is seen on the vast majority of 1842-O quarter eagles, even those rare pieces in Mint State. NGC ID# 25GK, PCGS# 7726

1846-D Quarter Eagle, XF45 Rare Reverse of 1845-D

4120 1846-D XF45 PCGS. Variety 8-J. A previously unknown die combination, Variety 8-J pairs the High Date 1846-D obverse with the reverse of 1845-D. Despite a small mintage of 19,303 pieces, five different die marriages are known for this Dahlonega type issue. The present wheat-gold Choice XF quarter eagle has a good strike except on the eagle's neck. Traces of luster persist, and marks are inoffensive for the grade. NGC ID# 25H3, PCGS# 7742

4121 1850-O XF45 NGC. Variety 1. Most '50-O quarter eagles display the mintmark over the numerator half of the fraction, but the very scarce Variety 1 shows the mintmark over the denominator. This Choice XF specimen shows only slight wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Census: 46 in 45, 240 finer (1/15). NGC ID# 25HK, PCGS# 7758

4122 1852 MS64+ PCGS. CAC. The 1852 quarter eagle is one of the more plentiful issues of the period in Mint State, but it is rarely found finer than MS64. This Plus-graded representative is awash in frosty green-gold luster, and reveals only a few trivial disruptions in the fields. The strike is sharp and there are a few intersecting die cracks in the vicinity of the date. Population: 45 in 64 (1 in 64+), 14 finer (1/15). NGC ID# 25HR, PCGS# 7763

4123 1852-C — Damaged, Cleaned — ANACS. AU Details, Net VF30. Variety 1. A caramel-gold Charlotte example that has a typical strike and distributed pinprick marks. Open areas of the reverse field are moderately bright and the obverse is hairlined. A hair-thin vertical mark is noted on the portrait behind the eye. Ex: *Baltimore ANA Signature (Heritage, 8/2008), lot 9496.* From *The Collection of Philip M. Peterson.*

1852-C Quarter Eagle, AU50 Attractive Surface Color

4124 1852-C AU50 NGC. Variety 1, the sole die pair employed for the meager mintage of 9,772 pieces. Much commendable detail remains on this AU50 piece, showing attractive khaki-gold to orange-gold color. Some strike weakness appears in the hair and coronet, and more noticeably on the reverse around the shield and the eagle's left (facing) wingtip and thigh. A single noticeable scrape runs through the lower olive leaves. Census: 8 in 50, 59 finer (1/15). NGC ID# 25HS, PCGS# 7764

4125 1854-O MS61 PCGS. Variety 4. A sun-gold New Orleans quarter eagle with lightly clashed but minimally abraded surfaces. Seven die marriages of the '54-O are currently known, derived from a mintage of 153,000 pieces. Population: 10 in 61, 15 finer (1/15). NGC ID# 25J2, PCGS# 7772

4126 1868-S AU58 NGC. The 1868-S had a limited mintage of 34,000 coins, and survivors are usually in lower circulated grades. This near-Mint example has subdued yellow luster and scattered marks. Census: 78 in 58, 15 finer (1/15). NGC ID# 25KC, PCGS# 7808

4127 1880 MS61 NGC. The 1880 Liberty quarter eagle had a scant mintage of just 2,960 coins; surviving examples are scarce in all grades and are notable rarities in Mint State. This piece is sharply struck, with warm honey-gold luster. No major abrasions are present, and we instead note just light chatter in the fields that limits the grade. Census: 27 in 61, 27 finer (1/15). NGC ID# 25L4, PCGS# 7832

1887 Quarter Eagle, MS64 Only 6,160 Coins Struck

4128 1887 MS64 NGC. Per David Akers: "This date is very underrated in Choice Uncirculated condition." In fact, the issue is rare in this impressive state of preservation, and there are just two numerically finer examples, one each at NGC and PCGS (1/15). The light yellow-gold surfaces exhibit crisp definition toward the centers with a touch of softness on the stars. A degree of semiprooflikeness and the absence of any singularly distracting blemishes enhance the appeal. NGC ID# 25LB, PCGS# 7839

4129 1903 MS65 PCGS. A delightful Gem representative, with razor-sharp definition on all design elements and vibrant mint luster throughout. The pleasing peach-gold surfaces show no mentionable distractions and eye appeal is outstanding. NGC ID# 25LU, PCGS# 7855

- 4130 1906 MS66 NGC.** A beautiful peach-gold Liberty type coin. The strike is intricate and both sides display potent luster. No marks are evident. A lens shows a few small rose-red alloy imperfections on each side. NGC ID# 25LX, PCGS# 7858

INDIAN QUARTER EAGLES

- 4131 1909 MS64 NGC.** Rich golden-orange color, with hints of green-gold, and attractive luster are among the attributes this near-Gem specimen possesses. In addition, the coin exhibits strong definition. A die crack appears near 9 o'clock on the obverse and an as-made lint mark is present below IBE of LIBERTY. A few scattered marks are present, including a couple near the eagle's head. NGC ID# 288Z, PCGS# 7940
- 4132 1909 MS64 PCGS.** A sharply struck Choice Mint State Indian quarter eagle from the second year of the design, showing lovely orange-gold surfaces and frosty mint luster. NGC ID# 288Z, PCGS# 7940
- 4133 1911-D Weak D AU50 ANACS.** The interior of the mintmark is easily discerned beneath a loupe, and subtle rotation of the coin reveals the low relief outline of the D. This key date two and a half has unmarked and lightly worn caramel-gold surfaces. PCGS# 7954
- 4134 1911-D VF30 PCGS.** A peach-gold example of the highly regarded series key. The headdress and cheekbone display less wear than expected for the VF30 level. The mintmark has low relief but its outline and toned center are readily observed. Housed in a green label holder. NGC ID# 2894, PCGS# 7943
- 4135 1912 MS63 ANACS.** This attractive Select specimen exhibits razor-sharp definition on all design elements and the lustrous yellow and greenish-gold surfaces show only a few scattered contact marks. Eye appeal is outstanding. NGC ID# 2896, PCGS# 7944
- 4136 1914 MS63 NGC.** With a mintage of 240,000 pieces, the second-lowest production figure of the series, the 1914 Indian quarter eagle is a better date in the finer Mint State grades. This satiny Select example displays fiery orange-gold luster and well-struck design elements. A few minor abrasions are present, none of which are out of line for the grade. NGC ID# 2898, PCGS# 7946
- 4137 1914 MS63 NGC.** One of the most elusive Indian quarter eagles in high grades, the 1914 is a favorite semikey to the series. This Select example is sharply struck, with satiny bronze-gold luster. Surface abrasions are light and evenly dispersed, with none being worthy of individual notice. NGC ID# 2898, PCGS# 7946
- 4138 1914 MS63 PCGS.** Depending on grade the 1914 quarter eagle is either second or third in the lineup of conditional rarities in the Indian Head series behind the 1914-D and the absolute key in all grades, the 1911-D. This Select example of the 1914 displays excellent eye appeal on wheat-gold surfaces with a sharp strike. A few minor ticks and scrapes, including a couple on the Indian's profile, are grade-consistent, and a small patch of reddish alloy appears below the B in LIBERTY. NGC ID# 2898, PCGS# 7946

THREE DOLLAR GOLD PIECES

- 4139 1855 AU53 PCGS.** The well-detailed design elements of this AU53 example show just a touch of wear on the high points and the pleasing orange-gold surfaces are lightly abraded. Both sides retain much of their original mint luster.
From The Collection of Philip M. Peterson. NGC ID# 25M6, PCGS# 7972
- 4140 1856 AU58 NGC.** A sea-green and orange-gold Borderline Uncirculated example. Marks are inconsequential for the grade aside from an unobtrusive tick on Liberty's chin. The only Philadelphia issue with a lower mintage than its branch mint counterpart. NGC ID# 25M8, PCGS# 7974
- 4141 1856-S XF45 PCGS.** Medium S. A caramel-gold San Francisco type coin. Luster fills the legends, and the surfaces show only inconsequential contact aside from a cluster of small marks on the upper left obverse field. Liberty's hair displays high point wear. NGC ID# 25M9, PCGS# 7975

- 4142 1864 — Improperly Cleaned — NGC Details. AU.** A Civil War date with a meager mintage of 2,600 pieces. The present briefly circulated butter-gold example is only lightly cleaned, and marks are minor except for a small obverse rim nick at 9 o'clock. NGC ID# 25MK, PCGS# 7985

- 4143 1874 AU58 NGC.** An attractive near-Mint example of this popular type issue, with well-detailed design elements that show just a trace of wear and lightly abraded orange-gold surfaces that retain almost all of their original mint luster. NGC ID# 25MX, PCGS# 7998
- 4144 1878 AU55 NGC.** The 1878 three dollar gold piece is one of the more available issues in the series, popular for type representation. This Choice AU example shows bright yellow-gold patina, with sharp detail on the devices and remnants of semiprooflike mirroring in the fields. NGC ID# 25MZ, PCGS# 8000
- 4145 1878 AU58 NGC.** A trace of wear appears on the high points of this frosty and lustrous near-Mint example. This issue claims the second-highest mintage of any three dollar gold issue, and serves ideally for type collecting purposes. NGC ID# 25MZ, PCGS# 8000
- 4146 1878 MS62 NGC. CAC.** The expectation of parity between gold and paper currency resulted in the production of 82,304 three dollar coins 1878. However, public demand for gold failed to materialize when the market reached equilibrium, and the majority of the mintage never circulated. Thus, Uncirculated examples such as this are fairly available and frequently serve as type representatives. Sharp definition, frosty luster, and yellow-gold color generate excellent eye appeal. NGC ID# 25MZ, PCGS# 8000
- 4147 1879 — Cleaning — PCGS Genuine. Unc. Details.** A low mintage of 3,000 pieces makes the 1879 much scarcer than its immediate predecessor. A fully struck and flashy canary-gold example. A lens reveals incidental marks along with delicate hairlines. NGC ID# 25N2, PCGS# 8001

CLASSIC HALF EAGLES

1834 Plain 4 Five, Attractive MS61 First Head Variety

- 4148 1834 Plain 4 MS61 NGC. Breen-6501, McCloskey 3-A, R.3. First Head.** The First Head, Plain 4 half eagle of 1834 is the most available major variety for the year, and therefore best-suited for the purposes of type collectors. The No Motto, Crosslet 4 half eagles are very scarce, and the With Motto types with Plain 4 or Crosslet 4 are rare and above. This Plain 4 in Mint State shows attractive auburn-gold color with minor surface roughness and a small scrape in the lower-left obverse field. Die cracks run downward from Liberty's eye and from a lower curl to the rim between the date and star 13. The reverse is better-preserved overall, save for one dig below the branch tip. NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

1843-C Half Eagle, AU53
Vivid Color

- 4149 1843-C AU53 PCGS. Variety 2.** The 1843-C half eagle is a fairly scarce issue overall, with 225 to 250 examples believed extant. The typical representative grades just VF or XF, making the current AU piece conditionally scarce. Both sides exhibit deep apricot-gold patina, with only slight wear over the high points of the design. The eagle's neck and left (facing) leg show a touch of the usual striking softness. Population: 6 in 53, 28 finer (1/15). NGC ID# 25T3, PCGS# 8214

- 4150 1849-C — Improperly Cleaned — NCS. AU Details. Variety 1.** This wheat-gold Charlotte Mint type coin is faintly hairlined, but noticeable marks are confined to an obverse rim nick at 3 o'clock. Luster illuminates the peripheries. The strike is above average although the eagle's legs and fletchings are incomplete.
Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 3008.
From The Collection of Philip M. Peterson. NGC ID# 25TW, PCGS# 8241

1849-C Five Dollar, AU53
Original Surfaces

- 4151 1849-C AU53 PCGS. Variety 1.** Die State II. Only two pair of dies were used to strike the 64,800 pieces of the 1849-C five dollar. Each variety is easily distinguished from the other. Variety I usually shows a die crack from the reverse rim that just touches the left serif of the U in UNITED. Variety 2 shows coarse vertical die lines behind the neck of Liberty. Only 65-75 pieces are believed known in AU today out of the 275-375 coins believed known in all grades (most VF and XF). This is an original coin. The fields are somewhat choppy as expected for this issue, and there is slight central striking weakness on each side. NGC ID# 25TW, PCGS# 8241

1850-D Half Eagle, AU53
Original 'Crusty' Surfaces

- 4152 1850-D AU53 NGC. Variety 28-U,** showing the 1 centered over a dentil. The surfaces on this yellow-gold piece show considerable "crust" and buildup in the devices, a strictly original-appearing example. Some luster remains on each side. Scattered small- to medium-sized marks fail to interfere with the good eye appeal. Despite the moderate mintage of 43,900 coins for the 1850-D, certified survivors average only XF45. Census: 16 in 53, 47 finer (1/15). NGC ID# 25U3, PCGS# 8245

- 4153 1851 MS61 PCGS.** The orange-gold surfaces of this pleasing MS61 example are lightly marked and show patches of lilac and pink patina in selected areas. The design elements are sharply detailed but mint luster is a trifle subdued. Population: 11 in 61, 27 finer (1/15). NGC ID# 25U5, PCGS# 8246

1851-C Half Eagle, AU53

- 4154 1851-C AU53 NGC. Variety 1.** An earring-shaped lump, described by Winter as a punchmark, defines this far more common 1851-C half eagle variety. This yellow-orange example is luminous, almost radiant, with light wear crossing the high points of well-struck devices and few singularly mentionable marks. Census: 19 in 53, 48 finer (1/15). NGC ID# 25U6, PCGS# 8247

1856-C Five Dollar, AU50
Well Defined and Problem-Free

- 4155 1856-C AU50 PCGS. Variety 1.** A well defined yellow-gold representative. Both sides display a smattering of small marks, but none are individually consequential. Mintages of Charlotte gold coins declined steadily after 1852, since West Coast bullion was increasingly struck at San Francisco rather than shipped to the Eastern seaboard. Population: 20 in 50, 38 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2008), lot 3256, which realized \$2,990.
From The Collection of Philip M. Peterson. NGC ID# 25UW, PCGS# 8267

1858-D Half Eagle, MS61
Great Eye Appeal, Seldom Seen Finer

- 4156 1858-D MS61 PCGS. Variety 43-HH**, identified by the upright of the D mintmark centered above VE in FIVE. This is simply a great-looking coin for the grade and issue, one showing far fewer marks than might be expected on well-struck orange-gold surfaces. It required a loupe to see the peppering of small marks that determine the grade, as the sole mentionable abrasion is a thin scrape underneath the eagle's left (facing) wing. Excellent eye appeal. The mintage was 15,000-plus pieces, but examples surpassing this one aesthetically or technically will be difficult to locate. Population: 8 in 61, 4 finer (1/15). NGC ID# 25V9, PCGS# 8278

1860-D Half Eagle, AU53
Medium D, Minimal Marks

- 4157 1860-D Medium D AU53 NGC. Variety 46-GG**. An attractive wheat-gold Dahlonega example with glimpses of peach-tinged luster in protected regions. No marks are obtrusive, and the strike is above average despite blending on the eagle's neck. Although the mintage was only 14,635 pieces, three die marriages are known for the '60-D. The Medium D is more available than the two rare Large D marriages. NGC ID# 25VH, PCGS# 8286
- 4158 1870-S XF45 NGC**. A Choice XF example from a mintage of 17,000 pieces, this coin shows slight wear on the well-detailed design elements and lightly abraded green and rose-gold surfaces that retain traces of original mint luster. Census: 17 in 45, 34 finer (1/15). NGC ID# 25WB, PCGS# 8321
- 4159 1872-S AU50 PCGS**. The 1872-S half eagle is a much underrated issue. The San Francisco Mint struck only 36,400 examples, survivors of which are scarce in all AU levels and are prohibitively rare in Mint State. This About Uncirculated piece displays warm straw-gold luster and retains pleasing detail. A few scattered marks accompany the grade. Population: 12 in 50, 15 finer (1/15). NGC ID# 25WH, PCGS# 8327

1874-CC Half Eagle, VF35
Minimally Abraded for the Grade

- 4160 1874-CC VF35 PCGS. Variety 1-C**. Two obverse and four reverse dies are known among the at least six die pairings for the 1874-CC half eagles' meager mintage of 22,000 pieces. This Choice VF example shows the appreciable wear expected at this grade level, on surfaces that are yellow-gold in the centers, blending into brownish-gold near the rims. There are minimal abrasions for the grade. Population: 18 in 35, 57 finer (1/15). NGC ID# 25WP, PCGS# 8334
- 4161 1877-S AU55 NGC**. The 1877-S half eagle is an underappreciated branch mint issue. Only 26,700 pieces were struck, almost all of which experienced heavy circulation. AU survivors are genuinely scarce, and only three examples have been certified as Mint State. This yellow-gold, Choice AU example displays sharp detail and semireflectivity in the fields. Only a trace of friction is evident over the high points of the devices. Census: 22 in 55, 9 finer (1/15). NGC ID# 25X3, PCGS# 8344
- 4162 1881-S MS64 NGC**. Despite a mintage of nearly 1 million coins, the 1881-S half eagle is scarce in MS64, and is decidedly rare any finer. This example displays sharp motifs amid frosty sun-gold luster. A few scattered abrasions limit the grade, but none are individually noteworthy. NGC has seen only 23 numerically finer representatives (1/15). NGC ID# 25XE, PCGS# 8357
- 4163 1882-CC — Scratch — PCGS Genuine. AU Details. Variety 1-A**. This briefly circulated straw-gold Carson City five displays plentiful luster across the borders, curls, and eagle. Lightly abraded except for a vertical pinscratch behind Liberty's neck and a diagonal pinscratch on the reverse from the right scroll end to the rim at 7 o'clock. NGC ID# 25XH, PCGS# 8359
- 4164 1892 MS65 PCGS**. High-grade examples of the 1892 half eagle are quite scarce. The peach-gold surfaces of this Gem radiate nice luster and exhibit strong preservation. Sharply defined design features complement these attributes. Population: 29 in 65 (1 in 65+), 23 finer (1/15).
Ex: Long Beach Signature (Heritage, 2/2007), lot 4627. NGC ID# 25Y6, PCGS# 8379
- 4165 1892-CC MS61 NGC. CAC. Variety 1-A**. The penultimate Carson City issue has a comparatively low mintage of 82,968 pieces. This well struck apricot-gold example is free from mentionable abrasions and offers a broad band of bright luster across both peripheries. NGC ID# 25Y7, PCGS# 8380
- 4166 1894-S MS60 NGC**. From a mintage of 55,900 pieces, the 1894 Liberty half eagle is an elusive issue in Mint State grades. This attractive MS60 specimen is well-detailed and brightly lustrous with the minimum number of minor contact marks for the grade. Census: 4 in 60, 25 finer (1/15). NGC ID# 25YG, PCGS# 8389

1905 Half Eagle, MS65
Elusive This Well-Preserved

- 4167 1905 MS65 NGC.** The 1905 is one of the less often seen Philadelphia issues from this period, scarcely seen in MS65 and rare finer. This example is sharply struck, with uninhibited straw-gold luster. Close examination with a loupe reveals only a few trivial disruptions, none of which are bothersome. This coin is decidedly pleasing for the grade. Census: 37 in 65 (1 in 65+), 27 finer (1/15). NGC ID# 25Z6, PCGS# 8411

- 4168 1907-D MS65 NGC.** This is a softly frosted Denver representative with gorgeous orange-gold and lavender coloration. The devices are sharply impressed overall with a touch of softness over the eagle's neck, right (facing) claw, and the arrow fletchings. Two small planchet voids, one adjacent to star 3 and another below the A in STATES, are noted for accuracy. NGC has certified 26 numerically finer examples (1/15). NGC ID# 25ZD, PCGS# 8417

INDIAN HALF EAGLES

- 4169 1908-D MS64 NGC.** From a mintage of 148,000 pieces, the 1908-D Indian half eagle is very rare in grades above the MS64 level. Most of the high-grade pieces we know about today come from a small hoard assembled by Virgil Brand. This attractive Choice specimen is sharply detailed and lustrous, with minimal signs of contact. NGC has graded four numerically finer examples (1/15). NGC ID# 28DF, PCGS# 8511
- 4170 1908-D MS64 PCGS.** The 1908-D half eagle represents the first year of the Indian design, an important consideration for mintmark type collectors. This attractive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces. PCGS has graded 11 numerically finer examples (1/15). NGC ID# 28DF, PCGS# 8511
- 4171 1911-S MS62 NGC.** The brightly lustrous orange-gold surfaces of this attractive MS62 specimen display a few highlights of green, with a scattering of minor contact marks on each side. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 25ZM, PCGS# 8522
- 4172 1912 MS64 NGC.** Vibrant, frosty mint luster and sharply struck design elements deliver outstanding visual appeal on this Choice 1912 half eagle. The obverse is beautifully preserved, although the reverse shows some faint, grade-limiting grazes in the upper-right field. An immensely attractive Indian five, and high-quality for the grade. NGC ID# 28DS, PCGS# 8523

1916-S Half Eagle, MS62
Last Readily Available Issue of the Series

- 4173 1916-S MS62 PCGS.** The final San Francisco half eagle issue struck for circulation, mintage 240,000 pieces, and the last readily accessible to collectors, as the 1929 half eagle is far less available. Yellow-orange surfaces are uncommonly vibrant with lighter color in the portrait area. Generally well-struck, if a touch soft on the lowest pendant of the necklace. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

- 4174 1841 AU55 NGC.** A seldom offered early Philadelphia issue, the 1841 eagle is scarce in AU grades and is rarely seen in Mint State. This Choice AU representative displays excellent detail, with bright straw-gold color. As is befitting of the grade, scattered small abrasions are present. Census: 33 in 55, 31 finer (1/15). NGC ID# 262H, PCGS# 8582
- 4175 1842 Small Date AU50 NGC.** Overall, the 1842 Small Date eagle is slightly scarcer than its Large Date counterpart. This AU representative displays pleasing detail, with consistent straw-gold patina. Remnants of semiprooflike mirroring are detected in the recesses when tilted beneath a light. NGC ID# 262L, PCGS# 8585
- 4176 1850 Large Date AU55 NGC.** The 1850 Liberty eagle with large numerals in the date is more available than its Small Date counterpart, but high-grade examples are still rare. This attractive Choice AU specimen offers lightly abraded greenish-gold surfaces that retain much original mint luster. Census: 66 in 55, 70 finer (1/15). NGC ID# 2637, PCGS# 8603
- 4177 1850 Small Date XF40 ANACS.** The scarcer of the two logotype varieties for the issue. A well defined lemon-gold No Motto ten with distributed moderate field marks and glimmers of remaining luster. Housed in an ANA cache holder. NGC ID# 2638, PCGS# 8604
- 4178 1852 VF35 PCGS. CAC.** Liberty's hair above the coronet shows a little wear and the curl below the ear is worn but still defined on this Choice VF specimen. The pleasing orange-gold surfaces are minimally abraded for the grade. NGC ID# 263C, PCGS# 8608
- 4179 1854-O Small Date AU53 NGC. Variety 1.** A pleasing caramel-gold representative of this low mintage New Orleans issue. Tiny marks are scattered but none distract. The Small Date and Large Date varieties are similar in scarcity, and listed under the same entry in the *Guide Book*. NGC ID# 28EC, PCGS# 8614

1871-S Ten Dollar, XF45
Underappreciated Rarity

- 4180 1871-S XF45 NGC.** The 1871-S eagle had a mintage of only 16,500 coins, although this was actually one of the higher production totals from any mint for this period. There are fewer than 100 examples believed to survive in all grades, and none are certified as Mint State. The date is rarer than the population reports would lead one to assume, and this Choice XF example is actually finer than most known representatives. Both sides show pleasing wheat-gold patina, with grade-consistent rub on the devices, but strong detail remaining. A small mark in the field near the chin is the only surface flaw of note. Census: 20 in 45, 40 finer (1/15). NGC ID# 264Y, PCGS# 8662

- 4181 1877 — Smoothed — PCGS Genuine. XF Details.** Only slight wear shows on the well-detailed design elements of this rare, low-mintage issue, but evidence of smoothing is apparent in the lower obverse field. Only 797 business-strike Liberty eagles were struck at the Philadelphia Mint in 1877. NGC ID# 265F, PCGS# 8677

LIBERTY EAGLES

- 4182 1878-S AU55 NGC.** Pale green-gold on the flashy obverse with a more yellow appearance on the reverse. Lightly worn on the high points but appealing. Scattered small marks through the fields do not detract. Census: 41 in 55 (2 in 55+★), 28 finer (1/15). NGC ID# 265L, PCGS# 8682
- 4183 1881 MS64 PCGS.** An attractive Choice specimen, with sharply detailed design elements and lustrous peach-gold surfaces that show only minor signs of contact. Eye appeal is outstanding. Population: 19 in 64 (2 in 64+), 1 finer (1/15). NGC ID# 265W, PCGS# 8691
- 4184 1887 MS62 PCGS.** The 1887 Liberty eagle claims a mintage of 53,680 pieces and examples are seldom encountered in Mint State grades. This pleasing MS62 example offers light orange-gold surfaces with a scattering of minor contact marks that define the grade. Population: 37 in 62, 5 finer (1/15). NGC ID# 266H, PCGS# 8710
- 4185 1887-S MS63 PCGS.** Apricot-gold bands surround the margins, with pale yellow interiors. The surfaces are lightly abraded, as the grade suggests, with the most noticeable flaw being a small scrape to the left of the bust truncation, though the eye appeal is nonetheless fair. Population: 95 in 63, 4 finer (1/15). NGC ID# 266J, PCGS# 8711
- 4186 1888 MS62 PCGS.** The 1888 ten dollar is a conditionally elusive issue in Mint State, with examples grading finer than MS62 being distinctly rare. This representative exhibits sharp motifs and frosty yellow-gold luster. Moderate abrasions define the grade. Population: 42 in 62, 8 finer (1/15). NGC ID# 266K, PCGS# 8712
- 4187 1889 AU55 NGC.** A pleasing Choice AU specimen from a low mintage of 4,440 pieces, this coin displays lightly abraded greenish-gold surfaces with bright mint luster in sheltered areas. The sharply impressed design elements show just a trace of wear on the high points. NGC ID# 266N, PCGS# 8715

1889 Eagle, MS61
Unusually Low Mintage

- 4188 1889 MS61 NGC.** The 1889 has a mintage of just 4,440 pieces, the lowest post-1883 mintage of the series at any facility, and the lowest mintage at Philadelphia since 1877. Since the few gold collectors of the era favored proofs, Uncirculated survivors are highly elusive. The present apricot-gold representative has good luster and a sharp strike. Field abrasions are moderate but we note a few unobtrusive marks near Liberty's jaw. Census: 34 in 61, 7 finer (1/15). NGC ID# 266N, PCGS# 8715

1889 Ten Dollar, MS61
Low-Mintage Condition Rarity

- 4189 1889 MS61 NGC.** A well-defined Philadelphia eagle from a neglected issue of just 4,440 business strikes, radiant yellow-gold with faint hints of copper-pink. Though both sides show significant abrasions on devices and in fields alike, as a Mint State coin it is a clear condition rarity. Census: 34 in 61, 7 finer (1/15). NGC ID# 266N, PCGS# 8715
- 4190 1890-CC AU55 NGC. Variety 1-A.** A glossy sun-gold Carson City ten with light high point wear and ample luster across the eagle, borders, and curls. Marks are minimal save for a slight reverse rim ding at 2 o'clock and moderate contact on the field beneath TRUST. A low mintage issue, much scarcer than the '91-CC. NGC ID# 266S, PCGS# 8718
- 4191 1891-CC AU58 NGC. Variety 2-B.** A yellow-gold Carson City type coin. Sharply struck, and relevant marks are confined to a slight reverse rim ding at 4 o'clock. The borders teem with luster. *From The Collection of Philip M. Peterson.* NGC ID# 266U, PCGS# 8720
- 4192 1891-CC MS61 NGC. Variety 1-A.** A honey-gold Carson City example with vibrant peripheral luster and a bold strike. Scattered small field marks are as expected for the grade. Traces of struck-in grease (as made) are noted near the left (facing) wingtip. NGC ID# 266U, PCGS# 8720
- 4193 1891-CC/CC FS-501 MS60 NGC. Variety 3-C.** Although undesignated as such on the insert, this is the *Cherry-pickers'* variety with a strongly repunched mintmark. An apricot-gold Carson City type coin with lustrous borders, a crisp strike, and moderately marked fields. PCGS# 145728 Base PCGS# 8720

- 4194 1892-CC XF45 NGC. Variety 1-A.** A moderately circulated butter-gold eagle with minimal marks and substantial glimpses of luster. IN GOD WE TRUST is die tripled, as seen on all examples of the low mintage Carson City issue.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3932.
From The Collection of Philip M. Peterson. NGC ID# 266W, PCGS# 8722
- 4195 1894 MS63+ NGC.** This high-end Select example displays sharply detailed design elements and lustrous reddish-gold surfaces, with a scattering of minor contact marks that explain the grade. NGC ID# 2675, PCGS# 8729
- 4196 1897-S MS62 PCGS.** From a substantial mintage of 234,750 pieces, the 1897-S Liberty eagle is still an elusive issue in Mint State grades. This attractive MS62 specimen is well-detailed and lightly abraded, with lustrous greenish-gold surfaces. Population: 28 in 62, 21 finer (1/15). NGC ID# 267F, PCGS# 8739
- 4197 1904 MS62 Prooflike NGC.** The central design elements of this impressive MS62 example are sharply detailed but some of the stars are a little soft. The yellow-gold surfaces show a scattering of minor contact marks and the fields display prooflike reflectivity. Census: 3 in 62 Prooflike, 1 finer (1/15). PCGS# 78755
- 4198 1905 MS64 PCGS.** This attractive Choice example exhibits sharply detailed design elements, except for a touch of softness on star 13. The vivid orange-gold surfaces are lightly marked and display ample mint luster. PCGS has graded 29 numerically finer examples (1/15). NGC ID# 2682, PCGS# 8757

PROOF LIBERTY EAGLE

1900 Ten Dollar Gold, PR58
Just 120 Proofs Struck

- 4199 1900 PR58 NGC. CAC.** An unusual find — a briefly circulated proof eagle, one of just 120 proofs issued by the Mint in 1900. Perhaps only half of the mintage exists today, as many coins were lost or simply spent during hard times. This example shows a number of small marks on the reflective surfaces and evidence of light handling. A bit of dark debris remains in the date area. Considerable proof mirroring remains in the fields, and the nice orange-gold color adds appeal. NGC ID# 28G7, PCGS# 8840

INDIAN EAGLES

- 4200 1907 No Periods MS61 NGC.** An attractive Mint State example of this popular first-year type coin, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks. NGC ID# 28GF, PCGS# 8852
- 4201 1907 No Periods MS62 NGC.** A lustrous first-year Indian type coin. The strike is good and the orange-gold fields display few marks. A couple of thin marks are noted on the portrait. The stars and date are strike doubled. NGC ID# 28GF, PCGS# 8852
- 4202 1908-D No Motto MS61 NGC.** An attractive Mint State example of the short-lived No Motto design, with well-detailed design elements and lightly marked orange-gold surfaces that radiate frosty mint luster. NGC ID# 28GH, PCGS# 8854

- 4203 1908 Motto MS63 NGC.** An attractive Select specimen from the first year to include the motto IN GOD WE TRUST. This coin displays well-detailed design elements and lustrous reddish-gold surfaces. NGC ID# 28GJ, PCGS# 8859
- 4204 1909-D MS61 PCGS.** The 1909-D Indian eagle is an underrated date, from a low mintage of 121,540 pieces. This well-struck Mint State example features lightly abraded orange-gold surfaces. NGC ID# 28GN, PCGS# 8863
- 4205 1911-D XF40 NGC.** Lightly textured surfaces disguise a few small contact marks, while the bonnet shows light wear. A surprising amount of mint luster remains for the XF40 grade. Some tiny ticks on the cheek do not detract from the appealing medium-gold color of this low-mintage Denver issue, which is challenging in all grades. Just 30,100 pieces were struck. NGC ID# 28GU, PCGS# 8869
- 4206 1913 MS64 NGC.** Magnificent butter-yellow patina covers the surfaces of this resplendent specimen. Several light grazes on Liberty's cheek limit the grade, but they barely affect the impressive eye appeal. The reverse is particularly stunning with vibrant streaks of orange and pale green across the eagle. This razor-sharp, near-Gem example would make an ideal type coin.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3991.
From The Collection of Philip M. Peterson. NGC ID# 28GY, PCGS# 8873
- 4207 1913-S AU55 NGC.** Peach-gold, gunmetal-blue, and lilac shades confirm the originality of this satiny and lightly abraded San Francisco eagle. The 1913-S has an unusually low mintage of 66,000 pieces, and the majority of certified examples are in AU grades. NGC ID# 28GZ, PCGS# 8874

1913-S Indian Ten, AU58
Low-Mintage Key

- 4208 1913-S AU58 NGC.** The 1913-S Indian eagle is one of the most challenging dates in the series, from a low-mintage of 66,000 pieces. This impressive near-Mint example is well-detailed and lightly worn, with brightly lustrous orange-gold surfaces that show only a few minor abrasions on both sides. NGC ID# 28GZ, PCGS# 8874
- 4209 1916-S AU58 PCGS.** Little actual wear, although the strike is not fully brought up on the eagle and a few small ticks are scattered across the lightly stippled surfaces. Soft luster remains in the recesses of this near-Mint ten dollar gold. Most of the mintage went into foreign holdings and were later returned to U.S. collectors — perhaps this medium-gold coin with hints of orange patina surrounding the legends is one of those. NGC ID# 28H7, PCGS# 8880
- 4210 1926 MS64 PCGS.** A sea-green and peach-gold Indian type coin. The cartwheel luster is vibrant and the scattered minor marks are invariably inoffensive. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3997, which realized \$1,955.
From The Collection of Philip M. Peterson. NGC ID# 28H9, PCGS# 8882
- 4211 1932 MS64 PCGS.** The vivid orange-gold surfaces of this attractive Choice example radiate vibrant mint luster on both sides creating outstanding eye appeal. The design elements are well-detailed and only minor signs of contact are evident.
From The Collection of Philip M. Peterson. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

- 4212** 1850 — Smoothed — PCGS Genuine. AU Details. Well-executed smoothing of the fields, primarily on the obverse, has effaced many of the detracting abrasions and leaves the surfaces with a softly luminous, matte-like texture. The strike is bold and the details are sharp amid rich yellow-gold coloration. NGC ID# 268F, PCGS# 8902

1851 Twenty Dollar, AU58 Early Date Type One Example

- 4213** 1851 AU58 NGC. Gold was pouring into the Philadelphia Mint from California, and as a result, this issue had an impressively high mintage of over 2 million coins. No previous gold issue of the United States, in any denomination, had a mintage as high as this figure (although in the same year, over 3 million gold dollars were also produced). Mint records indicate that 13 obverse dies and 33 reverse dies were produced for this coinage, and they were apparently all well made, for there are no notable varieties of this date that have been discovered. This near-Mint representative is an attractive double eagle with frosty and highly lustrous yellow-gold surfaces. The color ranges from light yellow to honey-gold with splashes of rose toning. A sharply struck example, the surfaces are relatively mark-free, although the usual small ticks are evident on each side. Ex: *Denver Signature* (Heritage, 8/2006), lot 5573. NGC ID# 268H, PCGS# 8904

- 4214** 1852 XF45 PCGS. This yellow-gold Choice XF double eagle retains traces of luster in the protected areas. Save for highpoint wear on Liberty's curls, the design elements display nice detail. The expected number of contact marks are scattered over each side. Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4023. From *The Collection of Philip M. Peterson*. NGC ID# 268K, PCGS# 8906

1853 Twenty Dollar, AU53 Ample Luster Remains

- 4215** 1853 AU53 NGC. The present coin has a natural appeal, with only light wear on the hair strands and eagle's feathers. A couple of minor rim bumps and abrasions in the obverse field account for the grade. A pleasing example of this early double eagle. From *The Collection of Philip M. Peterson*. NGC ID# 268M, PCGS# 8908

1853 Liberty Double Eagle, AU55 Appealing Originality

- 4216** 1853 AU55 NGC. CAC. A lightly circulated Type One twenty in its natural state, with glimpses of remaining mint luster and minimally abraded, medium-gold surfaces. The motifs retain sharp detail with no heavy marks and just slight wear. CAC confirms its overall appeal with the well-deserved green label. NGC ID# 268M, PCGS# 8908

1853/2' Twenty, XF45 Popularly Collected Variety

- 4217** 1853/2' FS-301 XF45 PCGS. Although the quotation marks apparently signify PCGS' doubt over whether the underdigit is the curve of a 2, repunching, or something else, it remains a popular variety that has been collected for decades. This Choice XF orange-gold example shows scattered marks throughout both sides, including a few larger reeding marks and scrapes. Population: 21 in 45, 61 finer (1/15). PCGS# 145730 Base PCGS# 8909

- 4218** 1853/2' FS-301 — Improperly Cleaned — NCS. AU Details. A curve within the lower loop of the 3 identifies the popular *Guide Book* variety. The die lump beneath the R in LIBERTY provides confirmation. The present orange-gold example is inoffensively bright and displays the expected number of moderate marks on the left obverse. From *The Collection of Philip M. Peterson*. PCGS# 145730 Base PCGS# 8909

1854 Liberty Twenty Sharp Choice AU Small Date

- 4219** 1854 Small Date AU55 NGC. 1854 double eagles were produced with two distinct date punches, and although the Small Date variety is more available than its Large Date counterpart, it can be difficult to locate in AU and finer grades. Splendid orange-gold patina graces the surfaces of this sharply struck piece. From *The Collection of Philip M. Peterson*. NGC ID# 268P, PCGS# 8911

1855 Liberty Twenty, AU55
Popular Type One Issue

- 4220 1855 AU55 NGC.** The 1855 Liberty double eagle is a popular Type One issue from a mintage of 364, 666 pieces. This attractive Choice AU specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded greenish-gold surfaces retain much of their original mint luster. Census: 93 in 55 (2 in 55+★), 85 finer (1/15). NGC ID# 268V, PCGS# 8914

- 4221 1856-SXF45 NGC.** The design elements of this Choice XF example show only a small degree of highpoint wear on either side. This issue is not rare, making it a good selection for type collectors.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4040.
From The Collection of Philip M. Peterson. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU55
Green Label Holder

- 4222 1856-S AU55 PCGS.** Though the discovery of a number of examples aboard the *S.S. Central America* increased the availability of 1856-S double eagles, this coin's green label holder shows that it predates those coins' market offering. Gold-to-orange surfaces have excellent luster and the detail is strong despite light wear. A coppery area is noted to the right of the eagle on the reverse. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU58
Sharp Mint Luster Remains

- 4223 1856-S AU58 NGC. Variety 17C.** Full Serif on D, Bold Left S Mintmark. With recovery of more than 1,000 coins from the *S.S. Central America*, this San Francisco issue left the ranks of extreme rarity in high grades and joined the 1857-S as among the most-available of all Type One double eagles. Nearly full luster radiates from the attractive, near-Mint surfaces. Small abrasions dot the fields and devices, but they are secondary to the sharp strike and rich, medium gold coloration. NGC ID# 2692, PCGS# 8919

1858-S Twenty Dollar, AU55
Seldom Available Finer

- 4224 1858-S AU55 NGC.** As the *S.S. Central America* sank in September 1857, no examples of the 1858-S double eagle survived aboard the wreck, and as a result, the issue is substantially rarer overall than its 1856-S and 1857-S counterparts. Mint State coins are particularly rare, most of which are heavily abraded. This Choice AU example is well-detailed, with some luster remaining amid medium green-gold patina. NGC ID# 2699, PCGS# 8925

1858-S Liberty Twenty, AU55
Scarce in Finer Grades

- 4225 1858-S AU55 NGC.** The 1858-S Liberty double eagle was produced in large numbers but few examples were saved by contemporary collectors and the issue is scarce in high grade today. This attractive Choice AU specimen shows slight wear on the well-detailed design elements and the lustrous straw-gold surfaces show a moderate number of minor abrasions for the grade. NGC ID# 2699, PCGS# 8925

1861 Double Eagle, AU58
Popular Type One Issue

- 4226 1861 AU58 PCGS. CAC.** From a huge mintage of nearly 3 million pieces, the 1861 Liberty double eagle is one of the most available Type One twenties in an absolute sense, but high-grade examples are still elusive. This well-detailed near-Mint example shows just a trace of high-point wear and the lightly marked peach-gold surfaces retain almost all of their original mint luster. NGC ID# 269G, PCGS# 8932

1862-S Double Eagle, Lightly Abraded XF45

- 4227 1862-S XF45 PCGS. CAC. Light wear and mostly minor marks blend on the surfaces of this Choice XF double eagle, which shows a typical (in grade and surfaces) appearance for the issue of 850,000-plus coins, most of which circulated extensively. This example boasts good eye appeal within its limits, and would make a nice S-mint Type One representative. NGC ID# 269N, PCGS# 8938

1863-S Double Eagle, AU55
Small S Mintmark

- 4228 1863-S AU55 NGC. Breen-7217. Small S. Pockets of luster dominate the legends and eagle. This Type One twenty displays lightly circulated apricot-gold and olive-green surfaces. Marks are relatively minor, and relegated to the upper left obverse field and a small reverse rim nick at 2 o'clock. NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, AU58
Conditionally Scarce Issue

- 4229 1863-S AU58 PCGS. Breen-7216. Medium S, about equal in scarcity with its Small S alternative. This peach-gold Civil War double eagle displays ample luster and a good strike. Customary for the grade and denomination, small abrasions are distributed, but only an inconspicuous mark along the bust truncation merits singular mention. NGC ID# 269R, PCGS# 8940
- 4230 1864-S — Improperly Cleaned — NGC Details. AU. The design elements of this still-collectible Type One Liberty double eagle show just a trace of friction on the high points and the pleasing orange and greenish-gold surfaces are lightly abraded. The surfaces have an unnatural sheen that indicates a light cleaning in the past. NGC ID# 269T, PCGS# 8942

1864-S Twenty, AU53
Sharply Lustrous for the Grade

- 4231 1864-S AU53 PCGS. CAC. A healthy amount of orange-gold mint luster remains across the surfaces of this lightly worn Type One double eagle. A multitude of minor abrasions dot the surfaces, but none are deep or severe, nor are they unexpected for the AU53 designation. The devices retain sharp detail, and the eye appeal is substantial. The CAC endorsement is an important recommendation. NGC ID# 269T, PCGS# 8942

- 4232 1866 Motto, Doubled Die Reverse, FS-801, XF45 NGC. Olive-green and apricot toning drape this lightly worn and moderately abraded twenty. The N in IN and the R in TRUST are doubled. This variety was caused by subtle design differences between two hubs, instead of a different placement of the same hub between hubbings. The variety is undesignated on the insert. PCGS# 145733 Base PCGS# 8949

1866-S Double Eagle, AU50
FS-301, Misplaced 8

- 4233 1866-S Motto, Misplaced Date, FS-301, AU50 NGC. Tall S. The interesting die variety with the top of a misplaced 8 emerging from the dentils, west of the 1 in the date. Undesignated as such on the NGC holder, since its generation predates the inclusion of the variety in Cherrypickers'. A richly detailed honey-gold example with moderate marks on the cheekbone and the left obverse field. Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7577; Menlo Park Collection (Heritage, 9/2008), lot 4093. From The Collection of Philip M. Peterson. PCGS# 145734

- 4234 1869 AU53 NGC. This is a pleasing Almost Uncirculated representative of this slightly better Type Two Philadelphia issue. Both sides are well-detailed, with bright yellow-gold patina. Subtle remnants of luster are visible in the recesses when tilted beneath a light. NGC ID# 26A5, PCGS# 8955

1869-S Liberty Twenty, Lustrous AU55

- 4235 1869-S AU55 PCGS.** The scarcity of the 1869-S double eagle in Mint State makes high-end AU examples somewhat appealing to the more budget-conscious or casual collector. This Choice AU representative exhibits luminous green-gold surfaces, with only minor wear over the high points of the design. No significant abrasions are observed. NGC ID# 26A6, PCGS# 8956

**1870-S Liberty Double Eagle, AU58
Popular Type Two Example**

- 4236 1870-S AU58 NGC.** The 1870-S Liberty double eagle claims a large mintage of 982,000 pieces, but high-grade specimens are elusive in today's market. This attractive near-Mint example exhibits well-detailed design elements with just a trace of friction on the high points, and lightly abraded orange-gold surfaces with most of the original mint luster intact. NGC ID# 26A9, PCGS# 8959

- 4237 1872-S AU58 NGC.** Small Squat S. A honey-gold representative with substantial luster and good eye appeal for its numerical grade. Small to moderate marks frequent the obverse. The reverse displays relatively few abrasions. NGC ID# 26AF, PCGS# 8965

- 4238 1872-S AU58 PCGS.** A well struck sun-gold Type Two double eagle that displays unbroken cartwheel luster on the reverse. The obverse exhibits distributed small abrasions consistent with the grade. Micro S mintmark, and scarce as such, since most '72-S twenties have a Small Squat S. Examples with a Small Narrow S mintmark were also coined. NGC ID# 26AF, PCGS# 8965

- 4239 1873 Open 3 MS62 NGC.** A splendid Mint State example of the Type Two double eagle, this example has frosty yellow-gold luster and minimal surface marks for the grade. The 1873 Open 3 is a relatively plentiful variety that is ideal for type collectors. NGC ID# 26AH, PCGS# 8967

- 4240 1873 Open 3 MS62 PCGS.** A pleasing MS62 example of this popular type coin, with well-detailed design elements and lightly marked yellow and rose-gold surfaces. The Open 3 variety is somewhat more available than its Closed 3 counterpart, which was only struck early in the year. NGC ID# 26AH, PCGS# 8967

- 4241 1873-S Closed 3 AU58 NGC.** Small S. This apricot-gold double eagle has a sharp strike and is peppered with minor abrasions, customary for the denomination and grade. Certified in a prior generation holder. NGC ID# 26AL, PCGS# 8969

**1873-S Twenty Dollar, AU58
Scarce Open 3 Variety**

- 4242 1873-S Open 3 AU58 NGC.** Small S. The Open 3 logotype was introduced fairly early in the year, but the majority of 1873-S twenties are the Closed 3 variety, due to slow shipment of dies from Philadelphia to San Francisco. The Open 3 '73-S is scarce at the near-Mint level, and its Type Two status provides further interest. The present partly lustrous butter-gold piece is well struck and exhibits no more than the expected number of small abrasions. NGC ID# 26AM, PCGS# 8979

**1873-S Double Eagle, Near-Mint
Scarce Open 3 Variety**

- 4243 1873-S Open 3 AU58 NGC.** Small S. A sun-gold Borderline Uncirculated double eagle that boasts a crisp strike and the scarcer date logotype for the issue. Minor marks are distributed across the obverse but the reverse is only lightly abraded and displays vibrant cartwheel luster. While the Open 3 is more prevalent on the Philadelphia issue, the opposite is true for its San Francisco cousin. All '73-CC twenties have a Closed 3. NGC ID# 26AM, PCGS# 8979

**1874-S Double Eagle, MS61
Appealing Reverse**

- 4244 1874-S MS61 NGC. CAC.** Yellow-to-orange surfaces are broadly lustrous despite scattered moderate abrasions. The stars are generally solid, though Liberty's hair is soft below the coronet. Noteworthy as a Mint State Type Two Liberty double eagle. PCGS has graded 63 numerically finer examples (1/15). NGC ID# 26AR, PCGS# 8972

- 4245 1875-S MS61 NGC. CAC.** A lustrous twenty, obviously Mint State and brilliant. More than 1.2 million pieces were struck and most were exported, only to return into collector hands in the past 40 years or so. The current coin offers attractive medium-gold color and, although typically bagmarked, it is a sharp and flashy example. NGC ID# 26AU, PCGS# 8975

**1876-CC Double Eagle, XF40
Last Type Two CC-Mint Twenty**

- 4246 1876-CC XF40 NGC. CAC. Variety 2-C.** Pale khaki-gold toning embraces both sides of this Carson City double eagle. A bit scuffy on the obverse, but cleaner on the reverse. This is an example of the 2-C variety, with both Cs in the mintmark close together and entirely left of the second T in TWENTY. This mintmark variety was discovered by cataloger Brian Koller of Heritage Auctions. NGC ID# 26AW, PCGS# 8977

**1876-CC Twenty Dollar, XF45
Partly Lustrous Yellow-Gold Surfaces**

- 4247 1876-CC XF45 NGC. Variety 5-A.** The 1876-CC claims the highest mintage among Carson City twenties (138,441 coins struck), but it still proves more challenging than several other later dates in the CC set. Partial luster illuminates the design recesses, and the devices retain much detail despite moderate blending over the high points. Light yellow-gold surfaces show an even number of abrasions over each side. NGC ID# 26AW, PCGS# 8977

1876-S Twenty Dollar, Sharply Struck MS62

- 4248 1876-S MS62 PCGS.** The Centennial S-mint Liberty Head double eagle, the 1876-S, gets an extra dose of popularity as a result of its date and mintmark. Orange-gold and yellow-gold areas alternate on this sharply struck example. The surfaces show few abrasions overall, but the grade is held back by a couple of scrapes on Liberty's cheek, neck, and in the obverse fields, as well as by minor copper spots on each side. NGC ID# 26AX, PCGS# 8978

- 4249 1878 MS61 PCGS.** Alluring luster accents the splendid yellow-gold surfaces. The details are crisply defined, but myriad abrasions limit the grade. The 1878 becomes scarce in finer grades.
Ex: Long Beach Signature (Heritage, 9/2008), lot 4202.
From The Collection of Philip M. Peterson. NGC ID# 26B3, PCGS# 8985

- 4250 1878-S MS61 PCGS.** A pleasing Type Three double eagle, with lilac and pink accents over the rich and frosted yellow-gold surfaces. Numerous obverse abrasions define the assigned grade. A sharp, early San Francisco issue — well-struck — one that is less available than many later dates. NGC ID# 26B5, PCGS# 8987

- 4251 1879 MS61 PCGS.** The 1879 Liberty double eagle is a scarce issue in MS61 condition. This attractive Mint State example displays sharply detailed design elements and lustrous orange-gold surfaces with a scattering of minor contact marks that explain the grade. NGC ID# 26B6, PCGS# 8988

- 4252 1880 AU55 PCGS.** The sharply detailed design elements of this attractive Choice AU example show just a trace of friction on the high points and the lightly abraded greenish-gold surfaces retain most of their original mint luster. Population: 59 in 55, 80 finer (1/15). NGC ID# 26BA, PCGS# 8992

**1880 Liberty Double Eagle, AU58
Elusive Issue in High Grade**

- 4253 1880 AU58 PCGS.** From a small mintage of 51,456 pieces, the 1880 Liberty double eagle is very scarce in AU58 condition, and Mint State examples are rare. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces show prooflike reflectivity in sheltered areas. Population: 44 in 58, 36 finer (1/15). NGC ID# 26BA, PCGS# 8992

**1880-S Double Eagle, MS61
Strong Obverse Color**

- 4254 1880-S MS61 PCGS.** The obverse is strong peach-gold, the reverse paler yellow. Though significantly abraded on and around Liberty's portrait, this sharply struck 1880-S double eagle nonetheless is attractive for the MS61 grade and the reverse in particular is smooth. PCGS has graded 88 numerically finer pieces (1/15). NGC ID# 26BB, PCGS# 8993

- 4255 1881-S MS61 PCGS.** Due to the rarity of its Philadelphia counterpart, the 1881-S double eagle is the issue of choice for date representation. This example is moderately abraded as the grade suggests, but exhibits sharp design definition and warm honey-gold luster. NGC ID# 26BD, PCGS# 8995

1882-CC Twenty, XF45
Appealing Reddish-Gold Surfaces

- 4256 1882-CC XF45 NGC. Variety 1-B.** The second C in the mintmark is positioned slightly higher than the first. Any double eagle that comes with a Carson City pedigree is highly prized by collectors. From a mintage of 39,140 pieces, the 1882-CC is one of the more available issues from the facility, but it is scarcer than its S-mint counterpart. This XF example briefly served its intended role as a medium of exchange before being retired from circulation. The reddish-gold surfaces retain strong detail aside from expected high-point friction, and abrasions are evenly scattered throughout. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, XF45

- 4257 1883-CC XF45 NGC. Variety 2-A.** A lemon-gold representative with moderate wear on the curls and unobtrusive marks on the field near the shoulder curl. A mintage of less than 60,000 pieces ensures better date status for this nonetheless collectible Carson City issue.
Ex: Orlando FUN Signature (Heritage, 1/2009), lot 5779.
From The Collection of Philip M. Peterson. NGC ID# 26BH, PCGS# 8999

- 4258 1883-S Misplaced Date, FS-501, MS62 PCGS.** Tall S. The top of an errant 8 emerges from the dentils beneath the second 8. The variety is undesignated on the PCGS holder. This peach-gold example has satin luster and a good strike. As is usual for the MS62 level, both sides show a number of small abrasions. PCGS# 145737 Base PCGS# 9000
- 4259 1884-S MS62 PCGS.** The lightly abraded fields are semiprooflike and attractive for the grade, and a bold strike shows every strand of Liberty's hair. Lilac overtones swirl with the medium-gold mint luster. An appealing twenty for the grade, with a few too many marks for full Select status. NGC ID# 26BL, PCGS# 9002
- 4260 1885-S MS62 PCGS.** This is a pleasing example for the grade, with sharp design elements and frosty orange-gold luster. No major abrasions are present, but we instead note just uniform chatter that limits the grade. NGC ID# 26BP, PCGS# 9005

1888 Double Eagle, Orange-Gold MS62

- 4261 1888 MS62 NGC.** Deep orange-gold color on each side complements surfaces that are well-struck and relatively unabraded, save for a cluster of small marks on the jawline and the obverse field nearby. Excellent eye appeal shows for the grade. The 1888 twenty dollar issue saw a surprisingly low mintage of 226,000 coins. NGC reports only 12 numerically finer (1/15). NGC ID# 26BT, PCGS# 9008
- 4262 1888-S MS62 NGC.** Bright yellow-gold luster delivers a satiny cartwheel effect on this sharply struck Type Three representative. Chatter on Liberty's cheek and the adjacent field limits the grade, but does not overly impact the eye appeal. NGC ID# 26BU, PCGS# 9009
- 4263 1888-S MS62+ PCGS. CAC.** The vivid orange-gold surfaces of this high-end MS62 example show a scattering of minor contact marks, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26BU, PCGS# 9009
- 4264 1889 MS61 PCGS.** The 1889 Liberty double eagle is a scarce issue in the context of the series, from a low-mintage of 44,070 pieces. This well-detailed Mint State example displays vivid orange-gold surfaces with a scattering of minor contact marks and vibrant mint luster on both sides. NGC ID# 2695, PCGS# 9010
- 4265 1889-S MS62 PCGS.** Honey and green-gold hues intermingle over both sides of this Type Three Liberty double eagle, with frosty underlying luster and sharply defined motifs. Light, scattered abrasions define the grade. NGC ID# 26BW, PCGS# 9012

1890 Double Eagle, MS62
Rare Any Finer

- 4266 1890 MS62 PCGS.** While the 1890 double eagle is available for a price in grades through MS62, anything finer is a condition rarity. This example is attractive for the designation with generous lemon-gold obverse luster that turns more peach on the reverse. Well-struck overall, though some softness and coppery effects are noted at the hair over Liberty's ear. NGC ID# 26BX, PCGS# 9013

**1890-CC Twenty, AU53
Rare Variety 2-B**

4267 1890-CC AU53 NGC. Variety 2-B. A sun-gold Carson City type coin with pleasing sharpness and fewer marks than is usual for the grade. Luster is especially plentiful on the reverse. The rarer of the two 1890-CC marriages. Approximately 90% of the issue is Variety 1-A. The mintmark is partly over the D in DOLLAR, allowing attribution with the unaided eye. NGC ID# 26BY, PCGS# 9014

4268 1890-S MS62 PCGS. CAC. A frosted, greenish-gold example of this desirable San Francisco date. Early collectors found the issue challenging in Uncirculated grades, and it remains so in MS63 or finer condition, making attractive MS62 coins like this a wise selection. Strongly struck with sharp mint luster and minimal marks for the grade. NGC ID# 26BZ, PCGS# 9015

4269 1891-S MS63 PCGS. Medium S. An orange-gold representative with a glimpse of lilac toning on the right obverse field. Sharply struck and lustrous. Lightly marked for the grade despite a field cluster above the arrowheads. NGC ID# 26C4, PCGS# 9018

4270 1892-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. A low mintage Carson City issue from the waning days of coinage at the Old West facility. The apricot-gold surfaces are minimally bagmarked aside from the cheek, which shows a couple of reed impressions. Patches of hairlines are noted on the upper reverse, and the remainder of the coin is faintly hairlined. A few specks of debris on the left-side rays likely led to the cleaning. NGC ID# 26C6, PCGS# 9020

1892-S Double Eagle, MS63

4271 1892-S MS63 PCGS. Rich orange-gold overall deepening to peach at parts of the fields and paler color elsewhere. Liberty's hair offers intricate detail, and though a few wispy abrasions and small marks affect her portrait and the nearby fields, overall this is an attractive coin for the Select level. NGC ID# 26C7, PCGS# 9021

4272 1893 MS63 PCGS. Sharply struck with excellent luster and an alluring mixture of lime and terra cotta coloration across both sides. There are surprisingly few surface marks for the grade. "As with nearly all Liberty Head double eagles, choice examples can be elusive," according to Jeff Garrett and Ron Guth (2006). *Ex: Baltimore Signature (Heritage, 7/2008), lot 3350. From The Collection of Philip M. Peterson.* NGC ID# 26C8, PCGS# 9022

4273 1893-S MS63 PCGS. Produced in large numbers, but widely subjected to rough storage and transport in overseas trade, the 1893-S Liberty double eagle is a challenging issue in grades above MS63. This attractive Select example offers well-detailed design elements and lightly marked peach-gold surfaces with vibrant mint luster throughout. NGC ID# 26CA, PCGS# 9024

4274 1893-S MS63 NGC. Distinctly scarce in higher Mint State conditions, this San Francisco issue carries a slightly higher perceived value because of the numismatically significant date. Few pieces are certified in finer condition by either service. This example shows a natural, minimally abraded appeal with soft luster and rich gold color. Just 21 pieces are certified numerically finer by NGC (1/15). NGC ID# 26CA, PCGS# 9024

4275 1894-S MS63 PCGS. Bright, medium-yellow gold color displays wisps of pink-gold color, especially on the obverse. The design features are well impressed throughout, and the coin is notably less abraded than expected, with smooth fields and only a few ticks on the obverse portrait. Bold mint luster covers both sides. NGC ID# 26CC, PCGS# 9026

4276 1895 MS64 NGC. The 1895 Liberty double eagle is conditionally rare in grades above the MS64 level. This sharply detailed Choice specimen displays lustrous orange-gold surfaces with few signs of contact. NGC has graded nine numerically finer examples (1/15). *From The Collection of Philip M. Peterson.* NGC ID# 26CD, PCGS# 9027

4277 1895 MS62 Prooflike NGC. The deeply reflective yellow and orange-gold surfaces of this attractive MS62 example show a scattering of minor contact marks on both sides that explain the grade. The design elements are sharply detailed throughout. Census: 23 in 62 Prooflike, 5 finer (1/15). PCGS# 79027

4278 1895-S MS63 NGC. This attractive Select example displays sharply detailed design elements and lightly marked peach-gold surfaces with vibrant mint luster throughout. Eye appeal is outstanding. NGC ID# 26CE, PCGS# 9028

4279 1895-S MS63 NGC. Attractive an lustrous, with a full strike and brilliant, sun-gold color and olive-gold highlights. Abrasions are light but numerous on the portrait and over the obverse fields. The reverse appears about a full point finer. Elusive in higher grades. NGC ID# 26CE, PCGS# 9028

4280 1896-S MS63 PCGS. A deeply frosted and strongly lustrous double eagle with the appeal of a higher-graded coin. Few marks disturb the surfaces for the assigned grade. The motifs show a bold strike as typical for this San Francisco issue. The abundant mint frost imparts olive-gold and rose-red accents over the medium gold surfaces. Somewhat scarce this nice. NGC ID# 26CG, PCGS# 9030

4281 1900 MS64+ PCGS. The 1904 double eagle is always popular for its turn-of-the-century date. This high-end Choice example exhibits sharply detailed design elements and the well-preserved peach-gold surfaces show only minor signs of contact. NGC ID# 26CP, PCGS# 9037

4282 1900 MS64+ NGC. A lustrous green-gold near-Gem Liberty type coin that has a precise strike and a well preserved reverse. The obverse displays only wispy grazes. A conditionally scarce issue any finer. NGC ID# 26CP, PCGS# 9037

4283 1900-S MS63 PCGS. New Reverse. In mid-1900, a new reverse hub was introduced. Among the incremental changes, the eagle's mouth is less widely opened, and the back of the head shows smooth feathers. The present sharply struck example has lustrous sea-green and orange surfaces. The reverse is minimally marked and the obverse is moderately abraded. NGC ID# 26CR, PCGS# 9038

**1901-S Twenty Dollar, Lustrous MS63
Excellent Type Representative**

4284 1901-S MS63 NGC. CAC. The late-series S-mint Liberty Head twenties are popular and attractive issues in this long series. The present piece is an excellent example of the type, showing a few small marks on surfaces that boast good luster, attractive apricot-gold color, and a nice, sharp strike. Survivors at the MS64 grade level are far more elusive. NGC ID# 26CT, PCGS# 9040

4285 1902-S MS63 PCGS. Original and well-struck, this Select Uncirculated double eagle displays frosted surfaces with cartwheel mint luster. An attractive and minimally marked coin with most abrasions in the left obverse field. Excellent eye appeal, nice for the grade. NGC ID# 26CV, PCGS# 9042

4286 1903 MS64+ NGC. Pinpoint definition is evident on all design elements of this high-end Choice example, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. NGC ID# 26CW, PCGS# 9043

**1903 Double Eagle
Brilliant, Frosted Gem Twenty**

4287 1903 MS65 PCGS. While a fair number of MS65 coins survive, this issue is nearly unavailable any finer according to the population reports. PCGS has seen just three numerically finer examples, and NGC lists 10 higher-graded coins in their Census (1/15). The present coin is an impressive Gem double eagle, with minimal marks and irresistible eye appeal. Vibrant luster enhances the bold motifs and opulent, frosted-gold surfaces. NGC ID# 26CW, PCGS# 9043

**1904 Twenty Dollar, MS65
Brilliant and Attractive**

4288 1904 MS65 NGC. CAC. The obverse shows prooflike tendencies while the reverse is fully brilliant and frosty. Both sides are free of any significant marks, with nice luster and a bold strike. More than 6 million double eagles were struck in Philadelphia in 1904, making the date a favorite of type collectors and specialists in Gem gold. The CAC endorsement is a valuable assurance of quality at this grade. NGC ID# 26CY, PCGS# 9045

4289 1904-S MS62 Prooflike NGC. The pleasing yellow and greenish-gold surfaces of this attractive MS62 example show a scattering of minor contact marks on both sides, but the fields are brightly reflective and the design elements are sharply rendered. Census: 45 in 62 (1 in 62 ★) Prooflike, 28 finer (1/15). PCGS# 79046

**1905-S Double Eagle, MS63
Appealing Late-Series Issue**

4290 1905-S MS63 NGC. This is a lovely example of this high-mintage issue of more than 1.8 million pieces. Prevailing orange-gold patina deepens to reddish-orange on the lower portions of each side. The face and neck of Liberty show a few trivial marks, but the surfaces are well-preserved overall and boast a sharp strike as a bonus. An appealing example of this late-series issue. NGC ID# 26D3, PCGS# 9048

**1906-D Liberty Double Eagle, MS64
First Denver Mint Issue**

4291 1906-D MS64 PCGS. The 1906-D Liberty twenty represents the first year of coinage at the popular Denver Mint, an important consideration for mintmark type collectors. This attractive Choice example offers sharply detailed design elements and lustrous orange-gold surfaces with few signs of contact. PCGS has graded only 13 numerically finer examples (1/15). NGC ID# 26D5, PCGS# 9050

4292 1906-S MS63 PCGS. Frosty and attractive with medium-gold patina and just a scattering of tiny marks across the lustrous surfaces. A bold strike is seen on both sides, as expected for this normally well-produced San Francisco issue. Possibly a repatriated export coin, although few Select Uncirculated examples were among the many coins that returned to this country. NGC ID# 26D6, PCGS# 9051

4293 1907-S MS63 NGC. A lightly abraded, peach-gold twenty from the final year of Liberty twenties. Sharply struck with original color and nice luster, although a bit busy with small marks on the cheek and a couple of small, red copper marks on the reverse. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

4294 1907 Arabic Numerals MS63+ NGC. This high end Select specimen exhibits well-detailed design elements with just a touch of softness on the eagle's belly. The lustrous orange-gold surfaces show only minor signs of contact and eye appeal is quite strong. NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS66+ From The Wells Fargo Hoard

4295 1908 No Motto, Wells Fargo Nevada MS66+ NGC. CAC. The magnificent Wells Fargo Hoard yielded some of the finest No Motto 1908 double eagles known to collectors, including the present Plus-graded Premium Gem. Both sides exhibit frosty, straw-gold luster and impeccable preservation. Excellent striking sharpness further contributes to the eye appeal. PCGS# 99142

4296 1908 Motto MS63 NGC. CAC. The 1908 Saint-Gaudens double eagle with the motto IN GOD WE TRUST is an important first-year type coin. This attractive Select specimen is well-detailed and lustrous, with pleasing orange-gold surfaces that show a few well-scattered minor contact marks. NGC ID# 26F8, PCGS# 9147

1908-S Saint-Gaudens Double Eagle, XF45 Low-Mintage Early Series Issue

4297 1908-S XF45 NGC. Only 22,000 Saint-Gaudens double eagles were struck at the San Francisco Mint in 1908, a small production total for any 20th century coin. This Choice XF example displays some light wear on the design elements and a few minor abrasions on the lustrous orange-gold surfaces. NGC ID# 26FA, PCGS# 9149

4298 1908-S — Scratch — PCGS Genuine. AU Details. The typical Saint-Gaudens double eagle issue has a mintage of more than 500,000 pieces. But the 1908-S has a stingy emission of 22,000 pieces, and is a favorite of speculators. A moderately worn butter-gold representative with mildly bright surfaces. A diagonal pincscratch on the upper obverse confirms the PCGS designation. NGC ID# 26FA, PCGS# 9149

4299 1910 MS64 PCGS. CAC. The 1910 Saint-Gaudens double eagle is a popular early series issue from a mintage of 482,000 pieces. This attractive Choice example offers well-detailed design elements and light orange-gold surfaces with vibrant mint luster and only minor signs of contact. Eye appeal is outstanding. NGC ID# 26FF, PCGS# 9154

4300 1910-S MS64 PCGS. This attractive Choice example exhibits orange and reddish-gold surfaces that radiate vibrant mint luster and show only minor signs of contact. The sharply detailed design elements add to the outstanding eye appeal. NGC ID# 26FH, PCGS# 9156

4301 1913 MS63 NGC. A sharply struck and carefully preserved example of this scarce lower-mintage issue. Lustrous and attractive for this sometimes abraded grade.

Ex: Santa Clara Signature (Heritage, 11/2002), lot 7930.

From The Collection of Philip M. Peterson. NGC ID# 26FN, PCGS# 9161

4302 1914-S MS65 NGC. A sharply struck representative, this coin is also free of any significant abrasions that would inhibit the eye appeal. Intermingled green and rose-gold hues encompass each side. Numerically finer representatives of this San Francisco issue are seldom seen. NGC ID# 26FU, PCGS# 9166

4303 1914-S MS65 PCGS. The 1914-S Saint-Gaudens double eagle was produced in large numbers and is a popular choice of mintmark type collectors. This attractive Gem is sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. NGC ID# 26FU, PCGS# 9166

4304 1914-S MS65 NGC. As can be seen by the certified population charts, the availability of the 1914-S double eagle plummets drastically above the Gem grade level. This MS65 representative displays excellent striking sharpness, with uniformly satiny wheat-gold luster over each side. A few minor disruptions in the luster are noted, but none are out of line for the grade. NGC ID# 26FU, PCGS# 9166

4305 1915-S MS65 NGC. The 1915-S Saint-Gaudens double eagle mirrors the 1914-S in availability, being readily obtainable in Gem and lower grades, but elusive in MS66. This MS65 coin shows satiny rose-gold luster and well-defined devices. A few light grazes limit the grade. NGC ID# 26FW, PCGS# 9168

4306 1915-S MS65+ NGC. A dusky orange-gold and lime-green Gem with sweeping luster and a bold strike. The reverse is exceptionally free from contact, and the obverse displays only unimportant grazes, mostly on Liberty's legs and the upper field. NGC ID# 26FW, PCGS# 9168

4307 1916-S MS65 PCGS. A highly lustrous Gem example of this popular San Francisco issue. The peach-gold surfaces have few marks overall, though a couple of ticks appear on Liberty's well-defined figure.

Ex: Long Beach Signature (Heritage, 2/2007), lot 5219.

From The Collection of Philip M. Peterson. NGC ID# 26FX, PCGS# 9169

4308 1920 MS63+ PCGS. A high-end Select example of this popular date, with well-detailed design elements and brightly lustrous orange-gold surfaces that show only minor signs of contact. Eye appeal is strong for the grade. NGC ID# 26FY, PCGS# 9170

4309 1923-D MS65 NGC. CAC. The 1923-D is a readily available issue in the series and a frequent choice among type collectors. This Gem is minimally marked, and the luster, strike, and eye appeal are certainly suggestive of a higher grade. Housed in a prior generation holder. NGC ID# 26G6, PCGS# 9176

- 4310 1924 MS65+ PCGS. CAC.** This high-end Gem exhibits sharply defined design elements and vivid yellow-gold surfaces, with vibrant mint luster and hints of green and red patina. The eye appeal is extraordinary. NGC ID# 26G7, PCGS# 9177
- 4311 1925 MS66 NGC.** The 1925 Saint-Gaudens double eagle is an available date in MS66 condition, but the issue is conditionally rare in higher grades. This well-detailed Premium Gem displays lustrous yellow and rose-gold surfaces with only minor signs of contact. NGC has graded 25 numerically finer examples (1/15). NGC ID# 26GA, PCGS# 9180
- 4312 1926 Tripled Die Obverse, FS-101, MS64 NGC.** The designer's monogram and date tripled, as are the nearby rays and stars. A lustrous apricot and green-gold near-Gem. Crisply struck and only lightly abraded. Census: 11 in 64, 8 finer (1/15). PCGS# 145744
- 4313 1927 MS65 PCGS.** Lime-green borders cede to orange fields and motifs. Lustrous and nicely struck with only occasional minor abrasions. A popular Saint-Gaudens type issue. Certified in a first generation holder. NGC ID# 26GG, PCGS# 9186
- 4314 1927 MS66+ NGC.** The 1927 Saint-Gaudens twenty is a plentiful date in lower Mint State grades, but it is quite elusive above the MS66 level. This sharply detailed example offers well-preserved orange-gold surfaces with vibrant mint luster. NGC has graded 57 numerically finer examples (1/15). NGC ID# 26GG, PCGS# 9186

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66
Gorgeous Color and Preservation

- 4315 1893 Isabella Quarter MS66 NGC.** Richly toned in powder-blue and pinkish-silver shades, with satiny surfaces and a bold strike overall. The Premium Gem fields are essentially mark-free. An oddity in the classic commemorative series both for the quarter denomination and for its obvious attention to the artistic design. Only the date seems out of place, floating in the right obverse field like a fleeting afterthought. NGC ID# 28HR, PCGS# 9220
- 4316 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C.** Rich orange borders frame pearl-gray fields and devices. A lustrous and sharply struck example with fewer marks than expected for the MS63 grade. DuVall 2-C is promptly attributed by obverse repunching on the second S in STATES. NGC ID# 28N8, PCGS# 9222
- 4317 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** An available variety, with the second S in STATES repunched. This example is boldly struck, with thick, satiny luster and remarkably few distractions for the grade. Both sides show consistent olive-gold color, with areas of pale amber and champagne also observed on the reverse. NGC ID# 28N8, PCGS# 9222
- 4318 1921 Alabama MS66 PCGS.** This impressive Premium Gem is sharply detailed on the obverse, but the eagle is a little soft. The lustrous surfaces are toned in dusky shades of greenish-gold, lavender, and amber. PCGS has graded three numerically finer examples (1/15). NGC ID# 28HT, PCGS# 9224

- 4319 1921 Alabama 2x2 MS66 PCGS.** The 1921 Alabama half dollar 2x2 variant is very rare in grades above MS66. This attractive Premium Gem exhibits well-detailed design elements and vibrant mint luster under attractive shades of champagne-gold toning. PCGS has graded seven numerically finer examples (1/15). NGC ID# 28HS, PCGS# 9225
- 4320 (5) 1936 Albany MS65 PCGS. CAC.** All five Albany, New York Charter commemorative half dollars are housed in mid-generation blue label PCGS holders with a common numeric grade of MS65 and CAC green labels for excellent technical quality. The coins are uniformly well-struck, with very few disruptions in the satiny luster that illuminates each piece. A blush of pale olive-gold toning is the norm, although one piece also exhibits deeper violet tinges around the peripheries. (Total: 5 coins) NGC ID# 28HU, PCGS# 9227
- 4321 1937 Antietam MS67 PCGS.** This delightful Superb Gem exhibits vivid shades of sea-green and lavender toning, with impeccably preserved lustrous surfaces and sharply detailed design elements underneath. PCGS has graded 17 numerically finer examples (1/15). NGC ID# 28HV, PCGS# 9229
- 4322 1935-S Arkansas MS67 PCGS.** Shades of lavender-gray, greenish-gold, and amber toning enhance the well-preserved surfaces of this sharply detailed Superb Gem. The 1935-S Arkansas half dollar claims a small distribution of 5,506 pieces. Population: 22 in 67 (2 in 67+), 0 finer (1/15). NGC ID# 28HY, PCGS# 9235

1936 Arkansas Centennial Half Dollar
Satiny Superb Gem, None Certified Finer

- 4323 1936 Arkansas MS67 PCGS.** Arkansas was part of the Missouri Territory in the early 1800s, and was admitted to the Union on June 15, 1836. Commemorative half dollars were issued from 1935 through 1939, but the issue never met with much success amid a general downturn in popularity of commemorative halves. This example shows no major marks with nice satiny luster. Areas of russet-gold toning provide extra appeal. The eagle is characteristically soft where the ribbon crosses the chest. Population: 15 in 67 (2 in 67+), 0 finer (1/15). NGC ID# 28HZ, PCGS# 9237
- 4324 1936-D Arkansas MS67 PCGS. CAC. Ex: W.P.E. Collection.** The 1936-D Arkansas Centennial half dollar was only issued as part of three coin sets, also containing an example each of the Philadelphia and San Francisco issues. The Denver Mint produced 9,660 pieces, of which only a few dozen survive in MS67 or finer condition. This piece is richly lustrous and sharply detailed throughout each side. A touch of light golden color is present throughout, and small tinges of amber and pine-green are also seen along the lower-right obverse border. Population: 34 in 67 (4 in 67+), 1 finer (1/15). NGC ID# 28J2, PCGS# 9238
- 4325 1937-D Arkansas MS67 NGC.** This sharply detailed Superb Gem exhibits satiny mint luster and well-preserved silver-gray surfaces, with a few hints of pale gold toning. Census: 13 in 67 (1 in 67 ★), 0 finer (1/15). NGC ID# 28J5, PCGS# 9242
- 4326 (5) 1936-S Bay Bridge MS65 PCGS. CAC.** A sharply struck quintet. Each example shows light to medium variegated tan-brown and pearl patina. Two of the pieces display minor marks on the bear. One of the coins is housed in an old green label holder. (Total: 5 coins) NGC ID# 28JD, PCGS# 9254

- 4327 (10) 1936 Bridgeport MS65 PCGS. CAC.** Each Bridgeport, Connecticut Centennial half is housed in a PCGS holder with a numeric grade of MS65 and a CAC green label placing it firmly within the Gem category. Nine of the coins reside in mid-generation blue label slabs, with the 10th example in an old green label holder. Striking quality is consistently pleasing on all pieces, and the preservation is equally uniform. Six of the coins, including the one in the green label holder, display a soft blend of lavender-gold and pale powder blue color, while two of the others show deeper olive and gold hues and the final two pieces are largely brilliant. (Total: 10 coins) NGC ID# 28JX, PCGS# 9279
- 4328 (5) 1936 Bridgeport MS66 PCGS. CAC.** The five Bridgeport, Connecticut Centennial half dollars offered in this lot are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels indicating firm quality for the grade. P.T. Barnum's hair is well-defined on each piece, and the surfaces are uniformly free of any significant abrasions, which is a plus on a design such as this with open fields and minimal fine details. Four of the coins show consistent light olive-gold color overall, while the fifth piece is essentially brilliant. Numerically finer examples of this commemorative issue are notably scarce. (Total: 5 coins) NGC ID# 28JX, PCGS# 9279
- 4329 1936-D Cincinnati MS67 NGC.** Smooth and unblemished, the mint luster rolls around each side uninterrupted by the abrasions that are so often seen on this popular Cincinnati commemorative half. The obverse is pearl-gray while the reverse has iridescent amber-gold toning, suggestive of many years residency in an original holder of issue. Census: 36 in 67 (2 in 67+, 5 in 67 ★), 3 finer (1/15).
Ex: Long Beach Signature (Heritage, 5/2003), lot 7114; New York Bullet Sale (Heritage, 12/2003), lot 2440; Portland Signature (Heritage, 3/2004), lot 6897. NGC ID# 28K2, PCGS# 9284
- 4330 1936-S Cincinnati MS66 PCGS. CAC.** A satiny Premium Gem with exceptional eye appeal, this San Francisco Mint half dollar displays rich gold and iridescent toning that gathers nicely near the borders. Population: 60 in 66 (2 in 66+), 3 finer (1/15). NGC ID# 28K3, PCGS# 9285
- 4331 (10) 1936 Cleveland MS65 PCGS. CAC.** All 10 Cleveland Centennial half dollars are housed in PCGS holders with a common numeric grade of MS65 and a CAC green label. Nine of the coins are encapsulated in mid-generation blue label holders, while the 10th piece resides in an old green label holder. Each coin displays pale champagne and ice-blue toning, with a few pieces leaning toward a uniform light golden hue. Satiny luster illuminates well-preserved surfaces on each piece, and there is no mentionable striking weakness observed. (Total: 10 coins) NGC ID# 28K4, PCGS# 9288
- 4332 (5) 1936 Cleveland MS66 PCGS. CAC.** All five Cleveland Centennial halves are certified in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels highlighting their outstanding preservation. Intense, satiny luster is the hallmark of each piece, although well-struck devices also contribute to the eye appeal. Four of the coins exhibit just a faint hint of pale golden toning, with the fifth coin showing a slightly deeper champagne hue. Fewer examples are certified numerically finer. (Total: 5 coins) NGC ID# 28K4, PCGS# 9288
- 4333 1935 Connecticut MS67 PCGS. CAC.** This Connecticut Tercentenary half dollar boasts an impressive Superb Gem grade assessment from PCGS, of which the outstanding surface preservation is fully deserving. Both sides are boldly struck and awash in luminous, satiny luster, while pale rose-gold and sky-blue hues attest to the originality of the surfaces. Population: 72 in 67 (6 in 67+), 1 finer (1/15). NGC ID# 28K8, PCGS# 9299
- 4334 (5) 1936 Delaware MS65 PCGS. CAC.** This offering contains five individually PCGS-certified Delaware Tercentenary half dollars with a common numeric grade of MS65 and CAC green labels drawing attention to their excellent surface quality. Four of the coins are housed in mid-generation blue label holders, while the fifth example resides in an old green label slab. The finer details of the Old Swedes Church are well-defined on each piece and the sails of the *Kalmar Nyckel* exhibit only a few of the usual disruptions. Varying shades of olive-gold toning are the dominant colors on each representative. (Total: 5 coins) NGC ID# 28K9, PCGS# 9301
- 4335 (5) 1936 Elgin MS65 PCGS. CAC.** All five Elgin, Illinois Centennial commemorative halves are individually housed in PCGS holders with a common numeric grade of MS65 and CAC green labels drawing attention to their exceptional quality. Three of the coins reside in mid-generation blue label holders, while the other two are in old green label slabs. Each piece is well-struck with thick, frosty mint luster that reveals few disruptions, even upon magnified examination. A blush of pale lavender-gold toning warms each example, while a couple pieces also show deeper lemon-olive tinges around the obverse border. (Total: 5 coins) NGC ID# 28KA, PCGS# 9303
- 4336 (5) 1936 Elgin MS66 PCGS. CAC.** Each Elgin, Illinois Centennial half dollar is individually housed in a mid-generation blue label PCGS holder with a numeric grade of MS66 and a CAC green label indicating confirmed quality for the grade. All five coins are well-struck, but with some of the usual softness seen on the female figure on the reverse. Abrasions are almost nonexistent and thick, frosty luster is the norm. Four examples show varying shades of pale champagne to olive-gold toning, while the fifth piece stands out with a subtle ice-blue hue. (Total: 5 coins) NGC ID# 28KA, PCGS# 9303
- 4337 1936 Elgin MS67 PCGS. CAC.** This impressive Elgin half dollar has frosty luster beneath delicate champagne toning within a frame of deep burnt-orange peripheral patina. PCGS has only certified six finer examples (2/15). NGC ID# 28KA, PCGS# 9303
- 4338 1936 Elgin MS67+ PCGS. CAC.** Wisps of champagne toning appear over frosty mint luster on both sides of this Superb Gem, exhibiting a frame of peripheral burnt-orange and deep purple toning. NGC ID# 28KA, PCGS# 9303
- 4339 1936 Gettysburg MS66+ NGC. CAC.** Delicate shades of lavender-gray and ice-blue toning visit the well-preserved lustrous surfaces of this attractive high-end Premium Gem. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 28KB, PCGS# 9305
- 4340 1922 Grant With Star MS64 PCGS.** Satiny luster resides beneath deep lavender-gray and peach-gold toning on each side of this Choice With Star Grant Memorial half. The top portion of the portrait's hair is a trifle soft, but the strike is otherwise pleasing and the surfaces are free of mentionable abrasions. NGC ID# 28KC, PCGS# 9307
- 4341 1922 Grant With Star MS64 PCGS.** Pale creamy-gold luster blankets both sides of this Choice With Star Grant Memorial half, while a few areas of deeper amber are noticed over the upper obverse. The fields exhibit numerous die striations — mint-made — and there is a trifle of weakness over the high point of Grant's hair, as is typical. NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half Dollar
MS65, Struck-Through Obverse**

4342 1922 Grant With Star — Small Struck-Through Obverse — MS65 PCGS. A short and slender piece of wire was apparently struck into the obverse, over Grant's cheekbone. The wire later dislodged and is absent from the lot. Aside from the interesting Philadelphia Mint error, this low mintage commemorative half dollar is noteworthy for its attractive autumn-gold, plum-red, jade-green, lavender, and stone-gray toning. The obverse field displays the die polish lines characteristic of the issue. NGC ID# 28KC, PCGS# 9307

4343 1928 Hawaiian MS64 PCGS. A favorite key issue in the classic commemorative series, the Hawaiian Sesquicentennial half dollar had a low distribution of just 10,000 coins (plus eight pieces for assay purposes). This Choice example is well-struck, with the typically seen satin luster and areas of light golden and deeper olive toning. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Silver Commemorative Key**

4344 1928 Hawaiian MS64 NGC. From a small distribution of 9,958 pieces, the 1928 Hawaiian half dollar is the key to the silver commemorative series. This attractive Choice example exhibits well-detailed design elements and well-preserved surfaces, with vibrant mint luster and delicate shades of pale gold toning. NGC ID# 28KE, PCGS# 9309

4345 1928 Hawaiian MS64 PCGS. CAC. An unusually bold strike is the hallmark of this Choice Hawaiian half dollar, although the well-preserved surfaces also contribute to the overall appeal. Much of each side is bathed in pastel lavender and ice-blue color, but with deeper olive-gold splashes also observed in the left-hand regions of both sides. NGC ID# 28KE, PCGS# 9309

4346 1924 Huguenot MS67 PCGS. Delicate shades of green and gold visit the borders of this fully struck and highly lustrous Superb Gem. Immaculate aside from a few minute ticks on the conjoined portraits. Population: 57 in 67 (8 in 67+), 2 finer (1/15). NGC ID# 28KG, PCGS# 9314

4347 (5) 1946 Iowa MS67 PCGS. CAC. The last of the state centennial issues. Three pieces are essentially brilliant, and two coins exhibit peripheral autumn-brown toning. All are nicely struck and close to immaculate. Two of the coins are certified in green label holders. (Total: 5 coins) NGC ID# 28KJ, PCGS# 9316

4348 1918 Lincoln MS67 NGC. An impressive Superb Gem that is rarely equaled, this Lincoln half dollar has frosty luster beneath lovely orange, gold, and iridescent toning. Census: 76 in 67 (8 in 67 ★, 2 in 67+★), 6 finer (1/15). PCGS# 9320

4349 (10) 1936 Long Island MS65 PCGS. CAC. All 10 Long Island Tercentenary half dollars are housed in PCGS holders with a common numeric grade of MS65 and a CAC green label indicating outstanding quality. Nine of the coins reside in mid-generation blue label slabs, with the 10th coin housed in an old green label holder. The design elements are uniformly well brought up and thick, satiny luster prevails across the board. Five of the coins exhibit just a blush of light golden and ice-blue color, while the remaining pieces show slightly deeper hues of the same, accompanied by tinges of olive and lavender around the borders. (Total: 10 coins) NGC ID# 28KL, PCGS# 9322

4350 (5) 1936 Lynchburg MS65 PCGS. CAC. All five Lynchburg, Virginia Sesquicentennial halves are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS65 and a CAC green label. Striking quality is uniformly excellent, as is surface preservation. Each piece is toned a pale olive-gold hue, but with two of the coins slightly brighter than the other three. Satiny luster reflects light well as each piece is inspected beneath a lamp. (Total: 5 coins) NGC ID# 28KM, PCGS# 9324

4351 (5) 1920 Maine MS65 PCGS. CAC. All five Gems show varying degrees of light to medium tan-gold toning. All coins are coruscating and crisply struck. A couple of the coins display minor contact on the central reverse field. (Total: 5 coins) NGC ID# 28KN, PCGS# 9326

4352 (5) 1934 Maryland MS66 PCGS. This is a well-matched group of Premium Gem Maryland Tercentenary half dollars, with each coin showing crisp detail and light golden toning overall. Light contact on the highest points of the design elements limits the grade on each piece. All five coins are housed in mid-generation blue label PCGS holders with a common numeric grade of MS66. (Total: 5 coins) NGC ID# 28KP, PCGS# 9328

4353 (5) 1934 Maryland MS66 PCGS. CAC. This is a well-matched, high-grade group of Maryland Tercentenary commemorative half dollars, showcasing uniform light golden toning and sharply struck design elements. All five coins are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels calling attention to the outstanding surface quality and pleasing eye appeal. (Total: 5 coins) NGC ID# 28KP, PCGS# 9328

4354 1921 Missouri MS65 NGC. The excellent eye appeal of this Gem example is undeniable, and proceeds from a combination of shimmering luster, fine surface preservation, and subtly variegated pastel coloration. A popular early commemorative issue. Ex: *Central States Signature (Heritage, 4/2009)*, lot 3377; *Central States Signature (Heritage, 4/2011)*, lot 6034. NGC ID# 28KS, PCGS# 9330

4355 1921 Missouri MS65 PCGS. CAC. Struck to commemorate the 100th anniversary of Missouri's statehood, this Gem Missouri Centennial half dollar boasts outstanding detail definition, with satiny luster and largely undisturbed surfaces. Both sides show a faint ice-blue and champagne hue, with a few russet specks also present on the obverse. PCGS has seen only 39 numerically finer representatives (1/15). NGC ID# 28KS, PCGS# 9330

**1921 Missouri Centennial Half
Deeply Struck Premium Gem, Few Finer**

4356 1921 Missouri MS66 NGC. Robert Aitken became one of the first outside artists to design a commemorative coin when his models appeared on the two varieties of the Panama-Pacific fifty dollar gold piece, and the first such repeat artist with his commission for the 1921 Missouri half. The pleasing Premium Gem presented here is a delightful representative of Aitken's work. The frosty surfaces display subtle hints of sky-blue and rose-gold patina. Immensely appealing and one of the finest survivors known. Census: 36 in 66, 2 finer (1/15).
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2352. NGC ID# 28KS, PCGS# 9330

4357 1921 Missouri 2x4 MS64 PCGS. CAC. This is a lovely Choice example of the slightly scarcer 2x4 variant, and the surfaces exhibit fewer abrasions than are expected for the grade. Warm lavender-gold toning warms each side, allowing rich, satiny luster to shine through. NGC ID# 28KR, PCGS# 9331

4358 1923-S Monroe MS65 PCGS. CAC. Mottled olive and lavender-gray toning blankets each side of this Gem Monroe Doctrine commemorative half dollar, masking any grade-limiting abrasions. Satiny luster underlies the patina, illuminating the well-struck devices. NGC ID# 28KT, PCGS# 9333

4359 1923-S Monroe MS65 NGC. CAC. The low relief motifs on this Gem Monroe Doctrine Centennial half dollar are especially well brought up, and the surfaces are remarkably vibrant with fresh mint luster. Swirling shades of champagne and ice-blue toning encompass each side, while a lack of noticeable abrasions completes the eye appeal. NGC ID# 28KT, PCGS# 9333

4360 (5) 1938 New Rochelle MS66 PCGS. CAC. All five New Rochelle commemorative half dollars are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels. Each piece is well-struck with largely undisturbed surfaces. Satiny luster prevails on most examples, save for one which shows considerable semiprooflike mirroring in the fields. Shades of pale lavender and ice-blue accent light golden toning on each example, while one piece also shows a deeper olive-gold patina on the obverse. (Total: 5 coins) NGC ID# 28KU, PCGS# 9335

**1938 New Rochelle Half, MS67+
Superior Quality and Eye Appeal**

4361 1938 New Rochelle MS67+ PCGS. CAC. A degree of semiprooflike reflectivity accentuates the impeccably clean fields of this Plus-graded Superb Gem New Rochelle half dollar. The strike is bold and both sides exhibit radiant luster. Uniform olive-green and pale champagne hues encompass much of the obverse, while the reverse is essentially brilliant. Only five coins are numerically finer at PCGS (1/15). NGC ID# 28KU, PCGS# 9335

4362 (5) 1936 Norfolk MS66 PCGS. CAC. This group of Norfolk, Virginia Bicentennial half dollars is housed in five individual mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels drawing attention to the coins' outstanding quality for the grade. Close examination of each piece reveals boldly struck design elements and uniformly unblemished surfaces that yield rich, satiny luster. Three of the coins are consistently ice-blue in color with just a few hints of deeper champagne throughout; the fourth piece is more evenly toned light golden, and the final example stands out with olive and russet toning in the recesses. (Total: 5 coins) NGC ID# 28KV, PCGS# 9337

4363 (5) 1936 Norfolk MS67 PCGS. CAC. This eye-catching group of coins is housed in five individual mid-generation blue label PCGS holders with a common numeric grade of MS67 and CAC green labels confirming the impeccable preservation. Each piece is boldly struck with thick, satiny mint luster. A faint lavender-gold hue tints both sides of each example, with one representative also displaying small tinges of olive in the border recesses. A well-matched, high-end group of Norfolk, Virginia Bicentennial halves. (Total: 5 coins) NGC ID# 28KV, PCGS# 9337

4364 1936 Norfolk MS68 PCGS. CAC. This is a beautiful, lustrous, and conditionally scarce example of the popular commemorative that celebrates the historical advancements of this Virginia port city, that now acts as home to the Atlantic Fleet of the United States Navy. Pastel lavender and ice-blue hues yield small mint-gold accents amid sharp motifs and seemingly flawless surfaces. PCGS and NGC have each certified one numerically finer example (1/15).
Ex: FUN Signature (Heritage, 1/2005), lot 10685. NGC ID# 28KV, PCGS# 9337

4365 (5) 1937-D Oregon MS66 PCGS. CAC. All five Oregon Trail commemorative half dollars are housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels directing the viewer's attention to their intense eye appeal and quality. All five pieces exhibit a pale champagne hue, although one coin is slightly deeper than the others. The striking quality is fairly uniform, being sharp on all but one coin, which is a trifle soft on the rearmost upright of the wagon on the reverse. (Total: 5 coins) NGC ID# 28L5, PCGS# 9347

**1938-D Oregon Trail Half, MS68 ★
Outstanding Visual and Technical Quality**

- 4366 1938-D Oregon MS68 ★ NGC.** The distribution total for the 1938-D Oregon Trail half dollar was just 6,000 pieces (plus five coins for assay purposes), sold as part of three-coin sets along with an example each of the Philadelphia and San Francisco issues. This superb Star-designated MS68 example displays impeccable preservation and color, with both sides showing shades of deep sun-gold, crimson, olive, and champagne. Census: 61 in 68 (1 in 68+, 35 in 68 ★, 1 in 68+★), 2 finer (1/15). NGC ID# 28L7, PCGS# 9349

**1939-D Oregon Trail Half, MS68
None Certified Numerically Finer**

- 4367 1939-D Oregon MS68 NGC.** The Oregon Trail commemorative half dollar series finally came to an end in 1939, a year in which the Denver mint struck only 3,000 examples (plus four coins for assay purposes). This satiny MS68 representative features immaculately preserved and seemingly brilliant surfaces with strongly struck design detail. Census: 28 in 68 (14 in 68 ★, 2 in 68+★), 0 finer (1/15). NGC ID# 28LA, PCGS# 9353
- 4368 1939-S Oregon MS67 PCGS. CAC.** Rich, satiny luster yields tinges of pale olive-gold color over otherwise consistently lavender-blue surfaces. The strike is well-executed and close examination is needed to find any grade-limiting imperfections on the delicately preserved surfaces. PCGS has seen only eight numerically finer representatives of this final-year San Francisco issue (1/15). Ex: *Pittsburgh Signature (Heritage, 10/2011), lot 4428*. NGC ID# 28LB, PCGS# 9354
- 4369 1915-S Panama-Pacific MS66 NGC.** The 1915-S Panama-Pacific half dollars were struck to celebrate the opening of the Panama Canal and the recovery of San Francisco after the 1906 earthquake. A net total of 27,134 pieces was distributed. This impressive Premium Gem is sharply detailed and lustrous, with well-preserved surfaces that show mingled shades of violet, lavender-gray, and golden-brown toning. NGC ID# 26H7, PCGS# 9357
- 4370 1915-S Panama-Pacific MS66 NGC. CAC.** The only silver commemorative issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915, the Panama-Pacific half dollar also had the highest mintage of the five different commemorative issues (27,134 pieces). The mintage, however, was still rather small, and today, Premium Gem examples are only infrequently seen, and finer coins are scarce. This example shows tinges of deep olive and russet toning around the margins, with light golden hues over the central regions. The strike is slightly soft on the highest points of the obverse, though the overall appeal is hardly affected. NGC ID# 26H7, PCGS# 9357

- 4371 1915-S/S Panama-Pacific, FS-502, MS65 NGC. CAC.** The upper serif of an errant S mintmark is evident in the field immediately above the primary. This Gem is well-struck on the relief elements and shows smooth, satiny luster in the recesses. Deep olive-gold and lavender-gray patina encompasses each side, masking any grade-limiting flaws and accentuating the luster. PCGS# 511601 Base PCGS# 9357

- 4372 (5) 1920 - 1921 Pilgrim MS65 PCGS. CAC.** This offering contains four 1920 Pilgrim Tercentenary half dollars and one 1921 example, all housed in mid-generation blue label PCGS holders with a common numeric grade of MS65 and CAC green labels. The four 1920 pieces are consistently well-struck, with minimally disturbed, satiny luster; two of the coins exhibit pale lavender-gold toning, while the other two show shades of the same accompanied by deep russet around the peripheries. The 1921 example is similar in strike and appearance to the four 1920 coins, but shows uniform olive-gold patina. (Total: 5 coins) NGC ID# 28LC, PCGS# 9359

- 4373 (10) 1936 Rhode Island MS65 PCGS. CAC.** All 10 coins are housed in PCGS holders with a common numeric grade of MS65 and a CAC green label indicating high quality within the grade. One piece resides in an old green label holder, while the other nine are encapsulated in mid-generation blue label slabs. Bright, satiny luster is the hallmark of each piece, although sharp design definition is also a pleasing attribute. Most of the coins show pale golden and champagne hues, although a few pieces also exhibit deeper lavender overtones. (Total: 10 coins) NGC ID# 28LE, PCGS# 9363

- 4374 (5) 1937 Roanoke MS66 PCGS. CAC.** All five Roanoke commemorative halves are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels calling attention to their outstanding quality of strike and preservation. The coins are uniformly tinted with a light golden hue, and display frosty luster that is largely uninterrupted by abrasions or handling marks. A well-matched, high-quality group of coins representing this popular commemorative half issue. (Total: 5 coins) NGC ID# 28LH, PCGS# 9367

- 4375 (5) 1936 Robinson MS65 PCGS. CAC.** Each Arkansas Centennial half is housed in a mid-generation blue label PCGS holder with a numeric grade of MS65 and a CAC green label. Senator Robinson's hair and the eagle's feathers are well-defined on each piece, and satiny luster is only minimally disturbed on the high points of the portrait. All five examples show shades of pale lavender, ice-blue, and olive-gold toning, but with the latter color most prominent on two coins and the former two shades seen primarily on the remaining three pieces. (Total: 5 coins) NGC ID# 28LJ, PCGS# 9369

- 4376 (10) 1936-D San Diego MS65 PCGS. CAC.** This glittering group of coins resides in ten individual mid-generation blue label PCGS holders with a common numeric grade of MS65 and a CAC green label showcasing the outstanding eye appeal and technical quality. Each piece is awash in thickly frosted, vibrant luster and exhibits just a hint of light golden color, save for one example which shows faintly peppered russet toning, as well. Striking quality is pleasing across the board, and the only notable abrasions are consistently on the highest points of the devices, as if caused by coin-to-coin stacking. Nine of the coins are rotated a trifle counter-clockwise on the reverse, while the tenth piece is perfectly aligned. (Total: 10 coins) NGC ID# 28LL, PCGS# 9372

- 4377 1926 Sesquicentennial MS65 NGC.** Struck to celebrate the 150th anniversary of the signing of the Declaration of Independence, this Gem Sesquicentennial half dollar displays mottled olive-gold toning over satiny, minimally disturbed surfaces. The finer details of the design are sharp, and the visual appeal is pleasing. Only 20 coins are numerically finer at NGC (1/15). NGC ID# 28LM, PCGS# 9374

- 4378 1926 Sesquicentennial MS65 PCGS.** Dusky grayish-brown color with hints of iridescent toning. This is a sharply struck example with pristine surfaces beneath the toning. Careful study reveals underlying satiny luster. NGC ID# 28LM, PCGS# 9374

- 4379 1926 Sesquicentennial MS65 NGC.** A lustrous lilac-gray example with a freckling of green-gold and orange toning advancing toward the margins. This issue's shallow relief and exposed design helps contribute to its difficulty as a Gem. NGC ID# 28LM, PCGS# 9374
- 4380 1935 Spanish Trail MS65 PCGS.** This attractive Gem displays vibrant luster and well-struck design features. Were it not for a couple of minute marks on either side of the steer's head and in the Texas panhandle this piece may have claims to Premium Gem status. Nevertheless, this is a very pleasing specimen for the aficionado of classic commemorative coins. NGC ID# 28LN, PCGS# 9376
- 4381 1935 Spanish Trail MS65 PCGS. CAC.** Powder-blue, olive-green, and wheat-gold toning adorns this lustrous and boldly struck Gem. Marks are limited to the lower tip of Florida and the field beneath the right (facing) horn. A low mintage type. Certified in an old green label holder.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2411, which realized \$1,610. NGC ID# 28LN, PCGS# 9376
- 4382 1935 Spanish Trail MS65 PCGS. CAC.** The well-preserved surfaces of this delightful Gem display delicate shades of golden-tan and lavender-gray toning, with frosty mint luster and sharply detailed design elements underneath. NGC ID# 28LN, PCGS# 9376
- 4383 1935 Spanish Trail MS66+ NGC. CAC.** A high-end Premium Gem example of this popular silver commemorative, with sharply detailed design elements and vibrant mint luster under delicate shades of pale gold toning. NGC ID# 28LN, PCGS# 9376
- 4384 1935 Spanish Trail MS67 PCGS.** The Old Spanish Trail commemorative half dollar is a popular issue, boasting a minimal distribution of just 10,000 coins (plus eight pieces for assay purposes). MS67 examples are scarce, and anything finer is a major condition rarity. This representative displays satiny, light golden luster, with sharply impressed design elements. Only two coins are numerically finer at PCGS (1/15). NGC ID# 28LN, PCGS# 9376
- 4385 1935 Spanish Trail MS67 PCGS.** Unusually vibrant mint luster resides beneath blended shades of orange-gold, lavender, and olive-gray toning, while the underlying surfaces are devoid of contact marks. The Old Spanish Trail half dollars are only marginally available in this grade, and finer pieces are prohibitively rare, with only two so-graded examples at PCGS (1/15). NGC ID# 28LN, PCGS# 9376
- 4386 (10) 1925 Stone Mountain MS65 PCGS. CAC.** All 10 Stone Mountain Memorial halves are certified in mid-generation blue label PCGS holders with a common numeric grade of MS65 and CAC green labels confirming excellent technical quality. The striking sharpness is pleasing on each piece, and close examination reveals few disruptions in the coins' satiny luster. A blush of pale champagne toning is the norm, although a few pieces show deeper olive-gold hues and one coin exhibits a few amber-red tinges near the borders. (Total: 10 coins) NGC ID# 26H8, PCGS# 9378
- 4387 1937-S Texas MS67+ NGC.** Most Texas half dollars show blending on the knee of the Winged Victory, but the present Superb Gem has nearly a full strike. The margins exhibit glimpses of fire-red and jade-green toning but the remainder of the coin shows only faint ice-blue and straw-gold iridescence. NGC ID# 28LZ, PCGS# 9392
- 4388 1937-S Texas MS67+ NGC. CAC.** Only 6,637 Texas half dollars were struck at the San Francisco Mint in 1937. This high-end Superb Gem features sharply detailed design elements and vibrant mint luster, with accents of champagne-gold toning. Eye appeal is outstanding. NGC has certified only five numerically finer examples (8/13). NGC ID# 28LZ, PCGS# 9392
- 4389 1927 Vermont MS66+ PCGS.** This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster on both sides, under delicate shades of greenish-gold and lavender toning. No mentionable distractions are evident and eye appeal is terrific. NGC ID# 28M6, PCGS# 9401
- 4390 1947-S Booker T. Washington MS67 PCGS Secure. CAC.** The 1947-S Booker T. Washington half dollar is one of the more conditionally challenging issues in the six-year production run of the type; it is decidedly rare at the MS67 grade level, and none have been certified numerically finer. This satiny representative displays sharp motifs and nearly flawless surfaces. Splashes of olive, gold, and amber-red toning encompass much of the obverse margins, while the reverse shows just a blush of pale olive-gold color. Population: 16 in 67, 0 finer (1/15). NGC ID# 28MC, PCGS# 9410
- 4391 1949 Booker T. Washington MS67 PCGS. CAC.** From a small distribution of 6,000 pieces (plus four coins for assay purposes), the 1949 Booker T. Washington commemorative half dollar is seldom encountered in Superb Gem condition. This sharply detailed MS67 example displays vibrant mint luster and sharply detailed design elements, with a few wisps of pale gold and pink toning. Population: 21 in 67, 0 finer (1/15). NGC ID# 28MG, PCGS# 9416
- 4392 1949-D Booker T. Washington MS67 PCGS. CAC.** Well struck and fully brilliant, with great satiny mint luster and clean, seemingly flawless surfaces. A beautiful, Superb example of this Denver Mint Booker T. Washington half dollar. Population: 36 in 67 (3 in 67+), 0 finer (1/15). NGC ID# 28MH, PCGS# 9417
- 4393 1950-D Booker T. Washington MS67 PCGS. CAC.** Gleaming silver-white surfaces provide this piece with immediate eye appeal. Closer examination reveals scattered areas of light toning, in shades of pale orange, with a few yellow, red, and olive-green splashes at the right reverse periphery. The signs of contact are minuscule. Population: 14 in 67, 0 finer (1/15). NGC ID# 28ML, PCGS# 9421
- 4394 1951 Booker T. Washington MS67 PCGS. CAC.** An unusually sharp strike and a colorful, naturally acquired patina set this final-year Booker T. Washington half apart from other examples. The often-seen marks from careless Mint handling and planchet nicks are few, and bold mint luster radiates beneath the attractive coloration. Iridescent shades of blue, forest-green, russet, and reddish-gold cover both sides. Population: 13 in 67 (2 in 67+), 0 finer (1/15). NGC ID# 28MN, PCGS# 9424
- 4395 (5) 1936 Wisconsin MS66 PCGS. CAC.** All five Wisconsin Territorial Centennial half dollars are individually housed in mid-generation blue label PCGS holders with a common numeric grade of MS66 and CAC green labels indicating confirmed Premium Gem quality. Each piece is boldly struck, with largely unblemished, satiny luster that yields just a blush of light golden color overall. (Total: 5 coins) NGC ID# 28N6, PCGS# 9447
- 4396 1936 Wisconsin MS68 PCGS.** Not surprisingly at this grade level, this coin displays exceptional visual appeal. Although the obverse is the side with the badger, these coins are dated on the reverse and are encapsulated displaying that side. This MS68 specimen exhibits pale pearl hues overall, with areas of iridescent blue-green and lavender present along with splashes of golden brown. Population: 31 in 68 (4 in 68+), 0 finer (1/15). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

1903 Louisiana Purchase, Jefferson Gold Dollar Lustrous, Eye-Appealing Superb Gem

- 4397 1903 Louisiana Purchase, Jefferson, MS67 PCGS.** A small distribution of just 17,500 pieces with the Thomas Jefferson portrait accompanied a like distribution of the William McKinley version of the Louisiana Purchase Exposition gold dollars in 1903. The Jefferson variety is virtually unavailable any finer than this lustrous, Superb Gem example. The strike is bold everywhere except a small area of weak denticles on the reverse — a normal characteristic of the type. Vibrant, sun-gold surfaces. Population: 93 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 26HA, PCGS# 7443

- 4398 1903 Louisiana Purchase, McKinley, MS67 NGC.** Numismatic entrepreneur and promoter Farran Zerbe sold thousands of Louisiana Purchase gold dollars to B. Max Mehl, the legendary Fort Worth, Texas coin dealer. The surfaces are expectedly pristine and free of distractions, with beautiful green-gold patina. A tiny copper-colored alloy spot is seen at the base of the first T in STATES and there is a die crack from the rim near the first S in ST. LOUIS. Ex: *FUN Signature* (Heritage, 1/2007), lot 7891; *Central States Signature* (Heritage, 5/2007), lot 5414; *FUN* (Heritage, 1/2010), lot 3282. NGC ID# 26HB, PCGS# 7444

- 4399 1904 Lewis and Clark MS64 PCGS.** Semiprooflike fields exhibit deep apricot-gold color on each side of this well-struck Lewis and Clark Centennial Exposition gold dollar. Some minor abrasions limit the grade, but are not detracting to the naked eye. NGC ID# 26HC, PCGS# 7447

- 4400 1905 Lewis and Clark MS64 PCGS.** This is a well-struck and minimally abraded example of the second Lewis and Clark gold dollar issue, struck in conjunction with the Lewis and Clark Centennial Exposition held in Portland, Oregon in 1905. Vivid lemon-gold color encompasses both sides. NGC ID# 26HD, PCGS# 7448

- 4401 1916 McKinley MS65 PCGS.** The vivid orange-gold surfaces of this attractive Gem show a few highlights of lilac, with vibrant mint luster and well-detailed design elements. Housed in a green label holder. NGC ID# 26HF, PCGS# 7454

- 4402 1916 McKinley MS67 PCGS.** The 1916 McKinley commemorative gold dollar is readily available through the Premium Gem grade level, though the population drops significantly in MS67, and higher-grade examples are virtually unobtainable. Soft yellow-gold patina displays hints of pale apricot over each side of this well-struck example, and both sides exhibit slight field-motif contrast, though it is more obvious on the reverse. Population: 87 in 67 (1 in 67+), 0 finer (1/15). NGC ID# 26HF, PCGS# 7454

- 4403 1922 Grant No Star MS64 PCGS.** A lovely Choice example of the No Star Grant Memorial gold dollar issue, this well-struck piece displays uniformly well-preserved surfaces, with rich apricot-gold color that is accented with tinges of lilac in the recesses. Housed in an old green label holder. NGC ID# 26HJ, PCGS# 7458

1922 No Star Grant Memorial Gold Dollar Razor-Sharp MS66+

- 4404 1922 Grant No Star MS66+ PCGS. CAC.** With a limited distribution of only 5,000 coins, the No Star Grant Memorial Gold dollar is understandably elusive in Premium Gem and finer condition. This Plus-graded example boasts razor-sharp definition and frosty lemon-gold luster. Close examination fails to reveal any discernable signs of contact, making this piece seem upper-end for the grade. NGC ID# 26HJ, PCGS# 7458

1922 No Star Grant Memorial Gold Dollar Glowing Superb Gem

- 4405 1922 Grant No Star MS67 PCGS. CAC.** For the classic commemorative type collector, an MS67 example of the No Star Grant Memorial gold dollar is virtually as fine as is obtainable. This well-struck example is beautifully preserved, as is expected for the lofty grade level, and displays rich apricot-gold luster. None are certified numerically finer at PCGS (1/15). NGC ID# 26HJ, PCGS# 7458

- 4406 1922 Grant With Star MS65 PCGS. CAC.** A satiny, well-struck example, this Gem With Star Grant Memorial gold dollar glows with uninhibited orange-gold mint luster. A highly appealing alternative to its higher-priced Premium Gem counterparts, with arguably equal eye appeal. NGC ID# 26HH, PCGS# 7459

MODERN ISSUES

- 4407 1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** A lack of collector interest in 1997 resulted in the Jackie Robinson gold five dollar piece's stunted 5,174-coin mintage. Not surprisingly, times have changed and this issue is now one of the most sought-after modern commemoratives. This representative is sharply defined, with frosty yellow-gold surfaces and seemingly perfect preservation. NGC ID# 28UG, PCGS# 9759

- 4408 1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** The Jackie Robinson gold five dollar piece's ranking at number five in Scott Schechter and Jeff Garrett's *100 Greatest U.S. Modern Coins* is fully deserved considering the coin's status as the lowest-mintage modern commemorative ever issued (just 5,174 pieces). This example is boldly struck, with fresh mint luster and nearly perfect surfaces. NGC ID# 28UG, PCGS# 9759

**1997-W Jackie Robinson Five Dollar, MS70
Key Modern Commemorative**

- 4409** 1997-W Jackie Robinson Gold Five Dollar MS70 PCGS. This is a technically perfect example of this key modern gold commemorative issue. The strike is bold and the surfaces displays fresh, frosty mint luster. Limited collector interest at the time of issue resulted in the Jackie Robinson gold five dollar's scant mintage of only 5,174 business strikes, which is largely what makes it such a sought-after piece by present-day modern commemorative collectors. Population: 54 in 70 (1/15). NGC ID# 28UG, PCGS# 9759

MODERN BULLION COINS

**1994 Quarter-Ounce Gold Eagle, MS70
One of Only Five for the Grade at PCGS**

- 4410** 1994 Quarter-Ounce Gold Eagle MS70 PCGS. The quality of strike and preservation on this 1994 quarter-ounce bullion coin is simply superb, showcasing fresh golden luster and full detail. From a mintage of 72,650 coins, this is one of only five examples to receive the perfect MS70 numerical grade from PCGS (1/15). NGC ID# 26MA, PCGS# 9880

**1995-W Silver Eagle, PR69 Deep Cameo
Near-Flawless Series Key**

- 4411** 1995-W Silver Eagle PR69 Deep Cameo PCGS. Without doubt the most significant date and mint of the series, and a stunning example for the advanced Silver Eagle collector. Just 30,125 pieces were produced, and while PCGS has certified 60 examples in PR70 (1/15), in truth very little separates this brilliant, near-flawless coin from perfection except the price. NGC ID# 28WZ, PCGS# 9887

- 4412** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. Although the 1999-W gold coins were intended to be struck in proof format, some coins were struck from unfinished dies, resulting in Mint State specimens with satiny luster like the present coin. This fully struck, brightly lustrous example is one tick away from technical perfection. NGC ID# 26MG, PCGS# 99942

- 4413** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. This virtually perfect quarter-ounce Gold Eagle was mistakenly struck with unfinished dies (all the 1999-W gold coins were supposed to be struck in proof format), resulting in a coin with satiny lustrous surfaces and fully detailed design elements. PCGS has graded one numerically finer example (1/15). NGC ID# 26MG, PCGS# 99942

TERRITORIAL GOLD

**C. Bechtler Five, XF Sharpness
K-20, 134 G., Star**

- 4414** (1837-42) C. Bechtler Five Dollar, 134 G, With Star — Plugged —NCS. XF Details. K-20, R.4. A plug is apparent near the RA in CARATS and opposite near the A in AT. The caramel-gold surfaces are moderately granular and faintly hairlined. Evenly defined and without any mentionable abrasions. A scarce Bechtler denomination. Listed on page 382 of the 2015 *Guide Book*. From The Collection of Philip M. Peterson. PCGS# 10097

**A. Bechtler Dollar, K-24, AU58
27G. 21C. Variety, Uncommon Eye Appeal**

- 4415** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU58 PCGS. CAC. K-24, R.3. The K-24 A. Bechtler gold dollars were struck during the period from roughly 1842 to 1850, predating by several years the U.S. Mint's entree into the denomination, which would not come until 1849. The K-24 Bechtler dollars are the most common issue of all the Bechtler gold pieces. What is uncommon, however, is the exceptional eye appeal of this near-Mint State example, showing only a few thin marks and beautiful wheat-gold color. The CAC green approval sticker provides further validation. Listed on page 382 of the 2015 *Guide Book*. Population: 45 in 58, 32 finer (1/15). PCGS# 10040

1853 Assay Office Twenty, AU Details
900 Thous., K-18

- 4416** 1853 Assay Office Twenty Dollar, 900 Thous. — Damaged, Cleaned — ANACS. AU50 Details. K-18, R.2. This pioneer gold type coin displays unbroken luster on the reverse. The obverse is lustrous aside from the open field. A bit bright from a wipe, and the obverse rim and the area above the eagle have been smoothed. A thin mark is noted near the E in AMERICA and the reverse has an edge knock at 1:30. Listed on page 388 of the 2015 *Guide Book*. Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 3536. From The Collection of Philip M. Peterson. PCGS# 10013

S.S.C.A. RELIC GOLD MEDALS

‘1855 Kellogg Fifty Dollar’ 2001 Relic Medal
Made from S.S.C.A. Gold Ingots

- 4417** 1855 SSCA Relic Gold Medal “1855 Kellogg & Co. Fifty” Gem Proof PCGS. Struck on September 12, 2001, with a proof mintage for that date of 587 pieces. Contains 1309 grains of 887 Fine gold, obtained from melted-down Kellogg & Humbert ingots recovered circa-1988 from the S.S. *Central America* shipwreck. Precisely struck and unmarked with outstanding cameo contrast. One pinpoint spot noted near the inner point of star 13. From The Collection of Philip M. Peterson. PCGS# 10358

Restrike 1855 Kellogg & Co. Fifty Dollar
Gem Proof, Struck in 2001

- 4418** 1855 SSCA Relic Gold Medal “1855 Kellogg & Co. Fifty” Gem Proof PCGS. Struck on September 10, 2001, one of 153 proofs coined on that date. A relic medal struck from 1309 grains of 887 Fine gold, as obtained from melted unsold Kellogg & Humbert bars recovered from the S.S. *Central America*. The present piece is pristine except for a tiny alloy spot on the left obverse field. From The Collection of Philip M. Peterson. PCGS# 10358

2009 Humbert Fifty Dollar Commemorative
Gem Proof Ultra Cameo

- 4419** 2009 “Humbert Commemorative” Gem Proof Ultra Cameo NGC. A private issue struck from “Pure California Gold” and modeled after the Kagit-11 1852 Humbert slugs from the California Gold Rush. The reverse design reads HUMBERT GOLD INGOT / COMMEMORATIVE 2009 / PURE CALIFORNIA GOLD / 2.5 OZ TROY 999.9 FINE. This is a clean example with razor-sharp detail and attractive Ultra Cameo contrast.

CALIFORNIA FRACTIONAL GOLD

- 4420** 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS66 PCGS. A beautiful high grade type representative of the Frontier, Deviercy & Co. maker. The canary-gold surfaces are lustrous and undisturbed. Moderately wavy, as made. A later die state than the Roe plate coin, with minor crumbling noted on the wreath and stars. Population: 22 in 66, 4 finer (1/15). PCGS# 10544

1871 Octagonal Liberty Quarter, MS65
Very Rare BG-720

- 4421** 1871 Liberty Octagonal 25 Cents, BG-720, R.7, MS65 NGC. A “Scarface” variety with three intersecting die cracks on the portrait. A splendid apricot-gold Gem whose smooth, flashy fields and even strike ensure excellent eye appeal. Frontier & Co. struck nine different 1871-date varieties but only BG-714 and BG-717 are close to common. NGC has yet to certify any examples of BG-720 as Prooflike or Deep Prooflike. Census: 4 in 65, 1 finer (1/15). PCGS# 10547

- 4422** 1881 Indian Octagonal 25 Cents, BG-799BB, High R.6, MS64 PCGS. This rare die variety was first reported in Kenneth W. Lee’s 1970 published study of the series. Most if not all examples are clashed, including the present coin. A lemon-gold near-Gem with attractive surfaces and minor incompleteness of strike at the margins. Tied with three others as finest certified. Population: 4 in 64, 0 finer (1/15). PCGS# 10654

PATTERNS

1867 Five Cent Pattern Judd-566, PR65 Cameo

- 4423** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 Cameo PCGS. The obverse features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. Struck in nickel with a plain edge. One of many similar five cent patterns of the year based on the contemporary three cent nickel design, Judd-566 features CENTS in straight rather than curved letters, and Liberty's coronet does not have a star. Brilliant throughout, the striated fields give this pattern a deep reflectivity that sets off the lightly frosted devices with a mild cameo contrast. A delightful example of this popular design. Ex: Western Hills Collection (Heritage, 6/2005), lot 7399; Long Beach Signature (Heritage, 9/2008), lot 3437. PCGS# 60776

1867 Five Cents, Judd-566, PR66 Among the Finest Certified

- 4424** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR66 NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. Moderately reflective fields complement well-struck design elements on this early nickel pattern, with faintly iridescent silver-gray color over both sides and overall excellent preservation. PCGS# 60776

1870 Standard Silver Ten Cent, PR62 Judd-841, Rarely Seen Pattern

- 4425** 1870 Standard Silver Ten Cents, Judd-841, Pollock-933, High R.7, PR62 PCGS. A capped bust of Liberty faces right with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. On the reverse 10 CENTS and 1870 are within a wreath of cotton and corn with STANDARD above. Struck in aluminum with a reeded edge. A sharply struck and unabraded specimen with a pleasing reverse and a blush of gray verdigris on the cap and near UNITED STATES. Ex: ANA Signature (Heritage, 8/2008), lot 2736. PCGS# 61085

1870 Standard Silver Half Dollar, PR65 Judd-952, Beautifully Toned

- 4426** 1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR65 PCGS. CAC. The obverse shows a bust right of Liberty. She wears a diadem inscribed LIBERTY, with the hair tied in a bun. The peripheral legends include UNITED STATES OF AMERICA and IN GOD WE TRUST, the latter within a scroll. The reverse displays 50 CENTS and the date 1870 within a wreath of cotton and corn. STANDARD is centered on the upper border. Struck in silver with a plain edge. The surfaces are beautifully toned in shades of golden and lilac with bright underlying mirrors in the fields. PCGS# 61198

1879 Metric Dollar in Silver Judd-1618, PR58

- 4427** 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR58 NGC. William Barber's Metric Dollar with Liberty wearing a coronet with a border of pearls. The reverse is quite elaborate with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in silver with a reeded edge. The surfaces are mostly brilliant and significant portions of reflectivity can still be seen in the fields. This is quite a pleasing pattern for the collector who is budget-minded. PCGS# 61996

1884 'Holey' Cent Pattern in Nickel
Judd-1721, PR65

- 4428 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR65 PCGS. CAC. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. The surfaces appear original and untampered with a medium density gray patina that covers each side. PCGS# 62150

1942 Pattern Cent, Unc Details
Judd-2060, Brown Plastic

- 4429 1942 Cent, Judd-2060, Pollock-4035, Low R.7 — Broken — PCGS Genuine. Unc Details. World War II demand for copper forced the Mint to find an emergency substitute alloy for the cent, an effort that led to the 1943-dated zinc-plated steel cents. The present pattern is struck in brown plastic with a plain edge. The obverse motif is taken from the KM-198 Columbia two centavos, and the reverse shows the wreath from a Baker-155 Washington medalet. Burdette's third reverse, shown on page 18 of his reference to the series. The glossy surfaces are as made except that the piece is broken in two pieces just below MINT.

SO-CALLED DOLLARS

1826 Erie Canal Medal
White Metal, HK-1
In Original Wooden Box

- 4430 1826 Erie Canal Completion Medal in Original Wooden Box. HK-1, R.6. White metal, 44.4 mm. The medal is unworn and free any from visible marks, but portions are oxidized charcoal-gray. The front half of the box has a minor crack repaired with a short strip of modern translucent tape. The reverse of the wooden box exhibits the inked name (possibly a Mr. Knaulan) of the original recipient. The first variety in the Hibler-Kappen reference, and rarely encountered with its original box.

1905 Denver Mint Opening Medal
MS65 Red and Brown, HK-876

- 4431 1905 Denver Mint Opening Medal MS65 Red and Brown PCGS. HK-876, R.6. Bronze, 35 mm. The Hibler-Kappen Second Edition notes that HK-876 "was the first product of the Denver Mint, struck in 1905 to test new machinery, and, some belief, new dies for a \$20 gold piece. ... Issued as a souvenir at official opening ceremonies of the Mint in early 1906. ... Unobtainable at the Mint following the ceremonies and 'decidedly scarce' in Denver." This Gem is likely among the finest survivors. As of (1/15), PCGS lists just one finer (as MS65 Red), while NGC shows one as MS65 Red and Brown with none finer.

EXPOSITIONS AND FAIRS

- 4432 1914 Idaho Gold (One) MS64 NGC.** A staple of the M.E. Hart "Coins of the Golden West" set, the Idaho gold tokens were part of a state series that also included similar Montana, Oregon, and Washington varieties. All four states were struck sans denomination in three sizes that correspond to California fractional gold quarters, half dollars, and dollars. The present honey-gold token is sharply struck and displays clash marks (as made) near the forehead. PCGS# 661060
- 4433 1915 Round Minerva, Bear, 1/2 California Gold, MS66 NGC.** 0.45 gm. Part of the M.E. Hart "Coins of the Golden West" series. The tokens in the series were sold by the M.E. Hart Co. of San Francisco during the 1915 Panama-Pacific Exposition and the subsequent year. The present example is essentially as made aside from a hint of olive-green and apricot toning.

GSA DOLLARS

- 4434 1884-CC MS66 NGC.** Traces of pastel color grace the obverse of this frosty Carson City dollar, while the reverse remains brilliant. The design elements are well-struck and a few small ticks on Liberty's cheek are all that preclude an even finer grade. Housed in its original GSA hard plastic holder. PCGS# 518872 Base PCGS# 407152
- 4435 1885-CC MS65+ NGC.** A virtually brilliant Gem of the popular low mintage Carson City issue. Lustrous and crisply struck with nearly pristine fields and only delicate contact on the portrait. No box or certificate accompanies the lot. PCGS# 407160 Base PCGS# 7160

REDFIELD DOLLAR

- 4436 1892-CC Morgan Dollar MS60 Paramount. VAM-8A.** Ex: Redfield Collection. In our opinion, this Carson City dollar grades MS62. Golden-brown toning is chiefly confined to the reverse periphery. The fields are smooth and the cheek displays shallow marks. An interesting VAM with a clashed N from IN near Liberty's neck, and a break within the 2 in the date. NGC ID# 255M, PCGS# 7214

MINT SET

- 4437 Uncertified 1948 Double Mint Set.** An original double mint set housed in the cardboard holders of issue. The outer mailing envelope is absent. The silver coins are minimally toned. The nickels exhibit medium golden patina. The cents are red except for the two 1948-S examples, which display deeply iridescent cobalt-blue toning. The coins grade between MS63 and MS65. The Denver half dollars grade MS63, and the Philly halves grade MS64 to MS65. No 1948-S half dollars were struck. (Total: 28 coins)

End of Session Three

MyRECOMMENDATIONS

ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, **MyRecommendations** looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available – even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at HA.com/Coin.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone
Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10	\$1
\$10 - \$49	\$2
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$499	\$20
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$4,999	\$200
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE

WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1,500, and there is no sales tax on coins in Texas.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

Terms and Conditions of Auction

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, those of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not

be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foosse 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 10-6-2014

Agent Shipping Release Authorization form

Heritage Auction Galleries requires "Third Party Shipping" for certain items in this auction not picked up in person by the buyer. It shall be the responsibility of the successful bidder to arrange pick up and shipping through a third party; as to such items auctioneer shall have no liability.

Steps to follow:

1. Select a shipping company from the list below or a company of your choosing which will remain on file and in effect until you advise otherwise in writing.
2. Complete, sign, and return an Agent Shipping Release Authorization form to Heritage (this form will automatically be emailed to you along with your winning bid(s) notice or may be obtained by calling Client Services at 866-835-3243). The completed form may be faxed to 214-409-1425.
3. Heritage Auctions' shipping department will coordinate with the shipping company you have selected to pick up your purchases.

Shippers that Heritage has used are listed below. However, you are not obligated to choose from the following and may provide Heritage with information of your preferred shipper.

Navis Pack & Ship
11009 Shady Trail
Dallas, TX 75229
Ph: 972-870-1212
Fax: 214-409-9001

Craters & Freighters
2220 Merritt Drive, Suite 200
Garland, TX 75041
Ph: 972-840-8147
Fax: 214-780-5674
dallas@cratersandfreighters.com

- It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.
